Williams' "Superrench"
(Chrome-Molybdenum)

General Service Wrench
22½° Angle, Double Head
Long and Light

Due to the use of Chrome-Molybdenum steel, these "Superrenches" provide a great increase in strength and toughness over the carbon steel wrench of corresponding size. They are long, light and efficient

These wrenches will strip the thread of any standard nut, or break the bolt before spreading the jaws. Guaranteed against breakage.

Furnished heat-treated, Chrome-finished, with heads bright.

Supplied to dealers in two assortments, mounted on special Silent Salesman display boards.

Every "Superrench" is Guaranteed Against Breakage

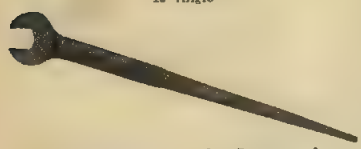
Williams' Drop Forged Steel Wrenches

Construction Wrenches
15° Angle



Redesigned and lengthened. Jaws are long and narrow, providing full bearing on square nuts.

The long handle is round for the greater part of its length, with tapered end for easy insertion into bolt holes. When bringing these into line, the handle enters such holes nearly to its flat portion; only enough of the head-end projects for proper leverage.

Unhardened are milled only.

Hardened are milled, hardened all over; heads not ground.

No.	For U. S. Standard Nut; Size Bolt	Opening Milled	Extreme Length	Thickness Head	PRICE Unhardened	PRICE Hardened

Adjustable Hook Spanners

P'atented in U. S. A.

This Spanner is a combination of strength and ready adjustment and each tool provides for service upon a number of dimensions.

They are drop-forged from a strong, tough grade of carefully selected steel.

Finished have surface and edges smoothed and are black enameled (baked on); the jaws are hardened and tempered.

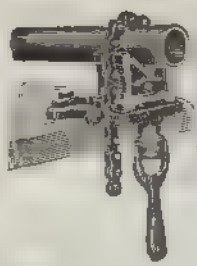
PIPE VISES

VULCAN



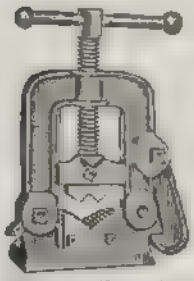
Wrought steel base plate and adjusting handle, natural finish. Polished steel screw; drop forged steel jaws, tempered for re-filling. Steel link, hand made chain, fits inside of base plate and is adjustable. For use on either bench or post.

Each

No. 1—For ⅛ to 2 in. pipe. Has extended tooth, prevents bending of small size pipes, tubes and bars. Size when folded 4x5x6 ins; wt each 4 lbs $10 50

No. 2—For ¼ to 4 in. pipe. Size when folded 6x8x8 ins; wt each about 5 lbs 22 50

One in box.



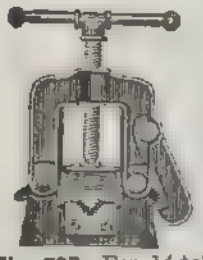
SELF-LOCKING

Malleable iron frame and base, black japanned finish; 5½ inch natural finish steel sliding handle; polished steel screw. The jaws are properly designed and made from special vise jaw steel hardened and tempered. Hinged joint on one side to open vise. Screw holes in base for fastening to bench.

Each

No. 00—For ⅛ to 1¼ in pipe; height overall 7 ins; base 4x3¼ ins $4 80

Packed loose; wt each 3¼ lbs.



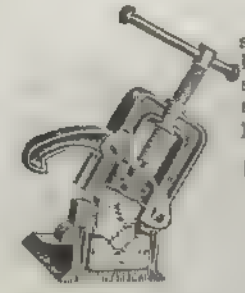
Self Locking.

Malleable iron frame and base, japanned; 10 inch natural finish steel sliding handle; polished steel screw. Jaws milled from solid tool steel bar, hardened and tempered in oil; two stationary lower jaws and one movable upper jaw fastened with two steel bolts in each jaw. Hinged joint and self locking; holds pipe rigid when closed and set; having lugs on both uprights, permits latch being used on either side.

Each

No. 72P—For ⅛ to 3½ in. pipe; height over all 13 ins; size base 8x6 ins $14 25

Packed loose; wt each 15 lbs.



Malleable iron, japanned. Polished steel sliding handle and screw; cut and hardened steel jaws. Holes in base to screw to bench; hinged joint on one side to open vise; self locking, holds pipe rigid when closed and set.

Each

No. 70P—For ⅛ to 2 in. pipe. Height over all 11 ins; size of base 5x4½ ins $6 75

Packed loose; wt each about 7 lbs.

VISE STANDS

HANDY-ANDY

One piece strong malleable iron casting top, leg braces, pipe rest, bending block and leg attachments; slotted openings in top will accomodate all makes of hinged and chain pipe vises without drilling; bolts, nuts and washers are furnished to fasten vise. Bending block is arranged to bend up to and including ¾ inch pipe. Openings for holding stocks and wrenches are provided.

Legs are of 1⅝ rail steel tubing, on the ends of which malleable iron fittings and feet are securely riveted, malleable feet have short spurs to prevent sliding, also holes to permanently fasten to floor.

Each

No. 2—Height 36 ins $45 00

Wt each 32 lbs.

COMBINATION VISES

DIAMOND, Anvil and Vise.

Cast iron body, painted green blued steel handle and screw. Hardened iron polished faced jaws, small jaw can be set at any position.

Each

No. 850—Size jaws 4x1⅝ ins; face of anvil 4x7 ins; jaws open 12 ins; holds pipe up to 2 ins; length over all 17 ins $16 60

One in wood box; wt each about 44 lbs.

FARMERS

Anvil, Vise and Pipe Holder.

Cast iron, japanned; steel screw and sliding lever handle, chill hardened jaws, polished. Pipe holding jaws. For mechanics, farmers, household use, etc.

Each

No. 83—Width jaws 3 ins; jaws open 6 ins; holds ¼ to 2 in. pipe; hardened anvil face 8x3 ins; length over all 16 ins $6 75

One in box; wt about 28 lbs.

ANVILS

—BELKNAP'S WROUGHT—

Belknap's wrought anvils are made from American wrought iron, welded at the waist, making a solid forging to which is welded a solid plate of highest quality crucible steel making a perfect weld.

GUARANTEE—Should a Belknap's Wrought Anvil break at the waist or its steel face become loose within one year from date of purchase it will be replaced without charge.

CAUTION—Tempered in a manner to suit the majority of smiths. No claim for defective temper will be allowed. To remedy trouble caused by the unfair advantage taken of the liberal guarantee heretofore made by manufacturers of wrought anvils, they have decided to qualify the guarantee as above, and all anvils are now sold with no guarantee other than as above.

Shoer's.

Made especially for us under our own brand. They are warranted equal to the very best English wrought anvils.

Crucible cast steel, full polished; tempered jaws; heavy steel rivet.

Nos.	24B	24A	24
Length, ins	10	12	14
Wt per doz, lbs	12	20	30
Per Doz	$53 25	66 75	80 25

Half doz in cardboard box.

HOOF PARERS

—PINE KNOT—

Crucible cast steel, tempered; black finish handles; polished jaws; heavy steel rivet.

Nos.	5012	5014
Length, ins	12	14
Wt per doz, lbs	20	29
Per Doz	$40 50	46 50

Half doz in cardboard box.

HELLER BROS.

Crucible cast steel, tempered; full polished.

Nos.	23A	23
Length, ins	12	14
Wt per doz, lbs	20	29
Per Doz	$66 75	80 25

Half doz in cardboard box.

FARRIERS' KNIVES

—JOHN PRIMBLE—

Crucible cast steel blade, uniformly tempered and polished; 3½ inches long, sharpened ready for use; 4 inch white bone handle.

Nos.	50-⅝	50-¾
Width blade, ins	⅝	¾
Per Doz	$29 25	29 25

Half doz in pkg; wt 2½ lbs.

WOSTENHOLM'S I. X. L.

Bone Handle.

Crucible steel blade, highly tempered, glazed finish, 3½ inches long; solid bone handle, 4 inches long.

Nos.	7834-⅝	7834-¾
Width blade, ins	⅝	¾
Per Doz	$31 50	31 50

One doz in pkg; wt per doz 2½ lbs.

POPE'S

Detachable blade, crucible steel, highly tempered glazed finish, 3½ inches long, japanned iron pierced handle; 4 inches long.

Nos.	1-⅝	1-¾	1-⅞
Width blade, ins	⅝	¾	⅞
Per Doz	$20 25	20 25	20 25

Half doz in cardboard box; wt doz 4½ lbs.

FARRIERS' KNIVES

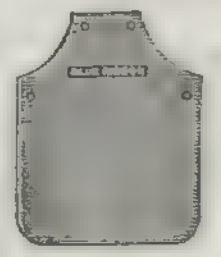
POPE'S FARRIERS' KNIFE BLADES

Crucible steel, highly tempered, glazed finish; 8½ inch cutting edge. For Pope knives.

Nos.	1B-½	1B-⅝	1B-¾
Width, ins	½	⅝	¾
Per Doz	$15 75	15 75	15 75

Three doz in cardboard box; wt per doz about 1 lb.

BLACKSMITH'S APRONS



—BLUE RIBBON—

Per Doz

No. 48—Split leather body, with brass eyelets 34 in. leather strings; size 26x34 ins $105 00

One doz in bdle; wt per doz 18 lbs.

—CYCLONE—

Per Doz

No. 49—Split leather, 26 in. strings; brass eyelets size 24x30 ins $93 00

One doz in bdle; wt per doz 21 lbs.

FORGES

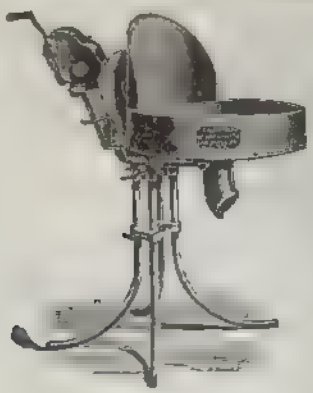
FORGES

CHAMPION

Heavy Pattern. With Shield.



Pressed steel hearth and wind shield; encased fan and gearing four bent tubular steel legs.

High speed Champion spiral gearing, adjustable ball-bearings. Welds 3½ to 4 inch iron. Crank turns either direction.

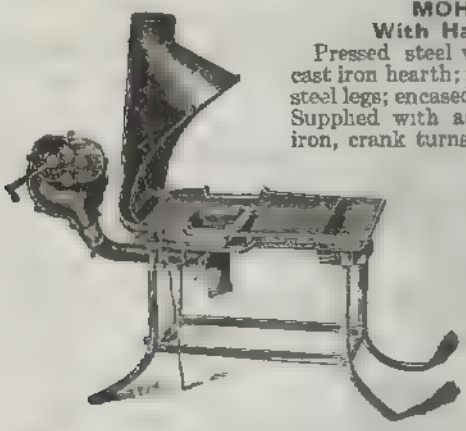
Each

No. 401—Champion Steel Rivet Forge. Hearth 18 ins; height to top of hearth 30 ins, fan 9 ins. ... $78 00

One in crate; wt 125 lbs.

MOHAWK

With Half Hood.



Pressed steel windshield hood; cast iron hearth; four bent tubular steel legs; encased fan and gearing. Supplied with adjustable tuyere iron, crank turns either direction.

Blacksmith's Direct Drive Forge. Hearth 32x45 ins.; fan case 12 inches in diameter, fan wings 9¾ inches in diameter; height to top of hearth 30 ins.

Each

No. 271 ... $82 50

One in crate; wt each 320 lbs.

CHAMPION

With Half Hood.

Note—Hearth should be well clayed before using.

Cast iron hearth; sheet steel hood. Equipped with helical cut gears encased in oil tight, dust-proof, rigid cast iron gear case. The gear ratio gives 48 revolutions of fan to one turn of crank, giving a strong high pressure blast; bent tubular steel legs braced and securely bolted to hearth. Designed for general use and large enough for plow share work. Burns coal, coke or charcoal. Requires 5½ inch stove pipe for indoor use.

Each

No. 243—Hearth 20x36 ins; height 30 ins; diam fan case 9 ins; diam fan wings 8 ins. ... $43 50

Crated; shipping wt each 108 lbs.

With Shield.

Each

No. 147—Hearth 22 ins; height 30 ins; diam fan case 8 ins, diam fan wings 6 ins ... $24 75

Crated; wt each 84 lbs.

FORGES

CHAMPION

Pressed steel hearth. Cut helical gears running smooth and noiseless in a dust-proof, oil tight gear case; bent tubular steel legs braced and securely bolted to hearth with a heavy steel leg socket. Designed for light and medium work on farms and in garages. Fan revolves 48 times to one turn of crank. Burns coal, coke or charcoal.

Note—Hearth should be well clayed before using.

With Shield.

Each

No. 145S—Diameter hearth 18 ins; height 30 ins; diam fan case 8 ins; diam fan wings 6 ins; ratio 48 to 1 ... $17 25

Crated; shipping wt each 53 lbs.

CHAMPION

With Half Hood.

Note—Hearth should be well clayed before using.

Each

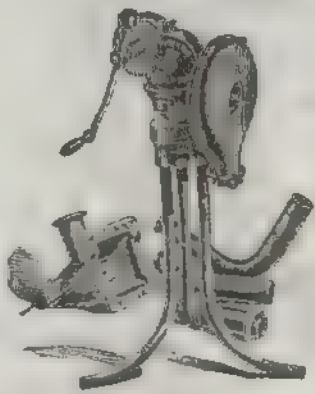
No. 146S—Diameter hearth 18 ins; height 30 ins; diam fan case 8 ins; diam fan wings 6 ins; ratio 48 to 1 ... $19 50

Crated; shipping wt each 52 lbs.

BLOWERS

CHAMPION

Ball-Bearing.



Adjustable fan casing; counter balanced fan crank. Phosphor bronze and tool steel. Adjustable tool steel ball-bearings. Lathe turned cups and cones. Highspeed spiral gearing.

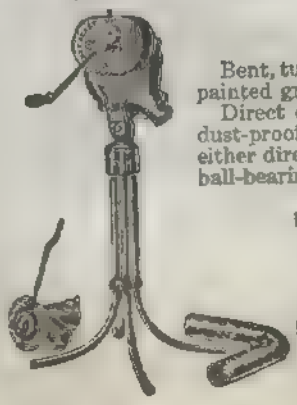
Each

No. 400—Height over all 46 ins; 12 in. fan case; diam fan wings 9⅛ ins; complete with heavy nest whirlwind tuyere iron and piping ... $69 75

No. 400LT—Same as No. 400, except less tuyere ... 66 75

One in crate; wt 156 lbs.

"HOT BLAST"



Bent, tubular steel legs, cast iron gear case, painted green.

Direct drive, cut gears are enclosed in a dust-proof, self-oiling case. Crank turns either direction. Case hardened end thrust ball-bearing, high speed spindle.

Each

No. 60—Height over all 46 ins; diam of fan case 12 ins; diam fan wings 9¾ ins; complete with tuyere iron and pipe ... $35 70

No. 60LT—Same as No. 60, except less tuyere ... 32 70

One in crate; wt each 98 lbs.

BLOWERS

—MOHAWK—

Cast iron base and standard, adjustable fan casing; counter balanced fan crank; height over all 46 inches; diameter base 17 inches. Champion adjustable nozzle tuyere iron.

Case hardened end thrust ball bearing; high speed spindle. Each

No. 40—12 in fan case; diam fan wings 9¾ ins; with tuyere iron and piping complete $42 00

No. 7D—Double; round head, diam 7½ ins; diam hole 3½ ins; length over all 14 ins .. $46 50

Packed loose; wt each 18 lbs.

SUTTON'S BOWL

Each

No. 60—Best Dunbar pig metal, dipped in asphaltum, cast in one piece, bowl 11½x14 ins $16 50

Packed loose; wt each 48 lbs.

NORTON'S

Cast iron, natural finish, bolted together.

Ball Valve, either right or left.

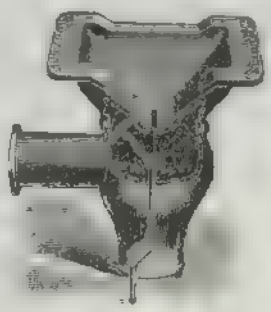
Each

No. 13—Round top; diam 6 ins; 3¼ in. hole; length of neck 6 ins; length of rods 26 ins $7 20

Packed loose; wt each 20 lbs.

CHAMPION "WHIRLWIND"

Anti-Clinker.



Heavy cast iron, japanned finish. Concentrates the blast and heat in the tuyere nest, making hotter fire.

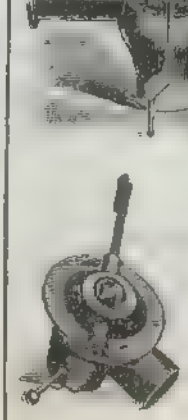
This is the same Tuyere Iron as furnished with No. 400 Champion Blower. Each

No. 400—Depth 5 ins; width 8¾ ins; length 10½ ins; over all 12¾x14¾ ins $26 25

Packed loose; wt each 54 lbs.

CHAMPION

Patent Adjustable Nozzle.



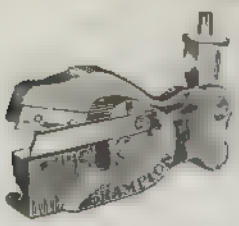
Cast iron, painted red. This is the same Tuyere Iron as furnished with Nos. 40 and 60 Blowers.

Each

No. PA—Diam head 8 ins; 3 in. hole; length of neck 3 ins; length over all 11½ ins $13 50

Packed loose; wt each 17 lbs.

STEEL SHEARS



CHAMPION

Will cut ¾ inch round and 3x ⅜ inch flat steel.

Each

No. 1C—Length 24 ins; height 10 ins..... $72 00

Crated; wt each 150 lbs.

TIRE SHRINKERS

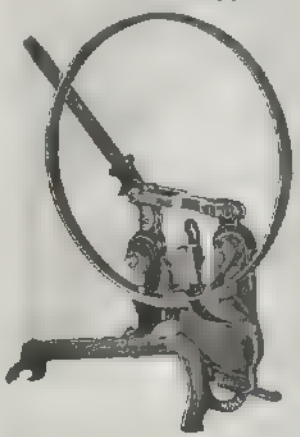
AMERICAN

Hammered tool steel jaws, hardened machine cut teeth. The jaws are worked by a mechanical lever and are thrown in and out instantly by a movement of the hand, which makes a shrinker that can be handled by one man. The tire is gripped on its flat sides, both top and bottom, and the tire is held with a perfect grip until it is shrunk. Will shrink with one stroke of lever 1¼ inches.

Each

No. 4—Will shrink up to 4x1 in. round or square edge tire, and 1¼ in. axles, has two steel jaws 4x2 ins wide, lgth base 28 ins; wth. 16 ins; wt each 342 lbs. $118 50

Shipped knocked down.



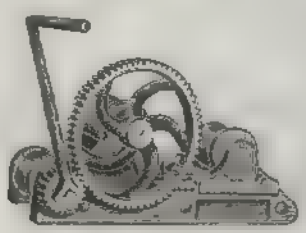
MOLES

With Anti-Kink Attachment.

Painted cast iron frame and bed; cast jaws; plain hardwood handle. The pin holes in the link connecting the jaws are so placed that the pin may be moved into different holes for different thickness of tire.

Nos.	12MK	13MK
For tires up to, ins	½x3	¾x4
Length of base, ins	42	43
Width of base, ins.	24	24
Wt each, lbs.	[illegible]	[illegible]
Each	$60 00	69 00

Packed loose.



WESTERN

Japanned cast iron frame and gear wheels, wrought iron crank, turned steel rollers and axles; will bend 3¼ inch tires or smaller to a circle 30 inch in diameter or larger.

Each

No. 2—Geared; length of base 25½ ins; width 6¼ ins; height 12 ins $36 00

Packed loose; wt each 85 lbs.

TIRE MEASURING WHEELS

Forged steel wheel, natural finish, polished steel index hand, japanned malleable iron handle and fork; raised figures and lines.

Each

No. 24—Wheel 24 ins in circumference, graduated in ins and eighths..... $6 00

One in box; wt per doz about 15 lbs.

BENCH DRILLS

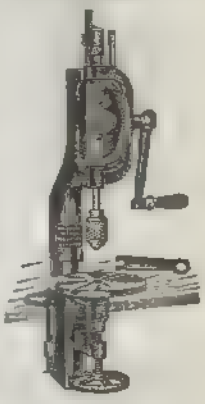
YANKEE

Cast iron frame, black finish; steel chuck, nickel plated and polished; machine cut gears and bearings; steel table post, feed screw and axle; automatic and friction feeds; adjustable table. Slide at lower end of column carries an adjustable bracket for table. Table can be adjusted vertically by hand wheel and screw, independently of bracket. Furnished with wrench for nut holding table bracket.

Single Speed. Each

No. 1003—For round shank drills up to ¼ in. in diam; diam of shank 1 in; diam of table 4¾ ins; adjustment of table 1¼ ins; diam of hand wheel 3 ins; height over all 18¾ ins..... $34 50

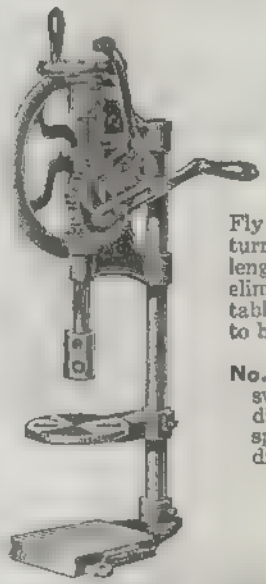
One in wood box; wt each 20 lbs.



Double Speed. Each

No. 1005—For round shank drills up to ½ in. in diam; diam of shank 1⅜ ins; diam of table 6¾ ins; adjustment of table 1¾ ins; diam of hand wheel 4½ ins; height over all 28 ins $57 00

One in wood box; wt each 51 lbs.



CHAMPION

Automatic Feed.

Feeds four speeds for work from smallest up to ¾ inch iron or steel. Fly wheel makes two revolutions to each turn of crank. Handle adjustable for length. Ball-bearing spindle end thrust eliminates friction; slotted lathe turned table. Greatest distance from spindle to base 11¼ inches.

Each

No. 104—Height over all 32 ins; swings to center of 12 in. circle; diam back column 1⅝ ins; diam spindle ⅜ in.; takes ½ in. shank drill bits..... $30 00

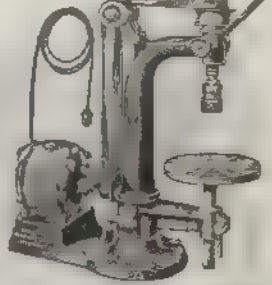
Crated; ship wt each 72 lbs.

CHAMPION, ELECTRIC

Cast iron frame, black finish; three jaw steel chuck, nickel plated and polished.

Equipped with ¼ H. P. motor at 1750 R. P. M. driving a two step cone pulley, giving two speeds of the spindle and is of ample size to drill holes up to the full capacity of drill.

Complete with attachment cord and belt.



Each

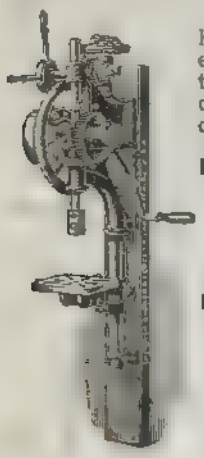
No. 50E-110—Operates on 110 volts A. C.; height over all 26 ins; drills to center of 10½ in. circle; diam table 8 ins; greatest distance from spindle to table 7¾ ins; adjustable spindle stop; up and down movement of spindle 2⅛ ins; up and down movement of table 5 ins; drilling capacity ½ in..... $120 00

Crated; ship wt each 140 lbs.

POST DRILLS

CHAMPION

Cast iron frame and feed table; machine cut gears and bearings; steel table post, shaft, axles and chuck; adjustable table can be swung out of way; automatic self-feed; crank has forward motion on both the first and second speeds.



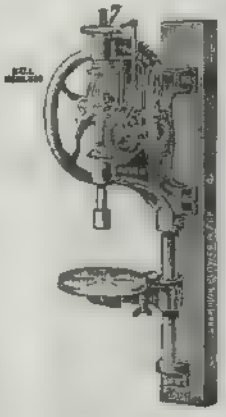
Ball-bearing. The propeller wheel hand-feed and self-feed are independent of each other. End thrust ball bearings; lathturned and slotted table: all bearings ground out of solid metal. Square table 8x9 ins.; drill bolted to hardwood board 46x6½ ins.

Each

No. 97—Diam fly-wheel 15 ins; drills holes up to 1¼ ins; and to center of 16½ in. circle; has 6½ in. up-and-down run; spindle 1⅛ ins in diam; never slip chuck takes ½ in. shank bits $69 00

No. 97P—Same as No. 97 except furnished with tight and loose pulleys, 6 ins. in diam and 2 in. face for power; speed 250 R. P. M; power required to operate ½ H. P. gasoline engine or electric motor. 79 50

One in crate; wt each 169 lbs.

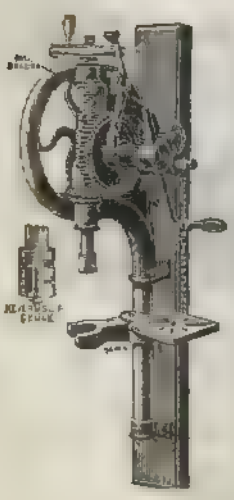


Ball-bearing; instantaneous adjustable lever-feed table, diameter 12 in.; drill bolted to hardwood board 46x6½ ins.

Each

No. 200—Diam fly-wheel 15 ins; drills holes up to 1¼ ins, and to center of 16 in. circle: has 4 in. up-and-down run; spindle 1¼ ins in diam; never slip chuck takes ½ in. shank bits $99 00

One in crate; wt each 196 lbs.



Ball-bearing; two speed with double journal bearings; entire drill swings to side with 18 inch sweep; square table size 8x9 in., drill bolted to hardwood board 53½ x 7½ ins.

Each

No. 4—Triple gear; diam fly-wheel 15 ins; drills holes up to 1½ ins, and to center of 18 in. circle; has 5 in. up-and down run; spindle 1¼ ins in diam; never slip chuck takes ½ in. shank bits $66 00

One in crate; wt each 198 lbs.

POST DRILLS

CHAMPION, BACK-GEARED

Self feed, 2 speed with crank turning in same direction on both speeds. High grade tool steel ball bearings. Self feed attachment can be set for fast or slow speed. Lathe turned slotted table can be raised or lowered, swung around or removed entirely. Spindle 1⅛ inches in diameter; up and down travel 4 inches; drills to center of 15 inch circle; capacity, holes from 0 to 1 inch; bored for ½ inch round shank drills. Each

No. 2—Hand power only; wt each 104 lbs $45 00

No. 2P—Hand and power drive, same as above, except with tight and loose pulleys, 6 ins. in diam; 2 in. face 250 R.P.M; wt each 115 lbs 52 50

Crated.

CHAMPION

Cast iron frame and feed table; machine cut gears; steel table post, shafts, axles, and chuck; adjustable table can be swung out of way; automatic self-feed.

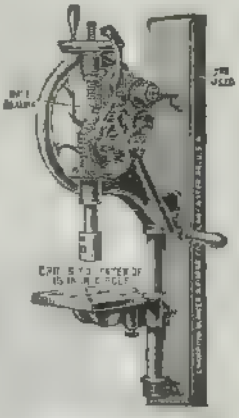
The cups and cones on Nos. 1900, 95 and 91 are both made from die steel.

Ball-bearing; full back gears with two speeds and forward motion on both the first and second speeds; square table, size 7x8 in; drill bolted to hardwood board, 46x6 inches.

Each

No. 95—Diam fly-wheel 14 ins; drills holes up to 1¼ ins, and to center of 15 in. circle; has 3 in. up-and-down run; never slip chuck takes ½ in. shank bits $47 25

One in crate; wt each 107 lbs.



Cast iron frame and feed table; machine cut gears; steel table post, shaft, axles and chuck; adjustable table can be swung out of way; automatic self-feed.

Ball-bearing; the bearings for the spindle are all ground from the solid metal; back gear with one speed. Round table, diameter 7¼ ins; drill bolted to hardwood board 40½x5½ ins. Each

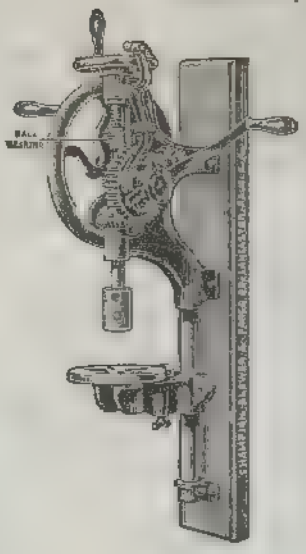
No. 98—Diam fly-wheel 14 ins; drills holes up to 1 in, and to center of 14 in. circle; has 3 in. up-and-down run; spindle 1 in. in diam; never slip chuck, takes ½ in. shank bits $30 75

One in crate; wt each 85 lbs.

Every "Champion" Drill is a perfect Drill and every Mechanic knows it. There are no ifs-an-ands about it. They are made to give perfect service for many, many years.

POST DRILLS

CHAMPION, BACK-GEARED



Self feed; 2 speed, ball bearing slotted lathe turned table. Drills to the center of a 12 inch circle. Greatest distance from table to spindle 8¾ inches. Spindle ⅞ inch in diameter with up and down travel of 3 inches; capacity, holes 0 to ¾ inch taking ½ inch straight shank drills.

	Each
No. 105—Hand power only; wt each 59 lbs	$24 75

FOR ELECTRIC STREET RAILWAY SERVICE

All Electric Street railways have 525-650 volts direct current. Direct current cannot be reduced in voltage except at great expense. Since a lamp of this voltage, if it could be produced at all, would be too fragile for use it has been found best to burn lamps of 105-125 volts in series of 5. However, lamps, if they are to burn satisfactorily in series, must have the filaments cut very accurately and uniformly in circumference in order that the same number of amperes may flow through each lamp in series.

G-18½

LOCOMOTIVE HEAD LIGHTING

These lamps are used mostly for lighting steam trains. Each car is usually equipped with generator attached to the axle of one of the wheels and a storage battery of either thirty to thirty four or sixty to sixty five volts. When the car is traveling above a certain speed the generator charges the storage battery just as on automobiles.

EDISON MAZDA INCANDESCENT LAMPS

The average life of a Mazda Lamp is 1000 hours. The decrease in candle power during the life of the lamp is less than 20%.
Edison Mazda Lamps are made in the following types:
New Standard Line, having Type A inside frosted bulb. Having the following advantages over other types:
1. **Easily Cleaned.** Frosting is on the inside and bulb therefore does not gather dirt. 2. **Better Lighting.** Splendid diffusion is obtained with such small loss of light that these lamps will replace both the clear and frosted lamps of the old types. 3. **Stronger.** These lamps are much more rugged than the old types. Breakage will be appreciably less. 4. **Attractive Appearance.** Pearl Gray bulb is pleasing in appearance and harmonizes with any background color. 5. **Simplified Stocks.** Five new types and sizes replace more than forty old types and sizes. **Mazda C Gas** filled lamps having type PS bulb in clear, white bowl and daylight blue bulb. **Sign Lighting Lamps** in type S clear and type P daylight blue. In ordering be sure to specify the following: Watts, volts, type of bulb (for instance A-17 inside frosted or PS-30 clear) type of lamp (for instance standard or country home lighting or train lighting.)

MAZDA B

For Electric Street Railway Service.

All electric street railways have 525-650 volts direct current. Direct current cannot be reduced in voltage except at great expense. Since a lamp of this voltage, if it could be produced at all, would be too fragile for use, it has been found best to burn lamps of 105-125 volts in series of 5. However, lamps, if they are to burn satisfactorily in series, must have their filaments cut very ACCURATELY and uniformly in circumference in order that the same number of amperes may flow through each lamp in series.

Edison Lamps Sold on Contract Only. See Discount Pages 1084 and 1085.

For Train Lighting And Locomotive Headlighting Service.

These lamps are used mostly for lighting steam trains. Each car is usually equipped with a generator attached to the axle of one of the wheels and a storage battery of either thirty to thirty-four or sixty to sixty-five volts. When the car is traveling above a certain speed the generator charges the storage battery just as on automobiles.

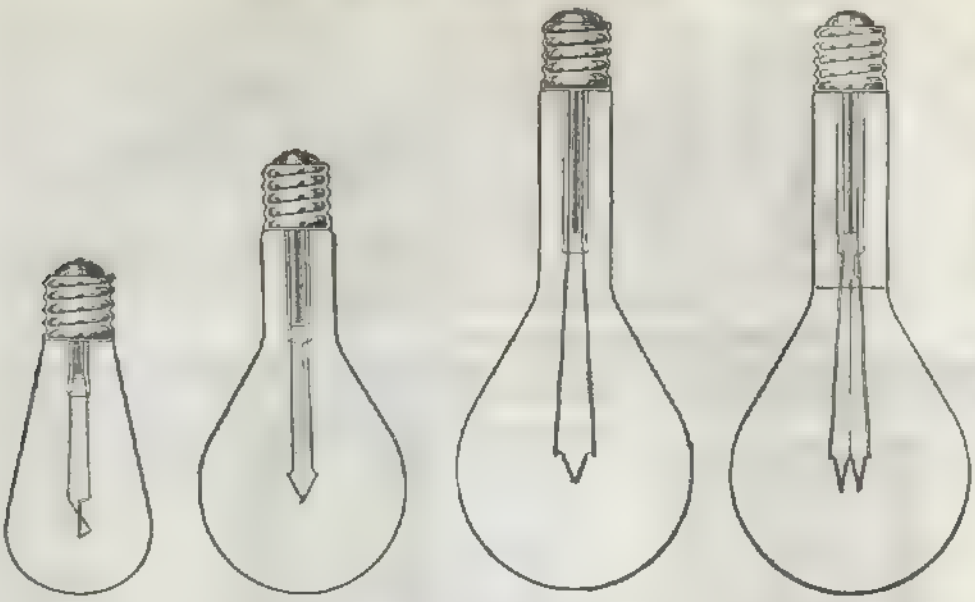
EDISON MAZDA INCANDESCENT LAMPS

"MAZDA C" STREET SERIES



S-Bulb. 2500 Lumens 4000 and 6000 Lumens 10000 and 15000 Lumens

"MAZDA C" STREET SERIES

Owing to the high amperage, low voltage and consequently shorter, thicker and more rugged filament, these lamps have an average life of 1300 hours.

Note: In ordering be sure to specify the Lumens and Amperes.

Because of the high amperage of these lamps they can be manufactured only with the large mogul screw base.

Edison Lamps Sold on Contract Only. See Discount Pages 1084 and 1085.

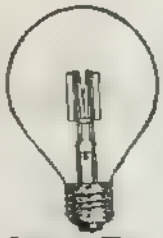
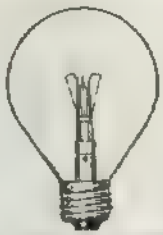
G-30, 500 Watts



P-25, 100 Watts



G-30, 250 and 400 Watts

Round type. Formerly the magic lantern was a source of constant danger because one could never tell when the child operating it would set something on fire from the coal oil wick. The magic lantern equipped with the 100 watt concentrated filament mazda "B" Lamp may be left in the hands of child with the same safty as a desk lamp. Until recently the small moving picture machine, such as used in schools and at church socials, had to have an expert too perate and adjust the carbons of the arc light, but now such a machine, fitted with a 100 watt Mazda "B" or a 250 watt Mazda "C" Stereopticon lamp can be operated by anybody and will give a steadier light than the arc and without the hissing sound.

The 500 and 1000 watt Stereopticon Lamps are used in the larger private moving picture machines. Also for throwing the border light in the largest and most up to date movie theatres. The Stereopticon lamp has an average life of 300 hours.

FLOOD LIGHTING ROUND T

These lamps are used in projection for lighting the front of buildings. They are much cheaper and more efficient than the old way of outlining with small lamps. These lamps have an average life of 1000 hours.

T-20 500 Watts

T-20 1000 Watts

For Motion Picture Projection.

Used in small portable projections of stereopticon lanterns where a concentrated light source is necessary in connection with the lens systems employed. Tubular bulb lamps permit more efficient utilization of light as the lens equipment can be placed closer to light source and therefore should be used whenever possible in preference to round bulb lamps.

Tubular bulb lamps should be burned vertically, tip up and should never be lighted when in any other position.

Can be supplied, fitted with skirted medium screw base, giving a light center length of 3 7/8 inches and a maximum over all length of 6 3/8 inches, without extra charge.

LAWN MOWERS

Our Monarch, Wizard, Elm Park Special and Magic mowers are manufactured by the Worcester Lawn Mower Co. The fact that practically all parts are made in their own factory under the direct supervision of men long experienced in the manufacture of lawn mowers coupled with the use of only the best materials obtainable insures a product hard to equal. Every mower absolutely guaranteed to give satisfaction.

Four tempered tool steel blades; 5½ inch ball bearing cylinder; patent cone adjustment; cones hardened and ground and cannot work loose; 1⅛ inch diameter ball races; ¼ inch tool steel ball bearings; rocker adjusted cutter bar; lipped self-sharpening underknife of high carbon crucible steel; rigid construction throughout and finished in attractive colors. These are practical mowers for the average home owner and being very capable and strongly built will give entire satisfaction on any lawn.

MONARCH, BALL BEARING

With 8 Inch Drive Wheels.

Width of cut, inches	14	16	18
Wt. boxed inc. handle, lbs.	42	44	47
Each	$11 00	12 00	13 00

WIZARD, BALL BEARING

With 9 Inch Drive Wheels.

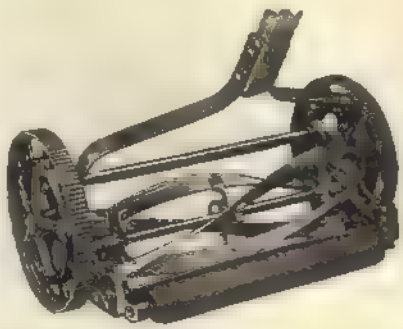
Width of cut, inches	14	16	18
Wt. boxed inc. handle, lbs.	50	52	55
Each	$12 00	13 00	14 00

Same construction as the Monarch and Wizard lawn mowers but with larger drive wheels. An exceptionally popular ball bearing mower for all lawn conditions. The Elm Park is a thoroughly high grade mower capable of very fine work, and will give long and satisfactory service

ELM PARK, BALL BEARING

With 10 Inch Drive Wheels.

Width of cut, inches	14	16	18
Wt. boxed inc. handle, lbs.	58	60	63
Each	$14 00	15 00	16 00



Four tempered blades of special alloy steel; 5½ inch ball bearing cylinder; patent cone adjustment; cones hardened and ground and cannot work loose; 1⅛ inch diameter ball races; ¼ inch tool steel ball bearings; rocker adjusted cutter bar; lipped self-sharpening underknife of high carbon steel, hardened and carefully tempered; open pattern drive wheels; frame held in perfect alignment by scientific construction design; finished in attractive colors. A light weight, easy running, dependable and satisfactory ball bearing mower at a very low price.

SPECIAL NO. 8-4

With 8 Inch Drive Wheels.

Width of cut, ins.	14	16
Wt boxed, inc. handle, lbs.	38	40
Each	$10 50	11 50

SPECIAL NO. 10-4

With 10 Inch Drive Wheels.

Width of cut, in.	14	16	18
Wt. boxed, inc. handle, lbs.	52	54	57
Each	$11 50	12 50	13 50

Three tempered tool steel blades; 5½ inch plain bearing cylinder; adjustable plain bearing; rocker adjusted cutter bar; underknife nicely tempered. An excellent mower for the price.

MAGIC PLAIN BEARING

With 8 Inch Drive Wheels

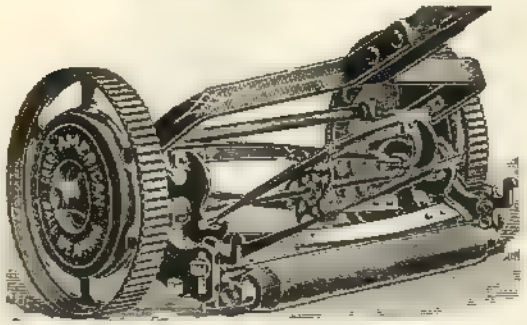
Width of cut, inches	12	14	16
Wt. boxed, inc. handle, lbs.	35	36	37
Each	$8 00	9 00	10 00

All above, one in a box, handle separate.

PENNSYLVANIA QUALITY LAWN MOWERS AND TRIMMERS

Our Great American, Super Great American and Wm Penn mowers and Pennsylvania trimmers are made by the Pennsylvania Lawn Mower Works. The highest grade of materials are used throughout and all have the adjustable "Staytite" handle which is the mark of quality and identifies all Pennsylvania Quality Mowers. These mowers cost more than ordinary lawn mowers but the service they give ultimately makes them cheaper. All are fully guaranteed.

LAWN MOWERS



GREAT AMERICAN, BALL BEARING

10 Inch, High Drive Wheels.

Five crucible tool steel blades, hardened and tempered; 6 in. ball bearing cylinder; Braun self aligning ball bearings, hardened cups and cones, eccentric screw adjustment; 10 in. solid center wheels; malleable and cast parts, machined in jigs; rocker adjusted cutter bar; self sharpening, raised edge crucible tool steel bottom knife, hardened and tempered; color, aluminum painted frame, gold painted wheels and gold and red striping. The best all-around mower of its type made.

Width of cut, inches.....	15	17	19	21
Wt. boxed inc. handle, lbs.....	67	69	73	76
Each $22 50	25 00	27 50	30 00	

SUPER GREAT AMERICAN

10 Inch, Ball Bearing, High Drive Wheels.

The Super Great American Mower contains all of the features of the Great American and in addition has two sets of Braun ball bearings in each wheel and the wheels have double spokes. This mower is recommended for gardener's use, as well as for the household lawn.

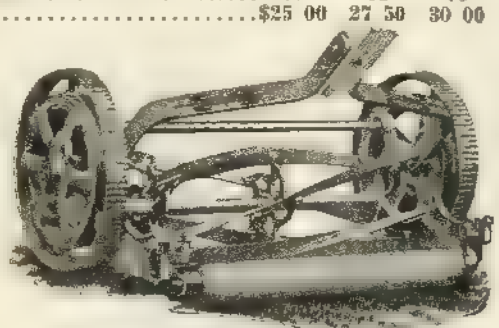
Wt. boxed inc. handle, lbs.....	69	71	75	78
Each $25 00	27 50	30 00	32 50	



WM. PENN, BALL BEARING

10 Inch, High Drive Wheels.

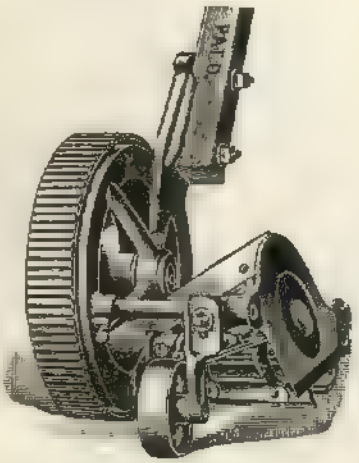
Five crucible tool steel blades, hardened and tempered. 5½ inch ball bearing cylinder; Braun self aligning ball bearings, hardened cups and cones, eccentric screw adjustment; 10 in. open center wheels; rocker adjusted cutter bar; spring steel, hardened and tempered bottom knife; finished in attractive colors. A sturdily constructed, popular, smooth cutting household mower.

Width of cut, inches	16
Wt. boxed inc. handle, lbs	50
Each $17 50	

LAWN TRIMMERS

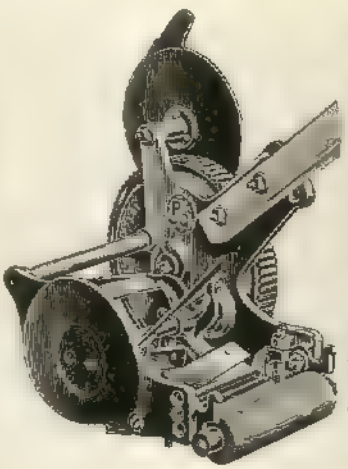
PENNSYLVANIA BALL BEARING

The unique construction of this undercutting trimmer permits cutting, not only close up to a wall, fence, tree, etc., but it will get the grass under a fence or rock-cut base of tomb stones, house foundations and other places hitherto out of reach of anything but a hand shear or grass-hook. The special design slanting side plate and conical shaped cylinder of this trimmer makes it possible to cut all grass left along walls, fences, foundations, etc., by the regular style of lawn mower.



Width of cut, 5½ inches; 9½ inch drive wheel; four blade ball bearing cylinder, adjustable "Staytite" handle. Made throughout of the same high quality materials as the Great American lawn mower and finished in attractive colors. Net weight, including handle, 25 lbs. Shipping wt. 34 lbs.

Pennsylvania Undercut Trimmer. .....Each $16 00



A new lawn accessory that saves time and labor. With this machine, which consists of a lawn trimmer equipped with a steel disc and a small plow, you can trim the overhanging grass along the edge of the paths and flower beds. Any gardner will find this Pennsylvania combined lawn trimmer and edger to be one of his most useful labor-saving tools. It will cut to within ⅜ of an inch of any wall and relieve him of the back-breaking work of using hand tools.

Width of cut, 8 inches; wheel, 8 inch diameter; 5½ inch four-blade ball bearing cylinder; adjustable "Staytite" handle. Made throughout of the same high quality materials as the Great American lawn mower and finished in attractive colors. Net weight including handle, 22 lbs. Shipping Wt. 31 lbs.

Pennsylvania Trimmer and Edger. .....Each $14 00

All above, one in a box, handle separate.

LAWN MOWER PARTS

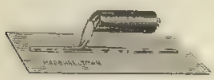
Packed one in a box.

CEMENT



Marshalltown

Blade made of highest grade crucible spring steel, ground and polished. Special light stiff mounting fastened with ten rivets; natural finish wood handle shaped for comfortable grip.

Differ from plastering trowels in that they are slightly convex on the face so that the edges of the blades will not dig into the mortar in finishing the cement.

FLOOR TROWELS OR FLOATS

Abrams—Double Action Long Handle

The above illustration shows the action of the long handle of the Abram cement tools. Substantially constructed for long service, the double of this handle is a very popular feature of this tool. As the trowel is pushed, the forward edge of the blade is tilted slightly; as the trowel is pulled, this action is reversed and the rear edge of the plate is raised. Simple and easy to operate, these tools satisfactorily meet all requirements.

Abrams

THE WISS SIMPLEX SHEAR BOLT. Patent Applied For

Fitted on N Pattern Tailor Shears

No spring, no levers or other parts to be lost or become out of order.

The shear can be easily taken apart and the lint and dirt that invariably collects under a shear bolt removed.

The bolt, when taken out of the shear, consists of only two pieces and can only be replaced correctly.

The operator can quickly adjust the shear to work looser or tighter by a slight turn of the nut.

WISS SHEARS

STRAIGHT TRIMMERS

Steel Forged

Generally known as the household or dressmaking shear. Straight trimmers, ten inches or over, are made with two sharp points; the smaller sizes have one sharp and one blunt point. Steel forged and handsomely finished in either full nickel plate, or with japanned handles and nickeled blades. The properly designed handles and perfect adjustment make it possible for one to use them for hours without tiring the hand.

The John Plain Watch

15 JEWELS ADJUSTED

is guaranteed without reservation to keep extremely accurate time and is insured against any expense for THREE years

Accuracy

A very high degree of accuracy, hitherto unknown in watches of this price, is offered in every John Plain Watch. By supervising the construction of these watches and their adjustments, we are able to extend a guarantee of three years on all 15 jewel movements, and one year on all 6 jewel movements. This guarantee relieves you of any and all expense. Naturally, these watches will far outlive their guarantee, and will give a life-time of satisfactory service.

All watches shown on Pages 212 and 213 come to you with a ribbon or leather strap as illustrated, and in addition, the metal strap or bracelet illustrated and described.

Ladies' 15 Jewel Adjusted
14K Solid White Gold Case

This watch contains a 15 jewel, adjusted, John Plain movement. We guarantee it against any and all expense for three years, a guarantee far excelling that ever offered on any watch. It will give a lifetime of satisfactory service. The case is 14K solid White Gold, the dial is Sterling Silver. The crystal is oval-shaped and accurately fitted. The watch comes with a black grosgrain ribbon with solid gold clasp, and in addition, a White Gold Filled, very flexible, expansion link bracelet, as illustrated. It comes to you complete in a handsome presentation box, together with our printed Guarantee.

2G20110 PRICE **$45.00**

Men's 15 Jewel, 10½ Ligne Adjusted
1/10th 14K White Gold Case

The handsome strap watch pictured above, contains a 10½ ligne, 15 jewel, adjusted, John Plain movement, guaranteed to give a life-time of satisfactory service, and insured against any and all expense for a period of three years. The handsome case is 1/10 14K rolled white gold plate, finished in chromium, the new, everlasting, platinum-like metal. It comes to you with a fine leather strap attached, as illustrated and in addition, a flexible, adjustable, expansion link bracelet, as shown—the very latest in men's metal straps. Coming to you complete in a handsome gift box, together with our printed Guarantee, it makes a gift that can scarcely be excelled.

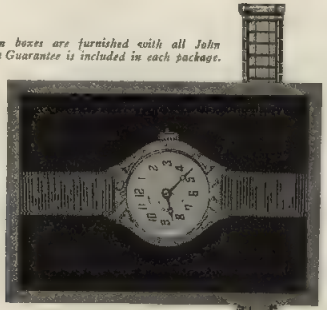
2G21100 PRICE **$40.00**

The John Plain Watch

6 JEWELS ADJUSTED

is guaranteed without reservation to keep extremely accurate time and is insured against any expense for ONE year

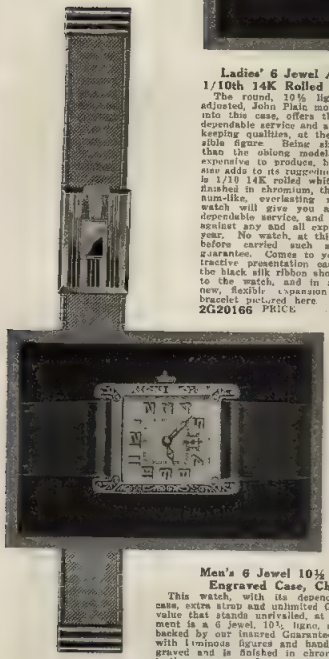
Attractive presentation boxes are furnished with all John Plain watches. A written Guarantee is included in each package.



Ladies' 6 Jewel Adjusted 1/10th 14K Rolled Gold Plate

The round, 10½ ligne, 6 jewel, adjusted, John Plain movement fitted into this case, offers the utmost in dependable service and accurate time-keeping qualities, at the lowest possible figure. Being slightly larger than the oblong models, it is less expensive to produce, but its larger size adds to its ruggedness. The case is 1/10 14K rolled white gold plate, finished in chromium, the new, platinum-like, everlasting metal. This watch will give you a lifetime of dependable service, and we insure it against any and all expense for one year. No watch, at this price, ever before carried such an unlimited guarantee. Comes to you in an attractive presentation case, including the black silk ribbon shown, attached to the watch, and in addition, the new, flexible expansion link metal bracelet pictured here.

2G20166 PRICE . . **$17.50**



Men's 6 Jewel 10½ Ligne Adjusted Engraved Case, Chromium Finish

This watch, with its dependable movement, handsome case, extra strap and unlimited Guarantee for one year, is a value that stands unrivaled, at our low price. The movement is a 6 jewel, 10½ ligne, adjusted, John Plain model, backed by our insured Guarantee. Has Sterling Silver dial with luminous figures and hands. The case is richly engraved and is finished in chromium. Comes to you with leather strap, as shown, and in addition, the new, flexible, adjustable expansion link bracelet pictured to the left. Shipped complete with presentation case and our printed Guarantee.

2G21132 PRICE **$20.00**

Beauty

We have picked for display, for our special offers on Pages 212 and 213, the four outstanding favorites with our customers. Into them, we have crowded the utmost in value; in them, you will find the last word in beautiful cases and attractive bracelets and straps. The decrees of fashion are answered by these four splendid watches. At these low prices, they are absolutely unrivalled, either in beauty, quality of materials or time-keeping accuracy.

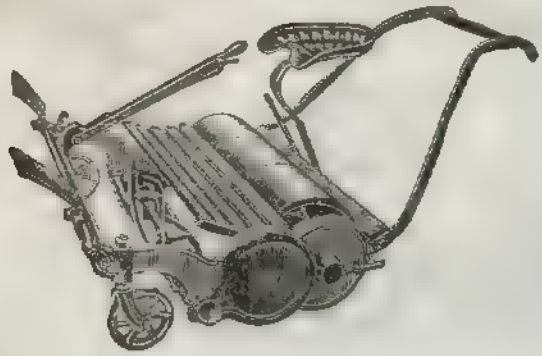
LAWN MOWERS

TOWNSEND'S, HORSE DRAWN



Fitted with triple rolls, having triple pawls in each roll, making the most powerful and instantaneous driving mechanism ever put into a mower; this feature maintains the motion of blades even in turning sharp corners, where in other mowers the blades remain stationary. It will cut over rough and uneven ground, and cuts its swath clean, easily and smoothly. Instant change of height of cut can be made.

Finished in light blue with gold bronze trimmings; furnished with tool box, seat, handles, shafts and side bar attachments.

Nos.	10	12	15

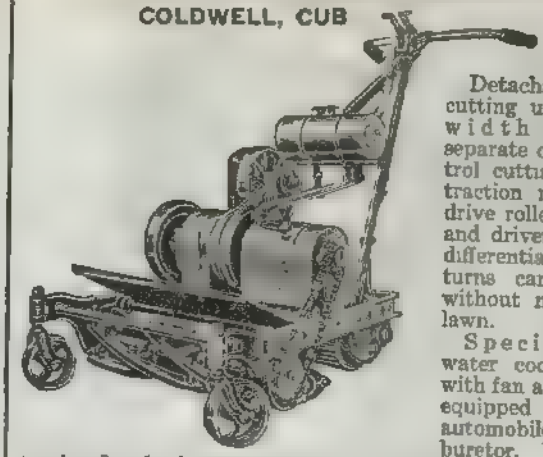
MOTOR LAWN MOWERS

COLDWELL, CUB



Detachable front cutting unit; full width drive roller; separate clutches control cutting unit and traction roller clutch; drive roller is divided and driven through a differential so sharp turns can be made without marking the lawn.

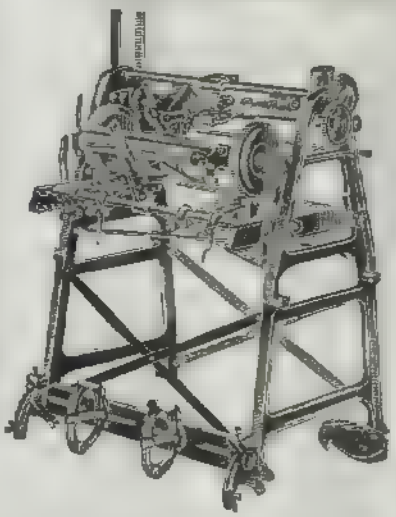
Special designed water cooled engine, with fan and radiator; equipped with an automobile type carburetor, Bosh high-tension fly wheel type magneto, oil circulating pump. A constant speed is maintained by a fly ball governor mounted in the fly wheel. Crank shaft mounted on Timkin roller bearings. Each

No. C21—Width cut 21 ins ..... ✚$600 00

Crated; wt each 400 lbs.

LAWN MOWER SHARPENERS

IDEAL



Angle iron frame construction. Alundum grinding wheel carried on a ball-bearing hub by an arm with bearings on the main shaft. The arm is counterbalanced by a weight at rear of machine and the grinding wheel is free to move up and down, carried along main shaft by feed screw and sliding head. The main driving shaft is special steel, ground and polished, key seated so as to drive the hub mounted between the bearings of arm. Hub carries a sprocket which drives grinding wheel by means of a steel chain. ¾ inch feed screw carried in babbited bearings, driven by a round leather belt over large sheave pulleys. The feed is thrown in and out by means of an improved belt shifter which locks itself in either position.

LATOMA WILTON MEANS EXTRA DURABILITY AND LASTING BEAUTY OF APPEARANCE

This wear-resisting rug is woven on the latest improved type of imported English loom. It is guaranteed to be five frames, 216 pitch and 9 wires to the inch. The surface yarn is firmly woven clear through to the back of the fabric, producing a rug that positively will not ravel or fuzz. The wonderful silky sheen of the pile is due to the high grades of the 9-ply wool, which is selected for its strength, brilliant lustre and length of fibre. It is sorted and blended with expert care and judgment, and spun in our mill, thus enabling us to maintain our unusually high standard of quality.

Each dye has to withstand the most severe tests for the permanency of color.

OTHER SIZES

Can be obtained special order. Advise us of your requirements. Quotations will be gladly submitted.

SALIENT FEATURES OF THE WORLD'S FAMOUS L'ORIEN SEAMLESS WILTON RUGS

(Awarded Grand Prize at the Sesqui-Centennial International Exposition, Philadelphia, 1926)

This is a new SEAMLESS rug especially designed and woven to meet the increasing demand for WILTON rugs made in one piece without seams. The L'ORIEN is a genuine 27-inch WILTON rug woven from the most carefully selected materials with particular attention paid to every detail of manufacture, from weaving and dyeing the yarn used on through to weaving and finishing the completed rug. Every process in the making of these fine WILTON rugs is under the most careful supervision.

The durable and beautiful L'ORIEN, with its soft thick pile, its rich colorings and pleasing patterns, represents the product of unusual experience in the manufacture of high-grade seamless WILTON rugs.

OTHER SIZES

The [illegible] threads [illegible] the back of the fabric, producing a nap that positively will not pull out. The wonderful [illegible] silky sheen of the pile is due to the high [illegible] of the 3-ply wool, which is selected for its strength, brilliant lustre and length of fibre. It is sorted and blended with expert care and judgment, and spun in our mill, thus enabling us to [illegible] our customers high standard [illegible] qualities.

Each dye has to withstand the most severe test for the permanence of color.

GENUINE ROSETREE WILTONS IN ATTRACTIVE DESIGNS

The Rosetree Wilton is a genuine Wilton rug woven from high quality highly woolen yarns on the most improved type of English Wilton looms. The pattern is woven into the rug and the ends so bound in by the Jacquard weave that the durability of the rug is tremendous.

The woolen yarns from which the pile is woven are spun in factories' own mills from raw wools specially selected for their quality, strength and length of fibre. These yarns are dyed in factories' own dyeing plant with dyes carefully tested for permanency and color.

Choice of four attractive patterns in various colors and furnished in sizes as listed under each illustration.

OTHER SIZES

Can be obtained by special order. Advise us of your requirements and quotations will be gladly submitted.

NATIONALLY ADVERTISED "SERVIAN" SEAMLESS RUGS AT FACTORY PRICES

America's Seamless Oriental — "A Bigelow-Hartford Product." Four exquisite and unusually beautiful and attractive designs are now featured below. The famous power-loom rug with a weave which shows the back through to the front, woven in the rarest Oriental patterns of rich, formal. The 9 x 12 ft. weight 60 lbs.

We own a power loom [illegible] the hand-woven fabrics of the Orient and bring [illegible]. The "Servian" brings Oriental luxury within the reach [illegible] American homes. It is far superior to many foreign made rugs now entering the portals of this country. Indeed this rug and others by hand would cost several hundred dollars—and it would not be as good a rug.

The handweaver is no longer an artist; he is a commercial worker and often there are "tired spots" and "hurry spots" in the fabric he weaves. Now the great power-loom has equalled the creative ability of the handweaver and *surpassed* him in strength and consistency.

The marvelous "Servian" represents the newest and most original achievement of the industry in fine rug weaving. The wool from which "Servian" yarn is spun is the finest blend of Persian, Chinese, Afghanistan and South American wools. Soft heavy back. Deep lustrous [illegible].

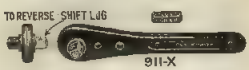
Q. D. RATCHET WRENCHES



9-Inch Handle

A trial will convince even the extreme skeptic that our new No. 911X Ratchet Wrench constitutes a marked improvement over any other wrench that we know of. Its design is scientifically correct, simple and provides exceptional strength. There is no complicated change mechanism. The ½-inch square Ratchet Lug can easily be pushed to the other side, thus changing direction of ratchet. Rotation ball and spring in Lug engage slots in ratchet wheel and lock lug in same. Will not stick in sockets. Made from high-grade steel, heat-treated.

NO	Lgth. In.	lb Each	EACH
911X	10	1¼	$3.30

Five in a box.

Extra Lugs

MECHANICS' CASES

Many is the mechanic whose first favorable impression of Blackhawk flashes before he sees more than the outside of these wonderful metal cases.

Good-looking, strong carrying cases—make a distinct hit with mechanics who care. They make a quick sale—no doubt of it.

Our newest cases have this two-tone black and maroon crackle finish of durable lacquer. Thrown open, the interior shows a copperized lacquer—which lasts and looks the part.

All Blackhawk Metal Cases are of one piece heavy stamped steel top and bottom trued to snap shut like a watch. No patched corners—no rough edges—furnished with strong hasps, also swivel metal handles, as illustrated.

Dealers who own Cabinet Assortments should always carry a stock of at least one A—one B—and two C—enabling them to select sets made up from the cabinet stock and sell complete in carrying case.

For car owners' sets and No. 18AD set.

NO	Lgth. In	Wd. In.	Ht. In.	EACH

POCKET KNIVES
—JOHN PRIMBLE—

The Blades—There positively is no finer Pocket Knives made than "John Primble". The blades which are the most important thing about a pocket knife are carefully forged from the very finest quality India Steel. There are no superiors.

Workmanship—In the manufacture of John Primble Pocket Knives only the very latest modern methods, combined with the most skilled workmanship are employed. Such detail as hardening, tempering, grinding and finishing is done with perfect accuracy which insures uniform excellance.

Stag Handles—The Stag Handles on John Primble Pocket Knives are genume, made from finest quality stag horns. This stag is carefully inspected for choice stock making it impossible to apply imperfect handles to the knives.

Pearl Handles—Only shells of the first water are selected for use on John Primble Pearl Handle Pocket Knives, possessing perfect skin of delicate texture, free from specks or flaws. They are clear translucent and of beautiful color.

Inspection—Every John Primble Pocket Knife after having been made goes through a rigid inspection which makes the general excellance so superior that John Primble Pocket Knives have grown steadily in popularity for over 40 years. Every user of a Pocket Knife recognizes and appreciates quality. That is what you get in a John Primble. The quality of these knives is backed by the reputation of the Belknap Hardware and Manufacturing Company, protecting the dealers and consumers from defects and flaws incident to manufacture or faulty material.

Proper Care of Pocket Knives—They should be sharpened on oil stone holding the back of blade slightly elevated so that only the cutting edge rests on stone. Do not lay the blade flat like honing a razor. Never put a Pocket Knife blade on the stone or emery wheel. Never carry a Pocket Knife in a sweaty pocket as this will cause the linings of the knife to rust.

L

RICHLUBE OILS

Made in the State of Pennsylvania from Selected Premium Pennsylvania Amber Crude. They bear the stamp of the Pennsylvania Grade Crude Oil Association, which is a guarantee of their superiority. They are straight run (not blended) Pennsylvania stocks graded to correct specifications for the lubrication of internal cumbustion engines of all types.

LIGHT

Pale amber color. High flash. Filtered. Correct for both splash and force feed systems.

NO.	Container	Cans In Case	lb Case	GALLON
½RL	½ gal. Can	12	65	$1.60
1RL	1 gal. Can	12	120	1.40
5RL	5 gal. Can	2	90	1.04
15RL	15 gal. Drum	....	130	.94
55RL	55 gal. Drum	....	450	.73

MEDIUM

Rich amber color. High flash. Filtered. Neutral. A correct lubricant for high speed, water cooled motors which require a medium oil.

NO.	Container	Cans In Case	lb Case	GALLON
½RM	½ gal. Can	12	65	$1.80
1RM	1 gal. Can	12	120	1.55
5RM	5 gal. Can	2	90	1.15
15RM	15 gal. Drum	....	130	1.05
55RM	55 gal. Drum	....	450	.86

HEAVY

Ruby color with green bloom. Very high flash. Filtered. Neutral. Maintains strong body under high heat. An excellent product for all types of automobile and truck motors requiring a heavy oil. Also adapted for use in air cooled motors.

NO.	Container	Cans In Case	lb Case	GALLON
½RH	½ gal. Can	12	65	$1.80
1RH	1 gal. Can	12	120	1.55
5RH	5 gal. Can	2	90	1.15
15RH	15 gal. Drum	....	130	1.05
55RH	55 gal. Drum	....	450	.86

No charge will be made for 15-gallon steel drum.

A charge of $6.00 will be made for 55-gallon steel drum. A credit for the amount will be passed if 55-gallon drum is returned—transportation prepaid. No credit allowed for 15-gallon drum.

EXTRA HEAVY

Rich ruby color with green bloom. Filtered. Very high flash. Maintains viscosity at high temperatures. Recommended for sleeve valve, tractor, truck, and airplane motors where a heavier oil than the Heavy grade is required.

NO.	Container	Cans In Case	lb Case	GALLON
½RX	½ gal. Can	12	65	$2.00
1RX	1 gal. Can	12	120	1.70

Antiques of 1847 Revived in Pewter

(The Celebrated Flagg & Homan Brand)

FLAGG & HOMAN TRADE-MARK

FLAGG & HOMAN TRADE-MARK

The House of Co-operation Inc. 1889 1930

These fine old Pewter pieces are most of them actual revivals from the designs and tools developed by ASA F. FLAGG and HENRY HOMAN MORE THAN 80 YEARS AGO, and now reproduced by their successor, THE HOMAN MANUFACTURING CO. The remainder are inspired by the work of early American pewterers or by English models

The Pewter productions of FLAGG AND HOMAN have long been sought by collectors of Pewter, and are now placed within reach of the general public with all the charms of the original designs and the sentiment connected with quaint old processes of manufacture.

All wares made under this trade mark conform to the traditions of the best early Pewter. They are massive in design, rich in simplicity, so characteristic of Colonial days, and fabricated from metal of a thickness and weight to ensure sturdy wearing qualities. A very high tin content and freedom from lead give the fine and enduring Pewter lustre. Will not tarnish.

GIFTS THAT LAST

PEWTER CANDLESTICK

A finely proportioned piece, enriched with artistic floral design. Height 14¾ inches. So admirably suited as a distinctive gift item. Heavy weight. Exquisite lustre.

No. 9H 7C Each $15 00

PEWTER FIVE-PIECE TEA AND COFFEE SERVICE

Unmistakably antiquated in appearance and exuberant in charm to grace the modern and well appointed table. Heavy weight. Finest workmanship and finish.

No. 9H 8 Complete Five-Piece Tea and Coffee Service, Per set $75 00

Separate Pieces Furnished at Following Prices

No. 9H 8A Coffee Pot, height, 10⅛ inches, capacity 7 half pints Each $24 00
No. 9H 8B Tea Pot height 10⅛ inches, capacity 6 half pints Each 22 00
No. 9H 8C Sugar Bowl, height, 6⅝ inches Each 12 50
No. 9H 8D Cream Pitcher, height, 8⅛ inches Each 10 50
No. 9H 8E Waste Bowl height 3¾ inches Each 6 00

PEWTER CANDLESTICK

Has the charm of a majolica, that bespeaks unusual richness. Heavy weight. Finest workmanship and beautiful lustre and finish. Height, 12¾ inches

No 9H/5C Each . .$13.75

PEWTER FOUR-PIECE TEA SET

Pewter of the celebrated Flagg & Homan brand when offered at such a low price, as quoted, is justly recognized as a remarkable value. The smoothness of the metal, the soft, yet beautiful lustre are attributes of quality by which high quality pewter is judged. An excellent weight and fine workmanship will please you.

No. 9H 81 Four-Piece Tea Set, as shown $45 00

SEPARATE PIECES FURNISHED AT FOLLOWING PRICES

No. 9H 81A Coffee Pot, height 9⅛ inches Each $15 75
No. 9H 81B Sugar Bowl height 5¾ inches Each 6 50
No. 9H 81C Cream Pitcher height 7¾ inches Each 7 25
No. 9H 81D Tray, length 14 inches, open end handles Each 13 50

PEWTER SYRUP AND PLATE

A companion piece to the above set

Height 3½ inches. Of excellent weight. Finest workmanship and finish. An especially popular item in Pewter. Ideal for Gift purposes.

No. 9H 17 each $11 75

PEWTER FOUR PIECE TEA SET

This is an exact replica of one in quite a vogue 80 years ago. It possesses the same full rounded outline and sound, substantial weight of its heavy weight. Its enduring nature is attributable to the high grade material used in construction. You will be fully satisfied with its intrinsic value at this low price.

No. 9H 80 Four-Piece Tea Set, as shown $53 25

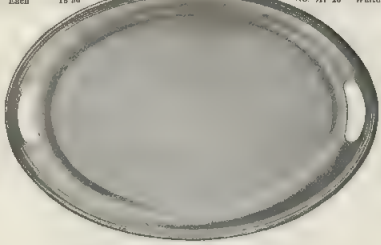
SEPARATE PIECES FURNISHED AT FOLLOWING PRICES

No. 9H 80A Coffee Pot, 10½ inches high, height 9⅝ inches Each $20 00
No. 9H 80B Sugar Bowl, height 5¾ inches Each 8 75
No. 9H 80C Cream Pitcher height 4½ inches Each 8 00
No. 9H 26 Waiter 13-inch Each 16 50

PEWTER SYRUP AND PLATE

Because it reduces to a minimum the reducing of beautiful lustre, thus eliminating polishing etc., Pewter Syrup and Plate dishes are very practical. Height 5⅝ inches. Excellent weight. Nicely made and finished

No. 9H/32 Each . . $11.75



PEWTER WAITER

(A companion piece to above Tea and Coffee Service)

Length 23 inches. Open handles. Heavy weight. Excellent workmanship and finish.

No. 9H/36 Each $60.00

PEWTER SYRUP AND PLATE

Designed distinctively as a syrup and plate dish should be. Tall and graceful, yet of excellent weight, correct proportions, fine workmanship and faultless finish. Height, 6⅛ inches. Priced low.

No. 9H/73P Each $12.50

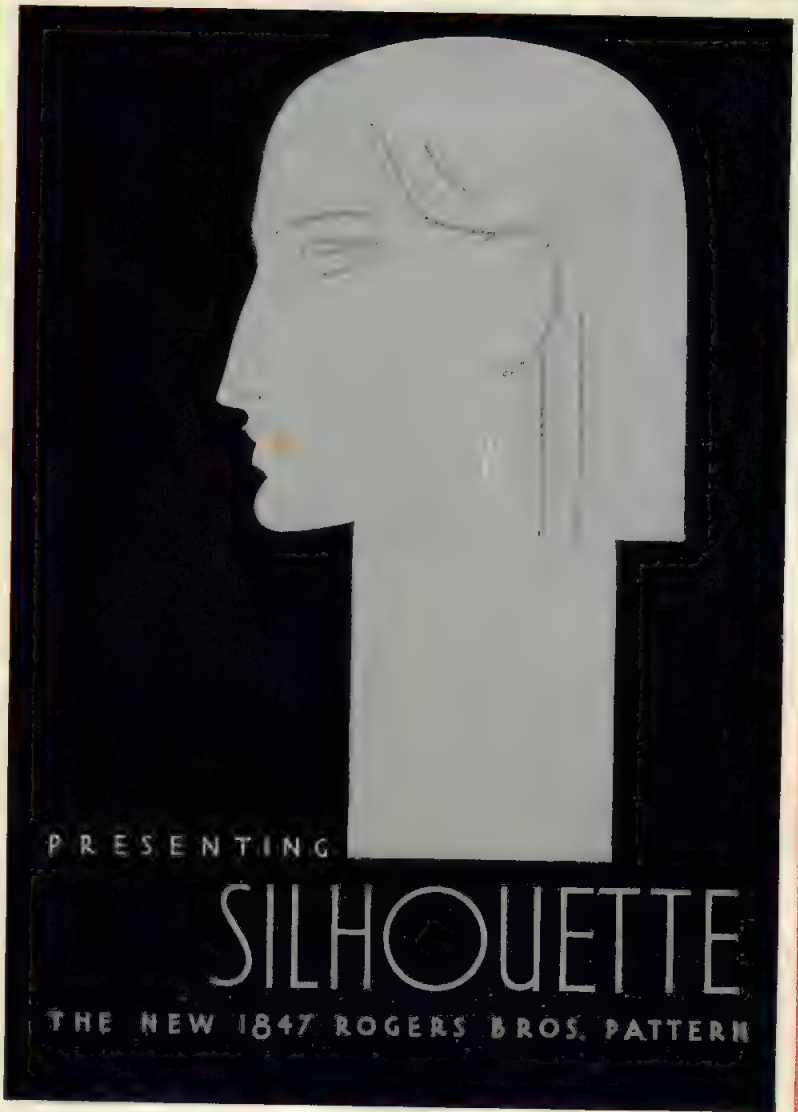
SILVER CO. Product



INTERNATIONAL SILVER CO.

Wise business experts have pointed out that women influence the purchase of 85% of all commodities. If it's 85% in all commodities . . . imagine what it must be in an ultra-feminine article like silverware. You can estimate it at 98% and never be accused of the slightest exaggeration. Therefore SILHOUETTE follows the most feminine slant in the world for its theme . . . fashion. SILHOUETTE brings, in silverware, the same basic Paris inspired lines women demand in frocks, hats, handbags, shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste. Clean, stream lines. And these are the lines of fashion, and of SILHOUETTE.

THE NEW SILHOUETTE PATTERN

VIANDE . . the new knife

PATENT APPLIED FOR

The new dinner knife, the Viande, is of special interest. Short blade . . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, we also make the regular conventional dinner and dessert knives in SILHOUETTE—thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables . . . and it is ready for you today.

louis. We have cautioned "Rayfield" not to tell us about the time he had fishing as he may beat some of the records made around Foley.

We have had a number of visitors during the month, all of which we were glad to see and hope they will come again. Some of them were: M. Minto, American Brake Shoe Co.; R. E. Gallagher asst. electrical engineer, J. S. Brown and Dan Eubanks, Galena Signal Oil Corporation; C. C. Cox, Southern Wheel Co.; Mr. Lewis, Barco Co.; H. R. Crull and Mr. Blaker of South Louisville Shop.

William Wallace, stenographer, is seriously considering trading in his cut down Ford (motor) and get him a real Ford of the latest model. If he does, lookout girls.

New Orleans Division

C. H. Phares, *Correspondent*

MOBILE SHOPS

E. G. Turner.

J. B. Davis, carman, had the misfortune to be severely injured at his home across the bay on January 29. Mr. Davis in some unaccountable manner had his hand caught in the belt of his pumping machine. While he was very badly hurt, we sincerely hope that he will soon be well enough to return to work again.

The Veterans' Club of the N. O. & M. Division Unit held a very enthusiastic meeting at Biloxi, Miss., on January 19, 1930.

Mrs. D. J. Faggard, wife of D. J. Faggard, carman, visited friends and relatives in Birmingham, Ala., on January 23, 1930.

The sympathy of his fellow workmen is extended to G. H. Straub of the Car Department in the loss of his mother-in-law, Mrs. Lucretia J. Mayher, who died at her residence, 307 S. Conception Street, January 29.

The sympathy of his fellow workmen is extended to J. J. Donovan of the Car Department on the loss of his granddaughter, who died on January 26, 1930.

T. J. McGill, carman, visited friends and relatives in Canoe, Ala., recently.

Messrs. Leo Gorey, engineer of the M. & M. Division, and Jesse E. Scalf, brakeman of the Louisville Division, visited Sibert Shops on February 7 and 8 in the interest of the Employes Pension Fund. Mr Scalf, while at Sibert Shops, spoke to the men of the Car Department during the noon hour of the 7th. Mr. Scalf in addition to being a brakeman is also local chairman of the B. R. T. with headquarters in Louisville, Ky.

W. C. Gascoigne, lead man, has returned to work after several days' illness.

Leroy Fulford, carman, returned to work after several days' illness.

This is station M. M. O. M. broadcasting from our office studio. We have with us to-nite two great men from Mobile, and we will take pleasure in introducing to you first "Thomas Edison" better known as "Rube," the wizard of Mobile shops. We will have Mr. Rube step to the mike and tell us about one of his patents.

Next we will introduce Mr. "Zek" McQuillen, who is well known along the coast and New Orleans. Mr. McQuillen, of the Master Mechanic's Office, is now open for invitations for week end visits. "Zek" is very fond of dogs, birds, flowers and good eats.

Now, folks, I know you would enjoy having "Zek" as a week end visitor, so just write in care of this station your name, address and date you wish to have him. What about this "Pop," you say he is seeking new acquaintances over the System?

Here are a few telegrams we will read:

Station M. M. O. M.

Enjoying your program. Have "Guy" Payne sing "I Got the Crichton Blues."

(Signed) Lonnie.

Station M. M. O. M.

Program coming in fine. Play "I'm In Love," dedicated to Marshall Renauld.

(Signed) Ed Cronier.

Station M. M. O. M.

Program coming in fine. Play "I Wish I Had 'Buck Shot' in My Arms," dedicated to Peck Sherrin and Owen James.

(Signed) A. C. Young.

Ned Turner will take charge of the mike and give us the Car Shop news.

Now fans our March program will come to a close with Harry Pegaro and Marcelino Marsal singing "The Spaghetti Blues."

DEPOT AT PEMBROKE, KY., AUGUST 12, 1897.

Left to right: Unidentified party; Uncle Dod Stanfield, engineer, at foot of ladder; Agent C. E. Mann, with arms folded; Joe Ward, drayman; Guy Wilson, operator; and S. S. Jameson, operator (at present agent at Pembroke).

SIBERT YARDS

J. W. Rousselle and T. J. Conboy.

Well folks, here we are 'way down in Mobile, Ala., on Mobile Bay, only seaport and city with the Azalia Trail, enjoying the summer breeze in the good old winter time, breathing the pure fresh air blowing off the Gulf of Mexico, as Al tells it to you from W O D X our new Broadcasting Station. But the Broadcasting Studio was here at Sibert we believe Al would say: "Well, folks, here we are, 'way out at Siberia near the end of civilization on Mobile River where winter time is ice and summer time is H—, breathing the fresh air from the Paper Mills." We welcome Al to our city and we hope he will make it his future home. We've got a real Broadcasting Station and for proof just tune in and listen for yourself. Now we are going to tell you the news of Siberia and what's puzzling us now is what became of the chief clerk's "bay window." He must be taking reducing exercises or else using vanishing cream. It wouldn't be a bad idea for Sid Paulin, Judge Bassett and Roy Epperson to try this method.

Well, did any of you recognize Switchman Johnny Pocase, Arthur Verneuille, Elmer Wachter and Assistant Yardmaster Clarence Vernell on the carnival floats. And did they have fun. Just ask them and let them tell you what a day of fun is.

We don't suppose it is too late to tell you about Hubert Hartley's wedding. Yes, he's done gone and did it, tied himself up for life, when he took Miss Edwina Balatt for his lawful wedded wife. We wish "Red" and "his better half" many future years of happiness.

We are sorry to hear of Lee Walton's illness and wish him a speedy recovery. Red Hartley's brother, Norton Hartley, was on the sick list too, undergoing an operation, but he is back with us again.

By the way, any of you who wish to become future rate clerks can enroll at the Barton Academy night school. The tuition is free and plenty of seats are vacant. Mr. Clark with the Illinois Central is teacher and what he can't answer you about rates is "Nobody's business."

We wish to welcome Robert Allman, our new record clerk who was transferred from the Local Office.

1847 ROGERS BROS.

SILVERPLATE

The standard silverware-preference of the first families of the land for more than eighty years—or since 1847. Charmingly beautiful.

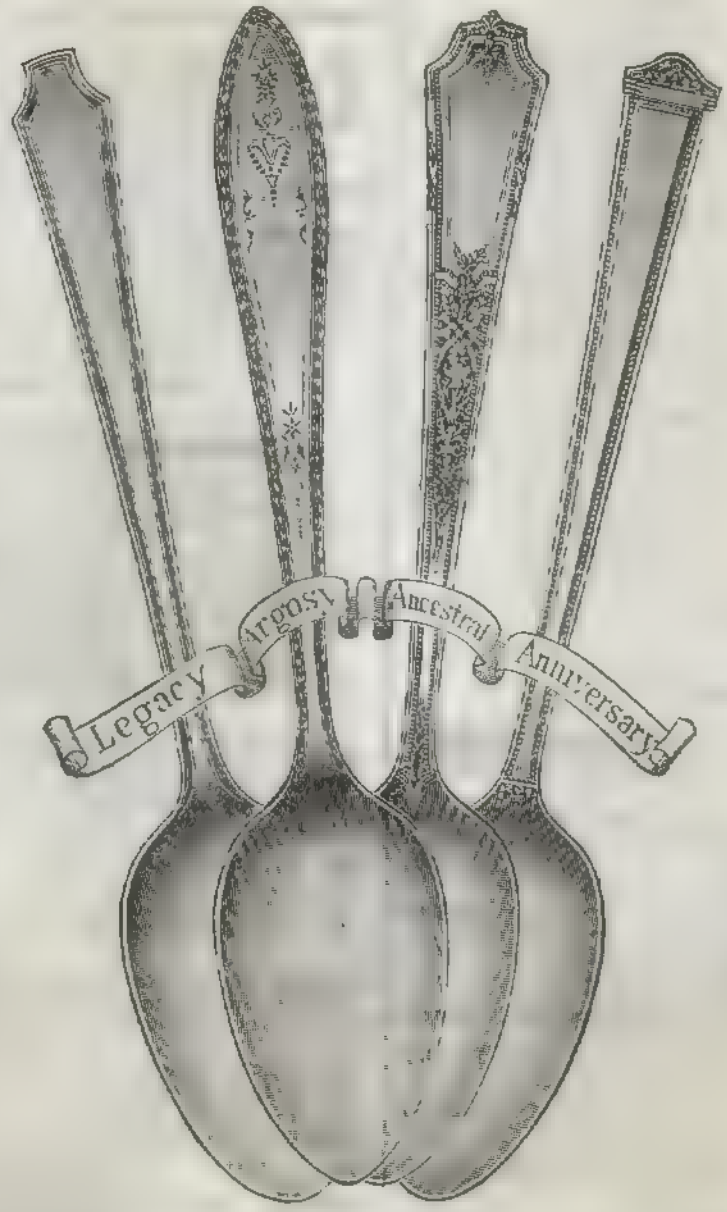
1847 Rogers Bros. has been tested by four generations of social America, and is today the outstanding leader in the field of fine silverware, because time has fully proven it to be worthy of leadership.

LEGACY PATTERN

Moded for today and tomorrow, but bequeathed with the artistry of four generations of yesterday. A beautiful pattern.

ARGOSY PATTERN

A delicate balance, joined with subtle ornamental tracery, is the secret of the gay charm of the Argosy pattern.



Every piece in this time-tested yet smart and modern silverware is guaranteed to give satisfaction without time limit. This guarantee is a most pleasing feature both to the dealer and the consumer.

ANCESTRAL PATTERN

A striking pattern that befits this finest silverware—1847 Rogers Bros. —used by generations of fastidious hostesses.

ANNIVERSARY PATTERN

The simple yet very rich Colonial design suggests cordial hospitality and the atmosphere of family reunion.

THE PATTERNS

Their variety, their adaptability to home decoration and correctness of design —sell silverware. The patterns of 1847 Rogers Bros. Silverplate are particularly salable—among them some one pattern always appeals to a customer —and the reputation of the ware, established through years of consistent advertising together with the guarantee of satisfactory service, makes 1847 Rogers Bros. Silverplate a profitable line for the Dealer to carry. All patterns are admirable and distinct

Toy News

Jack Nagele Enters the Hall of Fame —Almost

On Monday night, April 7th, at the regular weekly meeting of the Monday Night Bowling Club, which, by the way, shatters all precedent by actually meeting on Monday night instead of some other day of the week, Nagele, unassisted, rolled nine strikes in a row. And then, like Casey at the Bat, he broke and ended with a 264 from a perfect 300, just missing out at the finish for being eligible to the "300 Club" and a niche in the hall of fame. Lou Kassler, a fellow member of the club and a tense witness to Nagele's performance, collapsed in the arms of Charlie Icke and was promptly revived by Lou Shoneman and Sig Jacobs. All of these well known toy men are members of the club, as well as Herman Schickler, the toy printer with the double-breasted trousers, and many other prominent bowling ball twirlers of the toy trade. Latest reports have it that a special bowling ball is being manufactured for Nagele and the club "kibitzers" are awaiting its arrival in fear and trembling.

The Buffalo Toy & Tool Works "Washette" 11½" high and 6⅝" in diameter

A Novelty Cap

"Aljak" Nov. Co.'s Caps

Jack Slotnick of the Aljak Nov. Mfg. Co. is well pleased with the way business is coming in on their attractive line of Novelty Caps. One of their feature numbers is illustrated herewith. Other interesting Aljak specialties are Police Station and Aviator Outfits to retail for 10 and 25c

Uneeda Doll Opens Uptown Salesrooms

Uneeda Doll Co., of New York City, have opened an additional display room at 215 Fourth Avenue, New York City, for the convenience of visiting buyers. The entire line of "Sweetums" dolls are attractively shown in modern electrically lighted display cases. Bert Scheuer, their popular representative, is in charge of the new salesrooms. The complete line of this company will be displayed in Rooms 531 and 532 at the Morrison Hotel, during the Chicago Toy Fair, by Bert Scheuer and H. A Sussman.

World's Largest Basket Factory

The Burlington Basket Co. has just completed the construction of the world's largest basket factory. Basket making is one of the oldest industries in the world and until recently its greatest development was found in Europe. Over forty years ago, however, the Burlington Basket Co. began the manufacture of baskets in this country and grew to such a degree that this remarkable new plant was made necessary.

New Buffalo Washer

'Buffalo Toys" introduces another new washer operated by a plunger-type-vacuum disc that washes baby's clothes, stockings, etc. Kiddies can watch the "foam" through the two openings at the top and enjoy the thrill of a real wash. Washette is equipped with a wringer having balloon-type rubber rolls that can be taken apart if necessary. It is finished in a rich pink with attractive black silhouettes as an added attraction. Complete height 11½ in. and 6⅝ in. in diameter. Washette retails at a popular price of $1.25 and sales are reported extra heavy. In addition to Washette, reports indicate that two more numbers, Los Angeles Zeppelin and Aero-Zeps are equally enjoying large sales and the Buffalo Toy & Tool Works at Buffalo state that increased production is now under way.

The "Beach Buoy"

Announcing the "Beach Buoy"

Announcement of the development of a "Beach Buoy," which enables small children to play in safety on the water, has just been made by Clarence E. Fox, general manager of the Fox Toy Company of Berea, Ohio, manufacturers of Foxy Toys. Production will get underway at once, Mr. Fox said, as orders are already being received. The Beach Buoy has a canoe shaped frame, mounted on an especially designed and strengthened tire tube. It is in reality an aquatic kiddie-car, the seat being suspended from the frame, allowing the child to sit in it, in the center of the tube. Free action of the arms and legs is permitted, allowing the child to paddle anywhere it desires in perfect safety. It is the first device of its kind to be manufactured and placed on the market. All parts of the frame are ducoed, preventing it from rusting or disintegrating from the effects of salt water. "We expect a heavy demand for this Beach Buoy," Mr. Fox said in announcing production of the device. "It should be especially popular at the lake beaches and on inland waters. I believe it will be particularly valuable in that it is absolutely safe and a chid cannot possibly upset it or fall out. It will do much to instill confidence in the youngsters and do away with their instinctive fear of water." Dealers to whom Mr. Fox has shown the Beach Buoy have been enthusiastic in their praise of it and the company already has a large number of orders on hand for it. Patents on it are pending. The Beach Buoy is the latest addition to the large line of educational toys, which the Fox company has manufactured at its plant in Berea for the last 25 years.

Brinkman Introduces Skooter Skate

The Brinkman Engineering Co. are introducing a new item known as the Skooter Skate. This is said to be something entirely different from anything which has been on the market heretofore. It is adjustable for children from 6 to 12 years of age, has a toe clamp making straps unnecessary, and is provided with live rubber heels. The entire Brinkman line will be on display in Room 420 of the Hotel McAlpin during Summer Toy Week, June 9th to June 14th.

Visiting Chicago

New Type of Petite Dolls Shown At Chicago

Among the new models exhibited by the American Character Doll Co. is "Sally"—a doll that actually stands upon its own feet and wears its clothes in the long limbed, fashionable manner that is very much the mode. Sally dolls are miniature fashion figures, beautifully proportioned with hair attractively "coiffed," giving them that desired "smart" appearance. The frocks hats and shoes that the Sally group appeared in at the Show created considerable comment.

The other new Petite that shared honors with "Sally" is the "Toddletot" Baby. They are uncommonly pretty and life like. They wear knitted suits and dainty frilled clothes that would do credit to the finest baby department. The bodies are not too soft, for these babies sit up and hold their heads at the most bewitching angles, and last but not least, not only sleep, but also walk. If taken by the hand, they will toddle along in a brisk, baby manner. They are all equipped with high grade crying apparatus, like modern babies really are.

Oak Rubber Counter Display

Importance of "Flash"

Flash is the big word to the vendor of toy balloons on the street, circus lot or carnival midway. By flash he means brilliant, attractive appearance—something exceptionally colorful that will not fail to catch every eye. This flash is just as important to any store which handles toy balloons.

To meet this need for exceptional attractiveness with a minimum stock, The Oak Rubber Company, of Ravenna, Ohio, has introduced the Carnival Special assortments. Nine of the most popular balloons in the Oak line are used to make up two assortments, one of compound, or opaque, balloons and the other of transparent balloons. Both are packed one gross to the box.

Louis Rubin Starts His Own Business

Louis Rubin, who has been associated with the doll trade for many years, specializing in the manufacture of Doll Parts, has recently formed the Artistic Doll Corp. Mr. Rubin's new company will manufacture a complete line of high grade doll parts. The plant is of substantial size and contains ample modern machinery.

Enjoying Pal Picture Player "Talkies"

Men, Markets, Merchandise

Uncle Sam's Chromium Banks

In line with his policy of constantly improving the line, H. H. Payson, president of the Durable Toy and Novelty Corp., has recently added a new addition to the Uncle Sam's Bank line. Known as Uncle Sam's Chromium Bank, it is, as might be expected from its name, beautifully chromium plated, and has a bright, satiny sheen that will never tarnish or wear off. This new Chromium Bank adds a new and appealing touch of beauty to the Uncle Sam's Line. It should find favor with those who seek not only a strong, practical registering bank of proven mechanical perfection, but an attractive ornament for the home as well.

New Lumber Truck By Gibbs

The Gibbs Manufacturing Company, of Canton, Ohio, state that their New No. 38 Lumber Truck has met with an unusually large sale. This toy is a sturdy, all-wood truck, loaded, ready to go, with smooth lumber to build play structures. It is enameled in bright colors and measures twelve inches over all. One toy in box to retail for 50c.

Pal Picture Player

The illustration shows the Pal Picture Player in use. This machine is the product of the Plaza Music Co., and they report a widespread demand for this recently introduced item. Slides are furnished illustrating various children's stories, and records telling the stories are played while the pictures are being shown. The "talkie-picture" action is synchronized automatically, the child simply putting on a record, dropping in a strip of film and starting the machine. The picture changes every ten seconds, and there are eighteen views to a ten inch record. No screen is necessary, as the pictures can be shown on a wall or similar surface. Many different subjects are available, so that children can enjoy quite a complete show with the Pal Picture Player.

How Others Do It

WHEN a credit customer moves away, he often neglects to leave his new address behind him. A Wichita, Kansas, store nevertheless manages to locate him through the medium of its credit card. On this card, in addition to the usual information, a charge account is required to note the lodge or insurance company he belongs to. People will invariably notify lodge or insurance company of a change in address where they might forget to notify others, and the store finds it profitable to keep in touch with such institutions.

For a long time, a merchant in Des Moines, Iowa, has maintained an "Appointment Register." This is a book placed just inside the main entrance of the store; and in it, customers can write where they will meet their friends or where they have gone if they were to have met them and wish to leave before the friends arrive. Not only is the register an active builder of goodwill, but it is also a source of live names for the concern's mailing list.

Ingenious indeed was a window exhibit recently featured by a Newark dealer. The floor of this window, covered with overlapping strips of alternating black and red paper, resembled a huge checkerboard. In place of checkers, however, were used various various items of merchandise, which were placed on the black squares in much the same way as checkers would be lined up at the start of a game. A streamer spread clear across the face of the window screamed: "It's Your Move. Come In."

To hold in mind over a period of years all the displays that a merchant creates is obviously impossible. One retailer therefore keeps a written record. On this he notes the amount of business pulled in by each display as well as the various factors attending it at the time it was exhibited, such as 1:. method of arrangement; 2. character of the merchandise shown; 3. time of the year; 4. special occasions; 5. weather. This merchant even goes to the extent of making sketches of the layouts used.

With this record to refer to, the retailer is thus able to evolve new windows, not by guesswork but with the methods shown by the record to have been successful in the past.

"At least 50% of a store's trade should be composed of old customers," believes the manager of a St. Louis store. "If it isn't, then the store is not selling satisfaction along with its goods." In this store, the salesmen are therefore instructed to find out from each patron whether he has ever purchased there before or not. The information, listed briefly on each sales check, is compiled at the end of the day. Should it reveal a spareness of "come again" buyers, a letter is sent out asking frankly if anything is wrong.

There are two retailers in Spartanburg, S. C., who are firmly convinced that intercooperation pays. (These retailers, to be sure, are in business that are not competitive with each other.) For a long time, each of these concerns has devoted one of its windows to the display of merchandise kept by the other. A small announcement indicates where the goods can be secured. As the stores are located in different parts of the town, this exchange of displays gives their window advertising wider latitude.

"Only a store" was the headline of an advertisement released a while back by a merchant in Buffalo, N. Y. The advertisement reads:

"We have no odd prices to deceive, no stamps, no tinsel show, no catchpenny schemes of any nature, no bad charge accounts for you to pay for, no fancy fixtures, no expensive delivery systems, no P. M.'s to clerks to force you to buy unsalable merchandise, no turnover men so you can't get out with a whole shirt if you don't buy, no fancy expressions, no hired brains, to write mushy or slushy advertising, no high salaried wall flowers. There is nothing to pay for but the goods you buy."

"The only kind of a salesman I will hire," states the proprietor of a New York store, "is the kind I am willing to invite into my own home." Bearing this simple little rule in mind has enabled this retailer to build up a staff composed of men of real courtesy, tact, and character. Where he is in doubt about a particular individual, the manager invites him to his home for dinner, and then finds out from the woman of the house whether she would care to invite him back again.

Mirrors hold nothing but good luck for a store in Cincinnati. Covering the whole back wall, for instance, is a big highly polished mirror which makes the store seem much, much larger than it really is. Gaining the air of a big store at the mere cost of a mirror is of course good business.

Even though he had failed to obtain a location on the principal street of Walla Walla, Wash., a local merchant nevertheless secured for his store a reputation for being centrally located. He established his store not far from the main thoroughfare and in the vicinity of a long-established concern known as The Bee Hive. Then, capitalizing on the prestige of The Bee Hive, he created and used in all his advertising matter the slogan: "First Street—49 Easy Steps From The Bee Hive."

A SECOND TOY FAIR *in* NEW YORK

Buying Groups Enthusiastic Over Summer Toy Week

A SECOND Toy Fair, designed especially to meet the requirements of department store buyers and other retailers, to be held in New York beginning either the last week in April, or the first week in May.—This, according to the executives of about 15 buying offices, representing more than 600 department stores, is what will meet the necessities of modern retail distribution in the toy industry.

At the invitation of L. K. Anderson, Jr., President of the Toy Fair Chamber of Commerce, about 30 executive heads of leading buying offices came to a dinner at the Hotel McAlpin on Friday evening, April 25th. The plan of the dinner was to have these executives meet the directors of the Toy Fair Chamber of Commerce and express as freely and as fully as possible just what the large retail distributors of the country needed from toy manufacturers in the way of a definite period during which the manufacturer could rely upon the buyers for retail establishments making final selections

In opening the meeting, President Anderson made it clear that the Summer Toy Week for 1930 was instituted as an experiment and as somewhat in the nature of a compromise. The date was fixed so as to avoid interference with Toy Fairs already announced for 1930. It was not established as setting a definite period either as to date or duration; it was established to get something started and to help bring about a definite expression of opinion from the buyers, for whom Summer Toy Week is intended. With this statement and a few words of welcome, the meeting was opened for general discussion.

A Unanimity of Opinion

While a certain amount of agreement as to the time was expected, it was also thought that a good deal of compromise would be necessary, that opinions as to the proper time would vary by weeks and months. The result of this get-together conference was actually a revelation. Speaker after speaker voiced the opinion that the second Fair should start either during the last week in April or the first week in May. Reasons given were real reasons and seemed to apply to practically all of the establishments represented.

It was clearly indicated that the retail buyers would not be in a position to go ahead with complete holiday orders until the Easter business was out of the way. Several of the speakers mentioned the fact that their toy buyers were also buyers of sporting goods and that during the entire month of June they were required to be right on the job in their own stores in connection with that line. Another point brought out was that other toy buyers bought housefurnishings and housewares, and

L. K. Anderson, Jr.

Opening Remarks by President L. K. Anderson, Jr., at the Meeting on Summer Toy Week

"I T is gratifying indeed to have so many of you present at this, our first "Get Together Meeting." I wish to express to all of you my thanks for your being here this evening and particularly desire to express to our guests the appreciation of the Directors of the Toy Fair Chamber of Commerce for meeting with us.

"So that no delicate appetites will be affected by the lively discussions that may take place, I am going to suggest that we leave our regular business proceedings until after dinner—we want no catastrophies tonight.

"I do hope that in trying to solve some of the problems, which are present today in our industry—one of the problems being to designate a period most suitable for a Summer Toy Week—that each and every one of you will not hesitate to express your views and to join in the general discussion. This is absolutely necessary if we are going to get anywhere."

that many meetings in that particular industry are held in June. The astonishing thing was after all the expectation of difficulty in arriving at some period of time which would suit both seller and buyer, the decision came full-grown, almost out of the air. Everybody seemed to know just what they wanted, and they all seemed to want just the same thing, and thus the mountain of difficulty shrank to a mole-hill.

February Fair a Necessity

Several speakers emphasized the fact that a February Fair was an absolute necessity, not only for wholesalers, catalog houses, etc., but for many retail buyers. It was stated that buyers who planned to go abroad needed to see what was new in the American market before starting on their trip. The offerings of the domestic manufacturers were carefully gone over and plans for foreign buying modified, in accordance with what was shown. While these buyers would not and did not expect to place orders at the early Toy Fair, they needed these displays for guidance, and they needed them early in the year.

A second Toy Fair, and not a later Toy Fair, is the absolute necessity of modern business methods, and this necessity was clearly indicated and fully explained during this first meeting between the manufacturers, as represented by the Toy Fair Chamber of Commerce, and the retailers, as represented by the executives of their buying offices. The necessity of an early Fair, which has always been stressed by manufacturers and which has been considered as being necessary for wholesalers and catalog houses, was clearly shown to be just as necessary for the retailers themselves. It was clearly recognized that buying methods have changed with passing years. It is necessary for buying orders to be confirmed, and this process takes time. With the second Toy Fair in New York coming about the 1st of May, confirmations should begin to come in during the month of May and continue during the whole of June and the early part of July.

A number of speakers mentioned the value of meetings at which representatives of manufacturers and distributors could meet together and discuss their problems. If future meetings prove that fancied difficulties can be overcome by round table discussion, if they continue to demonstrate that the distributor is ready and anxious to cooperate with the manufacturer and to find out just how the needs of the distributor can be met by the manufacturer on a sound economic basis, then these future meetings will be of enormous importance to the toy industry.

Guests Who Attended

A list of the guests, together with the names of the organizations represented by them, follows:

Wm. Angrove, Syndicate Trading Co.; H. C. Annable, Syndicate Trading Co.; L. B. Ashton, Cavendish Trading Corp.; G. Connolly, Dry Goods Alliance; N. C. Dewes, McGreevey, Werring & Howell, Inc.; Edw. Freedman, American Retailers Assn.; James L. Fri, National Retail Dry Goods Assn.; H. Gessner, Interstate Department Stores; I. Gottlieb, Schranz & Bieber Co.; Mr. Heinbockel, Dry Goods Alliance; S. Hirsch, Interstate Department Stores; L. T. Huston, Frederick Loeser & Co.; D. Knieriem, Felix Lilienthal & Co.; A. Lefkowitz, Jack Hartblay, Inc.; Geo. J. McCartin, Associated Merchandise Corp.; H. Myers, Kirby, Block & Fischer; O. J. Radin, McGreevey, Werring & Howell, Inc.; R. G. Raitt, Cavendish Trading Corp.; Sydney Rosenberg, American Retailers Assn.; H. D. Ruhm, Associated Dry Goods Corp.; C. D. Ryan, Hahn Department Stores; S. Schlesinger, Hahn Department Stores; Jos. Schoenberg, Associated Merchandise Corp.; Geo. Vogel, Frederick Atkins; Walter Weedon, Associated Merchandise Corp.

Does Not Use Stagger Plan

THE Interstate Department Stores, Inc., 113 Fifth Avenue, who operate a chain of popular-priced department stores, have not adopted the "Stagger Plan" in the purchase of merchandise, according to Mr. Henry Gessner, General Merchandise Manager of the chain.

Mr. Gessner stated that he has found that after years of experience, that it has proven most satisfactory to permit salesmen with their samples to come to the office in the morning, at the designated hours from 9 to 11 o'clock, and that in special cases where the Interstate Department Stores desires to look at special lines, that this can be arranged by appointment with the office and various buyers.

The Interstate buying office has been arranged in such a manner that salesmen are now receiving even better service in making their contacts with the various buyers.

Mr. Clem Melancon has joined the Interstate Department Stores, Inc., as District Manager.

He will supervise: John Stillman Co., of Battle Creek, Mich.; Fair Dry Goods Co., of Flint, Mich.; Stillman's Dry Goods Co., of Ft. Wayne, Ind.; Lansing Dry Goods Co., of Lansing, Mich.; Stillman's Dry Goods Co., of Jackson, Mich.

Mr. Melancon will make his headquarters in the Fort Wayne unit, according to Mr. Leo G. Federman, President of the Interstate Department Stores, Inc.

Mr. Melancon was at one time connected with the Interstate Department Stores, Inc., and recently sold his business to again join them in the above capacity, according to Mr. Leo G. Federman, President.

Morning Shopping Urged

TO RELIEVE afternoon traffic congestion by switching a percentage of shopping over to the morning hours, the Ohio State Council of Retail Merchants is cooperating with transportation agencies in the State. A publicity campaign has been undertaken, to point out the satisfaction and comfort derived by the shopper through avoiding rush-hour crowds. Operators of parking garages and spaces are reported as offering special morning rates and in certain cities the larger stores have combined on a program of early morning bargain offerings.

Opening Day Flashes From
CHICAGO TOY FAIR

Robert H. McCready Wires Impressions As This Issue Goes to Press

Weather—Warm and cloudy.

* * *

More exhibitors than ever before.

* * *

Many new lines shown

* * *

More elaborate displays

* * *

First day's registration of buyers best ever.

* * *

Walter Fleischaker receiving many congratulations.

* * *

Chicago Toy Fair Association membership now numbers 250.

* * *

This number largest in its history.

* * *

Buyers' meeting every evening for round table discussions.

* * *

Speakers of note to appear at these meetings.

* * *

More than 300 toy lines on display.

* * *

Special 85c dinner in lounge of Morrison Hotel for toy buyers.

* * *

Informal meetings of buyers held during these dinners.

* * *

Information booth in the Morrison.

* * *

Another information booth in the Palmer House.

Many new displays at Hotel Sherman.

* * *

Big doings expected for the banquet.

* * *

Committee reports ticket sale going over big.

* * *

Committee has Ted Dowst as Chairman.

* * *

Helping him are A. C. Bissell, Fred Goetz, W. A. Huston and J. N. Shure.

* * *

Chairman Dowst promises much in the way of novelty for banquet show.

* * *

Exhibitors are registering visiting buyers.

* * *

Official headquarters of buyers in lobby of Morrison.

* * *

Official registry of buyers also in lobby of Morrison.

* * *

No delay in preparations—all exhibits ready at the opening.

* * *

Directors' meeting Sunday night, April 27th.

* * *

Consideration being given to open meeting on May 8th.

* * *

Ex-Presidents to be members of Board of Directors

* * *

Tentative date for 1930 Fair Week after Easter.

Has Your Store LIFE *and* ACTION?

Proper Layout a Necessary Spring Tonic for Toy Sales

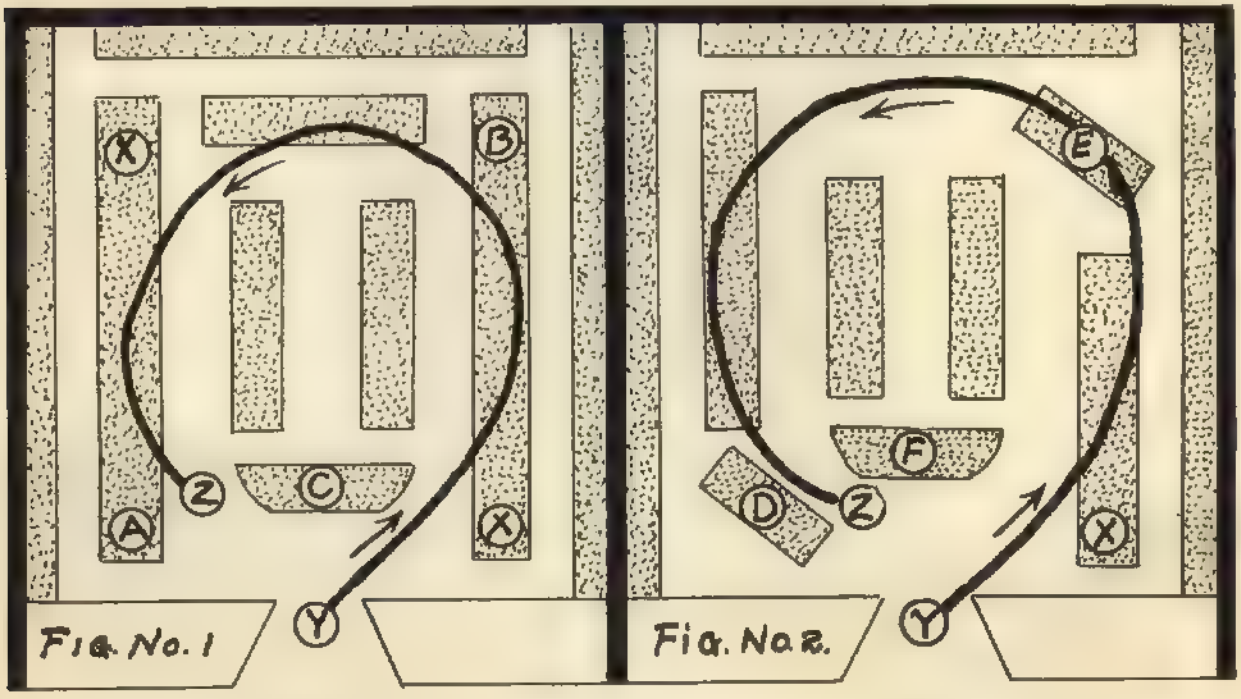
IF the toy shop proprietor will set a camera in the doorway and take a picture of the interior of his shop, he will discern just what the average visitor sees when he steps across the threshold, except for the color of the furniture, fixtures, decorations and merchandise. Does the picture contain LIFE and ACTION which induce the desire to spend money?

We have been urged to put life and action into our newspaper, direct-mail and outdoor advertising, and in our window displays. We should by all means put it also in the arrangement of our stores—those places where the final sales effort is made.

Art Principles Involved

Some of the principles involved in art are applicable to the toy shop arrangement, as many dealers already have learned. Art critics tell us that, when viewing a picture, the eye starts at the lower left corner of the canvas, swings across to the upper right, thence over the top to the left and then downward and toward the right. Artists endeavor to place the various objects in their pictures along this path and strive to encourage the eye to follow its natural bent. Hence, one seldom if ever sees a pleasing picture in which the composition is geometrically balanced. An absolutely geometrically balanced drawing is formal in its tone and is devoid of life and action.

Reproduced here are two sketches illustrating the floor arrangements of two toy stores, one with the entrance exactly in the center of the store front; the other with the door to one side. For each type we have two illustrations, one where the arrangements are formal and lacking in life and action; the other informally arranged, but balanced, and containing these desirable sales building attributes.



Wrong **Right**

Sketches illustrating two arrangements of a toy shop where the entrance is in the middle of the store front. In Figure No. 1 the arrangements are formal and geometrically balanced. Four dead spots, designated by A, B, and X's are evident. Figure No. 2 is of the same store informally arranged, yet balanced. Only one probable dead spot is evident. It is X. The irregularly curved line in each figure represents the visitor's line of view as he stands on the threshold and takes in a picture of the store.

CARBIDE LAMPS

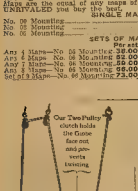
Globes



Suspended Globe

The globe is suspended by a strong mesh cord with counterbalancing weight and can be raised and lowered at will. When in use it is drawn down to any desired height. When not in use it is set out of the way housed in space. A counterbalance weight, 8 or 9 oz. is used to keep the globe in position. The "Moon Ball" weight is round like a sphere, one half being painted white, the other half black, to illustrate the phases of the moon.

With Moon Ball Weight

Heater

Hand tailored for comfort and fit. As the name indicates the Heater Hug-Tite Helmet hugs the head exactly like a fine glove fits the hand. At every point—over the head—around the forehead, cheeks, chin and neck it hugs-tite, keeping out the rush of air and assuring comfort. The wide extension on the right side fits comfortably under the chin and the strap fastener is entirely on the outside of this extension, eliminating possibility of irritation.

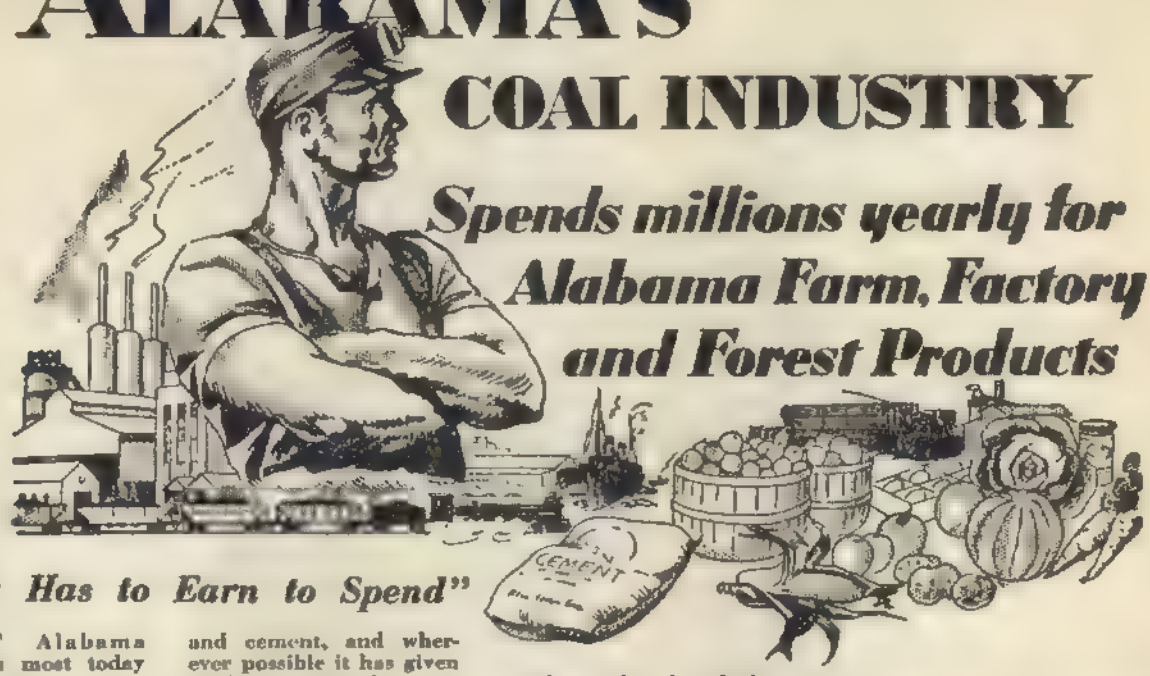
ALABAMA'S COAL INDUSTRY

Spends millions yearly for Alabama Farm, Factory and Forest Products



"Labor Has to Earn to Spend"

WHAT Alabama needs most today is a bigger and a better home market. What Alabama is now actually facing is a shrinkage in the market already here.

For many years, Alabama's coal industry has been Alabama's biggest cash customer for Alabama farm, factory and forest products. Its purchases have aggregated many millions yearly. It has been a steady customer for almost everything that grows from Alabama soil—corn, hay, oats, produce in vast quantities. It has been a regular consumer of Alabama livestock, dairy products and poultry. It has been a big buyer of supplies and equipment made by scores of Alabama industries. It has been the principal contributor to Alabama's railroad freight revenues. It has built its villages and tipples from Alabama brick, lumber, and cement, and wherever possible it has given preference to the products Alabama makes and grows.

More than any single industry, Alabama coal and coke have been responsible for the prosperity which Alabama has enjoyed. During the nationwide depression of 1920-21, Alabama did not feel the full effects of *hard times* because Alabama's coal industry was running almost *full time*.

One of the big reasons why Alabama is now feeling so severely *this* depression, is because Alabama coal mines are now running only one to three days a week. The big buying power of the coal industry has been cut down by outside competition—natural gas, and electricity (even though produced in Alabama) which employ but little Alabama labor in proportion to coal mining. It is not alone the coal producing counties which have suffered. Every section of the state has been blighted by the backfire.

Every time the Alabama coal and coke industry loses a customer to Natural Gas and Electricity, an Alabama farmer loses some portion of his biggest and his best home market. Every time an Alabama plant replaces Alabama coal with another form of fuel or power, it is limiting its own home market and its own future growth.

For one hundred years, the welfare of the Alabama coal industry and the welfare of our state have been irrevocably linked. To continue to forge forward they must travel hand in hand and side by side.

This is the third of a series of advertisements published by Alabama Coal and Coke producers about Alabama Coal and Coke

COAL and COKE

Are the Most Economical, Dependable and Satisfactory of All Fuels for Power Plant Purposes or Home Heating.

According to reputable engineers:

COAL will cost in Alabama, on the average, for power plant purposes, about ONE-HALF AS MUCH AS NATURAL GAS and in larger industries about SIXTY PER CENT as much as purchased ELECTRICITY.

FOR HOME HEATING, Coal and Coke will cost anywhere from ONE-THIRD to ONE-HALF as much as natural gas, depending on the grade of coal used.

Any industry or home owner, desiring verification of the foregoing statement, is invited to write to the Alabama Mining Institute, Webb Crawford Building, Birmingham.

Aside from this question of ECONOMY—which in these trying times is an all important question whether you are operating an industry or home—these facts about coal and coke should always be remembered:

Coal and Coke are available whenever you require them. Your supply does not depend upon the weather or a long distance pipe line. When you burn COAL or COKE, you'll never have to fear furnace shutdowns for lack of fuel, breakdowns from mechanical failures, exhaustion of supply or interruption in your service. Coal and Coke do not leak, trickle or explode. Coal and Coke are safe, dependable and economical.

Unless you have money to burn—burn COAL or COKE!

ALEXANDER DOLLS

Created and Designed by Madame Alexander

You'll Be Delighted with These New Creations

Genuine Heavy Solid Sterling Silver Tableware

Theseum Pattern. **Historical and Beautiful.** **Lovely Gray Finish.**

In the Theseum pattern you will find real beauty and appeal. It is a real masterpiece in classic designs, historically rich and interesting. Theseum is the best preserved Greek temple on the Acora at Athens, dating from about 421 B. C. and erected in honor of Theseum, the an lent King of Athens. The same strength, massiveness and classic beauty that characterized Theseum of old has been transformed by an eminent designer into this charming pattern, which is "Wrought from Solid Silver."

Never have such remarkably low prices been offered for this magnificent pattern as presented in this sale. The value is truly extraordinary.

Illustration herewith Actual Size.

ALVIN

Meet SALLY—youngest of the moderns—tall, clean limbed, trim as a sapling—Miss America herself. Saucy, jaunty, appealing—tugs at the heart strings of little children.

TODDLE-TOT

THE MODERN PETITE BABY

Youth must be served...TODDLE TOT is an exciting adventure for the modern miss—a doll that's something MORE—a playmate that toddles on its own feet, tilts its head in the quaintest baby way—cries and sleeps . . . . .

Has a soft, cuddly body that little mothers love to hug.

REAL? . . . . well! Just look at it yourself

During the June 9th Toy Week, our executives and sales staff will be in our showrooms to serve you.

Dime	3¾x3⅞x3¼	1	$1 25

LUCKY SAVINGS BANKS

Three-Coin

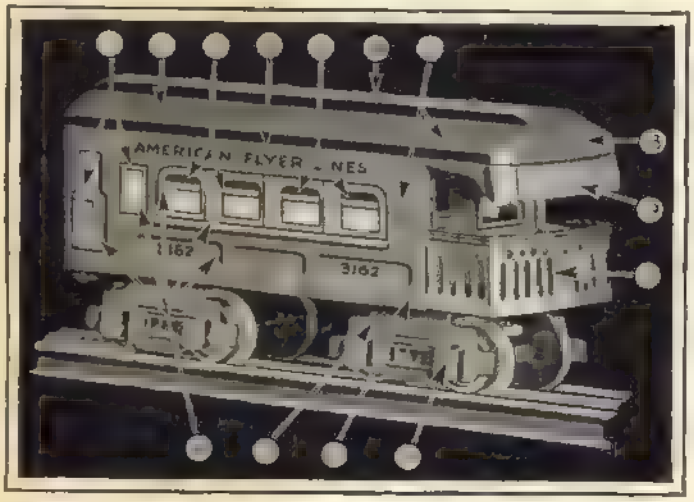
Bell rings once for a nickel, twice for a dime, five times for a quarter. Bank opens automatically when $10.00 have been registered. Beautifully decorated Ech-Kraft design showing various emblems of good luck.

NO.	Size In.	lb Each	EACH
Lucky	5¼x5x4	2¾	$2 75

"American Flyer"
Transformers Electric Trains Mechanical Trains

THE *PREMIERE* TRAIN LINE OF AMERICA

Construction of this car same as on our $7.00 train, with single trucks.



Comparison is invited. Send for samples and illustrated price list

The superiority of American Flyer trains is *inbuilt.* Long life and performance are obtained by building strength, efficiency, and dependability into individual units. For example, the illustration above is typical of the cars on the Narrow Gauge trains. The features incorporated in these cars have heretofore been confined only to much higher priced trains. There are no finer nor more durable cars made anywhere.

DYALTYPE TRANSFORMERS

American Flyer DYALTYPES are strongly and carefully constructed and with ordinary use will last indefinitely. They are fully guaranteed to be mechanically and electrically perfect when they leave our factory. Complete operating instructions are packed with each transformer. The pointer on the knob indicates on the direct reading chart the voltage being used. Nothing like it on the market. Distinctly an American Flyer product. Write for further information

PATENTS PENDING. May be had in the following sizes:

Model No.	*Watts*	*Volts*	*Cycles*	*Consumer Each*
1289	50	110	60	$3 50
1257	50	110	25-40	4 25
1290	75	110	60	4 25
1252	75	110	25 40	5 50
1295	100	110	60	6 25
1262	100	110	25 40	8 50
1296	150	110	60	8.00

14 POINTS OF SUPERIORITY

1. BRASS DOOR AND WINDOW. These are fine reproductions in solid brass.
2. SIZE. Note the impressive width.
3. WINDOW FRAME. This feature is a brass detail beautifully embossed.
4. LETTERING. High quality "leaf" lettering is *pressed* into the enamel to stay. This is done by an electric process and not merely stamped on. This adds to the attractiveness of the cars.
5. WINDOW SASH. This is hand decorated in color.
6. STREAMLINE ROOF. The upper part of the roof runs the *entire* length of car and has imitation ventilators just like on the *real* Pullmans. This one piece roof has no exposed screws to mar its beauty.
7. ENAMELED FINISH. The side is finished in a lighter tone enamel and the roof in a darker shade. The enamel is baked on at a high temperature, which is proof against the effects of weathering and will preserve its luster indefinitely.
8. ROUND ROOF END AND SIDE. No sharp corners to mar the beauty of this car.
9. CANOPY. This is a *separate* piece of brass highly polished.
10. OBSERVATION RAIL. This realistic detail is also of polished brass.
11. JOURNAL BOX. This separate brass detail is standard equipment on all cars.
12. ASSEMBLY. Sides and bottom permanently secured by eyelets, not nibs turned over. Exclusively American Flyer.
13. DOUBLE TRUCK. Two swivel trucks with eight wheels are equipped on all but two trains. The trucks are finished with french gray enamel.
14. EMBOSSING. As indicated, it adds strength and detail.

Meet us at our permanent exhibit, Room 452-454—200 Fifth Avenue, New York City

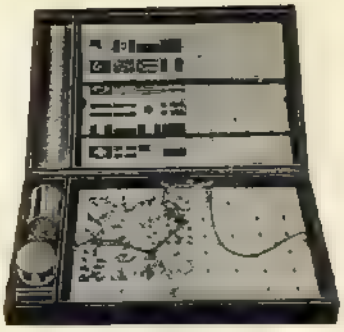
KNAPP MASTER MAGIC

They must be good! Only a year on the market, Knapp Master Magic sets have outsold all others wherever shown. That speaks volumes! Selling all year 'round and selling big. Most complete line of magic ever offered. Mystifying illusions of foremost magicians. Three sets, each entirely different. And priced *"right"*.



No. 325, list price, $3 50; without battery $3 40
Denver and West, $5.75, without battery, $3.65

KNAPP ELECTRIC QUESTIONER

YEAR IN, year out, *for 39 years* the Knapp Electric Questioner has held sway as one of the most popular and profitable of educational toys. This year selling better than ever. Education with unusual entertainment is its big feature, plus—*for you*—the demonstrative value of the electrical device.

No. 399. List price, $3.50
Denver and West, $3.75

KNAPP TELL-BELL

COMPANION to the Knapp Electric Questioner and already rivalling it in sales, though only introduced last year. Improved with new colorful box, new cards and a new low price. An all year seller to all ages. Mystifies and amuses as it instructs.

List price 50¢. Denver and West 55¢

KNAPP PYRAMIDS

YOU KNOW what happens when a popular game becomes a craze! Biggest profits are made then. Pyramids is a craze and it's sweeping the country. A modern version of a puzzle that baffled ancient Egypt. A brain teaser for young and old. Cash in!

DEALER SERVICES FOR 1930

New 48 Page Colored Catalog →

The entire line of American Flyer Trains, Equipment, Airplanes and Structo Toys is illustrated in full color —just like having the merchandise in front of you. Now available.

WRITE FOR YOUR COPY TODAY

AN ever increasing number of jobbers and dealers are finding that they make more money with the American Flyer Line because of American Flyer's sound sales policy, which has resulted in an *unusual degree of consumer price stability.*

There are no other trains comparable to American Flyers in appearance, exactness of detail, color harmony, durability, speed and extreme simplicity of operation.

For 1930 American Flyer's efforts to service the trade are complete in all details, from the proper packing of the merchandise to demonstration equipment and other store aids, not overlooking space in the country's leading publications and newspapers.

DISPLAY EQUIPMENT

Train Display Stands. These stands are proven merchandisers, and are equally adapted to counter or window display. There are five stands in all. Write for full information.

Equipment Panel Boards. They allow your customers to select quickly and intelligently the models that interest them. There are five in all. Write for full information.

9 Additional Services at Your Command

Envelope Enclosures. Illustrates popular Narrow and Wide Gauge Electrical Trains and Equipment. Space is provided for your imprint. Ready September 1st.

Merchandise Catalog. Illustrated in full color and describes practically the entire line. This is a convenient miniature catalog and is a sure sales producer. Ready September 1st.

Magazine and Newspaper Advertising. During November and December, American Flyer will use the leading magazines and newspapers in a National Advertising Campaign reaching thousands of prospects.

Window Display Cards. Attractively designed and will establish your store as headquarters for American Flyer Trains.

Window Streamers. Over 5 feet long. Now available.

Truck Banners. 4 feet by 3½ feet, printed in color on waterproof cloth.

Catalog Layout Service. Our Advertising Department is always ready to assist you in laying out catalog pages.

Electrotypes. Complete Electrotypes for catalog purposes now available on all American Flyer and Structo items.

Illustrated Price Lists. Now available on both American Flyer and Structo.

A Comparison is Invited—Send for Samples and Catalog.

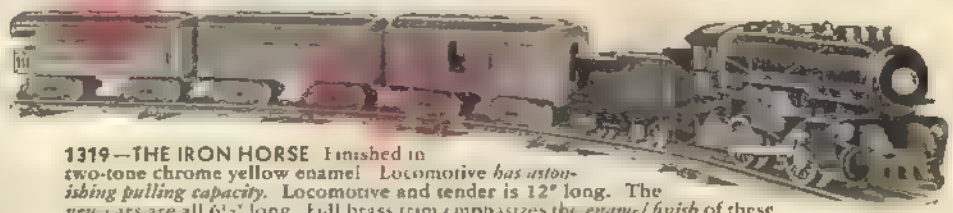
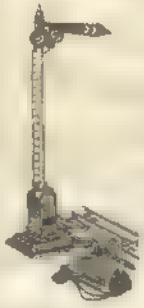
NEW NARROW GAUGE STEAM TYPE TRAINS



1319—THE IRON HORSE Finished in two-tone chrome yellow enamel. Locomotive *has astonishing pulling capacity.* Locomotive and tender is 12" long. The new cars are all 6½" long. Full brass trim emphasizes the *enamel finish* of these *double truck* cars. Eight curved and four straight track. Retail Each....$11.50

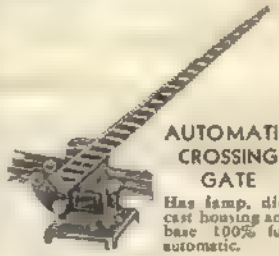
NEW ELECTRICAL EQUIPMENT



TRAIN CONTROLLING SEMAPHORE

Included also is a controlling switch which allows the operator to control the train from a distant position.

No. 1041 for either narrow or wide gauge. *Retail Each* $6.00



AUTOMATIC CROSSING GATE

Has lamp, die-cast housing and base 100% full automatic.

No. 2042 Narrow Gauge. Retail Each.....$4.50

No. 4042 Wide Gauge. Retail Each $4.75

DYALTYPE TRANSFORMERS

Operates similar to the tuning knobs of a radio. Pointer indicates on direct reading chart the voltage being used. Nothing like it on the market distinctly an American Flyer Product. Write for further information.

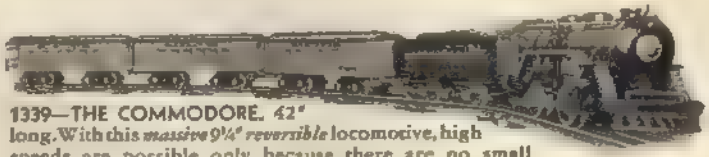
Compare the Pulling Power of These Locomotives

The new massive steam type locomotives made from heavy castings hold the rails and out-pull all locomotives made of lighter material. Locomotives and tenders are very realistic and are in true proportion to the cars.

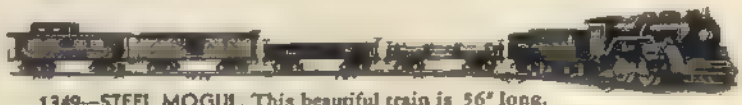
The 1319—IRON HORSE and most of the other narrow gauge trains are equipped with entirely new enameled finished cars with full brass details.

Four of the six steam type narrow gauge trains are illustrated here. They are priced right to attract volume selling.

1321—OLD DOMINION. A sturdy attractive train 44" long. Four *new freight cars* with solid brass journal boxes, hand rails, brake wheels and ladders bring out the details of these 6½" long, *double truck cars.* Eight curved and four straight tracks. Retail Each.....$12.00



1339—THE COMMODORE. 42" long. With this *massive 9¼" reversible* locomotive, high speeds are possible only because there are no small pilot wheels to jump the track. The *eight wheel* tender is very realistic. The new cars are each 8¾" long, *with lights* and *etched nameplates* and are finished in tan *enamel* bodies with green roofs. Eight curved and six straight tracks. Retail Each.....$18.00



1349—STEEL MOGUL. This beautiful train is 56" long. Consists of the well-proportioned 14¾" *reversible* locomotive and *8 wheel tender,* log car, sand car, automobile car and *lighted* caboose. Cars are 9½" long, and are finished in bright enamel and have solid brass details throughout. Eight curved and eight straight tracks. Retail Each.....$20.00

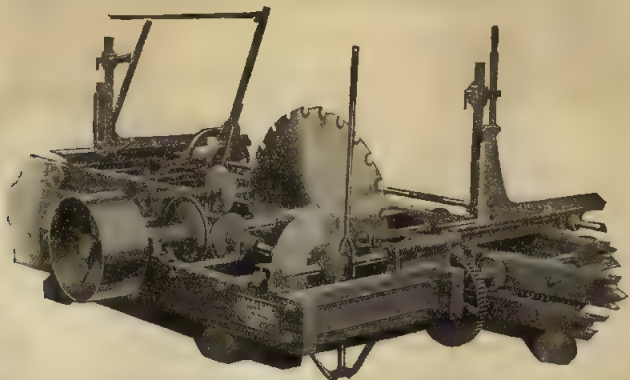
"American" Improved Variable Friction Feed Saw Mills



These mills are light running, easy to install, and do not easily get out of order. The latest improved features are embodied in their design, which enables them to cut more timber than other mills using same power.

Variable Feed—Bevel frictions are used as drivers, insuring positive motion, reducing end and lateral thrust, and maintaining a wide range of feed variation. The "gig back" is also positive and will start on highest speed without any slipping; it is many times faster than the feed.

Husk Frames are made of selected timber, well bolted together and thoroughly braced. All shafts are turned and ground perfectly true, and run in self-oiling bearings throughout.

Carriages are of sufficient strength to withstand any reasonable load and hard usage to which saw mill carriages are usually subjected.

Trucks—On all carriages trucks are large diameter, fitted with steel axles running in self-oiling babbitted boxes, with ample provision for taking up all lost motion, and accurately turned to perfectly fit guide track.

Track furnished is rolled steel in 12-foot sections and furnished with suitable holding down spikes.

Set Works—We usually furnish patented combination set works and quick receder, which are accurate and possess many advantages. Two or three pulls of lever will recede the blocks as far as is usually required. We can also furnish the larger mills with double acting set works and spring or foot receder as may be ordered.

Carriage Drives All standard mills are furnished with rack and pinion carriage drive, but manila or wire rope drive will be supplied, if preferred, with small additional cost.

Equipped with board roll spreader wheel and saw guide.

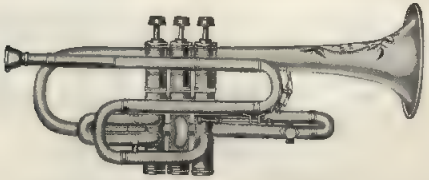
American Professional Band Instruments

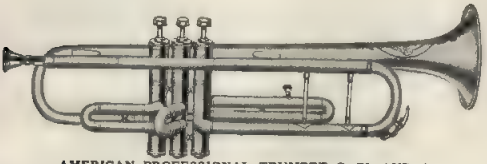


LONG MODEL CORNET—Bb QUICK CHANGE TO A

This professional long model cornet possesses tonal beauty and easy playing qualities to a degree far in excess of the ordinary model. It is built in B-flat, with quick change to A. The German Silver valves are of star construction, carefully ground. The top valve buttons are of pearl. Each cornet comes with music rack and silver plated mouthpiece. The length is 16⅝ inches; the diameter of bell is 4½ inches; weight is 2⅜ lbs. Your choice of two finishes. Distinctive high quality throughout.

9G70162 Highly Polished Brass Finish. PRICE..... **$48.50**

9G70163 Heavily Silver Plated, satin finish; inside of bell gold plated and hand burnished. PRICE..... **65.00**

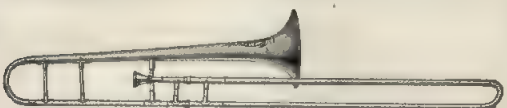


AMERICAN PROFESSIONAL TRUMPET C, Bb AND A

As this trumpet is built in the Key of C, low pitch, you can play violin or piano music without transposition; quick slide changes to Bb and A. The top valve buttons are of pearl. Complete with music rack and silver plated mouthpiece. Length is 22½ inches, diameter of bell, 4½ inches; weight is 2¾ lbs. Your choice of two finishes

9G70164 Highly Polished Brass. PRICE..... **$54.00**

9G70165 Heavily Silver Plated, satin finish; inside of bell gold plated and hand burnished. PRICE..... **70.00**

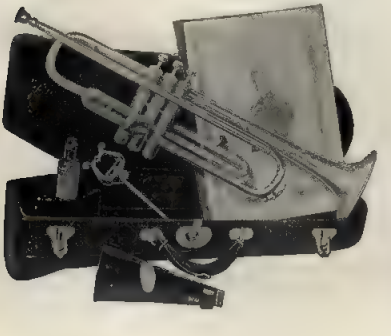


LOW PITCH AMERICAN PROFESSIONAL SLIDE TROMBONE

Perfect slide action and balance, with exceptional ease of blowing, feature this model Every position is in tune. It is distinguished with graceful proportions and careful workmanship. It is only large production that makes possible the low price. Built in low pitch; complete with music holder and silver plated mouthpiece. Length 46 inches. diameter of bell 7 inches; weight 3¼ lbs. Your choice of two finishes

9G70166 Highly Polished Brass. PRICE..... **$35.00**

9G70167 Heavy Silver Plated, satin finish; inside of bell gold plated and hand burnished. PRICE..... **55.50**



CONVERTIBLE MELLOPHONE

This instrument can be used for parts such as French Horn, Eb Alto, Ballad Horn in C, etc. The instrument is convertible to keys from F down to C. Quality is particularly necessary in a Mellophone, owing to the number of crooks and extensions; if workmanship and materials are not the best, the instrument will not be in tune. The most skilled workmanship and the highest quality of materials contribute to the perfect tone and operation of this instrument. It is built in the Key of F, with crooks to change to Eb, D and C. The valves are made of hard German Silver, with top buttons of pearl. The diameter of the bell is 10½ inches; weight is 3⅝ lbs. Low pitch; comes complete with music rack and silver plated mouthpiece. Your choice of two finishes. Please order by number.

9G70170 Highly Polished Brass. PRICE..... **$74.00**

9G70171 Heavily Silver Plated, satin finish, inside of bell gold plated and hand burnished. PRICE **105.00**

AMERICAN PROFESSIONAL Eb ALTO

The American Professional Eb Alto (not illustrated) has a round, full, rich tone—a delight to player and listener. It plays easy, with light, responsive valve action. It is made of a fine quality brass, with valves of German Silver, and top buttons of pearl. Comes complete with music rack and silver plated mouthpiece. Is 15½ inches high, with 7½-inch bell. Weighs 3 lbs; low pitch. Your choice of two finishes.

9G70172 Highly Polished Brass. PRICE **$64.00**

9G70173 Heavily Silver Plated, satin finish, inside of bell gold plated and hand burnished. PRICE **95.50**

BARITONE OR EUPHONIUM

The American Professional Baritone (not illustrated) has an exceptional round, powerful tone, and great carrying quality. It is easy to blow, with faultless intonation, and possesses a smooth scale. It is ideal for solo as well as band playing Height is 26 inches; diameter of bell is 11 inches; weight 7½ lbs.; low pitch Complete with music rack and silver plated mouthpiece. Highest quality at a moderate price.

Eb BASS (OR TUBA)

The American Professional Eb Bass (not illustrated) has a large, true and powerful tone. With it, you can reach extremely high and low notes. The instrument has perfect intonation, combined with faultless valve action. It is light weight, which makes it ideal for parade work. Built in low pitch. The length is 31 inches; diameter of bell 16 inches. weight 18 lbs. Has top valve buttons of pearl. Comes complete with music holder and silver plated mouthpiece. Your choice of two finishes

9G70176 Highly Polished Brass. PRICE **$135.00**

9G70177 Heavily Silver Plated, satin finish, inside of bell gold plated and hand burnished. PRICE **214.00**

TWO HANDSOME TRUMPET OUTFITS

Supreme Values in Your Choice of Two Models

Illustrated to the left is a high-grade trumpet outfit at a moderate price that will fill every musical need. The American Professional trumpet used in this outfit is built with precision in a correct design, and is comparable with instruments selling for a much higher price. These trumpets will be found in use in the best known bands and orchestras in the country. The reason for their popularity can be given in a few words, they are easy to blow; they are absolutely perfect in pitch and intonation, and they are priced within the reach of all. The tone is rich, penetrating and flexible; the lines are graceful and well balanced. The valves are made of the finest German Silver, ground with the greatest care, and constructed in the star style. This is a great improvement, as the valve cannot turn in the spring box, and this makes it impossible to replace the valve pump wrongly. The action is as short as it is possible to have it and still retain the full size air passages through the valves. You have your choice of either an engraved, polished brass trumpet, or a handsomely engraved, heavily silver plated trumpet in a satin finish with gold plated bell. Each outfit comes complete with a high quality Keratol covered carrying case, one Shastock mute, bottle of valve oil, music rack, and an understandable illustrated instruction book. Please order by number

9G70168 Outfit complete with engraved brass Bb trumpet. PRICE..... **$64.00**

9G70169 Outfit complete with silver plated, gold bell Bb trumpet. PRICE **90.00**

Clarinets • • Flutes • • Piccolos

THIS PICTURE SHOWS THE COMPLETE OUTFIT YOUR CHOICE OF TWO CLARINETS

There is nothing else to buy. The complete outfit includes everything. You have your choice of the Albert System Clarinet or the Boehm System Clarinet, both in Bb low pitch. The Albert System Clarinet has 15 keys, 4 rings and 4 rollers. the Boehm System Clarinet has 17 keys, 6 rings. The superiority of these instruments is fundamentally in their correct design, in their expert workmanship, and the care with which each minute part is carefully adjusted and inspected. The prices quoted to the right, represent extremely good values. The instruments and outfits are guaranteed to be 100% perfect.

ALBERT SYSTEM CLARINET OUTFIT—Bb LOW PITCH

We have carefully selected this outfit as the best and most practical of the Albert System clarinets. We have included everything that is necessary or desirable. The outfit includes a Kohlert Clarinet made of Grenadilla wood, with German Silver keys and trimmings. The clarinet is built in low pitch and has 15 keys, 4 rings and 4 gutta percha rollers, is complete with ebony mouthpiece and cork joints. The case is of black seal grain Keratol on a three ply wood body, velvet lined, with leather handle; the strong lock and clasps and other trimmings are of brass, nickel plated. The outfit includes a cleaner, a box of joint grease, a nickel music rack, a bottle of oil, a mouthpiece cap, leather covered reed case, three extra reeds, reed holder, a "Handy" reed finishing outfit, a "Masterbilt" reed trimmer, screw driver, and an "E-Z" instruction book.

9G70178 Outfit complete. PRICE..... **$75 00**
9G70192 Clarinet only PRICE..... **55.50**

BOEHM SYSTEM CLARINET OUTFIT –Bb LOW PITCH

While this outfit, as the illustration indicates, is remarkably complete, every item in it is necessary for the proper use and care of the Clarinet. The Kohlert Clarinet is made of Grenadilla wood, with German Silver keys and trimmings, ebony mouthpiece and cork joints. It is built in low pitch and has 17 keys and 6 rings. The silk plush lined case is the popular French model of black leather grained Keratol, with leather handle nickel brass trimmings, lock and spring catches. The outfit includes cleaner box of joint grease bottle of oil, mouthpiece cap, nickel music rack, leather covered reed case, reed holder, three extra "Super-o-Phone" reeds "Handy" reed finishing outfit, "Masterbilt" reed trimmer, screw driver, and an illustrated Remecke instruction book.

9G70179 Outfit complete. PRICE **$140.00**
9G70193 Clarinet only. PRICE.. **107.00**

Piccolos and Flutes

NICKEL SILVER PICCOLO

Well-made Piccolo of highly polished nickel silver. The valves and mechanism are finely adjusted to resist changes of temperature. This eliminates much of the trouble that is ordinarily found with wood instruments. Complete with cleaner, in high-grade velvet lined Keratol covered case. Your choice of two models.

9G70180 In Key of C for Orchestra **$100.00**
9G70181 In Key of D for Band. . . . **100.00**

HIGH QUALITY GRENADILLA PICCOLO

At a price no higher than that of the ordinary model, we present a high quality, genuine "V. Kohlert & Sons" Meyer System Piccolo, made of genuine Grenadilla, in your choice of two pitches, for band use or for orchestra use. The piccolos are very well made and are highly polished. Each piccolo is made with slide, cork joints, six keys, and German Silver caps on end.

FLUTES IN SUPERB NEW STYLES

We take pleasure in showing for the first time, the new series of genuine "V. Kohlert & Sons" flutes, which are much superior to the common market goods. They are correctly designed, Meyer System, carefully constructed of Grenadilla wood, with German Silver keys, cork joints and German Silver caps. You have your choice of 8 keys 11 keys or 13 keys, with or without Gallalith ivory heads. Each flute is carefully adjusted and inspected before leaving the factory. You will find in this series, the exact style and model you desire. They are all 100% guaranteed. Please order by number as listed below.

9G70186	8 Keys	**$22.80**

The American Wolf Type Miner's Safety Lamp

An American Made Lamp Similar to the Imported Wolf Safety Lamp

Its construction has proven the most satisfactory. It is made of heavy cold rolled steel tinned with brass trimmings. It is stronger, more serviceable and costs less to maintain than any other safety lamp on the market.

It is very sensitive to gas, indicating plainly as low as ¾ of 1 per cent with the luminous flame, and is extensively used for testing purposes. With a non-luminous flame, as low as ½ of 1 per cent of gas may be detected and ¾ of 1 per cent shows a distinct gas cap.

It has from 1 to 1½ c. p. illuminating power and the light remains practically constant from 9 to 12 hours.

The maintenance cost is very low and should not exceed 1 cent each lamp per shift, for naphtha, repair parts and supplies. The fuel burns as a gas. The wick does not char and rarely requires renewal.

The standard lamp for general use. Burns naphtha and is fitted with double gauzes, pyro metal or match tape internal igniter, key or magnetic lock, and burner for either flat or round wick.

The shield, or bonnet, is corrugated to increase the radiating surface, and the perforations are so made as to prevent the high velocity currents from impinging directly against the gauze. A plain steel bonnet can be furnished, but it has less radiating surface and does not keep the lamp as cool.

The gauzes are of the best grade charcoal iron wire carefully woven. Brass or copper wire can be furnished at small additional cost.

It has passed the most exacting tests and been formally approved in practically every mining locality. It has been tested in high velocity currents up to 2500 feet per minute.

Price each, as described above	$ 9.00
Price, made from light weight aluminum alloy, round wick only	12.00
Fitted with 1 lens, extra	3.75
Fitted with 2 lens, extra	7.50
Fitted with 3 lens, extra	10.50

The American Pneumatic, Signal System

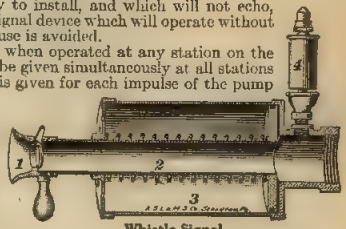
A thoroughly reliable pneumatic signal system, durable, easy to install, and which will not echo, nor repeat the signal given. It is positively the only pneumatic signal device which will operate without an echo, an incstimable advantage, as all confusion from this cause is avoided.

It consists essentially of a specially designed air pump which when operated at any station on the line compresses the air sufficiently to cause the desired signal to be given simultaneously at all stations on the line. One blast of the whistle or one stroke of the gong is given for each impulse of the pump piston.

The signal pump is entirely self-contained and no fittings are required for its erection. All that is necessary is to erect a suitable pipe line connecting the points between which it is necessary to signal, and attach the pumps. One pump for each station.

Line Can Be Used as Speaking Tube

The piston rod is hollow and upon opening the check valve near the mouthpiece the line is open as a speaking tube. Sound is transmitted sharp and clear in the very deepest shafts. This feature is invaluable when the mine telephone is out of order, or if an accident should occur and more than one method of communication is desired.



Whistle Signal

Once properly installed there is practically no maintenance expense. The pump is heavily constructed of cast and drawn brass and has no delicate parts. Signals installed for 10 to 20 years still give perfect service, the only expense being an occasional new packing ring.

It cannot get out of order. Left untouched for an indefinite period it will operate perfectly at first impulse of the piston.

Materials falling down shaft cannot cause a false signal, as frequently occurs where mechanical signals using wires are employed. There are no wires to break or short circuit and the signal line is not readily damaged by fire or water.

Prices

M220. Pneumatic signal pump complete with one gong or whistle, 6x9¼x2½ inches, for signaling up to 900 ft. Each $55.50

M222. Pneumatic signal pump complete with one gong or whistle, 8x12x3 inches, for signaling up to 2000 ft. Each $75.00

M224. Signal whistles, brass. Each 7.50

M226. Signal gong, brass, complete. Each 9.00

Brass tubing and pipe at market.

Justrite Carbide Lamps

For Campers, Miners, Contractors, Hunters, Etc.

No. 407

Carbide Cap Lamps

Nos. 407 and 861

Made of brass. Height, 3 inches. Have self-lighter attachment. Burn 2½ hours on 2 oz. charge of carbide. Weight, 5 oz. each.

Price, each $1.25

No. 861

Hand Lamps

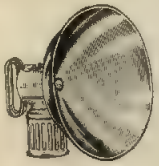
Justrite hand lamps are very useful for inspection purposes as well as for campers. They have folding handles and reflectors which throw a large volume of light. The No. 39 lamp has a 7-inch, highly nickel plated reflector and the No. 95 has a 3-inch nickel plated reflector. Both lamps are all nickel plated and are packed one each in a cardboard box.

No. 39 Lamp

Burning capacity, 4 hours on 3 oz. charge of carbide.

Height, inches	7
Diameter of reflector	7
Weight, ounces	9

Price, each $3.00



No. 39

No. 95

No. 95 Lamp

Burning capacity, 4 hours. Equipped with No. 170 flame protector. Charge, 3 oz. carbide. Height, 4¾ in. Weight, 7 ounces.

Price, each $2.50

No. 12 Carbide Lantern

This lantern is dependable in every way and is a great favorite with sportsmen. Gives a bright, penetrating 20 candle power light, burns 3 to 4 hours with 3 ounces of carbide, flame is controlled by valve and can be turned high or low or extinguished as desired. Highly nickel plated, equipped with detachable bull's eye lens and reflector. Equipped also with self lighting attachment—no matches required, no complicated parts to get out of order and easy to operate.

Superior to any portable light in cleanliness, safety and candle power, no smoke or grease, will not blow out.

It has proven its efficiency and has no peer for lighting the camp, motor boating, canoeing, hunting, fishing and going thru the woods and in fact for all outdoor lighting it is invaluable

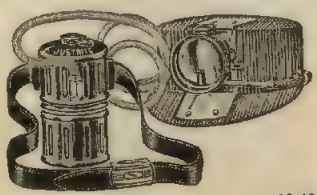
Can be packed with the camping outfit or in the trunk without danger of spoiling food or clothing.

Price, each $6.00

Justrite Headlight

The perfect light for general out-door work at night. The light, being worn on the cap, leaves both hands free for any work. It is one of the most practical head lights made. The light weighs only 5 ounces and having a self-lighter attachment, no matches are required. It has a strong rubber hose, steel generator, and a burning capacity of 5 to 6 hours. The belt is included with the outfit, but cap and special concentrating lens must be purchased extra.

Price, each $6.00



Carbide

For use in all lamps. Put up in 2-pound cans.

Price, per can $0.40
100-pound drums. Price, per drum 7.00

AMOS 'n' ANDY

TRADEMARK

The Dapper Dancing Dolls of Dark Town

Patent No. 1,753,032

Every child in the country is a prospective customer for these new, hilariously funny dancing dolls. They all know 'em, and they'll all want 'em. They simply hold "Amos 'n' Andy" by the string so their feet touch the floor, jiggle them up and down and watch them dance to the accompaniment of the radio or phonograph. For regular play purposes, the dolls can be unsnapped in a jiffy. Light in weight and strongly made with unbreakable composition heads. Dressed in a wide variety of humorous character costumes.

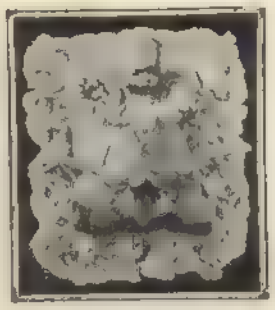
Be the First in Your Town to Feature AMOS 'N' ANDY DANCING DOLLS

DEMONSTRATOR for DANCING DOLLS

Dealers: We have arranged to furnish our Peppy Pal Demonstrating Units which are very attractive and as a sales stimulator have already proven successful. These Units are 4½ feet high, and handsomely decorated in five colors, electrically operated by guaranteed fool-proof motor unit, completely enclosed, operated by Universal Motor for AC or DC current. Write for descriptive literature and our attractive offer on these demonstrating units.

"TEE-WEE" HAND BABE

The Living Doll
Continues in Popular Favor



Does everything a living baby does—the hand fits inside and makes it live. You all know how it sells—and records prove it is selling better than ever. Fully patented and protected.

INTERNATIONAL SILVER CO.

"L. C. SMITH" HAMMERLESS GUNS

FIELD GRADE

This gun is especially designed for those requiring a cheap sound and plainly finished weapon. It is particularly useful for field and marsh where rough usage is required. Featherweights are made in twelve gauges as light as six and one-quarter pounds. Full Pistol Grip. Barrels 26, 28, 30 and 32 inch, Armory Steel only, bored any way you choose from a cylinder to a full choke. Gauge 12, 16 and 20. Weights 12 gauge 6¼ to 8¼ pounds; 16 gauge, 6¼ to 7 pounds 20 gauge, 5¾ to 6½ pounds.

	Price

Canvas Covers for Above Guns, Nos. 27-28-29. See Page 143 for Description.
Leather Cases, Nos. 31-32. See Page 142 for Description.

IDEAL GRADE

This gun is a "General Purpose" weapon, a sound, reliable and thoroughly serviceable gun and with just enough engraving to make it attractive. The barrels are bored and finished with extreme accuracy and care. For general purposes it is far superior to any other gun offered at a similar price. Featherweights are made in twelve-gauges as light as six and one-quarter pounds. Full Pistol Grip, Regular, Half or Straight to order. Barrels 26, 28 and 30 inch. WATER BAGS

APPELL'S SOUTH AFRICAN

Made from material having the peculiar property of holding water, and yet exuding enough moisture to prevent the sun from having any effect on water inside the bag, will keep water cool for over 48 hours and if put into bag in the morning and exposed to the sun and air all day, will be cooler at night than it was in the morning. Lower corners are slightly rounded to prevent sediment from accumulating.

DIRECTIONS

Hang in the Air. This causes the water to evaporate slightly. Notice a drop of water on outside of bag continually This prevents the sun from striking the bag and water inside remains cool First and second time filling, water will evaporate quite rapidly, after which bag is O. K Some evaporation is necessary to keep water fresh.

Bag Should Hang Where the Air Will Strike It.

When empty, or its use is not desired, it can be folded up like a towel and carried in the pocket.

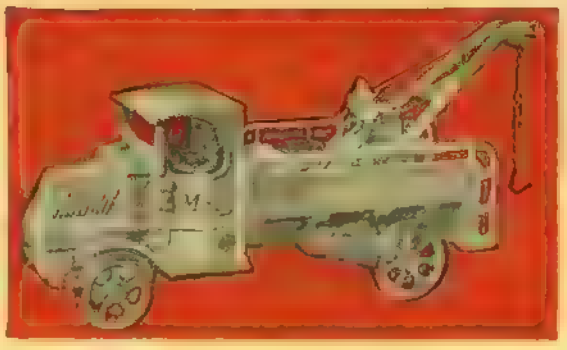
To Know Profitable Results!

The new combination Mack Wrecker and Service Car is an unusually good value. The Wrecker actually works and a tow chain is supplied in the tool box that has a lid which opens and closes. Realistic in every detail. Just the thing that will please the child. 12½ inches long, 4¾ inches wide, and 6½ inches high.



To buy Arcade cast iron Toys is to buy nationally advertised products that have been known for years for their lasting qualities and durability. To know that the trade-mark on every Arcade Toy assures the purchaser that a reputable company is back of each toy, and is aiding the dealer by advertising his goods nationally. To know that each sale of an Arcade Toy is just a leader for many more sales of sister items. To know all this insures the dealer that he may carry Arcade Toys the year round with continuous profitable results.

It has been proved.

"They Look Real"

To The Fair With ARCADE Cast Iron TOYS

CHICAGO TOY FAIR

April 28—May 10

PALMER HOUSE - Room 797

KNOW the toys you buy will go over with the children for whom they are made. Make sure the salient traits of your Toys are the ones that will make them the best sellers. ¶ARCADE Cast Iron Toys will meet any test you put them to. They are strongly built and hard to break. Each toy looks real in its representation of some item with which the child is familiar in his or her every day life. They are simple in construction with no parts on them that will injure the child. Baked, colored enamel finish gives them a lasting luster that appeals to children, and a prominence on the counter or in the window that draws attention. ¶The dealers who realize the fine selling qualities of ARCADE Toys are displaying them in their permanent all year 'round toy departments. Now is the time to place your order for immediate delivery; and visit the ARCADE Toy display at the Chicago Toy Fair.

BRIDGE KENO

The New BRIDGE GAME for Everybody

There's only ONE Bridge Keno

REG. U.S. PAT. OFF.

Whenever a game "catches on" with the public—imitations spring up over night! This is happening with Bridge Keno. But remember this! There *can be only one* Bridge Keno. And Milton Bradley is the *only* source from which you can obtain this fast-selling game.

Bridge Keno is the game the public wants. It's the only Keno game with a scoring system like Bridge. It fascinates everybody—grown-ups and children. Has the suspense of poker—the dash of dice. Odd or even numbers up to twelve people can play. Easy to learn but packed with thrills.

Wide-awake dealers who are displaying Bridge Keno are making nice profits. You can, too. Send your order today.

Going the Rounds

Alexander Doll Co.'s New Showroom

Alexander Doll Activities

Madame Alexander has been busy welcoming her many friends to her new luxurious showroom. As shown in the accompanying illustration, this showroom is of ample size to adequately display the ever increasing line of Alexander dolls. Easy chairs for the tired buyer are to be found in abundance. Madame Alexander has been busy creating and designing many new and novel specialties in high grade dolls, and she will be found, together with the complete line of Alexander dolls, during the Chicago Toy Fair, in Room 436 at the Morrison Hotel.

Schoepfer Lands a Big One

G. Schoepfer, who provides animal eyes for the toy trade, recently returned from a month's tour of Florida. Schoepfer is an enthusiastic fisherman and in order to substantiate his claim that he could really "land em," he forwarded us the accompanying interesting photo. The fish, he informs us, is a salt water trout that he caught at Titusville, Florida, on the way home from Miami.

The Proof—G. Schoepfer and a Prize from Florida Waters

"Playit With Flowers"

The direct Toy Sales Corp. are offering miniature greenhouses that actually grow flowers, under the trademark of "Playit With Flowers." These greenhouses are strongly built, with steel frames and steel sash, and enameled in colors. They are made in four sizes. The fully equipped greenhouses look just like the real thing, with planting trays, miniature cold frames, iron flower stands, ferneries, garden baskets, garden tools, seeds, soil, etc. Little flower plants grow in enameled pots with red, blue and green saucers. By giving the plants care, sunshine, air and water, children can have blooming plants in a short time. And with the home garden season at hand, amateur gardeners will find the greenhouses useful accessories. Fred W. Kahlke and I. W. Doremus of the Direct Toy Sales Corp. announce that all the toys sold under the trademark of "Playit" are controlled by that concern. Mr Kahlke will be in charge of their exhibit at the Chicago Toy Fair in the Hotel Sherman, where a full display will be made of the lines for which the Direct Toy Sales Corp. are direct factory salesmen.

New Oak Balloon

An addition to the popular variety of striped balloons has just been introduced by the Oak Rubber Company of Ravena, Ohio. The new item is called the Whirlwind balloon, the stripes being printed around the balloon instead of from top to neck as in the other striped series. The center band of stripes is printed in a different color than the bands above and below, lending a very colorful and attractive effect to this number.

New Low Priced Twistums Announced

The Twistum Toy Factory anounces that due to the discovery of new and improved manufacturing methods, it is now possible for them to offer a brand new line of Twistums at lower prices. The new Twistum animals embody the famous Twistum principles in design and construction and are made to retail for $1.00, 50c, and less. With the addition of this new low priced line, Twistum animals are now available for every class of trade. The Messrs. Carlson say that millions of Twistums have been sold, and now that a special line is available at lower prices, they look forward to a greater than ever increase in sales.

Rosebud Game Line Continues to Grow

I. S. Rosen, of the Rosebud Art Co., says they are continually adding new and interesting numbers to their comprehensive line of popular price games. One of their latest game creations is called "Catchem," and is described as the game of "super comedy." Retailing at the popular price of 50c, "Catchem" offers exceptional value. It consists of a solid box and heavy platform with 36 holes, each hole being next to a picture of a fish, frog, etc., four colored agets, one slanty grooved block, 36 picture cards and a score book. The cover is beautifully lithographed in bright colors and varnished. This company has recently issued a catalog illustrating and describing their complete line.

IRVING WECHSLER
B. & W. Sales Organization

ART FLICK

CHAS. BUTCHIN
B. & W. Sales Organization

B. & W. Sales Organization

Announcement is made of the formation of the B. & W. Sales Organization, with temporary offices at 110 E. 176th St., New York City. The members of this firm are Charles Butchin and Irving Wechsler, and they will represent G. H. Hartshorn, Inc., of Gardner, Mass., and the North American Coach Mfg. Co., of Fort Lee, New Jersey. Charles Butchin was formerly a member of the firm of Maerheim Co., acting as sales manager and credit man for that concern. Irving Wechsler has been, for the last five years, connected with the Paragon Furniture Co., representing that concern in Brooklyn. He is a brother of Harry Wechsler, who continues with the Paragon Furniture Co. The B. & W. Sales Organization will act as sole selling agents in the United States for the North American Coach Mfg. Co. This firm makes a variety of high grade baby coaches, and also doll carriages and juvenile desks.

Handy Electric Lantern

The Kas-Kel Electric Co., Inc., of 5 Union Square, New York City, have just put on the market the Daimon Telka Trio, an electric lantern embodying several interesting features. It is made in a handy shape, fitting in the pocket, and also has an adjustable strap from which it can be hung. A slight pressure on a button gives an instantaneous flash, so that the light can be used for signalling. A full push on the same button sets the light for a steady beam, which can be instantly shut off by pressure on another button. The Telko gives a white, red or green light, quickly changed from one to another by the simple movement of a lever. Another feature is a safety lock preventing waste of the battery. The lantern is finished in black, red, blue or green, and is packed in an individual carton, equipped with battery and bulb.

Buddy "L" in Chicago

The Mohne Pressed Steel Co. has opened a Chicago office in charge of E. H. Jones, Director of Sales, with temporary quarters at 58 E. Washington St., Room 1101. The steadily increasing business of the well known Buddy "L" line has made it advisable to open a sales office in the middle western territory.

Permanent Pilliod Display

An office and display room has been opened at Room 436, 200 Fifth Avenue, New York City, by the Pilliod Cabinet Company of Swanton, Ohio, manufacturers of toy and juvenile cedar chests. This office is in charge of Art Flick, who is assisted by Lee Magan. A continuous, permanent exhibit of the complete line of Pilliod toy and juvenile cedar chests is maintained for the benefit of the trade and buyers in the New York area. This exhibit is said to be very unusual, displaying many beautiful, distinctive designs that compose the 1930 Pilliod line.

New Gabriel Mosaics

Samuel Gabriel Sons & Company have made a radical departure in their Mosaic line, which has enjoyed great popularity over a period of several years. Realizing the necessity of bringing this into a modern line of thought to conform with the new standards of education, a new large block, easy for the children to handle and making very definite designs, has been developed, and most brilliantly colored box tops are now offered to the trade. The new arrangement of these boxes enables the child to handle the pieces more easily than in the old double trayed type of box and the larger and more showy size of these boxes offer exceptional value. As a matter of merchandise alone, aside from the educational and entertaining features of the games, they represent splendid value for the money. The new Gabriel Catalog illustrates and describes the entire line.

Jackbilt Playthings

W. F. Gibian, sales manager for the Rochester Folding Box Co., is enthusiastic over the new items which are being made for 1930. This line of Jackbilt Playthings includes play stores, engine houses, play houses, and fortresses. Mr. Gibian will be at the Toy Fair in Chicago, assisted by A. J. Abernethy. Mike Sweyd is in charge of sales on the Pacific Coast. A. Weinberg is connected with the company as designer and will visit the trade in the Eastern States.

Kenton Announces New Toy

The Kenton Hardware Company, of Kenton, Ohio, has just placed on the market a most interesting small cast-iron replica of a Flying Boat. This toy's design is taken from a large model which is in use on one of the well known air transportation lines. It has a "pusher type" motor with a propeller that turns. The openings along the side of the hull and in the front create a realistic appearance as to the wings which are furnished in color or aluminum finish. These toys are finished in beautiful colors, and securely packed in sturdy boxes. For those dealers desiring further information on this and other new Kentontoys, the manufacturers have prepared a new catalog describing them fully. Copies are available to anyone desiring them.

Locate in Merchandise Mart

Eileen Benoliel and William A. Benoliel of Chicago, who for many years have been manufacturing the well known line of Live Long Toys, and operating the Chicago Toy House, announce that after May 1, 1930, they will be located in very spacious quarters on the toy floor of the Merchandise Mart, the new $32,000,000 building just completed in Chicago. They state that they will have some very interesting news to announce next month.

Reiss Marries

Gustave M. Reiss, of the Reiss Mercantile Co., was married February 6th to Miss Eleanor Schoen. They spent their honeymoon in New York, where Mr. Reiss visited the Toy Fair.

At The New York Toy Fair

American Character Doll Co.

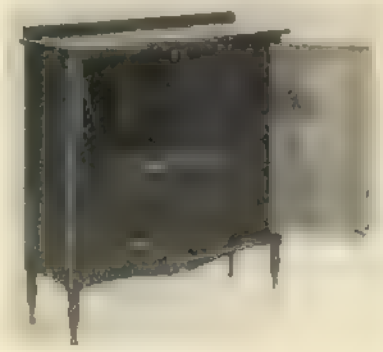
Here is an entirely new novelty doll number, of which the features, character, appearance and "get-up" are different and unusual. This newcomer is made in several sizes, to cover a retail price range of from $2.00 to $5.00. There were also shown on display during the Fair other members of the "Petite" family, which include the Campbell Kids, Puggy (the boy character), and five new numbers in Toddle Tots, to cover requirements in the infant doll field. There was also displayed a complete new line of mama dolls.

Kingsbury Mfg. Co.

This all-metal Zeppelin was displayed by this company during the Fair at Riemann, Seabrey Co., Inc. It is a newcomer and is designed and constructed as both a mechanical and pull toy. The gas bag is finished in gold and mounted on a rubber-tired, four wheel under-carriage which, in turn, is finished attractively in red and white. Among other toys displayed by the company were the racing and cabin-type Silver Arrow Flying Planes, aeroplane construction sets, motor-driven toys, garden sets, kits and trowels.

Toy Corporation of America, Inc.

The pictured item is the No. 454 Deskorobe which was one of the items featured by this company during the Fair. It is 32" high, with a top 27" x 11". This number is a novel combination of desk and chifferobe, one side being used as a desk and the other side for the child's doll clothes, which can be hung up on small sliding hangers. It is made in colors of shaded ivory, green, blue and antique maple. This and the other furniture numbers of this company, which now approximate about eighty items, are made of birch and maple throughout, together with 3-ply veneer backs and bottoms. The feature on the finish is that it follows the latest semi-dull finish such as is now being used on quality furniture items. New special designs, domes of silence on table and chair sets and desks sets are other selling features. Particular attention is also called to the fact that all drop-leaf table sets have the ruled edge feature



Corcoran Mfg. Co.

The illustration shows the new Three Way Dump Truck made by this company. This truck dumps at the back or on either side, with an automatic release of a tail piece, or the side toward which the material is to be dumped. The truck is of heavy gauge steel, 24" long, with rubber tires, and enamel finish. The retail price is $1.25. This and many other items of the line were shown at the salesroom of Strobel-Wilken Co., Inc.

Bing-Wolf Corp.

The illustration shows one of the new cabinet phonographs made by this company. Retail price range is from $2.00 to $20.00. The phonographs can be had in four sizes. The smaller sizes play 7" records, and the larger size can use records up to 10". Exchangeable springs are a feature of this line, which is suitable for department stores as well as wholesale trade.

Educational Card & Game Corp.

"Bild-A-Word for Tots," shown here, is one of the games featured at the Toy Fair by Educational Card & Game Corp. It is made in two models: No. R 1 is 9⅜" x 8" and retails for $1.00—and No. R 2 is 12½" x 9¼", retails for $2.00. These, and "Bild-A-Word Picture Puzzles," apparently intended for the "pre-school educational age," constitute the new numbers of this company. These, of course, are in addition to "Original Bild-A-Word," the game for children and grown-ups, that was very popular in the toy departments of leading stores last year. The line is sold through the department stores and the jobbing trade.

Best Bets

Richmond School Furniture Co.

Litho Plate Combination Table and Educational Blackboard is interesting and instructive. It teaches the child in play hours, develops practical thinking, and aids in working out the child's own problems. Among its many features, this novel blackboard has, in different models, a scroll ranging from ten to forty charts, many of which are in colors. Also, its distinctive finishes, in colors, are brilliant enough to attract, yet subdued enough in tone to blend with the appointments of the home. It is built as a piece of furniture should be—sturdy and graceful. This Combination Table and Educational Blackboard comes in a choice of three colors, with two chairs, to match—Ivory—Jade Green—and Baby Blue.

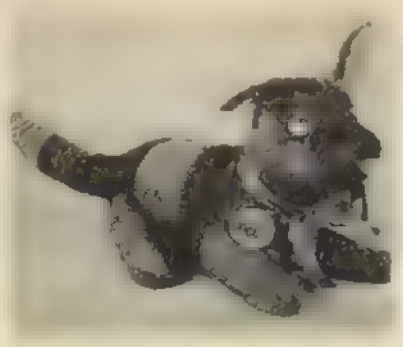
The Litho Plate Line also carries Easel and Wall Blackboards in colors. The easel type comes in a choice of three colors, Chinese Red, Jade Green, Baby Blue, with attractive frames. The scrolls of the different patterns range from 10 charts, 5 in color to 60 charts, 30 in colors. The same characteristics of Litho Plate's regular line are carried out in the above Easel and Wall Board lines—strong—graceful. The regular line finished in natural oak with desk in green enamel, has a scroll range of 10 charts, 5 in colors, to 60 charts, 30 in colors.

Strobel-Wilken Co., Inc.

A new 50c airplane was selected from this line as one of the leading items. It is made of heavy gauge steel, the toy being 20" long, with a wing spread of 18". It is provided with a moving propeller, and painted in attractive colors. Suitable for wholesale, chain store and popular price trade.

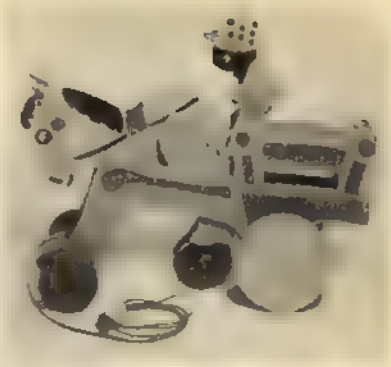
Continental Toy & Novelty Co., Inc.

"Famous Radio Dogie," the pathetic and comical canine known to youngsters wherever radio is known, is the newcomer featured this year by this company. He is 18" long, 10" high and, when his tail is squeezed, produces a familiar bark. Other numbers shown in the Continental display covered all requirements in the stuffed toy line, with particular emphasis being placed by the manufacturer on the popular priced numbers for the jobbing trade and quantity buyers.



Helvetic I. & M. Corp.

This imported Swiss whistling figure, in hand-carved wood, represents a Scotch Highlander with bagpipes. He whistles the familiar Scotch tune, "The Campbells Are Coming." This is well made and is sold with a life-time guarantee. Priced from $35.00 to $50.00, this is a department store item. Other Helvetic products show this same whistling figure in West Point Cadet and Boy Scout.



Bumpa Toys

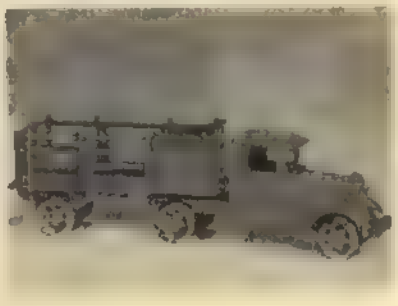
This is a new line of toy novelties for boys and girls. Sam and Henry, which is illustrated, retails at 50c. The mule acts in the way a mule should by kicking up his heels and trying to wreck the cart, while Sam drives in the most energetic manner. This line includes many items from tiny animals to a complete Noah's Ark De Luxe with 32 colored animals.

N N Hill Brass Co.

Duplicating in every detail the latest French-type house telephone was the number featured by this company in their display at Riemann, Seabrey Co., Inc. It is highly finished in enamel and nickel and is made in sizes to retail at 25c, 50c and $1.00. Shown along with this were the bell toys, complete line of telephones, reins and ringing bells of every description.

The A. C. Williams Co.

The Coast-to-Coast Truck, with trailer body, is 10¾" long and 3" high, comes with assorted red, green and blue bodies, at prices from 25c up, and sell to chain stores, jobbers and the department store trade. The products of this company include iron toys of all kinds, which sell at from 10c to $1, as well as a line of hammers, hatchets, etc.



"So that's why I say that a rival 'rooter' is always a fine salesman

Cowen chuckled as he told this yarn, and said, "It does seem to pay to do your own stuff and to let the other fellow do his."

The Evolution of a Toy Plant—Moline Pressed Steel Co. Now Buddy "L" Mfg. Co.

Started originally on a capital of $1,500, what might be termed the proverbial shoe-string by its founder, Fred A. Lundahl, and today one of the outstanding toy manufacturing concerns. Wherever toys are sold, Buddy "L" Quality Steel Toys are recognized as representing originality, quality and skilled workmanship. The concern was started originally to manufacture automobile fenders and kindred lines and the conversion to a toy plant might be considered almost accidental.

Mr Lundahl's desire to make up something new and different in the way of a toy for his then little boy prompted him to design and produce an all-steel truck, which, in miniature, reproduced the real article in every respect This toy created such a desire in the minds of other youngsters in the neighborhood that the parents began to importune Lundahl to make some for their own youngsters This demand growing prompted the thought, "Why not make a number of similar items for the toy trade?" This was done; however, the reception accorded Lundahl at the first showing of these toys, namely, the Toy Fair in 1922 was far from encouraging Seasoned toybuyers with years of experience claimed they would not sell on account of the price, stating the public would not pay such heretofore unheard-of high prices for toys.

However, a few venturesome buyers bought a small selection and Lundahl doggedly kept on with the result that to everyone's astonishment in the short period of two years the plant was swamped with orders and expansion became necessary

Competition also came, which was natural. However, the business has continued to grow to the extent that it became too burdensome for one individual, consequently a reorganization took place July 1 of this year and the name of the company was also changed to the Buddy "L" Mfg. Co. to bring about a closer tie-up with the name of its products, which are known as Buddy "L" Toys, having been named after Mr. Lundahl's son, who is affectionately called Buddy Lundahl, and a new organization was formed with the following officers:

J. W. Bettendorf, president. Mr. Bettendorf is one of the leading industrialists of the Tri-Cities and nationally known as a successful manufacturer and financier, being at the head of a number of large manufacturing plants, among which are the Bettendorf Company, builders of all-steel railroad cars and steel underframes; the Bettendorf Foundry, Westen Chippewa Pump Company and others.

Fred A. Lundahl, vice-president, in charge of origination and manufacturing

R. F. Valentine, vice-president, in charge of sales and advertising

F. J. Bettendorf, secretary and treasurer E. J. Bettendorf is the son of J. W. Bettendorf and associated with his father in the various enterprises.

New Window Counter Card Free With Liberty No. 10's

A new combination window and counter card, designed to capitalize on America's outboard motorboat fever, and providing an excellent tie-in with Liberty's Outboard Sea-Scooter number, is to be included free of charge with every dozen Sea Scooters, according to an announcement received recently from George O Benson, sales manager of Liberty Playthings, Inc., of Niagara Falls, New York, manufacturers of the popular Liberty Playboat line. This new card incorporates a splendid action photo of an outboard motorboat race as a main illustration, and is made of heavy bristol-board A unique feature of this compact display is the ingenious method in which the bottom of the card folds out to form a ledge to hold the Sea Scooter itself. When slipped into the slot on the left of the ledge the boat assumes a realistic racing pose, accented by the die-cut waves and spray in its wake. An easel for erection on counter or in window folds flat against the back. Total height when erected, 12 inches; width, 13½ inches. Shipped flat complete with directions. Dealers desiring the new Liberty display for tying in to outboard motorboat regattas, races or general promotion work may obtain one free with every order of one dozen of the popular No. 10 Liberty Sea-Scooter Requests for additional displays will be granted unless quantity is too quickly exhausted Dealers who have ordered Sea-Scooters before the counter card was off the press may secure one by writing to the factory.

Lionel Corp. Opens Chicago Office in New Merchandise Mart

In order to better serve their trade in the Midwest, the Lionel Corporation of New York, because of an ever-increasing volume of business in Lionel electric trains and accessories, Lionel electric ranges for girls, announce the opening of a Chicago branch office located in the Merchandise Mart

Mam-A-Car Changes Name and Management

Two very important changes have recently taken place in the name and management of the Mam-A-Car Corporation.

The company will hereafter be known as the Elmhurst Mfg Corp., manufacturers of Mam-A-Cars, children's vehicles and toy specialties.

E. G. Leach, the well known toyman

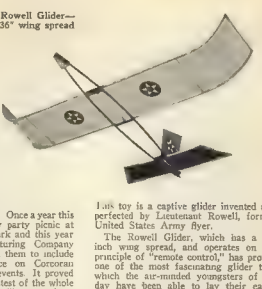
who formerly had charge of the New York sales office of the H. C White Co., has become vice-president and general manager.

Mr. Leach, who is a graduate of Carnegie Institute of Technology, spent several years with Stone & Webster Engineering corp. With this background and his wide experience in selling and manufacturing, he states he will put all his efforts into improving the company's line. Mr Leach also states that their 1931 line will be all set with new merchandise and prices during the very early part of 1931.

Miss R. Prager, who was associated with Mr. Leach in former years, is also with Elmhurst Mfg Corp., acting as Mr. Leach's secretary

Window and counter cards issued by Liberty Playthings, Inc.

"Our Gang" of movie fame



Rowell Glider—
36" wing spread

A Remarkable Film Library

The most complete library of exhibition films for home projection is that released by Pathé Exchange, Inc.—the Pathé 9.5 mm Film Library.

It contains over 400 subjects, dramas and comedies featuring famous screen stars, the ever popular "Our Gang" Comedies and a full list of sports and educationals, on either 30- or 60-foot reels.

Perhaps the most astonishing feature of the Pathé 9.5 mm. Film Library is the "picture length" of these small and compact reels. Each picture is a complete story with main title, sub-titles and end title. These pictures are not to be confused with the "short strips" without titles usually sold with cheap projectors.

Pathé releases the same picture on both 9.5 mm. and 16 mm. film. On 9.5 mm. film (40 frames to the foot) the picture costs $1.75 and on 16 mm film (40 frames to the foot) the picture cost $7.50, a distinct saving of $5.25, yet the "image" of the 9.5 mm. film when projected at the same distance is larger than that of the 16 mm. film. At a distance of only 9 feet the 9.5 mm. film gives a brilliantly clear picture 30 inches wide.

Because the Pathé 9.5 mm. Exhibition Films provide outstanding home entertainment at low cost, we predict that stores and toy departments throughout the country will enjoy substantial profits from the sale of these popular films, the universal choice of home movie enthusiasts.

Corcoran Mfg. Co. Devises New Schemes for Their Line

One, Two, THREE! And they're off! Yes sir, it's a real race for the kiddies under 10 years of age. What better publicity could you get? This clever method of introducing a new line of juvenile vehicles was used by the Corcoran Manufacturing Company of Cincinnati in conjunction with the Cincinnati Times Star, a local newspaper. Once a year this paper sponsors a family party picnic at Rainbow Amusement Park and this year the Corcoran Manufacturing Company made arrangements with them to include a big Sweepstakes race on Corcoran Toys, among the other events. It proved to be the outstanding contest of the whole affair, boys and girls alike participating—the first and second winners receiving as prizes a hobby horse (Black Beauty) and an airplane (Red Bird). The photo reproduced here shows the line-up of the race. There is no question about these toys taking after seeing the enthusiasm of the youngsters at this annual affair. It was the only event of the day that had an over supply of entrants.

Truck Load of Corcorans

Another worth while idea was loading a truck with the toys to be used in the race and driving it about town in the morning of the day of the picnic. In the downtown section, especially in front of the stores with window displays, large crowds gathered and the driver estimated their number, in one instance, to be at least one hundred people. As soon as it was known, the names of the winners of the race appeared on small cards in each of these downtown display windows.

This is one of the cleverest publicity stunts that has ever been brought to our attention and we pass it along to wholesalers and dealers for what it is worth. Keen merchandising practices, in vogue today, demand original ideas to sell toys or any other merchandise; the idea presented here could be worked to good advantage in many other cities.

J. L. Wright, Inc., Adds Rowell Glider to Enlarge Their Line

The Lieutenant Rowell Glider has been acquired by J. L. Wright, Inc., 1443 Merchandise Mart, Chicago, manufacturers of Lincoln Logs and Lincoln Bricks. This toy is a captive glider invented and perfected by Lieutenant Rowell, former United States Army flyer.

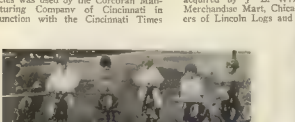
The Rowell Glider, which has a 36-inch wing spread, and operates on the principle of "remote control," has proven one of the most fascinating glider toys which the air-minded youngsters of today have been able to lay their eager hands on. Its immense popularity as an aviation toy is based not only on a long-lived fun-value and excellent performance in flight, but also on the fact that it has been scientifically designed according to the most approved and modern theories of aero-dynamics. And, of course, as everyone knows, the attention of the whole world is right now focused on gliding and various forms of motorless flight.

Lieutenant Rowell, whose record of 2600 flying hours as an army pilot and instructor without a single serious mishap is outstanding among U. S. Army aviators, has designed the glider with three things in view: scientific construction, long life, and real fun in flying it.

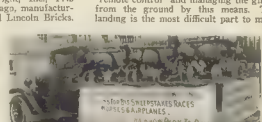
The toy is so designed as to be inherently stable, that is, when tilted or turned by "air pockets" or "up winds" it immediately rights itself as soon as the disturbance is past. This is a problem which must be constantly met in actual flight and one that has perplexed builders of toy planes and gliders for a long time.

It has a tough, light fuselage and well built wing, made of Airplane Spruce, with up-curved tips, the wing surfaces being covered with a light but strong aviation fabric. A clever bit of planning of the wing and tail mountings reduces the number of the construction and helps prevent injury to the toy in a careless flight among a poor landing.

With each glider are detailed instructions regarding assembly, taking off into the wind, the proper size thread for the "remote control" and managing the glider from the ground by this means. The landing is the most difficult part to man-



Lined up for a race on Corcoran wheel toys



A truck load of Corcoran Green Arrow wheel toys

All Year Sellers

Shaw Doll Co., Inc.

Pictured here is what is described by the manufacturer as an ideal jobbing number. It is 25" high, with moving eyes, eyelashes, teeth and tongue. It has composition legs and comes in costume assortments of six to a dozen, made to retail for $3.00. Featuring the possibilities of the line for the jobbing trade and quantity buyers, this exhibitor showed a complete assortment of infant, mama and novelty dolls, embracing seventy-five different numbers and running in retail price from 25c to $10

National Sewing Machine Co.

Outstanding in the line of "Vindex" Iron Toys, which were on permanent display in the showrooms of H. F. Mack & Bro., Inc., was the Steam Shovel number pictured. Finished in brilliant red and green, 14 inches long and 10 inches high, this number retails for $5.00. Other featured iron toys in a line covering a price range from 25 cents to $5.00, are automobiles, tractors, cement mixers, police motor bike and dump trucks.

Faultless Rubber Co.

The box of balls shown is an innovation in ball decoration, the varied colors producing a rainbow effect on this line and all sponge rubber play balls, each ball in turn being a veritable riot of color The balls pictured are typical of these sponge balls, which are made in five sizes, ranging from 2-7/16" to 3½" in diameter. They will not deflate, will not go dead in stock, and are full of bounce. Other items shown were practical golf balls, sponge rubber novelties, such as eggs, mice, candy, nuts, cigarettes, etc., and toy balloons which embrace a large line, including all sizes and shapes made by a patented water cure process, and guaranteed not to deteriorate in stock for one year from shipping date from factory. These products are produced under the trade names "Faultless," and "Fast Flight."

Aluminum Specialty Co.

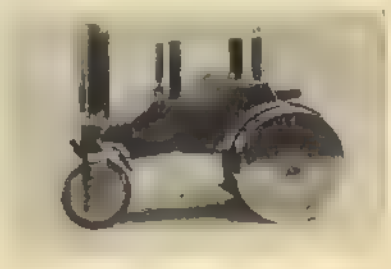
Here is a reproduction of the Cooking and Baking Set made by this company, which is one of the featured numbers in a line of aluminum sets, which includes tea sets, percolator sets, cooking and baking sets. More new items have been added to the line for 1930 which now covers a price range from 75 cents to $3.50 at retail. The Cooking and Baking Set shown in the photograph is made to sell for $1.00

Regal Doll Co.

Here we show a featured item in a complete line of infant, novelty and mama dolls, which covers the entire price range from 50c to $5.00. The larger number pictured is 27" high, with moving eyes, teeth and tongue, and human hair and, as a $5.00 seller, should be particularly attractive to the department store trade. The company manufactures dolls adaptable for all classes of distribution, with special value for quantity buyers. Produced as members of the happy "Kiddie Pal" family are Sweetie, Hugme, Kissme, Dorothy Jane, Smiles, Loveme and Judy.

Lindstrom Tool & Toy Co.

Here we reproduce a newcomer offered by this company at the Fair. It is a large-size, slow-action Steam Roller, made of heavy gauge steel. It is an exceptionally realistic reproduction of an actual steam roller, both as to appearance and action. It is made to retail for $1.00.



Line Leaders

Victor Novelty Mfg. Co.

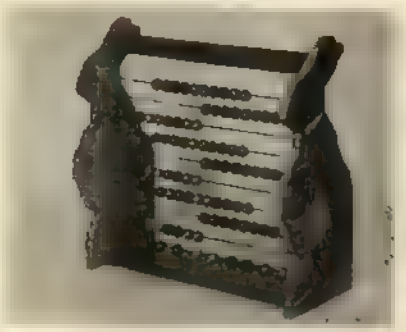
The beach ball shown is one of the many in the line of Victor "Joy Balls," a particular number being a four color panelled ball made of durable fabric heavily rubber coated, with a sheet rubber bladder that is guaranteed against defects. Comes packed in an attractive box, and retails at 50c. The complete Victor line covers a price range of all prices, with Victor water animals retailing from $2.00 to $6.00 each. These rubber water animals were also on display

The Ives Corp.

Shown here is No. 572—a $10.00 mechanical train number of this company, which, among all their line, has proven particularly popular. As will be seen, it is a steam type locomotive, and the set is complete with coal car, coach, baggage car and pullman car with observation platform. Another particularly interesting feature being pushed by this company is the Ives Treasure Chest. Available for use at home or for window and counter display in the store, this Treasure Chest has all the appearance, when closed, of just what its name implies. When opened up, however, through ingenious fastening arrangements which prevent displacement, a most complete train set with all tracks and the popular accessories is laid out all ready for operation. This Treasure Chest sells, exclusive of trains, which are, of course, at the additional option of the purchaser, for $50.00

Sayco Doll Corp.

Shown in the display rooms of Long & Yondorf, the standing type of doll pictured is typical of this line of "Sayco" Dolls which are made to cover the requirements of the department store and jobbing trade. Retail from $2.00 to $4.00.



The H. G. Cress Co.

Here is a novel little number—a Rabbit Abacus, which was but one of the numerous items shown by this company at the Fair. A featured number was the 3 R's Easel Blackboard, 44" by 19½" in size, with beautifully contrasting red and green color combinations. The manufacturer has noted that the tendency of the buyers will be toward medium priced drawing sets and spelling boards and is, accordingly, directing most of his attention toward these numbers.

A. C. Gilbert Co.

Through an unfortunate error a wrong cut was shown in connection with the description of one of the items featured by this company during their Toy Fair display. We are glad of this opportunity to show below the proper cut and to again give a full description. This is No. 2006-Svengali Mind Reading Set of the A. C. Gilbert Co. It contains many fascinating and bewildering tricks, such as the Dread of Midas, Svengali Mind Reading Wonder, the Phantom Ring, Chinese Mystery Ring, Mystery Topsy Turvy, Galloping Dime, Hiding Chessman, Buddha Money Mystery and many other spectacular and awe-inspiring effects. This set and the other new Gilbert Magic Sets are so designed that any child or adult can accomplish magical effects in a few moments' time by reading the directions. The particular set shown here retails at $5.00 and is typical of a line that contains numbers running from $1.00 to $10.00. Other toys featured in this company's Toy Fair display were, of course, the ever-popular Erector, Chemistry, Tool Chests, Puzzles and Motors. All of the products of the company are produced under the trade names of "Gilbert" and "Erector."

Travelers on L. & N. trains passing Glasgow Junction, Ky., see these massive ruins and wonder about their history. They stand today, as they were placed in 1860, commemorating a project that was to have been a fine tavern, but which was interrupted by the Civil War and was never completed.

Famous Bell's Tavern

JUST within a stone's throw of the L. & N. station at Glasgow Junction, Ky., on the main line of the Louisville Division, stands an old ruin that has caused many a question on the part of the stranger in those parts. Most ruins imply a condition of decay; something once whole and complete and now decimated by that master wrecker, time. In this sense the massive walls of stone now standing at Glasgow Junction cannot properly then be called ruins. They only represent a fond dream that never materialized; they serve but to perpetuate the memory of one of the greatest inns this continent has ever known, namely, Bell's Tavern. It was the Civil War, that gigantic internecine conflict that changed so much of the American scene, that brought to an abrupt end both a castle in stone and a castle in the air.

Some time in the 1820's there came to what is now Glasgow Junction but what was then called Three Forks, a veteran of the Revolutionary War, by name, William Bell. This place was called Three Forks for the obvious reason that here three roads converged. In reality two of the roads were but branches of a highway that led from Louisville to Bowling Green and which connected with the state highway a short distance below Bowling Green. One of its branches here at Glasgow Junction led to Glasgow; the other to Bardstown.

This road then became one of the main highways in this section of the country and one that was much traveled. Stage coaches, the smart equipages of the aristocrats of town and country, as well as ruder rustic and urban vehicles, made their way over this main road through what was still largely a wilderness. The town of Three Forks became a relay station. Here the drivers of stagecoaches and the mail carriers exchanged their tired nags for fresher ones and they, as well as the passengers, endeavored to rejuvenate themselves by partaking of food and drink. To Mr. Bell it doubtless seemed that here would be an excellent place for the location of a comfortable inn or tavern, and he acted accordingly.

Due to its strategic situation, an inn only mediocre would have been a success here, but under Mr. Bell, a man of culture from all accounts, there was engendered and developed a tavern that became nationally famous. Even in those remote days it was considered a part of everyone's education to visit Mammoth Cave and many were the notables from all walks of life who made a respectful pilgrimage to this prodigy of Old Mother Nature. Since it was on the way to the cavern, a good many of these stopped at Bell's Tavern; at first because of the exigencies of travel; later, and in increased numbers, because of the reputation of the inn. Indeed, so famous did it become that the name of the place was changed from Three Forks to Bell's Tavern. And with regard to the notables who were guests at the inn, an "A-1" class of such is meant; not mere traveling tinkers and the like, but men of the stature of Henry Clay, the King of England and United States Senator Silsbee from Massachusetts

Oh, that we only had a magic Axminster, that we could be transported back to those times! Imagine a road, not the smooth-surfaced, skillfully constructed affair of today, but one that is little more than a widened trail, hardened by usage, winding through what is still in parts a wilderness. Flowers are every-

where in profusion, their rich variety of colors forming a pattern truly kaleidoscopic. Over this road dashes a picturesque (it would be to us of today) stage-coach. The driver urges on his steeds faster and faster, the postillion sets up a merry and enthusiastic tooting on his horn, for now they are approaching Bell's Tavern and a pleasant oasis in the desert of traveling is in sight. Inside, the passengers smooth out their ruffles, straighten their hats, brush off their clothes and, if any of the younger generation are along, coerce and threaten them into a semblance of recitude.

At last with an air of old Kris Kringle arriving on the lawn in "'Twas the night before Christmas," the stage-coach rolls to a rest before the inn. The servants of the inn rush out; the dogs bark and make tentative nibbles at the legs of the horses; the townspeople gather around to see the passengers descend in stately manner

The reputation of Bell's Tavern rested on several foundations. First, Mr. Bell was a man of culture and one who could hold his own in conversation with the intellectual giants of the day. Henry Clay and other statesmen made of his tavern a sort of club or salon, where they could be sure of meeting equals. Then, too, the inn was famous for its hospitality to the guest and for its strict observance of all the little niceties of conduct that do so much to make agreeable the contact between members of society. And last, but really first in any catalogue of virtues, there was its cuisine. Beef steak, quail, venison -in fact, any kind of meat you could think of—and flapjacks! Let us not forget those flapjacks, pray. These were especially famous among the gourmets of the day and many a stack of them, garnished with butter and honey, or syrup, perished gloriously. Bell's Tavern was also famous for a concoction which Mr. Bell prepared with expert hands, called "peach and honey," a beverage of exhilarating potency.

After William Bell's death, the widow of his son, Robert Slaughter Bell, and her two sons owned and ran the inn. Gradually, the idea was conceived of building an inn, whose exterior and interior both would be worthy of its reputation. Work was started some time in 1860 and, stone by stone, the dream approached reality. But all this while the dark clouds of war had been gathering on the horizon and, when finally the tempest broke, the work was halted. It was never resumed. The old tavern, however, continued to be a pleasant spot for the weary traveler clear up until 1882 or 1883. In the closing days of its existence it was owned by Mr. G. M Procter, whose daughter and her husband (Mr. and Mrs. J. B Whitney) are living today at Glasgow Junction and to whom the writer is indebted for many of the facts contained in his story.

The ruins of the projected tavern are about fifteen or twenty feet high and extend along the Dixie Highway about 105 feet; the depth being about sixty feet. Massive stones, of a sort seldom seen nowadays, were used in its construction. Today these massive stones are still standing in the same position in which they were placed over seventy years ago. Old Man Weather and Old Father Time have cast their subtle weapons of destruction in vain; the inn, incomplete but undismayed, seems by its very presence to protest against the harsh bludgeonings of a fate that for it ended in futility and unfulfillment —that left it waiting like a bride at a church. Its walls have never known a roof; have never echoed with the lazy, cheerful talk of people comfortably housed; its only guests have been the lizard and the sparrow. Tall and sturdy trees grow within its confines and in the summer the blossoming honeysuckle mantles its walls with masses of fragrance.

If the ruins at Glasgow Junction serve as a monument to perpetuate the memory of a famous inn, then on them in a prominent spot should be engraved this epitaph—"Of all sad words of tongue or pen, the saddest are—It might have been."

"Hot" Numbers

Noble & Cooley Co.

The Jazz Outfit pictured is typical of a line that was shown in ten sizes and which is made to retail from $1.00 upward. This company's line of quality drums, coming in new designs and colors, with special heads, and numbers in tamborines and rolling hoops, were also seen in the permanent display rooms of Riemann, Seabrey Co., Inc.

Gobar Products

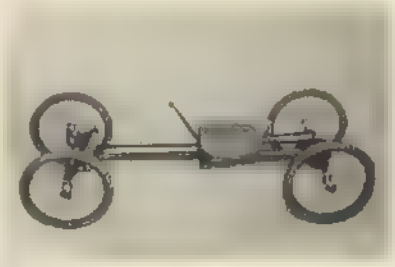
The Mystery Boat. What makes it run? What gives it that realistic "put-put" sound of a big motor boat? There are no springs, no moving parts—yet the Mystery Boat will operate steadily indoors or out, wherever there is water, for forty-five minutes. It is the popular little boat that uses canned heat to make it go. Each boat comes individually packed in 3-color cartons, with complete instructions for operating.

Bradley Picture Puzzles

Picture puzzles which embody the newest ideas are featured in the Milton Bradley Line. The illustration shows the Airways Picture Puzzle. It is printed in attractive colors, and is based on the latest developments in aviation. The retail price is $1.00. Other items in this line feature activities of all kinds, from Alice In Wonderland to the latest developments in science

J. K. Farnell & Co., Ltd.

Scottie is one of a large line of animals made by this well known concern. Scottie can be had in lengths from 12" to 21" and retails from $2.00 to $10.00, being suitable especially for department store trade. Materials, design and workmanship of a high grade are special features of this line.



Colson Co.

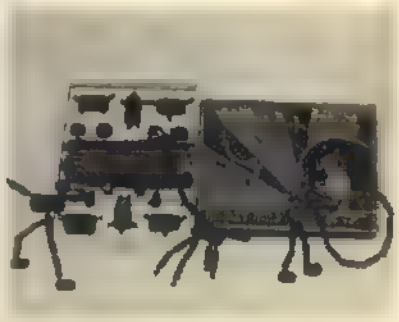
The Fair Sport Racer shown here is called the world's speediest wheel toy by the manufacturer. It is propelled by a hand operated strap, attached to a clutch mounted on the rear axle, and steered by foot pedals on the front axle. The frame has 1¼" seamless steel tubing, and wheels are equipped with 1¼" balloon tires. Model No. 810 is designed for children from 4 to 7 years, Model No. 820 for children from 7 to 12 years. It is distributed through all classes of the trade handling wheel goods, and sells for $20.00 and $22.50. Other items on display were bicycles, velocipedes, scooters, tricycles, etc., all manufactured under the name "Fairy."

The Whitney Reed Corp.

This Spring Horse, a newcomer in the company's line, was displayed during the Fair in the showrooms of the Riemann, Seabrey Co., Inc. It is a new type of hobby horse and is made with steel springs to give the proper effect of a horse moving at a jog-trot. The other merchandise of this company, including Swing Horses, Trot-A-way Velocipedes, Houses, Sand Boxes and Beach Umbrellas were also on display.

Selley Mfg. Co., Inc.

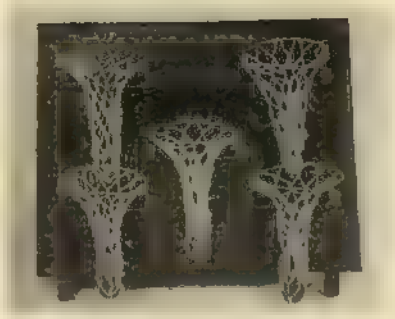
The Lark Airplane shown is a feather-weight model, with an 18" double surfaced wing. It is typical of a line that is designed expressly for department stores and which covers a retail price range of 75c to $7.50 and includes airplane construction kits and all varieties of model supplies. All of the products are offered under the trade name of "Selley Champion Line."



Main Toy Company

"Krazy-Ikes," the amusing little $1.00 builder toy that builds birds, animals and dolls, was the featured item in the display of this company, which also produces playground equipment and games. The line is made to sell to all classes of the trade.

Bidding for Favor



Standard Solophone Mfg. Co.

In the "55 Or Bust" Basket Ball Game pictured here we have one of the featured numbers shown by this exhibitor. The idea of the game is to make exactly 55—no more, to win. It consists of a kiln dried board, a horseshoe, five baskets and five rubber balls The game, which is a jobbing as well as a department store item, retails at $2.25

Anchor Toy Co.

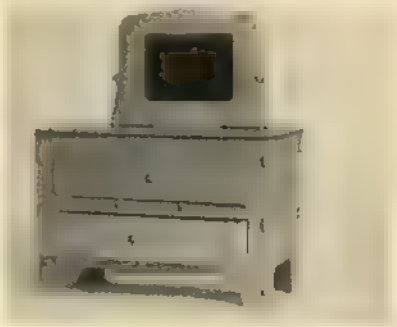
This little walking toy and cart is typical of a line showing several animal characters in various bright colors highly lacquered. The retail price runs from 25c to $1.00, sales being through department stores and jobbers. Another featured item under the trademarked line of "Roleasy Playtoys" was the "Balancing Soldiers," which balance at any angle, and which are made of wood in brilliant colors, and packed five in one box. This number retails at 50c

Hygrade Fabric Co.

Hygrade Playballs include a wide variety of these popular playthings made of rubber and rubberized fabric. They are finished in an extensive assortment of eye catching colors, and are especially suited for the jobbing and chainstore trade. The retail price range is from 10c. to $1.00.

Dolly Folding Kite & Toy Co.

The dresser shown is typical of a line made in sizes to cover a price range from 25c to $2.00. The mirror is detachable and the manufacturer features, further, the fact that each dresser is packed individually, in an attractive box. This line of dressers is augmented by a line of "Fibro" Furniture and "Shy Boy" Kites—all products being designed to sell through jobbers, department stores and chain stores.



Gerling Toy Co.

The number pictured comes in three sizes, with moving eyes, moving head and silk Kapok stuffing. Special attention is paid to finish and dresses and all are complete with tailored hats and baby shoes. Made to sell to department stores and exclusive jobbing trade, the numbers retail for $3.50, $5.50 and $7.50.

Painting and Water Color Outfits

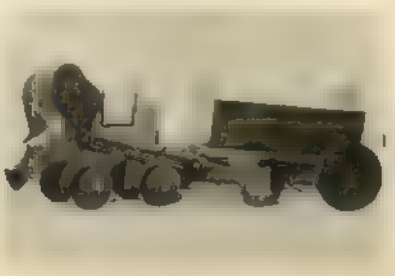
One of the most popular of the Milton Bradley Painting Sets is illustrated. This is the Playtime Utility Set retailing at $2.00. It is very complete in its equipment, the box being printed in attractive colors. The demand for these sets has been growing steadily during recent years. Child experts have brought about numerous modifications and improvements which make the sets especially valuable for young children

Katherine A. Rauser

The photograph herewith shows a typical trousseau trunk, fitted with doll and complete doll outfit, which "Kitty" produces to sell to the department stores in a price range of products from 25c to $10.00. These products include doll house furniture, doll houses, doll house furnishings –including curtains, cushes, rugs, etc.; also a complete line of Patsy and Patsy Ann Doll Outfits.

The Toy Kraft Co.

Pictured here is the Toy Kraft elephant and wagon. Like all other numbers in the line, it is hand made and hand painted, this particular number coming in bright red trimmed with yellow and blue. This is a practical play toy and is of a substantial size and construction These are made to retail for $2.50. Among other items of Toy Kraft on display were the hand painted wooden toys for Easter, Summer, Christmas and year 'round use. Pull toys and sand toys were also shown in many numbers with particular attention being directed to the pleasing color combinations, and the quality of workmanship



age, and yet the most instructive. By releasing the tension on the controlling thread the plane will right itself when out of position and this principle must be carefully adhered to in making a successful landing

The Glider may be seen on display in the J. L. Wright, Inc., Showrooms, 1443 Merchandise Mart, Chicago. Also on display by Mark Harris, 215 Fourth avenue, New York City, and M. Sweyd, 788 Mission street, San Francisco, Cal.

Lieutenant Rowell's Glider is furnished to dealers in three styles—the "Set-up" model to retail at $2.00, the "Semi Kit" (partially assembled) $1.50 and the "Kit" or construction outfit at $1.00

Discounts are the same as on Lincoln Logs and Bricks.

Further information will be gladly sent on request.

Knapp Krazy Ikes

Knapp Electric of 200 Fifth Ave., New York City, manufacturers of the Knapp Questioner, Master Magic, and other Knapp toys, have added Krazy Ikes to their line. Krazy Ikes was first announced at the New York Toy Fair, and later at the Toy Fair in Chicago, where it was very uniquely displayed and attracted unusual attention

Its popularity lies in its appeal to a child's creative ability. It consists of 68 pieces of wood, which are put together on a clothespin principle, forming all sorts of "Krazy" animals — donkeys, monkeys, giraffes, kangaroos, gobblers, humpty-dumpties, dollies, birds, dogs, soldiers, dancers, boxers, acrobats, etc The pieces are made of durable birch wood painted in attractive, bright colors of red, blue and yellow. It is purely a construction toy with apparently no limit to the objects it can make, which is one reason why it is referred to as the "1000-in-one builder toy"

Selling for a dollar, it has unlimited sales possibilities. It is a builder toy that doesn't wear out. Its construction advantages and its ability to make grotesque characters make it attractive to adults as well as children It is not a seasonal item as the company reports unusual sales since its first announcement at the New York Toy Fair in February, with production unable to keep pace with the increasing sales

This item is expected to have a good summer sale as a vacation and travel toy. It has also unlimited possibilities as a construction toy for kindergarten and school use, as well as its appeal of uniqueness, originality and entertainment, which makes it attractive to children of all ages

Changes at Oliver Bros., Inc.

Mr. Albert Oliver, formerly secretary and treasurer of the firm of Oliver Brothers, Inc., Philadelphia, is no longer connected with the firm, and Mr. Benjamin Greenbaum takes his office. Mr. Harry Greenbaum continues as president, while Mr. Frank P. Dwyer has been made salesmanager. Mr Dwyer will be remembered as the man who traveled the United States selling the "Hotspur" soccer shoe and the official A. F. A. soccer ball.

Stork Brings a Stark

Fourth of July is celebrated by the country in general, but not so with Fred Stark, one of Horsman's popular salesmen. Fred picked out the third of July to do his celebrating, for it was on this day he became the father of a 7-pound boy. It is rumored around that the baby will become a doll salesman. Fred says that the boy can say "Baby Dimples."

Hubley Makes Bank Now

The King Midas Bank is a new toy feature recently added to the Hubley line The greedy king, so familiar to children is represented by a long-eared, crowned figure with a leering wink, closely grasping his bag of gold. The coin slot is at the top of the bag and he points to it with his left hand The figure is mounted on a square base measuring 3½ inches and is about 5 inches high overall. The colors are flesh, red, black, brown, and gold

Hubley sees a bright future ahead for these toys as they are unique, attractive, and moderately priced

Dorfan Has New Train Signal

The "Five Point Light" is an interest ing electric train signal device placed on the market recently by the Dorfan Co., 200 Fifth Avenue, New York. Colored lights are done away with. Five white lights are used and when the block is clear three of them are shown in a vertical position; when train is coming the lights are horizontal

"My best salesman was a rival manufacturer"—I. Cowen, V. P. of Knickerbocker Toy Co.

The writer was recently talking to I. Cowen on the subject of salesmanship in the toy industry—and a story with a distinctly new twist came to light

"Knickerbocker's best salesman could be stated off hand by anyone in the industry — Leo Weiss, my able partner—of course—but the talented Leo himself will admit that the best individual selling job of two seasons back was put over for us, not by Leo, but by another animal manufacturer.

"One day early in May, 1928, a new customer came to our showroom, and after going all over the line, placed a very substantial order When he finished I thanked him, and inquired as to just how he came to get in touch with us, and as to how he had waited so long before he actually placed an order with us."

"Well," he said, " it's a rather odd story. Of course I had heard of you people, through your advertising, but it remained for a rival manufacturer to sell me your line."

"How come?" said Cowen.

"Well, it was this way," said the buyer. "The man who had been selling me animals gave me satisfactory values and service for several seasons, and I never did any shopping on animals. But suddenly he began to plank animals in front of me with comments like, 'This one is as good as Knickerbocker's' and 'This one is better than Knickerbocker's' or 'This one is cheaper than Knickerbocker's.'

"And so—I naturally said to myself I'll just have to see this Knickerbocker line before I buy."

Liberty Playthings, Inc.

Maerklin Steam Locomotive

News and Notes

Maerklin Steam Driven Locomotives

The accompanying illustration shows one of the popular Maerklin Steam [illegible] Maerklin models come in several sizes and cover a wide price range. The particular model illustrated is a beautiful reproduction of a powerful express steam locomotive. It has fixed double [illegible] reversing gear, hand or automatically operating through stop valve. It also has a safety valve, waste tap, steam whistle and exhaust pipe outlet in chimney. Another feature is the double bogie tender. It comes complete with cup, funnel, washers, screw wrench poker, and cylinder oil. In fact, as with all Maerklin models, Maerklin Steam Driven Locomotives are wonderfully accurate reproductions of the real thing.

Comet Makes Musical Toys

The Comet Novelty Co., of 2808 Fulton St., Brooklyn, is now manufacturing and selling the line of musical toys including calliopes, flutes, kazoos, whistles, etc., which were formerly made by the Eureka Toy Co., of Troy, N. Y. This line covers a wide range of popular price items and is suitable for all classes of trade. These musical toys were formerly sold by S. Rosenberg & Co.

Folding Doll Carts

The Forsyth Metal Goods Co. are offering the trade an unusual line of popular priced folding doll carts in metal and imitation leather. These doll carts are being shown by the Riemann, Seabrey Co., Inc. They are made in four sizes to retail at 50c and up. They are fitted with red disc wheels 4½ and 5 inches in diameter. One of the lower priced numbers is illustrated here. The larger ones are made with sun canopies.

The Mordt Company Announces

The Mordt Company is offering a new line of metal gymns, varying in height [illegible] 4 ins to 8 [illegible] ins, stressing the point that the height of a gym set is of great importance, in that it should provide sufficient clearance for proper and safe performance by a boy on trapeze and rings, likewise high enough suspension from the floor to lend a thrill and avoid dizziness. These manufacturers tell us, by eliminating all the unnecessarily expensive castings, yet producing a sturdily built and easily assembled gym stand, that they have been able to offer such improved style gym at a price low enough to attract the general public of moderate means, where heretofore the more expensive items of this kind may have sold only to the homes of the well-to-do. And whether the ultimate purchaser lives in the house, apartment or hotel suite The Mordt Company say they have a gym set to fit every home and every pocketbook. Overcoming foreign competition with a superior article at a moderate price is a matter of constant concern with these manufacturers, and we are advised notwithstanding the expected considerable boost in the tariff schedules applying to such commodities in the bill before Congress that there will be no advance in the Mordt prices as a consequence. This company has designed and prepared a "Manual of Gym Exercises on Mordt Gym Sets"; an illustrated book of 16 pages that is being furnished with each set of their class A merchandise. At the Palmer House, room 722, during the Chicago Toy Fair Mr. Mordt and assistants will greet and be glad to explain the various meritorious features of their products.

Gem Doll at Toy Center

Gem Doll Corp. will display in Room 821, 200 Fifth Avenue, after May 1st.

Will Represent Liberty Playthings

Liberty Playthings, Inc., of Niagara Falls, N. Y., announce the appointment of the following representatives for their Liberty PLAYBOATS: Ralph W. Reed, 421 Arthur Bldg., Omaha, Nebr., covering Iowa & Nebraska territory. The Heiman Co., 1609 University Ave St Paul, Minn., covering the Northwest territory; Mr. A. Rose, 2095 Pingaree Ave., Detroit, Mich., covering the States of Ohio & Michigan, and Western Pennsylvania; James S. Vysco, 912 Commerce St., Dallas, Texas, covering States of Arkansas, Oklahoma and Texas; J. F. Bridges, 312 S. Clark St., Chicago, Ill., covering the immediate Chicago territory, including Milwaukee.

Big Bang Gets a Certificate

The Conestoga Corp. are mailing to the trade a circular containing a report from the Department of Public Safety of the Commonwealth of Massachusetts covering tests conducted on their Big Bang Cannon. The results of the test are most interesting and are reported as follows: "The cannon was fired, holding the hand about one inch from the muzzle; a flame was seen, a pressure was felt and a slight sensation of heat. A white cotton thread, a rayon thread, and a human hair were in turn fastened across the muzzle of the cannon. There was no effect on the thread or hair. The rayon thread, which was very delicate and flimsy, was ruptured by the force of the explosion. An ordinary parlor match was placed in the muzzle of the cannon. The match was blown from the cannon a distance of a few feet, but did not ignite. About a teaspoonful of dry black gun powder was placed an inch from the muzzle of the cannon. This was scattered about by the force of the explosion, but was not ignited. Cotton, saturated with gasoline, was placed two inches from the muzzle of the cannon. This ignited and was scattered when the cannon was fired. The proper charge of "Bangsite" or calcium carbide for the model 8F cannon, weighs approximately 5-6 of a grain. As one pound of carbide will produce about 4½ cubic feet of acetylene gas, it was estimated that slightly less than one cubic inch of acetylene is generated when the cannon is fired. I find, upon investigation, supplemented by the tests herein described, that the calcium carbide and acetylene gas which produces the explosion by means of the devices subjected to the tests cannot be classed as fireworks, that the articles are a safe and sane method of producing noise for celebration purposes; and that no regulation regarding their sale or use in this Commonwealth is required."

MacLaren Sells Royal Games

Royal Games, Inc., have opened salesrooms at 221 Fifth Ave., New York City, in charge of Robert MacLaren, vice-president and sales manager of the company. They make a large line of popular price games to sell at 10c to $1.00. At present this line includes 87 different items. Joseph Mender is president, Ray Robinson, secretary, and Dave Harrison, treasurer of the company. This line will be shown at the Morrison Hotel during the Chicago Toy Fair.

GEORGE E. PARMENTER

American Crayon Company Elects New President

Results of the annual meeting of the American Crayon Company, held during the month of January at Sandusky, Ohio, reveal a number of changes in the personnel of the officers of this organization. Of paramount importance is the election to the presidency of George E. Parmenter to fill the vacancy caused by the death of L. L. Curtis. Mr. Parmenter has been affiliated with the industry for over fifty years, for some time holding the position of First Vice-President and Eastern Sales Manager of the company. He maintains his home in Branford, Conn., with business headquarters in New York City.

Other officers elected at the recent meeting are: Carey W. Hord, formerly Second Vice-President and General Sales Manager, now First Vice-President and Director of Sales; A. M. Spore, re-elected Secretary-Treasurer; Earl L. Curtis, former Assistant Secretary-Treasurer and Purchasing Agent, now Second Vice-President and Purchasing Agent; John C. Whitworth, made Assistant Secretary-Treasurer; Leland P. Spore, re-elected Auditor and Office Manager; Lynn B. Curtis, re-elected Factory Manager. Directors include the above named, as well as Carl C. Curtis of Pasadena, Calif., and T. B. Taylor of Sandusky, Ohio. President Parmenter has indicated that the policies of the company will be continued along the same lines that have been followed in the past, and that the outlook of the organization at the present time is very encouraging

New All-Fair Catalog

All-Fair, Inc., have sent their new 1930 catalog to the trade, and it certainly makes a fine appearance. The cover is cleverly designed and printed in vivid colors. The catalog is printed in red and black on coated stock, bringing out the illustrations of the games and toys to the best possible advantage.

New Hubley Toys

The Hubley Manufacturing Company of Lancaster, Pa., has just placed on the market two new toys which have been added to their line of "Exclusive Right" merchandise. These new items are a Jantzen Surf Girl and a Jantzen Beach Patrol. The figures, nicely modeled and in lifelike poses, are mounted on surf boards, or aquaplanes, around which is indicated splashing waves. The front wheel of these toys is eccentric so that when the toy is pulled along a wave riding motion adds to the realism of the design. Space will be taken in the June issues of the Junior Home and Child Life, two of the leading juvenile publications and the Surf Girl will be illustrated and both toys described. The Hubley organization is making great efforts to popularize the Hubley name so that the toy dealer will receive the benefit. On each of the new toys the Hubley decal and the Jantzen insignia will appear, Hubley having been authorized by the Jantzen Company, famous makers of bathing suits, to produce the toys.

Paramount Moves

The Paramount Sales Company, whose showrooms are now located in the Flatiron Building, will move on May 1st to 16 East 18th Street. In their new display rooms, conviently located between Fifth Avenue and Broadway, they will show the complete lines of those four well known quality brands the "Paramount," "Goodyear," "Rubbercraft," and "New York Ball & Toy" rubber balls and rubber toys. In their new headquarters the Paramount Sales Co. will be able to present a very full and conveniently arranged display of these four brands, all of which are made by the Paramount patented processes. These rubber balls and toys will be shown during the Chicago Toy Fair in Room 521 of the Morrison Hotel, under the direction of Tom B. Roberts, Paramount's genial Director of Sales, and H. E. Bitterlich, the popular Western Representative of that firm.

New Stevens Repeater

The J. & E. Stevens Co., of Cromwell, Conn., have just placed on the market a new number which they call a Stevens Instructor Repeating Cap Pistol. This pistol combines simplicity of mechanism with positive action and obviates many of the difficulties which have been met in the manufacture of repeating cap pistols. The new item is easily assembled and disassembled, and adds one more to the line of constructions toys made by the Stevens Co. which have been popular for so many years

Little Miss Fugarini

The stork, that bird of joy and happiness, has alighted upon the home of Mr. and Mrs. John C. Fugarini. Lois Anne Fugarini arrived in this whirling world on Thursday, March sixth, and has been a howling success since that date. Mr. Fugarini is the New England and Pennsylvania representative of the Riemann, Seabrey Co., Inc.

C. A. SCHOEN

'Cap" Schoen in the Southeast

C. A. Schoen, familiarly known as "Cap" by most of the toy trade east of the Mississippi and many west of it, has been transferred to the southeastern territory of The Gendron Wheel Company of Toledo, Ohio. His new territory includes Virginia, North Carolina, South Carolina, Georgia, and Florida. Cap has been with Gendron for years, the list fifteen of which he has spent in the southern states, covering Tennessee, Alabama, Mississippi, and Louisiana. With the remarkable new line of The Gendron Wheel Company to aid him Cap should prove even more successful in his new territory than he did in the old, where his large volume always kept him close to the top in the Gendron Sales Organization. His old southern territory is being taken over by Kenneth Pollard, an up and coming young man who recently joined the sales force of The Gendron Wheel Company.

Hesse Will Breakfast Lehmanically

The handsome five piece breakfast room suite made by the Lehman Co. of America, and forming one of their attractive show pieces during the Toy Fair, will soon repose in the home of Lee Hesse, toy buyer for Schruggs-Vandervoort and Barney, of St. Louis. Little Miss Alice June Taylor, 10 years old, of Washington, D. C. acted as the judge in reaching the decision as to who would own the furniture. Bill and Art Lehman telegraphed to Mr. Hesse, informing him of the happy event, and asking him to have Mrs. Hesse select the type of breakfast suite she might prefer from photographs which they forwarded to St. Louis. Incidentally, they state that nearly 900 buyers registered at the Lehman exhibit during the Toy Fair.

The New Name for Miller

The name of the Miller Rubber Co. of New York has been changed to the Miller Rubber Products Co., Inc. James Taylor, manager of the toy sales division, is enthusiastic over the outlook for 1930.

Shearwater Pottery

By
E. H. TARDY
Agent, Biloxi, Miss.

SHEARWATER POTTERY, one of the show places of the Mississippi Gulf Coast, was established on East Beach at Ocean Springs and opened to the public on February 1, 1928. It is there because one man had a good idea and the tenacious energy to put that idea over.

Back in 1924 Peter Anderson saw the vast supply of fine potter's clay in this section, and decided that it was an excellent place to establish a pottery. Accordingly he built as best he could a small hillside kiln which he fired with pine knots. This attempt proved a dismal failure, and convinced Mr. Anderson that if he was to make a success of his pottery he must have some knowledge of the art. He went to Wayne, Pennsylvania, and took a course at Conestoga Pottery under E. deF. Curtis. When he felt qualified to continue by himself he left Conestoga and returned to East Beach where he erected a small experimental kiln and spent a couple of years perfecting himself in the art of making shapes, glazing and firing. In the summer of 1926 Mr. Anderson went to New York and took a special course in glazing under Dr. Binns.

Feeling that his pottery was now good enough to successfully conduct a larger enterprise Peter Anderson organized Shearwater Pottery, in the autumn of 1927, with himself as president and his father, G. W. Anderson, for many years an export grain dealer at New Orleans, as business manager.

Since starting the pottery other members of the Anderson family have joined the organization. Walter I. Anderson, a graduate of Pennsylvania Academy of Fine Arts, is taking an active part in designing and decorating pottery and has added much to the originality and interest of the ware being made. James McC. Anderson, a third brother, is showing singular aptitude in pottery decoration. Their mother, Mrs. G. W. Anderson, is also contributing special pieces, and as an artist and critic, has done much for the success of the work.

The policy of Shearwater Pottery, while the output is quite considerable for an art pottery, is not quantity production. The whole idea is to improve shapes, color, workmanship, decoration and design. Many of the pieces depend solely on shape and color for their interest which is the thing that strikes most observers at first sight. Very few pieces are duplicated and the pottery may be said, so far, to have avoided becoming commercialized.

Since 1928, the pottery has been developing steadily and the necessary equipment for its growth has been gradually increased with the demand for pottery. Today there are two kiln houses, two drying rooms, two glazing rooms and two work rooms.

One of the potter's wheels now used was formerly used by George Ohr, Biloxi's famous potter who died some years ago. It was with this wheel that Shearwater Pottery made its start, but now a modern power wheel has been added, also a filter press for the proper drying and proper preparation of clay.

There are only two kilns, one a large down draft kiln with a capacity of from 200 to 250 pieces; the other, recently installed, is a ceramic muffle kiln of very large size. This will give largely increased facility for the manufacture of special pieces.

Shearwater Pottery is located at "Fairhaven," the Anderson estate of twenty-five acres of beautiful woodland fronting on the Bay of Biloxi. A more ideal location for such work could hardly be found.

There is an unlimited amount of native clay to be found within easy reach, the clay at present being brought from Fish River, which enters Mobile Bay. The material is brought from the landing at Fish River by boat, direct to the wharf at the Pottery which is situated on a small bayou coming into the Anderson place.

In addition to the buildings housing the plant and the production end of the business, there is a show room building which deserves a few words of description. It is planted right in the middle of the piney woods with native shrubbery all around it and a fine outlook across a marsh to the Bay of Biloxi. There is one large room lined with pottery of all sorts and through this there is access to a gallery with a northern exposure, in which the pottery is shown in stalls, partitions separating the different colors. This building houses the office and packing rooms.

The pottery now also employs two local young men, Clare Scharr, son of Division Signal Maintainer Scharr of the L. & N. R. R., and Bruce Hutson, to whose faithful work much of the success of the pottery may be attributed.

Pottery of unique and charming design graces the show rooms of Shearwater Pottery.

There appears to be no limits to what may be done in pottery at this particular plant. The improvement noted in the ware since the start in 1928, has been steady and very marked. Visitors are welcome at the show rooms every day of the week but the workshop may be visited on Monday afternoons only.

A visit to Shearwater Pottery is one of the most interesting and delightful trips on the Gulf Coast.

A Ticket Agent's Impression of New Orleans

By F. A. STICKER

In the November, 1929, issue of this Magazine is a report of the convention of the American Association of Railroad Ticket Agents at New Orleans and on the Gulf Coast. This article presents the story from the visitors' angle. —EDITOR.

AS THE invading army of the Railroad Ticket Agents entered the wide open hospitable gates of New Orleans, on Monday, October 21, they felt the thrill that accompanies the entrance into the portals of such a quaint and interesting city, a sort of magic city, that held much of the unusual for them to see and explore within the succeeding five days, within its intriguing background of more than two centuries of romantic history.

New Orleans holds an attraction for the visitor of much more than just ordinary interest. This is particularly true of its famous French Quarter, redolent with the memories and traditions of love, adventure and knights, valiant actors of long-forgotten days when all was fair in love and war and sometimes traversing the narrow and crooked streets under the chaperonage of our fair guides, we could almost reconstruct some of the scenes of an earlier period of the Crescent City's history. We felt it held much of the spirit of old Spain and France whose people craved plenty of the swashbuckler element that provided the soul-stirring adventures so dear to the heart and mind of the Latin race.

Time seemed to have stood still in this unique section of the city, and here the Count of Monte Cristo might have realized his fervent prayer that the Lord turn back His universe and give him yesterday. Here, like the Lotus Eaters of Tennyson, everybody appears to have reached "The land where it was always afternoon." No hurry, no bustle in this delicious atmosphere fragrant with vagrant memories of a bygone but not forgotten age of chivalry and romance

Two outstanding buildings that are fully representative of the Spanish and French periods in the city's history are the Cabildo and St. Louis Cathedral, both most interesting to the tourist. After a day or more in this atmosphere you sort of rub your eyes in wonder on coming to Canal Street, and viewing the skyline of the modern city, where the towering and imposing business structures, all up-to-date in finish and appointments, greet vision in all directions, splendid business blocks tell the story of a flourishing business metropolis, and comfortable, up-to-date hostelries make the tourist and business man feel right at home in this atmosphere of warm Creole hospitality.

A ride around the magnificent harbor of New Orleans is an experience that you will not easily forget. You are charmed with the beauties of the Father of Waters and amazed at the forest of masts among the shipping that represents the wide world commerce of this, the second port of entry in the United States.

Here King Cotton reigns supreme as an outbound commodity, and the luscious tropical fruit that appeals to everyone regardless of race, creed or color, the banana, is an inbound commodity. "Yes, we have no bananas" would indeed be a travesty in this land of plenty Strange but true, we found they even grew bunches of them on our special train enroute from New Orleans to Chicago.

Entertainment, did you say? Why, bless your dear heart, there was just one round after another, special programs for the ladies, while the men were in business sessions, golf tournaments for visiting guests, lunches and dances at the "Roosevelt," "Jung" and "Monteleone." All prearranged through the splendid work of the local committee headed by General Chairman A. P. Hardy, ably assisted by Miss Helen Roddy. The post-convention trips were most marvelously interesting and instructive, and will be great helps in selling not only New Orleans but the entire country in the Gulf Coast and Evangeline country regions Every ticket agent should have a very warm spot in his heart for the Crescent City, and sell its manifold transactions to his patrons.—(*The Louisianian.*)

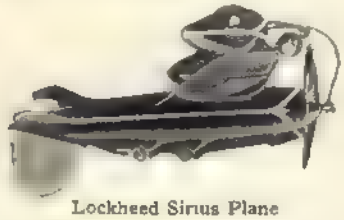
Five New Numbers Added to Hubley Cast Iron Line

The Hubley Manufacturing Co. of Lancaster, Pennsylvania, makers of cast iron toys, have recently added to their line five attractive numbers that should be of great benefit to toy dealers

The present day popularity of gliders has been adroitly capitalized with a glider toy named the "Lindy Glider." The Hubley organization, having copyrighted the name "Lindy," expects big returns from this toy, which is neatly modeled, brightly colored and equipped with rubber tires and demountable passenger. The toy is 10 inches long with a wing spread of 11 inches

Lindy Glider

A Lockheed Sirius plane, a model of the type selected by Colonel Lindbergh for his personal use and in which he made his new transcontinental record, is another of the new toys. This plane has two passengers, moving propeller, rubber tires and the name "Lindy" on each wing It is said to be a realistic copy of the big plane, and is 8½ inches long with a wing spread of 10½ inches



Lockheed Sirius Plane

The famous Hubley motorcycle line has been augmented by an Indian traffic car and an Indian crash car. The former is 12 inches long, has a demountable rider rubber tires and carries a load of small articles. It has a motor click and the cycle is a copy of the latest big Indian model

The Indian crash car is 11½ inches long and has a demountable rider, rubber tires, motor click, hose reel, hose and nozzle, gasoline can, first aid kit and a removable axle on each side. The cycle is the same type as the one used in the traffic car

A new Hubley toy

Naughton Appointed Sales Manager

M. F. Naughton, well known toyman, has been appointed salesmanager for Main-a-Car Corp. of Elmhurst, N. Y. The complete line will be displayed during Summer Toy Week at the McAlpin Hotel and Mr. Naughton will be on hand all week to greet the trade. This company recently announced that several prominent business men have been appointed officers for the company, the new officers being R. H. Stork, president; H. C. Drewes, vice president and treasurer, and S. W. Eno, secretary

Another new number is the Nucar transport which is made in two parts, measuring 16 inches overall and consisting of a car and trailer. It is equipped with a load of four small cars easily loaded and unloaded. The front section has a motor click attachment and both it and the trailer have rubber tires

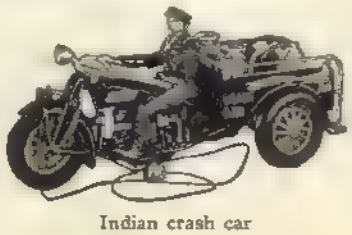
These new toys enable the dealer to make individual or unit sales, as each toy will appeal to children having previous models of auto, motorcycle or airplane toys. Those who have not can be sold units made up of related toys. Each toy is well modeled and brightly colored

Kilgore Duplicates Real Planes

The Kilgore Mfg. Co., Lancaster, Pa., announces their T. A. T. Tri-Motor plane. It is an exact replica of the planes used by the Transcontinental Air Transport, Inc., in their coast to coast service in connection with the Pennsylvania Railroad and the Santa Fe Railroad. It serves as a companion toy to the highly popular

"Amphibian Plane," the "Sea Gull" and the "Travel Air Mystery Plane."

This toy plane has received the unsolicited endorsement and approval of the T. A. T. Maddux Air Lines offices as indicated in the following excerpt from their letter "The lines of the plane are remarkably accurate in detail and it is by far the best representation of one of our planes I have seen. Please advise me where they may be purchased in New York."



Indian crash car

New Football Game Is Product of Woolsey Mfg. Co.

Woolsey's Football Game, shown at the Chicago Toy Fair by Mr Hoch, is a new mechanical game that will please children in or out of the football season

A small figure actually kicks the ball toward the painted cardboard goals, the angle from which it is hit determining where it shall light.

Other numbers made by the Woolsey Mfg. Co., of Minneapolis, are Bang-a-Loop (a glider gun made of wood and cardboard) and Ring a Nose

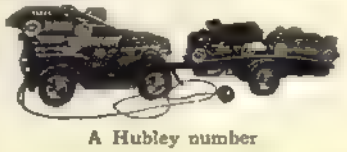
Aero Zeps is a new toy made by the Buffalo Toy and Tool Works, Buffalo, N. Y.

Morehouse, Economic Authority, Says America Still Land of Fortune

America is still a land of opportunity and 1930 holds much in store for industry and business. There is need, however, that we should go back to first principles of operation, of interesting the methods of production and distribution which have proved successful and profitable in the past. Executive and employee alike must appreciate that better business is not a matter of speculation, but of imagination, creative and hard work. In the period of readjustment and consolidation business and industry must take notice of weakness as well as of strength. If we proceed on the basis of a sane policy and govern all our actions by sound procedures we will accomplish what we all most desire—better business and better conditions

Kilgore in Fifth Avenue Bldg.

The complete line of the Kilgore Mfg. Co., Lancaster, Pa., will be on exhibit at 450 Fifth Ave. Bldg., New York City, during and after the New York Summer Toy Week



A Hubley number

Valentine Becomes V. P. and Sales Manager for "Buddy L" Steel Toys

R. F. Valentine's reedy baritone voice has found a new and most interesting theme in the well known "Buddy L" line of steel toys—for R. F. V. is now vice-president and sales manager for Moline Pressed Steel Co. at East Moline, Ill. Mr. Valentine has acquired a financial

R. F. Valentine

stake in this company and will devote his well known administrative talent to securing for "Buddy L" toys an even greater market than they now enjoy.

Valentine's headquarters will be in the Fifth Ave. Bldg. and he plans to do a considerable amount of traveling.

For the past year and a half he has been western sales manager of the Ives Manufacturing Corp. and prior to that time was vice president and general manager of the King Mfg. Co. of Plymouth, Michigan.

Schoenhut Revives Old Toy

A. F. Schoenhut Co. writes us that the dancing figure pictured below in a group of Schoenhut toys was made in Germany in the year 1864-65 by his grandfather, Wm. F. Schoenhut. It was made by the old importing firm of John and George Doll in Philadelphia.

A few of Schoenhut's leading spring and summer items, some of them illustrated here, are the Roller Chimes, the wooden racing yachts, the Choo-Choo push toys and a late novelty—the hooked rug set.

Wheel Goods Manufacturers Bring Out Distinctive Lines

The American National Company, internationally known manufacturers of children's vehicles, have added a new series of velocipedes to their 1930 line which are causing a great deal of comment, and which favorably impressed visiting buyers at both the New York and Chicago Toy Fairs. The velocipedes are made in four sizes with 12, 16, 20 and 24-inch front wheels and numbered 100, 101, 102 and 103, respectively. Equipment includes many new features, among which are the patented "Jumbo" hubs and hub caps, bicycle type truss fork, motor bike type handle bar with rubber grips and bicycle bell, 1¾-inch rubber tires, and tangent spoke wheels. They are finished in a rich shade of blue with white head and striping.

Gendron to Market Toy Plane

The Gendron Wheel Company of Toledo, Ohio, manufacturers of the famous "Pioneer" line of children's vehicles, among other things, are placing on the market for 1930 a new tri-motored airplane, the No. 999, equipped with pneumatic tires and ball bearing wire spoke wheels. The plane is attractively finished in their new shade of goldenrod yellow, harmoniously decorated in red, blue and black, and has a storage compartment in the fusilage directly behind the pilot's seat.

Blue Streak Cadillac

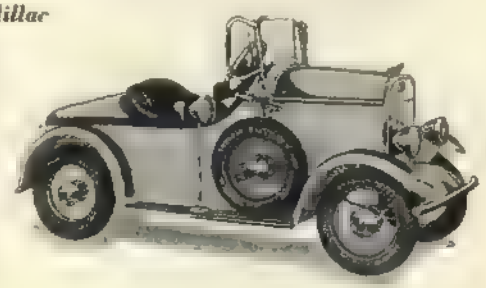
The "Blue Streak" line of the Toledo Metal Co. of Toledo, Ohio, has been enlarged by some juvenile automobiles that are a radical departure from anything ever before offered to the trade. These autos are "just like dad's." Equipment includes pneumatic tires (25 lbs. pressure), ball bearing heavy wire spoke wheels, running board spotlight, extra wheels, French horn, all steel chassis, easy riding cantilever springs, and other features. In addition these autos are furnished in many attractive colors that will add much to the pride of the boy or girl who possesses one. The No. 653-P Cadillac is illustrated.

Weinberg to Welcome Trade as Agent for Mid-West Toys

David T. Weinberg, who has long been associated with the toy trade and is representing Live Long Toys of Chicago, Maxcy-Barton Organ Co. of Oshkosh,

David T. Weinberg

Wisconsin, and the Patent Novelty Co., of Fulton, Illinois, is enjoying a nice sale on the lines he represents and will be glad to welcome the toy trade during the June Toy Week at the Hotel McAlpin, where all three lines will be shown.



Dancing Figure

Child's Rug Weaver

Chime Toys

Choo Choo Train

Some Seasonable Specialties from the A. Schoenhut Co., Inc.

Liberty Playboats Feature New Models

According to announcements received recently from Liberty Playthings, Inc., the 1930 line of Liberty Playboats has been augmented by the addition of several new models and new action features for the popular models produced in 1929. The Airplane Carrier now has an interesting play feature in the new catapult and trigger device which propels tiny gliders from the deck with all the realism of its big sister, the U. S. S Lexington. Brighter colors have been used, and it retains the same twin motors and propellers and other features that have made it so popular in previous years

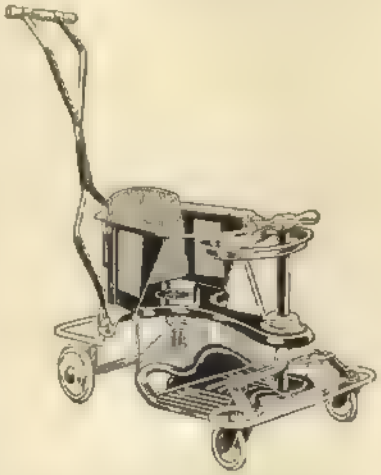
A new action feature, calculated to increase the appeal to children, has also been added to the Destroyer model. It is a torpedo tube in the prow, through which torpedoes, carried on the deck, may be shot. It retains the same low racy lines, powerful steel and brass motor, and general design of the model it replaces. The Junior single-motor Seaplane, a new number, was brought out to meet the demand for a smaller companion to the larger twin-motor seaplane. These speedy toys scoot over the water with the same pep and realism of a real plane, capturing the fancy of the million of air-minded children. Another new number is the pull-toy destroyer, a flat-bottom model without motor. All Liberty Playboats, except the seaplanes and small numbers, are equipped with removable undercarriage and wheels, combining the year-round sales appeal of a pull-toy with the realism of a real water boat. Important general changes are the variety of colors used in finishing the hulls of the boats, brighter, glossier lacquer finishes, rudder improvements, anchors on several numbers, and the fascinating play features on three of the models. All of the boats have non-crushable, non-sinkable wooden hulls. The addition of these features to the already popular line leads the manufacturers to predict a big year in 1930.

Ignatz Mayer with Novelty Doll

The trade will be interested to learn that Ignatz Mayer, who needs no introduction, is now representing Novelty Doll Mfg. Co., of 54 Greene St., New York City. This concern manufactures "Favorite" mama and baby dolls for jobbers, syndicate buyers, chain stores, premium users, etc., All necessary parts for dolls are turned out in their own factory. The complete line of this company will be displayed by "Ignatz" in Room 526, at the Morrison Hotel, during the Chicago Toy Fair.

Bob Green Convalescing

Bob Green, who is well known to many people in the toy trade, had the misfortune to break his leg recently, and is now in Bellevue Hospital, N. Y. He would like very much to hear from any of his friends in the trade, as it is rather tedious work lying in bed with a lot of weights and pulleys and other apparatus stretching one out while bones knit together. He is in Ward M2



New "Taylor Tot" With Shock Proof Springs

Attractive Display Pieces

American Mfg. Concern who make the well known Falcon line of toys have introduced a new feature which has met with instant success. These are wooden cut out soldiers and clowns for display purposes. They are very inexpensive and, as they stand about 3 feet high, they make unique displays and are especially suitable for toy departments. Many stores have purchased these cut outs as they find it more economical to get them in this way than to have them made to order locally.

Important Taylor News

The Frank F. Taylor Co. announces that they have changed their policy with respect to the marketing of Taylor Products in the Eastern Territory. They are now traveling their own men through New York, Pennsylvania, New England, New Jersey, Maryland and Delaware, and all shipments to this territory will be made direct from the factory.

The Frank F. Taylor Co. also announces a very important improvement in construction in the Taylor-Tot and the addition of a new line of Velocipedes, known as the No. 900 series. All models of the Taylor-Tot are now fitted with ingenious shock proof springs, which enables the child to ride in perfect comfort, fully protected against jar or bumps. Two tempered coil springs are so fitted to the rear axle that great buoyancy is possible during the entire life of the car. Complete durability is assured by braces placed against forward and backward motion and definite limits set to the perpendicular action. Patent has been applied for on this new Taylor innovation. It is also interesting to note that all models of the Taylor-Tot are now obtainable with or without play trays

In their new No. 900 Velocipede Series, the Frank F. Taylor Co. has again introduced a new and improved construction principle. The accompanying illustration shows that the rear arch has been eliminated, making possible the addition of aluminum step plates. This enables the young rider to dismount while the vehicle is in motion, or out of control, without causing a nasty fall. This new feature also permits more comfortable tandem riding and in general opens new possibilities in the pleasure to be had out of velocipedes. The finish of this new series is fully in keeping with the advanced design and construction. Three sizes are available, for children from 3 to 7 years. Patents have been applied for.

Here and There in the Toy Trade

C. W. SCOTT

T. B. EDWARDS

Scott With Murray-Ohio

C. W. Scott, recently in the New York office of the Sidway-Topliff Co., is now with the Murray-Ohio Mfg. Co., and will be connected with their New York salesroom in the Fifth Avenue Building. Mr. Scott has made a very fine record in the industry and especially in connection with juvenile vehicles. He has a pleasing personality and a most accurate knowledge of the items which he sells.

Irving Fink on the Air

The genial voice of Irving Fink, President of the Ay-Won Toy & Novelty Corp. was heard on the air on February 22nd and again on March 1st. This broadcasting was part of the Dagmar Perkins period from Station WGBS. Mr. Fink spoke to the radio audience about the merits of the Utra Light, the electric lantern which is enjoying widespread popularity. This lantern is supplied in a small metal case about four inches square, and can be made to reflect either white, red or green light. Mr. Fink has been very well pleased with the response given to his talk; as the postman has been busy bringing mail from people who heard the broadcast. Among the listeners to WGBS while Mr. Fink was talking were his own children, who became very enthusiastic. The youngest rushed to the loud speaker and shouted a greeting to her father, and on his return home asked him if he had heard her.

IRVING FINK

House Cleaning Sets

The Little Housekeeper House Cleaning set is one of four boxed House Cleaning sets manufactured by the Kiddie Brush & Toy Co. This line has a price range of 25c to $1.00 at retail, the one shown retailing at $1.00. There is a Mother's Helpmate retailing at 50c, and two very attractive Santa Claus Surprise Package numbers. All of the sets are finished in the new lacquer colors and are made with true adherence to details in grown up house keeping appliances. Sales counter appeal is secured through the use of exceptionally attractive boxes lithographed in four colors. A number of dealers have had very good results from using these items as leaders in spring toy sales, tying up their advertising with the annual house cleaning campaign. The line this year is distributed by Baker & Bennet Co for the United States, and by Geo. Borgfeldt & Co., Ltd., in Canada.

Paragon Furniture Change

The Paragon Furniture Co. anounces a change in sales representation in part of Brooklyn. Harry Wechsler will now call on the trade in that territory, where he is well known through having represented his company there in former years. Irving Wechsler, who has covered this territory recently, is no longer connected with the Paragon Furniture Co. The concern adds that they are ready to deliver Hartshorn go-carts and Paragon beach carts from New York stock, and also the complete C. H. Hartshorn fibre line

Redgrave's New "Pegatelle" Game

M. Redgrave's Bagatelle Co., of Jersey City, N. J., have just brought out a new game called "Pegatelle." The new game consists of a large clown finished in red, white and blue, with an opening in his throat to admit balls which are tossed by the players. The entire front of the figure contains a number of wooden pegs and the score is determined when the ball reaches the feet of the clown. The game is very attractively made up, and is packed in individual display boxes. This new number, as well as 7 sizes of Parlor Bagatelle, will be displayed during the Chicago Toy Fair in Room 783 at the Palmer House

Edwards With Ross & Ross

Ross & Ross, makers of quality stuffed dolls and animals, anounce the appointment of Tom B. Edwards as their representative in the East. He will cover the entire territory east of Buffalo and Pittsburgh, including New England and the Middle Atlantic states. Mr. Edwards has long been known in the doll trade, and his engaging personality and knowledge of modern merchandising needs have brought him a wide circle of friends among buyers, who will wish him well in his new connection. He is enthusiastic over the Ross & Ross line for this year, and believes their holiday numbers in stuffed toys and soft dolls will come in for a heavy play across the counter.

Twenty-Three Years in Wood Toys

Established back in 1907, at which time he began to fill the demand of the youngsters for popular-priced wood toys, F. W. Peterson, after twenty-three years, is still engaged in doing the same thing on what might now be called a larger scale. His line, which hitherto confined itself to tops, checkers, hockey sticks and toys of similar character, has now been amplified by the addition of an unusual line of wood toy items which retail for 15c. These include bassinet wagons, auto trucks, horse trucks, cradles and wheelbarrows. Mr. Peterson's complete output is designed particularly for jobbers and quantity buyers

F. W. PETERSON

New York Toy Fair

Rochester Folding Box Co.

Pictured here is the "Jackbilt Playhouse." It is collapsible and is made of fibreside board. It has eight windows, which can be opened and closed, has a colorful awning over each window and comes complete with chimney and dormer window. It is 45" high and 39" long. The door is large enough to permit the entrance of children of the twelve-year-old size. It retails at $3.00 and is sold as a jobbing item and to the department stores. Another item in a complete line of lithographed doll houses, ranging in price from 60c. to $2.00, is the "Jackbilt Fire Department." This is a fire house which actually ejects a fire engine. It has a bell on the roof which may be rung by the children

Shenandoah Community Workers

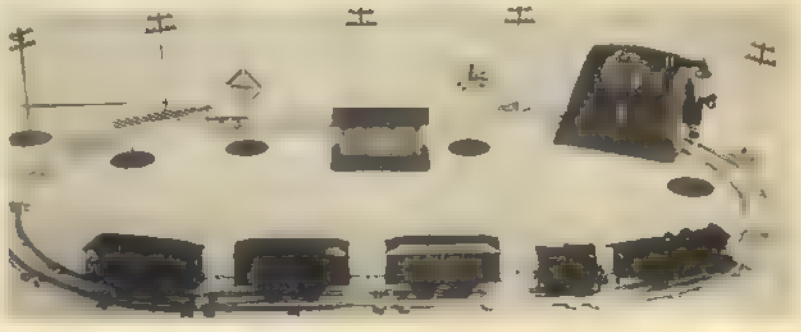
The Audubon Bird Picture Puzzles shown by this company for the first time this year, are the product of a community enterprise conducted by and in the interest of a group of native workmen in the Shenandoah Valley, twelve miles from the nearest railroad and the town of Mount Jackson, Va. The bird puzzle games are made expressly for the department store, gift shop and book shop trade, and retail for $1.00 coming three in a box, as shown. Other items manufactured in this community enterprise are "John Martin Beasties," which also retails for $1.00 a set, and the Shenandoah Building Blocks. The block sets cover a range of from $5.00 to $28.50

A. Reif & Co.

Here is a sample of an attractive briefcase line furnished in heavy Du-Pont cork-back material, all attractively decorated with assorted decalcomania designs and each complete with lock and key, made to retail for $1.00.

Mason Mfg. Co.

The table and chair set shown in the photograph is a $5.00 seller, with a 17½" high table and a top 20" square. Each chair is 22" high. The sets come packed one in a carton and are finished in green, ivory or maple, with decorations. These are made for all classes of the trade. Among other items produced in "The Mason Line," are nursery furniture, rubber-seat chairs, rocker-table sets, swings, dressers, desk sets and games; also dolls' chairs, rockers, beds, bassinettes, swings and cradles. The line includes merchandise selling from 10c to $10.00. One of the popular items well known to the trade made by this company is Neal Obstacle Golf.



Transogram Co., Inc.

The number shown in the photograph, this company's No. 1285, is a bubble set in an attractive suitcase with brass handles, riveted lock and a lithographed cover showing attractive scenes of various parts of the world. The bubble pipes are made with a brilliantly lacquered wood bowl and bright celluloid stem. The enameled dish, soap turtles and rubberized apron in a removable tray, complete the set. Designed for jobbers and department stores, this bubble set retails from 25c to $1.00. Among other items on display in the "Gold Medal" and "Gilt Edge" trademarked lines were games of all kinds, table and floor Kro-Kay, needlework sets, sewing cards, stencil sets, painting and crayon sets, aluminum sets, play boxes, writing sets and garden sets

Hafner Mfg. Co.

Featured in the permanent display of this manufacturer, in the showrooms of H. F. Mack & Bro., Inc., was the leading mechanical train special in the "Overland Flyer" line. This is the "Overland" No. 29 and consists of four-unit sections of track, engine, tender, three large cars, tunnel, station, clock, crossing signal, crossing gate, double-arm semaphore and six telephone poles. Packed all in one box, this No. 29 set retails for $5.00. It is typical of the "Overland" line, which offers improved numbers for 1930, covering a retail price range of from $1.00 to $5.00 and a wide variety of new accessories, embracing tunnels, bridges and stations

Featured Playthings

Marks Brothers Company

On this page there are shown two numbers in the line of the Marks Brothers Company. Described by the manufacturer as "A Good American Jack-in-Box" is the number pictured which, in the 5" high size, retails for 50c. It is also made in a 10" high number to retail for $1.00. In these numbers the manufacturer features the fact that the sounding device is of their own manufacture and is guaranteed to operate with a good, long sound. The "Kiddie" Cop Outfit shown comes in three numbers, which retail at $1.00, $1.50 and $2.50. The pictured number is the one that sells for $1.00 and consists of cloth hat, badges, varnished mahogany finish club, whistle and handcuffs.

Lehman Co. of America

The drop leaf table and chair set shown here is an early-American pattern, designed after the full-size breakfast room furniture manufactured by this company. The item shown is made in a Puritan grey, decorated in blue, with an enamel finish and hand-painted figures. This number is also made in a Stuart Oak and will retail in the neighborhood of $20.00. The company also featured during the Fair several new numbers in bench sets, consisting of table with two benches, shown in six or more color combinations—all with the same type of hand decoration described above. In addition, the well known line of this company, including doll beds, bassinets, cradles, chests, dressers, rocking chairs, bedroom furniture, play yards and kitchen cabinets, were also attractively displayed.

Junior Toy Co.

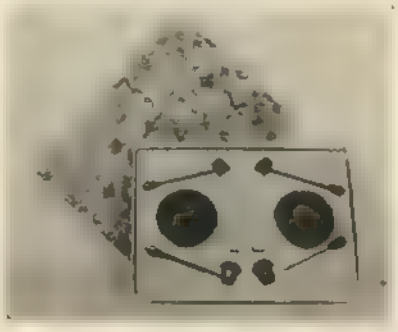
"Junior Toys for Girls and Boys" is the phrase used to describe the line of this company, one of which is pictured here. This small tubular number embodies the strength of the larger vehicles, is attractively finished and, together with other numbers and scooters which form the line, retails for $1.00 up. The company also manufactures junior novelties, camp table and stool sets, junior camping sets, costumers, bird cages and stands and shoe bags.

Gardner Screw Corp.

In this set of Garden Tools we find a rake that is 42" long, a hoe 38" long and a shovel 28" long. The metal in this set is 20-gauge, bright-finish steel and the handles are ⅜" Rock Maple Dowels. These are designed for the chain store, department store and jobbing trade and are made as 50c sellers. Other featured toys in the line, which are produced under the trade name of 'Good Scouts Delight," are the toy handcuffs, police sets, snow shovels, change makers and puzzles. The company also manufactures a complete line of bassinette hardware and automatic screw machine specialties.

American Bubble Pipe Co.

This leading item in the line of this company is a 25c seller, designed for all classes of the trade. The set includes two different kinds of bubble pipes, two cakes of bubble soap and a metal dish—all attractively displayed in a three color box. Their bubble pipes and bubble sets, eight in number, cover a price range of from 5c to $1.00. The product is known as the "Wood-Metal" Bubble Pipe.



Leaders in Lines

Uneeda Doll Co.

One of the popular-priced quality Uneeda numbers, with real hair wig, sleeping eyes and eyelashes, and a dress of voile, trimmed with ribbons, complete underwear, silk stockings and shoes to match, this number is particularly suitable for the department store trade. The "Uneeda" Line includes an extensive store line, ranging from 50c. to $10.00 retail.

American National Co.

Here we have the latest approved model Stutz Racer, 65" long, with full balloon pneumatic tires the size of which, in automobile parlance, is 2.50 by 12.75. It is finished in gleaming lacquer enamel and chromium plate and, selling for in the neighborhood of $35.00, is adaptable for both department store and jobbing trade. The photographed number is but typical of a complete line of juvenile vehicles, doll carriages and play yard equipment, all of which are produced under the trade name, "American."

Madmar Quality Co.

Pictured above is but one of the most complete lines of excellent picture and map puzzles produced by this company. The old and established favorites maintain their popularity with the visiting buyers, who also evidence considerable interest in several newcomers introduced by the company.

American Flyer Mfg. Co.

Pictured here is a number embodying this company's new development for 1930, which includes an entirely new line of narrow gauge electric trains, finished in baked enamel with solid brass trim and which are scaled reproductions complete in all details, of the most recent developments in American railway practice. The stream line construction of the low swung locomotive and cars permits high speed operation without danger of derailment. As an added development in this quest for speed, a special banked track of wider radius is now supplied with the entire new narrow gauge train sets. Other new features in the line this year are remote control lighted semaphores, high-speed trucks, automatic ringing bells, self-closing doors, automatic and remote control switches, crossing gates and a complete line of dial-type speed-control ling transformers with fractional voltage steps.

The Mordt Company

The Gym Sets made by this company consist of trapeze, swinging rings and swing, and the manufacturer features the fact that they are unbreakable. Sets to meet certain living requirements—for apartment, parlor, basement, attic or yard use—were also displayed. All numbers are equipped with case hardened ceiling hooks and are packed in attractive display boxes. The photograph shows the display stand that the manufacturer furnishes to department stores who order in quantities. A smaller display fixture, suitable for wall attachment, is furnished for jobber distribution. The prices for these Gym Sets range from $1.50 up to the Senior set, which sells at $7.50. Sets employing heavy duty metal stands, for small schools and playgrounds, retail at $40.00 and $60.00. Other products of this company shown were the Lon M x Rodeo ropes, Jumping Ropes, Ring Toss games and Children's Swings.

Newest Novelties

Domec Dolls, Inc.

This is "Kewty," described by its manufacturer as the outstanding character doll of their line. It is a 15" high, all-jointed, composition doll, with a head that turns and tilts in numerous poses. It has an attractive bow in the headdress and comes packed one in a box. This, together with a full line of quality dolls at popular prices, covering a retail price range of from $1.00 to 15.00, is made to sell through all classes of the trade.

Gould Mfg. Co.

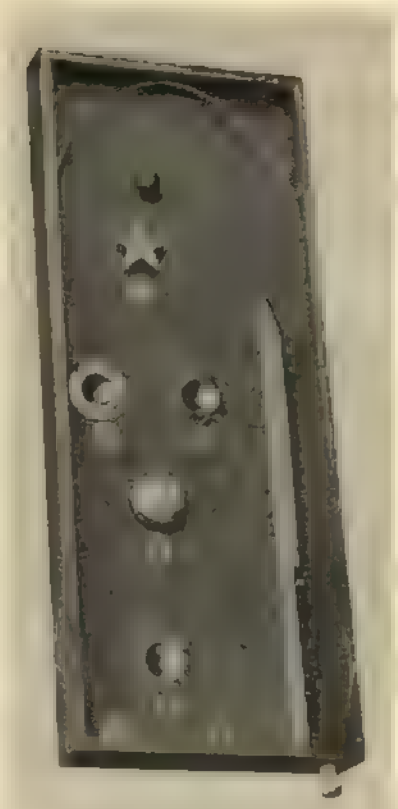
The number shown here is a large-size, high gloss enamel finished item coming in eleven different colors of an unusually striking appearance. It is equipped with a safety saddle seat and is made of plywood construction. These "Toddler Toys" are offered in many other beautiful designs and the entire line, which includes Shooflies, Rocking Horses, Hobby Horses, Doll Cradles, Bassinets, Nursery Toys, Wheel Toys and Wooden Pull and Action Toys, retail from 50c to $7.50, being particularly adaptable to the department store and jobbing trade.

Mutual Novelty Mfg. Co.

Characterized by its manufacturer as "The largest and prettiest box of icicles ever shown to retail at 10c," the attractively boxed silver ribbon icicles were featured by this company as being particularly adaptable to jobbers, chain stores, department stores and wholesale drug companies. An attractive line of 5c and 10c retailers also included artificial snow in mica and asbestos, a new and improved glass tree ornament hanger, colored icicles and new sparkling floss in all colors, designed for Christmas tree decoration.

Johnson Randall Co.

These Juvenile Rockers are built to serve as practical children's furniture. They have ship seats of cretonne 13" by 14" and come finished in an attractive array of enameled colors with fitting decorations. Made to sell to department and chain stores, the retail price range is from $2.50 to $10.00.



M. Redgrave's Bagatelle Co

The Bagatelle Game shown is the Style B. It is 23½" by 8½", has a varnished frame, is sturdily built, has a green cloth base and comes packed individually, with three clay marbles. Style C is the same, but comes in a Chinese red lacquer frame with a felt base and is equipped with three glass marbles. It is sold through all classes of the trade, Style B selling for $1.00 retail and Style C for $1.50. In addition to seven sizes of Bagatelle, this exhibitor also displayed "Pegatelle."

Canvas and Leather Novelty Co.

Here are shown three of the "Canlea" products made by this company. The bags are made of suede in four attractive colors, and are 11" wide by 8½" high. They are made expressly for youngsters of the kindergarten age, and the earlier classes. Shown also was an attractive line of similar products.

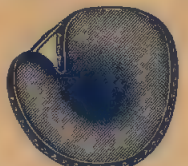
CATCHER'S—BASEMAN'S BASEBALL MITTS

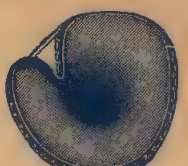
No. 1654 BOY'S CATCHER'S MITT. This is a good full size, suitable for boys and youths. Made of tan leather, palm and fingers, with black leatherette back, nicely trimmed. Has lacing between the thumb. Well padded, deep pocket and strongly stitched.
Each ..... .75

No. 3540 BASEMAN'S MITT. Full regulation size and a real professional model. Has strong rawhide lacing all around and is made of genuine Horsehide leather, nicely padded with deep ball pocket. Metal eyeleted lacing with adjustable strap and buckle at back. All seams welted and double stitched. Full lined, heavily padded.
Each 1.90

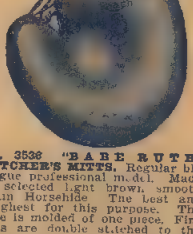


No. 3537 CATCHER'S MITT. Professional model extra thick, with deep molded pocket, genuine horse hide, tan color, heavy quality, black leatherette back, lacing all around edge, adjustable thumb, heavy lace strap, large size.
Each 1.35

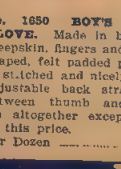
No. 3539 "BABE RUTH" BASEMAN MITT. This has the sure, real catch quality of the professional model and gives the player confidence in his playing to stop and hold any ball. Made of fine quality light brown Horsehide. Fitted with hand made felt padded natural built-in pocket, which may be adjusted by the lacing when desired. It has leather bound edges and leather facing. Strap and buckle at wrist with "Protector" under the buckle to prevent chafing. Pocket may be made high or low, wide or closed with the lacing to suit the individual taste. It is a real baseman's mitt.
Each 4.25



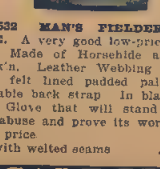
No. 3538 BASE BALL CATCHER'S MITT. A good popular number, regulation size, made of Horsehide leather, palm and back with welted seams. Metal eyelet lacing. Well molded and padded. Made 10 in. long and same in width. A model that is very popular and much appreciated at this price.
Price Each 2.50

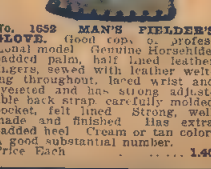


No. 3536 "BABE RUTH" CATCHER'S MITTS. Regular big league professional model. Made of selected light brown, smooth grain Horsehide. The best and toughest for this purpose. The face is molded of one piece. Fingers are double stitched to the back. The edges are leather bound and laced. Strap and buckle wrist holds the mitt on snugly. Full lined. Leather extension on the buckle prevents chafing. With a very well formed deep sure-catch pocket. Lacing is adjustable, permits pocket of extra depth.
Price Each 6.00



Fielders' Gloves





No. 1650 BOY'S FIELDER'S GLOVE. Made in brown or tan sheepskin, fingers and palm. Well shaped, felt padded palm, strongly stitched and nicely made. Has adjustable back strap. Webbed between thumb and forefinger. An altogether exceptional value at this price.
Per Dozen 5.28

No. 3532 MAN'S FIELDER'S GLOVE. A very good low-priced glove. Made of Horsehide and sheepskin. Leather Webbing at thumb, felt lined padded palm. Adjustable back strap. In black color. Glove that will stand a lot of abuse and prove its worth at the price.
Each, with welted seams ..... .80

No. 1652 MAN'S FIELDER'S GLOVE. Good copy of professional model. Genuine Horsehide padded palm, half lined leather fingers, sewed with leather welting throughout, laced wrist and eyeleted and has strong adjustable back strap carefully molded pocket, felt lined. Strong, well made and finished has extra padded heel. Cream or tan color. A good substantial number.
Price Each 1.40

LITTLE EGYPT WIGGLER

AL FOSS

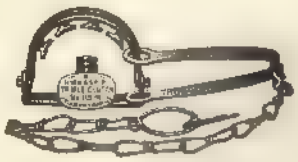
This spinner arrangement, fitted with a strip of pork rind, is an excellent lure for bass and large trout. The pork rind strip is attached by impaling on the hook and the forward end, put under clamp as shown in cut. Made of brass, heavily nickel plated. One size only, fitted with number 3/0 hand forged O'Shaughnessy hook. Packed one wiggler in tin box. Wt. each, ½ oz.

Little Egypt Wiggler.....Each $0 75

All above, one in a box.

GAME TRAPS

TRIPLE CLUTCH



Nos. 115X and 215X.

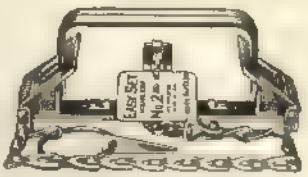
Triple Clutch Traps have three grips; upper, lower and middle ball grips. Pull, twist and gnaw proof. No bone breakage. After being set the springs of Triple Clutch Traps may be turned in any direction, from extreme right to extreme left or any position between these limits, and both jaws will still lie flat. This saves labor of cutting out or removing what would be obstructions with other makers' traps.

No. 115X. For muskrat, skunk, mink, etc.

No. 215X. For fox, coon, wildcat, opossum, etc.

No	Spread of Jaws In.	Size of Pan In.	Length of Trap In.	Length of Chain In.	Wt. doz., Lbs.	Doz.
115X	4⅞	1¾x2½	8	18	8⅝	$ 4 75
215X	6⅛	2¼x3	9½	19	13⅞	7 25

EASY SET—SQUARE GRIP



Nos. 2, 3 and 4.

Here is the trap that eliminates all necessity for setting clamps and does away with the dangerous practice of trying to set a double spring trap with slippery boots. Now you hold even the largest size trap right in the hands and complete the setting operation quickly and with entire safety. Men in saddle or on snowshoes will value this exclusive feature. Square jawed traps with long gripping rim offer increased opportunity for capture over traps with round or oval shaped jaws.

No. 2. For fox, coon, wildcat, opossum, etc
No. 3. For coyote, wolf, lynx, badger, etc.
No. 4. For wolf, otter, beaver, lynx, etc.

A setting clamp is packed with each No. 15 trap.

GAME TRAPS

TRIUMPH

Nos. 0 to 1½, Single Spring.

Nos 2 to 4, Double Spring

"Triumph" is the only long spring trap in which both jaws lie perfectly level and flat, with the spring turned in any direction. This valuable feature appeals to every user. The high carbon steel springs, uniformly tempered and carefully tested are full of strength and vigor. The pan is hinged high above surface water—positively non-freeze and non-clog. The unbreakable, all-steel jaws, strongly trussed and well formed, insure a firmness of grip much desired by every trapper. All excess and useless weight has been eliminated. The rigid guarantee protects both trade and user. Numbers 3 and 4 "Triumph" Traps are equipped with strong "Everhold" flat link chain.

No. 0. For barn rats, weasels, gophers, etc.
No. 1. For muskrat, skunk, mink, etc.
No. 1½. For mink, skunk, opossum, etc.
No. 2. For fox, coon, wildcat, etc.
No. 3. For badger, wolf, coyote, lynx, etc.
No. 4. For wolf, lynx, badger, coyote, etc

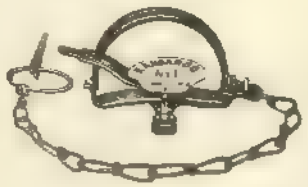
4	5¾	2⅝	18¾	21	27	16 50

KANGAROO



Nos. 1 and 1½, Single Spring.

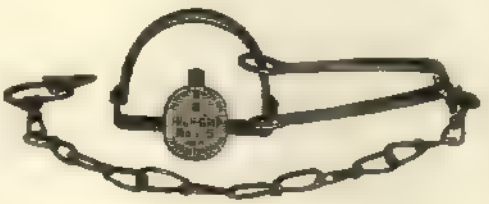
A compact, easily concealed trap. Especially desirable for den sets or within narrow runways. Unlike all other traps, the springs of "Kangaroo" are full width at the bend, the point of greatest strain, and being neither slotted nor riveted, the limit of strength and durability is secured. Top and bottom springs are cleverly interlocked, facilitating renewals without special tools. Pan is hinged high above surface water. Positively non-freeze and non-clog. All traps equipped with chains and rings.

No. 1. For muskrat, skunk, mink, etc.
No. 1½. For skunk, mink, muskrat, etc.

No	Spread of Jaws In	Diam. of Pan In.	Length of Trap In	Length of Chain In.	Wt.Doz. Lbs	Doz.
1	4¾	2¼	5⅛	18	7½	5 00
1½	5⅛	2½	5¾	18½	9	7 50

HIGH GRIP

High Grip Traps grip the animal high up on the leg where bone and flesh are heavier. The higher the grip the surer the hold. By using High Grip Traps the trapper increases his catch, consequently increases his profits. After being set, the springs of High Grip Traps may be turned in any direction, from extreme right to extreme left or any position between these limits, and both jaws will still lie flat. This saves labor of cutting out or removing what would be obstructions with other makers' traps.



Nos. 115 and 215 Single Spring.

No. 115. For muskrat, skunk, mink, etc.

No. 215. For fox, coon, wildcat, opossum, etc.

No. 415X Double Spring.

No. 415X. This is the lowest priced, lightest weight Bear trap made. Jaws are offset with eight well-staggered teeth; jaws have patent pivot locks; equipped with "Ever-Hold" flat link, steel chain. Will hold Bear weighing up to 600 lbs. Also used for Beaver, Cougar, Mountain Lion, etc.

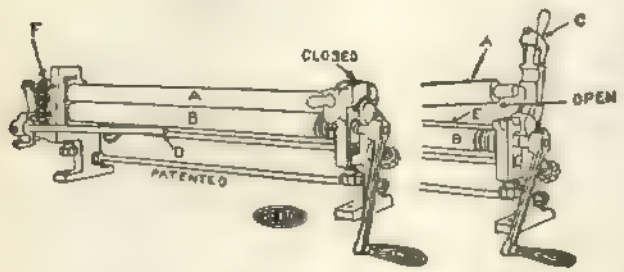
LIGHTNING SLIP ROLL FORMERS



Capacity, 22 Gauge Iron and Lighter.

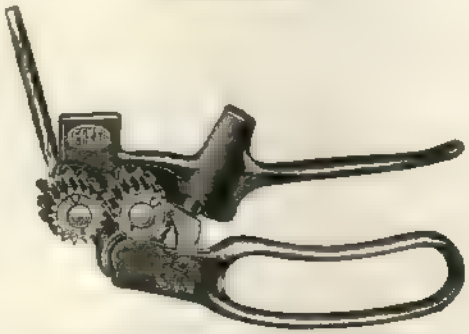
New original Pexto Features are embodied in these Forming Machine Patterns that place them in a class by themselves. They are greatly improved over their old Slip Roll Pattern Forming Machines and those which the present market offers. A careful study of the illustration shows that the time and steps saved through being able to perform all operations at one end of the machine the convenient end where the crank is fitted. Without necessitating the changing of positions the sheet to be formed is placed between the Gripping Rolls (A) and (B). The cylinder formed, open Latch (C), then by means of Lever (D) raise Upper Gripping Roll (A) and slip the formed cylinder from the Roll (A). It will be readily seen that all operations are performed at the crank end of the machine—a Pexto innovation that can be well appreciated by the mechanic who has operated the old pattern Slip Roll Former. Rolls (B) and (E) are adjusted with knurled Screws, and once adjusted they cannot slip. The Gears (F) are steel, machine cut, running more smoothly than cast iron gears, without danger of slipping or breaking with whatever thickness of metal is used. Grooves cut in rolls are intended to allow work with a wire to be formed.

The Roll Raising Mechanism in these machines is so balanced that the Roll (A) is easily lifted with a slight pressure on the Lever (D). The Latch (C) is released and closed with one movement, and is self-locking.

No. 382. Length rolls for sheets 30 inches wide; diameter of rolls, 2 inches; gripping rolls A and B have an extreme clearance of ⅛ inch. Wt. approx. 185 lbs., boxed .....Each $60 00

STEEL ROLL HAND CRIMPERS

COMPANION

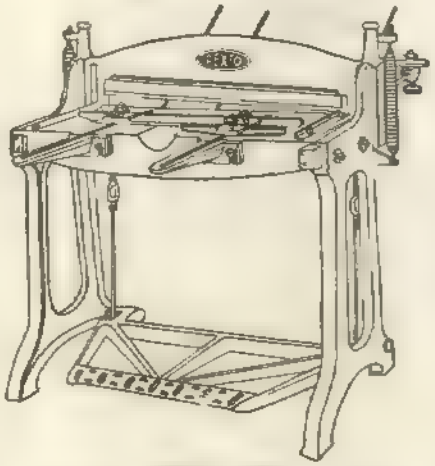


Capacity 26 Gauge Iron and Lighter.

A needed companion tool for the mechanic engaged in pipe making or hanging. In the shop and particularly on outside jobs, no kit is complete without this handy tool. To crimp a piece of pipe with machine-like effect and precision simply slip the end of the pipe to be crimped between the crimping rolls. Close the rolls by pushing down lever. With an up and down movement of the handle by means of a ratchet the rolls rotate, making a perfect crimp in the pipe The depth of crimp is regulated through a simple adjustment of a screw. A tool skillfully designed, well constructed, easy working, simple to operate and the first of its kind ever offered.

No. 788. Length over all, 8 inches. Weight each, 1⅞ lbs. ..... Each $6 00

SQUARING SHEARS



Silver City.

Capacity, 18 Gauge Iron and Lighter.

These new patterns are preferred over other shears owing to their extra wide Bed Plate and are so proportioned that they will cut up to the full rated capacity very much easier than any other similar shears of the same capacity. They are guaranteed to give very excellent service and Pexto high grade quality materials combined with thorough workmanship make them the most desirable up-to-date, medium weight shears that the market offers.

No. 132. Length for sheets, 30 inches wide; long front arms, 19 inches; length, rear gauge arms, 30 inches; width of bed, 14 inches. Wt., 510 lbs.....Each $110 00

"Our Gang" Table and Chair Sets Need No Salesmen . . .

Sturdily built and attractive table and chair sets decorated with pictures of "Our Gang" kiddies will boost your sales of juvenile furniture. Every customer remarks about the way they're built and how good-looking they are. You'll need no salesman to show these "Our Gang" sets — because they'll sell themselves—everytime.

The set includes a table and two chairs, finished in either blue, green or ivory; tastefully decorated with decalcomanias of flowers and "Our Gang" heroes.

"Our Gang" Sets are manufactured *only* by the Benner Manufacturing Company. Write today for more details.

● ***Benner Doll Bassinets, finished in attractive colors, make a toy a girl never tires of. Many varieties of sizes and styles.***

● ***Rockers and Shooflys, so attractive they sell themselves. Many different kinds painted in pleasing color tones and beautifully decorated by hand. Unusually sturdy.***

At the Chicago Toy Fair
April 28th to May 10th, 1930

JACKS

L

SINGLE LIFT HYDRAULIC WITH SCREW EXTENSION

36" Folding Handle—Walker

No. 830 and No. 835 are built for heavy duty truck and bus service either on the road or in the station. Power range increased by screw extensions. Pump and ram operating mechanism completely enclosed in malleable iron base. Safety valve prevents overloading. Positive oil returns from pump and ram prevent leakage.

Handle locked in socket for safe and easy placing and withdrawing of jack.

Ram lowered by pushing handle further into socket against spring pressure and downward against valve stem.

Oil filling plug at correct height in tank to assure correct oil level when refilling. Handle socket above center of jack to insure proper balance in placing and to prevent tipping. Hardened steel serrated cap for positive grip on lifting surface; 36-inch handle clears bumpers with stroke as long as desired; handle folds for placing in tool box or under seat.

May be operated in horizontal position. Skid base for sliding over gravel or dirt. Easy operating with speedy lift. Sturdiest construction throughout to sustain continuous service. Weight: No. 830, 20 lbs.; No. 835, 25 lbs.

NO.	Ht. In.	Raise In.	Screw Ext. In.	Capacity Tons	Dia. Rams In.	EACH

835	9	6¾	4¾	7	1⅝	24.50

Sure Grip

Ball bearing; sure grip anywhere.

An extra base is furnished to be used under warranted conditions and a 36-inch handle with a universal joint permits unhindered jack use.

No interference from bumpers, springs, spare tires or gas tanks.

Jack finished in copper bronze. Jack handle and base aluminum finished. The length of the handle clears the bumpers while a universal joint in same permits unhindered use. A positive lock in the form of a cotter key locks the handle securely to the jack

The use of the extra base is warranted at all times. Rough paved city streets and the soft shoulders along paved highways find its use almost indispensable.

NO.	Cap. lb	Low Ht.	High Ht.	EACH
SG	4000	6¾	16	$6.00

Simplex

The No. 39 Simplex Jack is a practical and efficient jack for handling balloon and semi-balloon tires. Built of high grade malleable iron with steel rack bar and drop forged steel spring case. The adjustable shoe provides a lifting range from 3½ to 11 inches. Complete with a 36-inch folding handle.

INDUSTRIAL

Duff-Norton Standard Speed—Ball Bearing

These jacks are of unusually easy leverage and are ideal for work in repair shops, in railroad yards, for bridge work, and for handling structural materials. They cover the requirements of many industrial concerns, contractors, trucking companies, factories, machine shops, and find many uses in and around mills. The top of the jack shoulders the full rated capacity as given below, while one-half of the rated capacity is lifted on the toe. The direction of the jack is controlled by a spring-actuated steel pin, engaging the teeth of the ratchet in either direction as desired. Furnished with carrying handles, one on either side of the jack. Each jack is supplied with a steel tube operating lever.

NO.	Cap. Tons	Ht In.	Lift In.	lb Each	EACH
60	15	26	13	132	$70.00

66	15	22	10	115	65.00

Standard Speed—Ball Bearing

Duff-Norton

These jacks are designed for extremely heavy work. The least amount of effort is required to handle the load on account of the leverage provided. The base is round, 14 inches in diameter, and is strongly ribbed. The top has a diameter of 10½ inches and contains extra large ball bearings which, due to their size and to their extreme hardness, are more efficient and durable and will withstand heavier loads than any other anti-friction bearings that could be used for the purpose. Convenient carrying handles are provided, one on either side of the frame, facilitating handling. The foot lift, rated at half the capacity of the jack, will be found very convenient for handling low loads.

NO.	Cap. Tons	Ht. In.	Lift In.	lb Each	EACH
64	50	27	13	320	$150.00

Duff-Norton High Speed—Ball Bearing

Adapted to use as general railway service jacks, and for all lifting purposes where safety and efficiency are of first importance. They are operated upward by means of a raising lever, and lowered very rapidly by cranking with a lowering handle. The lowering handle is also used for fast raising up to the load. Note the easy clearance and the wide swing of the lowering handle. An automatic positive safety clutch holds the load firmly at all times. Each jack is furnished with a steel raising lever and a crank handle for lowering.

The Scout Model L7

It lifts the heaviest pleasure car with ease. It has the lowest head of any hydraulic jack made 7" at low point. It is safe because it cannot lower accidentally. It is the lightest jack, weighing only 8⅛ lbs. packed for shipment. It is the simplest having only 2 positive bale checks to protect from dirt and has no flimsy or delicate mechanism. The hand adjustable plugger allows operator to run jack up 2" to meet axle. Then a 4½" lift will raise car high enough to inflate a 6" balloon tire.

Price, each $7.50

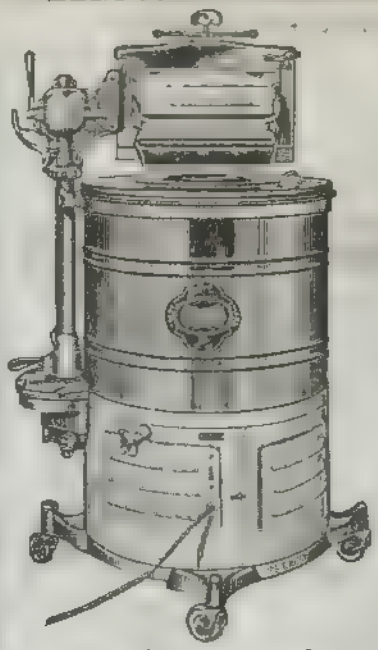
ELECTRIC WASHING MACHINES

—BLUE GRASS—

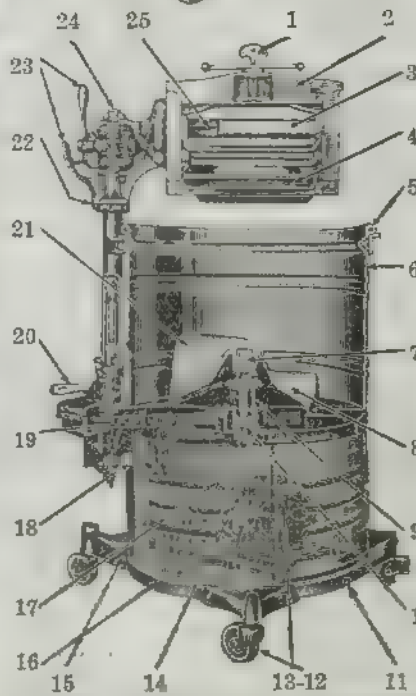
ELECTRIC GYRATOR TYPE



The washing principle is safe and fast, the mechanical working is simple and sturdy. The dome like agitator (no center post) with its washing paddle and clothes pusher, semi-turns in a half circle movement 62 times a minute, imparting a rotation of the clothes being washed. In from 5 to 8 minutes a 6 pound batch of laundry is washed.

1 to 4—Nickel plated swinging wringer with instantaneous safety release, soft rubber rolls and double drainboard.

5 and 6—Heavy copper tub, polished on outside, inside nickel plated.



7 to 10—Agitator seated on tapered spline which holds agitator tight but permits it being lifted out. Cone shaped bottom of tub with close fitting agitator, prevents buckles, buttons, etc., getting under agitator.

11—Convenient belt tightener.

12—Three extra large, easy rolling casters.

13—¼ H. P. motor.

14—Toggle switch control. 10 feet of cord, and plug.

15—One piece cast iron base.

16—Ventilated steel cabinet.

17—V moulded rubber belt.

18—Cut steel worm on hardened steel shaft, equipped with ball bearing thrust and end play adjustment nut.

19—This point imparts washing motion to agitator.

20—Liberty silver control lever for starting and stopping.

21—Dome type agitator.

22—Wringer locks in 8 positions.

23—Liberty silver wringer levers.

24—Gears enclosed in two piece die cast zinc metal head.

25—Extra hard, thick rubber washer vulcanized to shaft.

Diameter tub 21 inches; height tub 35 inches; height over all 50 inches.

¼ H. P. Motor, 110 Volts, 60 Cycle, Alternating Current.

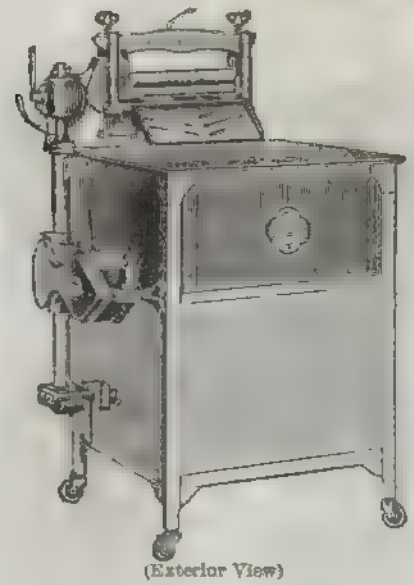
Crated; shipping wt each 198 lbs.

ELECTRIC WASHING MACHINES

—BLUE GRASS—ELECTRIC CYLINDER

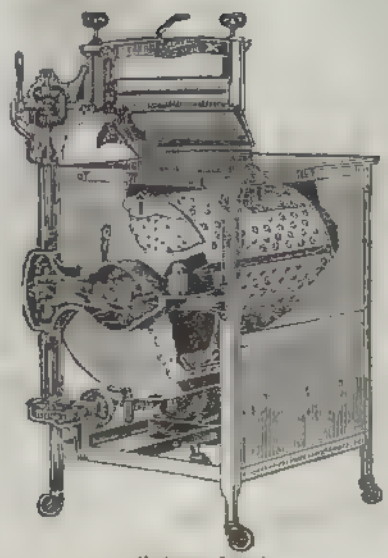


(Exterior View)

The washing is done in an aluminum cylinder with a surface that can not injure the daintiest of clothes. Hundreds of small cup like pockets in cylinder wall, gently rub the clothes.

The cylinder revolves 6½ times, and automatically reverses. This revolving reversing motion, creates an excellent combination of water agitation and cylinder action that lifts, dips, rubs and turns the washing the same as when done by hand.

Heavy copper tank, nickel plated on the inside, durable, easy to clean and fully protected by paneling on all sides. All steel utilited finish, swinging wringer frame with instantaneous safety release lever, soft rubber rolls and double drainboards. Wringer may be operated independently or at the same time cylinder is revolving. Equipped with a permanently fixed draining feature that does away with attachable drainboards and drip trays. Wringer may be swung into and used in any one of five different positions.



(Interior View)

Easily controlled by one lever and reversible. Protected and made safe by an instantaneous safety lever by which the tension is released by a quick pressure of the hand. Automatic friction clutch protects mechanism of whole machine in case of overload or strain. Welded frame, mounted on easy rolling casters. Water proof switch and all wiring encased in lead covering. Complete with 10 feet of cord with separable attachment plug. Height over all 53 inches, floor space required 25x24 inches. Size cylinder 17¾x 18½ inches.

¼ H. P. Motor, 110 Volts, 60 Cycle, Alternating Current.

No.	BG145
Less than 3, Each	$277 50

No. 723

Queen City quadruple multiplying round disc, click and drag, bushed bearings, oil caps, 1⅝ inch spool

	Per Dozen
No. 722. 60 yards	$30 00
No. 723. 80 yards	32 40
No. 724. 100 yards	36 00

SUNNYBROOK REELS

No. 150 - 150½

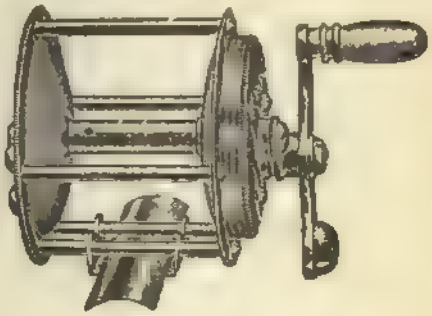
A high grade Trout Reel single action with click, light weight frame and spool, strongly made

	Per Dozen
No. 150 60 yds.; nickel plated	$21 60
No. 150½ 60 yds.; gun metal	21 60

No. 200

	Per Dozen
No. 200. Single action, nickel finish with adjustable click; 60 yds.	$7 20

No. 75 SUNNYBROOK MULTIPLYING

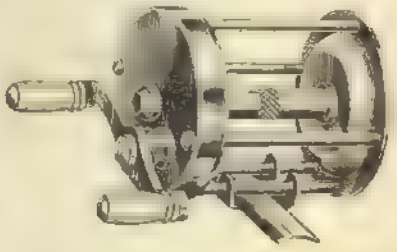


Click and drag on back plate, balanced handle with fancy white knob, all screws no rivets. Capacity 60 yards

	Per Dozen
No. 75 Sunnybrook Multiplying	$10 80

MONTAGUE "35"

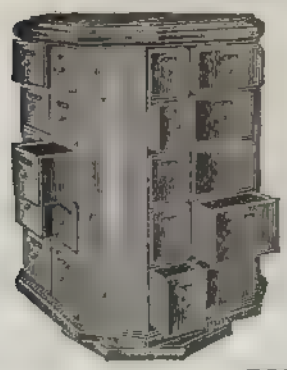
QUADRUPLE MULTIPLYING REEL



This low priced reel is quadruple multiplying and 100 yards capacity. It is substantially built and well nickel plated. A click is provided and the crank has double handle. A serviceable reel for the younger members of the family.

	Per Dozen
Montague "35"	$18 00

BOLT AND SCREW CASES



PERFECTION BROWN'S

Revolving.

Oak, hard oil finish; will hold more bolts than other case of same size, because the drawers are square, with no waste space at center, each drawer is labeled with size of screw or bolt, which it is intended to contain. Each drawer will hold a full package of the size indicated; the case revolves easily.

BOLT CASES Each

No. 40—Forty drawers, height 37 ins; diam 22 ins; wt each 180 lbs ..... ✦$72 00

No. 40 bolt case, contains drawers labeled for the following sizes of bolts:

¼x1½, 1¾, 2, 2¼, 2½, 3, 3½, 4, 4½, 5.
5/16x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 6.
⅜x2, 2½, 3, 3½, 4, 4½, 5, 6, 7, 8.
½x3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10.

SCREW CASES Each

No. 80—Eighty drawers, height 37 ins; diam 22 ins; same as No 40 except with smaller drawers; wt each 180 lbs ..... ✦$95 55

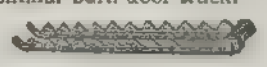
No. 80 screw case contains drawers labeled for the following sizes of screws:

¼ in. x 1, 2, 3 (in one drawer).
⅜ " x 2, 3, 4, 5.
½ " x 2, 3, 4, 5, 6.
⅝ " x 4, 5, 6, 7, 8.
¾ " x 5, 6, 7, 8, 9.
⅞ " x 5, 6, 7, 8, 9, 10, 11, 12, 13, 14.
1 " x 5, 6, 7, 8, 9, 10, 11, 12, 13, 14.
1¼ " x 7, 8, 9, 10, 11, 12, 13, 14, 15, 16.
1½ " x 7, 8, 9, 10, 11, 12, 13, 14, 15, 16.
1¾ " x 9, 10, 11, 12, 13, 14, 16.
2 " x 9, 10, 11, 12, 13, 14, 16.
2 " 12 x 14, 16.
3 " x 14, 16, 18.

One in crate.

TOOL BRACKETS

Malleable iron, japanned, with slot in end which slips over the wall support and is held firmly in place. These brackets are also interchangeable with Model A Tool Rack, O. N. T. or similar barn door track.



Holds 12 long handle or D handle forks and shovels; length 19 inches. **Wall support not included.**

Per Doz

No. 6—Wt per doz 52 lbs $46 50

Packed loose.

Holds 9 tools, long handle shovels or spades and handled axes length 18¼ inches. **Wall supports not included.** Per Doz

No. 6½—Wt per doz 51 lbs $49 50

Packed loose.

Holds 12 tools, hoes and hook tools; length 22 inches. **Wall supports not included.** Per Doz

No. 8—Wt per doz 28 lbs $39 00

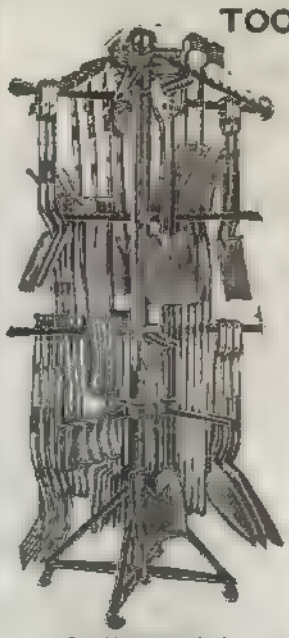
WALL SUPPORTS Per Doz

No. 686½—For above brackets; wt per doz 5 lbs $12 00

Packed loose.

✦F. O. B. Tennessee Factory Only.

TOOL RACKS



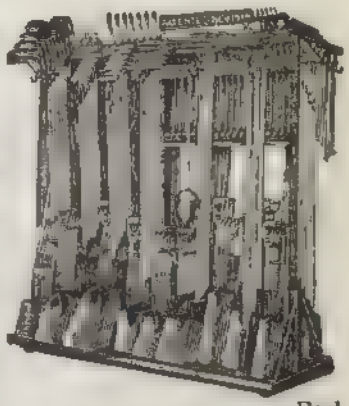
Steel and malleable iron, painted. All bracket arms are interchangeable. Ball-bearing rack mounted on heavy casters.

Height over all 9½ feet; occupies floor space 2½x2½ feet; capacity 186 agricultural tools and 1 dozen axes.

Each

No. A—Shipping wt each 225 lbs ..... ✦$147 00

One in crate.



ADJUSTABLE

Occupies floor space 36x96 inches by 8 feet high.

Holds 300 to 500 pieces garden hoes, forks, rakes, handles, scythe, snaths, shovels, etc. Will take care of all handles by setting them on end in the middle division of rack. Scythes are set on end, heel down, fitting in a wire basket. Bolted and mounted on six good casters.

Each

No. 75—Hardwood, painted carmine red ..... ✦$179 55
No. 75GO—Golden oak finish ..... ✦ 195 90
No. 75MO—Mission oak finish ..... ✦ 195 90

Shipped knocked down; wt each about 280 lbs.

HAND POWER ELEVATORS

Reliable and Easy Working.

Platform No. 2 and 3 are suspended by two standard wire cables, thereby equally distributing the load on the platform on the two wire cables. This is a great saving to the cables and other parts and gives greater safety and longer wear. The same plan is followed in wheels overhead, which are placed on ends of main shaft close to bearings. The cables are led direct from the platform over the cable sheaves at the top of the hatchway and down again to the counter balance weights without the use of idlers or drums; thus reducing the friction to a minimum. In the event of one of the cables breaking, the second cable is amply strong to hold the load on the platform. Is furnished with a screw brake so arranged as to stop platform at any point of travel, and will firmly hold the load and also permit the operator to control the speed of platform while descending.

Whenever the top floor of a building is less than 11 feet 6 inches, use the Combination Sheave Elevator, as by comparing the cuts, you will note on Sheave Elevator that pulling wheel or sheave is at the front of hatch, and is approximately 5 feet in diameter. Therefore a regular sheave elevator cannot be used where the ceilings are low on account of insufficient clearance way for persons to pass underneath.

We are therefore recommending the Combination Sheave Machine to be used with pulling sheave at side as an elevator should have no less than 6 feet from top of floor to underside of pulling sheave.

The Combination Sheave Elevator is also used to good advantage when size of platform is over 5 feet 6 inches in width.

We give full directions and erecting plan with each machine to parties outside of the city. **(See following page)**

✦No. A—F. O. B. New York Factory Only.
✦No. 75—F. O. B. Illinois Factory Only.

HAND POWER ELEVATORS

(For general description see preceding page).

HOW TO ORDER

Lifting capacity wanted_____
Size of hatchway (we build platform to fit _____
Elevators larger than standard size, see price for additionals.
Style of platform (see diagrams below). _____
How many stories high is building (see diagrams below)_____
Does car run in enclosed or open hatchway_____
Kind of business to be used for_____
Give the height of each story from top of floor to top of next floor above.

Sub-basement to Basement_____
Basement to First floor_____
First floor to Second floor_____
Second floor to Third floor_____
Third floor to Fourth floor_____
Fourth floor (To underside of roof timber.)

These diagrams indicate the different locations of guide posts in hatchway. State which would be best suited to your building.

Please make answers as complete as possible, and we will then be able to submit estimates for the elevator work best adapted to your requirements. When convenient make sketch of ground plan of building, showing position of hatchways, etc.

Buda Railway Motor Cars

No. 519-W
Wood Frame

No. 519-S
Steel Frame

These cars are the same except as to frame construction.

For Safety, Dependability, Low Cost of Operation and Maintenance Ample power and strength together with ease of handling make this a truly ideal 'center-load' motor car.

Engine: Model "11" Horizontal, two-cylinder, opposed, FOUR CYCLE, air cooled, free-running, 2¾" bore, 2¾" stroke, developing 4 horsepower. Equipped with counterbalanced crack shaft mounted in ball bearings. Engine entirely enclosed and dust-proof. Started with rope, independent of movement of car.

Ignition: Eisemann flywheel type, requiring no batteries or coil; reliable in operation and simple in construction.

Lubrication: Circulating splash system. Oil level maintained by specially designed idler gear, carrying oil to dipper trough.

Transmission: Friction disc type. Provides two speeds (or gear ratios) both forward and reverse. Four-spline countershaft (carrying friction wheel) equipped with ball bearings. Adjustable sole plates provide easy means for alignment of engine and transmission surfaces.

Wheels: 14" diameter, wood-center. One wheel loose on axle.

Axles: 1¼" diameter, cold-rolled steel, heat-treated.

Axle Bearings: Bower Roller type, self-aligning; oil lubricated.

Brakes: Positive, hand-operated, adjustable shoe brakes on four wheels.

Rail Skids: Angle iron, located immediately below side frame members.

Wheelbase: 36 inches.

No. 119

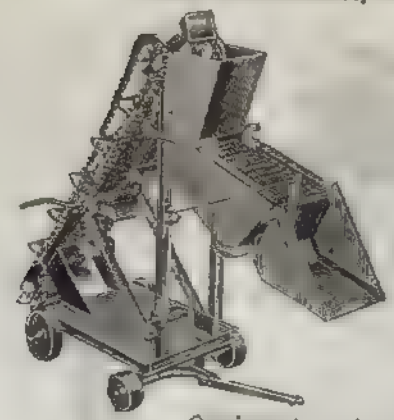
Heavy Duty Railway Motor Car —With No. 193 Trailer

For the handling of large gangs at speeds consistent with Safety First operation. These cars are of the two cylinder, friction driven type, developing extreme power for unusually heavy operating conditions. Other types ranging from two to twelve man capacity. Full information and prices furnished on application.

D 7

STEEL TOYS

SAND SCREENER, "BUDDY L"



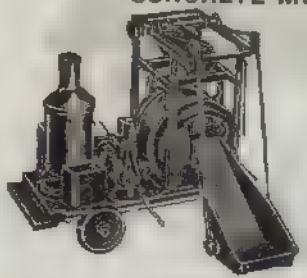
Heavy stamped steel, black enamel baked on finish. Provided with a series of buckets on an endless chain which elevates sand and gravel onto a shaking screen, the vibration of which separates the sand from the gravel depositing each in independent hoppers from which either may be dumped at will.

Each

No. 300—Length 29 ins; height 21 ins.....$25 50

One in carton; wt each 18 lbs.

CONCRETE MIXER, "BUDDY L"



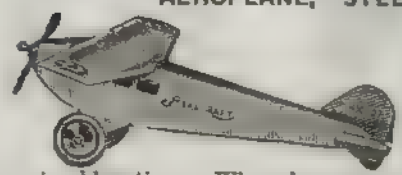
20 gauge pressed steel, grey enamel baked on finish. Elevating hopper dumps material into drum, water flows from tank on top. Drum rotates, mixing concrete. Finished mixture empties from opposite side.

Each

No. 280—Length 16 ins; width 13 ins; height 15 ins.....$27 00

One in carton; wt each 16½ lbs.

AEROPLANE, "STEELCRAFT"



Heavy gauge steel, grey baked enameled body, red baked enameled wings, wheels and tail pieces.

Double disc steel wheels gilded to represent rubber tires. When drawn across floor the propeller revolves making a clicking sound. Equipped with cord and hand ball for drawing.

Each

No. 107—Length 22⅜ ins; width tip to tip of wing 22¾ ins; height 7½ ins.....$2 70

Half doz in carton; wt each 4 lbs.

AEROPLANE, "STEELCRAFT"

Heavy gauge steel, grey baked enameled body, red baked enameled wings, propellor, wheels and tail pieces.

Double disc steel wheels with solid rubber tires. When drawn across floor the propeller revolves, making a clicking sound. Equipped with cord and hand ball for drawing.

Each

No. 130—Length over all 24 ins; width tip to tip of wing 22½ ins; height 7¾ ins.....$5 10

One in carton; wt each 7 lbs.

DUMP TRUCK "STEELCRAFT"

Heavy gauge steel, double disc steel wheels with solid rubber tires. Hood, seat and chassis green baked enamel finish, bed and wheels red baked enamel finish. Equipped with cord and hand ball for drawing. Each

No. 120—Length 23¼ ins; width 8¾ ins.....$4 95

One in carton; wt each 8 lbs.

STEEL TOYS

HOOK AND LADDER, "STEELCRAFT"

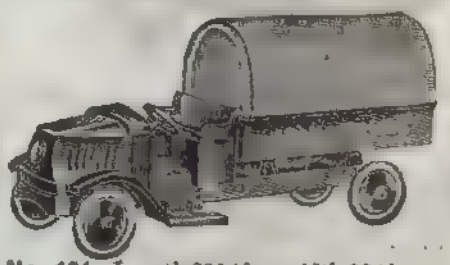
Heavy gauge steel; double disc steel wheels with rubber tires. Equipped with pull cord; non-steering, bright red baked enamel finish.

Each

No. 121—Length 29 ins; width 8¾ ins; ladder length in three sections 58½ ins.....6 90

One in carton; wt each 10 lbs. $3 00

ARMY TRUCK, "STEELCRAFT"



Heavy gauge steel; double disc steel wheels with rubber tires. Equipped with pull cord; non-steering; fawn body, red wheels, all baked enamel.

Each

No. 124—Length 23¼ ins; width 8¾ ins.....6 45

One in carton; wt each 9 lbs. $3 00

ICE DELIVERY TRUCK, "STEELCRAFT"

Heavy gauge steel; double disc steel wheels with rubber tires. Equipped with pull cord; non-steering; bright green baked enamel body, red wheels.

Each

No. 122—Length 24¼ ins; width 8¾ ins.....6 60

One in carton; wt each 8 lbs. $2 80

INTER-CITY BUS, "STEELCRAFT"

Heavy gauge steel; double disc steel wheels with rubber tires. Equipped with pull cord; non-steering; fawn body, red wheels, all baked enamel.

Each

No. 123—Length 25 ins; width 7 ins.....6 45

One in carton; wt each 8 lbs. $2 60

D II

STEEL TOYS

RAILWAY EXPRESS TRUCK, "SON-NY"

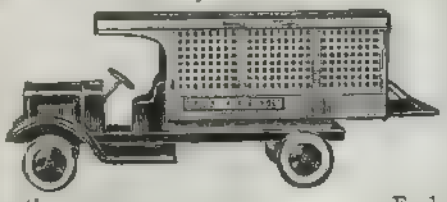
20 gauge steel, finished in red and black enamels baked on. Double strength frame, will carry 300 lbs; 4 inch double disc wheels; easy steering construction.

Each

No. 4—Length 29 ins; height 11½ ins $9 00

One in carton; wt each 17 lbs.

PARCEL POST TRUCK, "SON-NY"



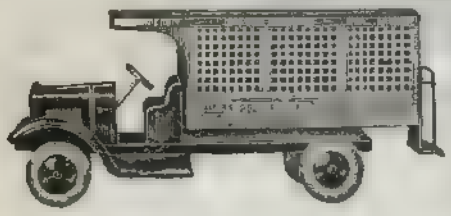
20 gauge steel, finished in green, black and orange enamels baked on. Double strength frame will carry 300 lbs; 4 inch double disc wheels; easy steering construction.

Each

No. 3—Length 29 ins; height 11½ ins $9 00

One in carton; wt each 17 lbs.

POLICE PATROL, "SON-NY"



20 gauge steel, finished in blue, black and orange enamels baked on. Double strength frame, will carry 300 lbs; 4 inch double disc wheels, easy steering construction.

Each

No. 5—Length 29 ins; height 11½ ins $10 50

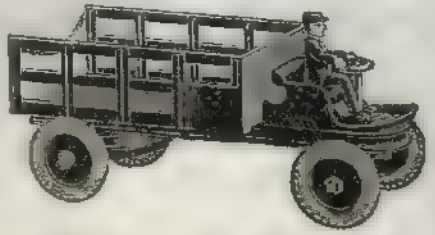
One in carton; wt each 18 lbs.

MECHANICAL TOYS

KINGSBURY, MOTOR DRIVEN

Heavy gauge pressed steel bodies; disc steel wheels, with soft rubber tires vulcanized on; finished with high quality baked enamel which gives a glossy, durable finish; best grade flat steel springs, practically unbreakable under regular use.

Auto Truck.

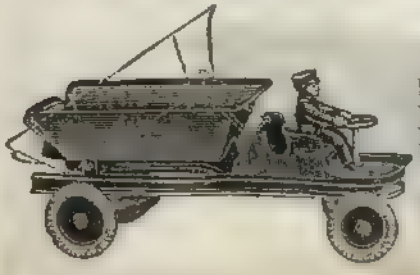


Dark blue body, decorated, red wheels.

Per Doz

No. 718—Length 9 ins $24 00

One in cardboard box three doz in case; wt per doz 13½ lbs.



Dump Truck.

Dark blue chassis, bright red body and wheels. Body raised to dumping position by lever.

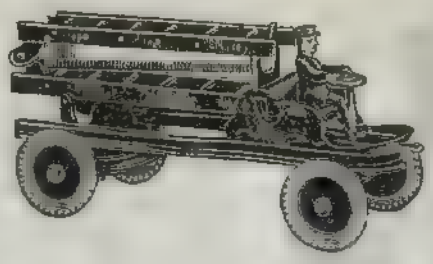
Per Doz

No. 729—Length 9 ins $24 00

One in cardboard box, three doz in case; wt per doz 15 lbs.

MECHANICAL TOYS

KINGSBURY, MOTOR DRIVEN



Ladder Truck.

Bright red with yellow ladders. Carries three wooden ladders, each 6½ inches long.

Per Doz

No. 736—Length 9½ ins $24 00

One in cardboard box, three doz in case; wt per doz 13½ lbs.

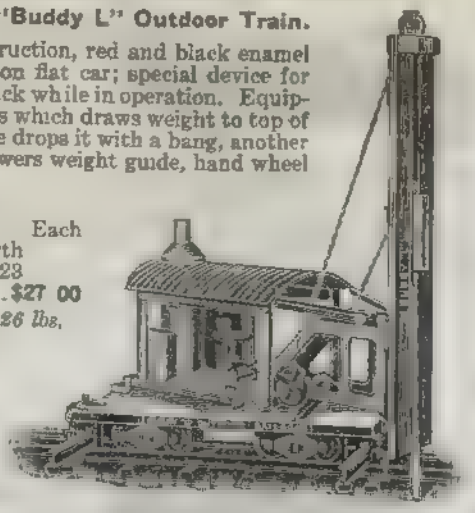
One in cardboard box; wt per doz 8½ lbs.

STEEL TOYS

LOCOMOTIVE PILE DRIVER, "BUDDY L"

For Use With "Buddy L" Outdoor Train.

All steel construction, red and black enamel finish; mounted on flat car; special device for holding car to track while in operation. Equipped with windlass which draws weight to top of guide, trip release drops it with a bang, another windlass lowers weight guide, hand wheel rotates cab.

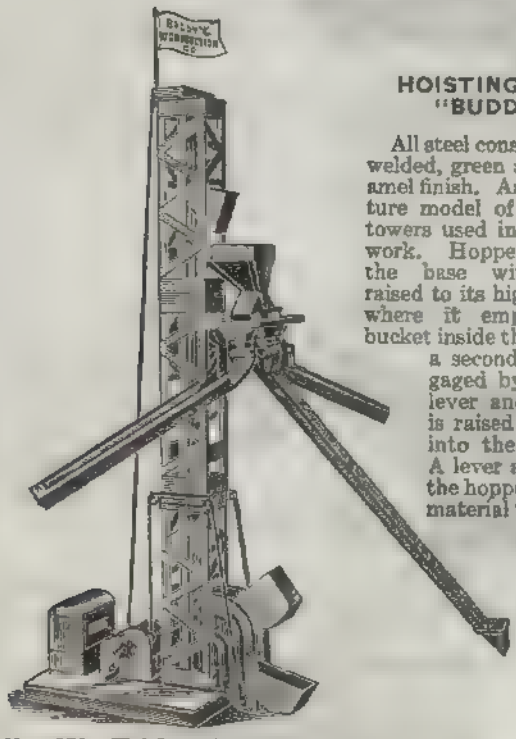


Each

No. 1022—Length 22 ins; height 23 ins.....$27 00

Crated; wt each 26 lbs.

HOISTING TOWER "BUDDY L"



All steel construction, spot welded, green and black enamel finish. An exact miniature model of the hoisting towers used in construction work. Hopper is loaded at the base with material, raised to its highest position where it empties into a bucket inside the framework, a second drum is engaged by means of a lever and the bucket is raised and emptied into the top hopper. A lever at the base of the hopper permits the material to be emptied into any one of the three swinging troughs.

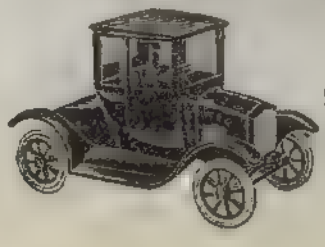
Each

No. 350—Height 38½ ins; base 12 ins square..... $33 00

One in carton; wt each 25 lbs.

"BUDDY L" LINE

The Buddy "L" line of toys are practical, sturdy and educational for all children. They are built to withstand hard knocks and rough handling. Constructed of high grade steel; braced, riveted and welded throughout. Finished in baked red and black enamel.



FLIVVER COUPE "BUDDY L"

20 gauge, pressed steel, red enameled wheels, black enamel baked on finish.

Each

No. 2108—Length over all 11 ins; height 7 ins; width 5½ ins.....$6 30

One in cardboard box; wt each 3 lbs.

STEEL TOYS

DELIVERY TRUCK, "BUDDY L"

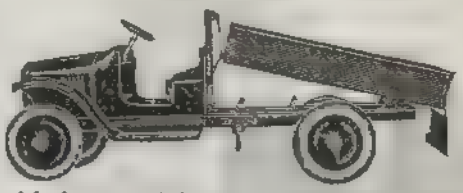
Heavy stamped steel body and fenders, extra heavy chassis and strong axles and frame, black enamel finish; red aluminum wheels. Canopy top, drop end gate and curved bottom body.

Each

No. 212A—Length 14½ ins; height 7 ins..... $8 25

One in carton; wt each 11 lbs.

DUMP TRUCK, "BUDDY L"



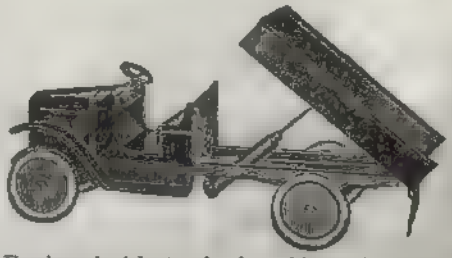
20 gauge, pressed steel, black and red enamel baked on finish. Braced and riveted; welded throughout. Equipped with lever and locking ratchet for hoisting and dumping. Disc wheels.

Each

No. 201—Diam of wheels 4½ ins; width 8¾ ins; height 9¼ ins; length over all 25 ins $10 50

One in carton; wt each 10 lbs.

HYDRAULIC DUMP TRUCK, "BUDDY L"



20 gauge, pressed steel, solid aluminum wheels; red and black enamel baked on finish. Operates on the hydraulic principle, by releasing lever body raises and dumps automatically; drop end gate. Equipped with steering knuckles and column.

Each

No. 201A—Length 25 ins; height 9¼ ins.. ..... $15 75

One in carton; wt each 9 lbs.

SAND AND GRAVEL TRUCK, "BUDDY L"

20 gauge, pressed steel, solid aluminum wheels; red and black enamel baked on finish. Two compartment body with removable partition, two lift doors on each side, sloping body allows material to pour out. Equipped with steering knuckles and column.

Each

No. 202A Length 25½ ins; height 12½ ins $15 00

One in carton; wt each 10 lbs.

STEEL TOYS

MOVING TRUCK, "BUDDY L"

20 gauge, pressed steel, black, red and green enamel baked on finish. Braced and riveted; welded throughout Double rear doors equipped with catch. Disc wheels.

Each

No. 204—Diam of wheels 4½ ins; width 8½ ins; height 11 ins; length over all 25 ins.....$13 95

One in carton; wt each 11 lbs.

OIL TANK TRUCK, "BUDDY L"

20 gauge, pressed steel, black and red enamel baked on finish. Braced and riveted; welded throughout.

Large tank equipped with brass faucet and opening in top for filling and rack on each side of tank for carrying cans. Disc wheels.

Each

No. 206—Capacity 1 gallon; length over all 26 ins; height 12½ ins; width 9 ins; diam wheels 4¼ ins.....$15 00

One in carton; wt each 12 lbs.

ICE TRUCK, "BUDDY L"

20 gauge pressed steel cab, body and fenders, channel steel chassis; black baked enamel finish cab, yellow body, red chassis and aluminum wheels. Equipped with step, hand rails, cross chain and removable sliding canvas cover.

Each

No. 207—Length 26½ ins; width 9 ins; height over all 12½ ins.....$15 00

One in carton; wt each 10 lbs.

FIRE TRUCK, "BUDDY L"

20 gauge pressed steel; brilliant fire red enamel baked on finish. Riveted and braced throughout; brass hand rails and bell. Equipped with two extension ladders, length 72 inches, hose reel and movable crane. Disc wheels.

Each

No. 205—Length 27 ins; height 12 ins; width 8½ ins.....$18 00

One in carton; wt each 10 lbs

STEEL TOYS

HYDRAULIC AERIAL TRUCK, "BUDDY L"

20 gauge pressed steel; solid aluminum wheels; bright red enamel baked on finish; brass bell; nickel plated ladders. With steering knuckles and column.

Equipped with a hydraulic mechanism by means of which the ladder unit raises itself automatically upon moving a lever. The ladders may be extended nearly 4½ feet and rotated in any direction.

Each

No. 2058H—Length 39 ins; height 10 ins.....$24 00

One in carton; wt each 15 lbs.

COACH, "BUDDY L"

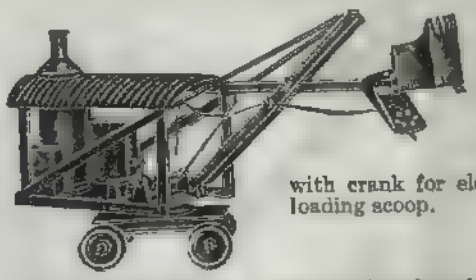
Heavy stamped steel body, black baked enamel. Built on a long low graceful chassis that includes all the details of the finest inter-city buses. Dual wheels on rear axle. Equipped with bumpers, headlights, sunvisor, radiator cap and two spare wheels, steering is accompolished by turning the spare wheels.

Each

No. 208—Length 29¼ ins; width 8¼ ins; height 7¾ ins.....$26 25

One in carton; wt each 17 lbs.

STEAM SHOVEL, "BUDDY L"



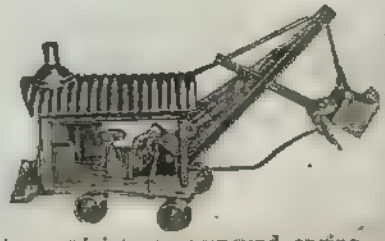
20 gauge, pressed steel, black and red enamel baked on finish. Braced and riveted; welded throughout Equipped with crank for elevating and unloading scoop.

Each

No. 220—Width 7 ins; height 13 ins; length over all 25¾ ins.....$6 30

One in carton; wt each 11 lbs.

IMPROVED STEAM SHOVEL "BUDDY L"



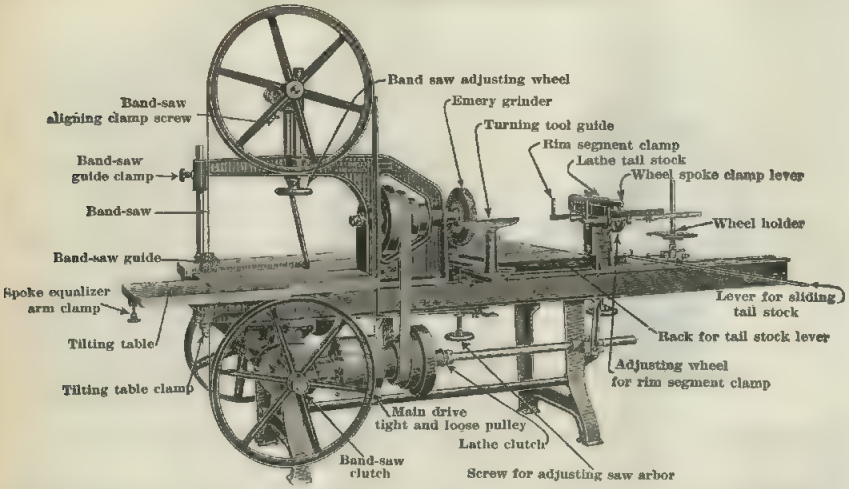
Heavy stamped steel, reinforced and electrically spot welded; body, boom, shovel and wheels black baked enamel; roof and base, red baked enamel. Operates on the same principle as steam shovels of the latest type. The boom is extended by a rack and gear operated by a miniature compound engine. Double clutches control all movements of the shovel itself, a tiller wheel turns the cab.

Each

No. 220A—Length 27½ ins; height 14 ins.....$19 50

One in carton; wt each 12 lbs

E BUFFALO WOOD WORKERS



The Buffalo Complete Woodworker has been designed for use by carpenters, wagon and pattern makers, normal training schools and all wood-working shops. The machine is exceptionally well built, there being no skimping in either weights or capacities.

The Buffalo is so designed that almost any desired woodworking operation can be performed on it without extra attachments. Simply change the tools—then go ahead. In addition to its general woodworking facilities, it possess features especially valuable to the blacksmith, wagon and pattern maker, for drilling or boring in a wheel rim or tire on a true radial line with the center of wheel, and for tenoning and equalizing spokes in wheels after insertion in the hub.

TWELVE MACHINES IN ONE

Band Saw	Edge Moulder
Rip Saw	Lathe
Cut-off Saw	Grinder
Planer and Jointer	Borer and Driller
Sander	Spoke Equalizer
Shaper	Tenoner

In band saw work the tilting table, 20x24 in., is a new feature just added. It is so arranged that the operator can tilt the table to any angle up to 45 degrees, which will permit him to do almost any kind of bevel sawing and shaping. The band saw furnished is 1-2 in., with anti-friction guide. The wheel is 27 in. diameter, and the maximum clearance 12 inches

A rip saw and a cut-off saw, both 12 in. diameter, are furnished with the machine. This saw can be raised or lowered to make cuts of any depth up to 3½ in. The adjustable gauge, when used as a ripping fence, can be set at any distance from saw up to 12 in. For cross-cutting, a removable cut-off gauge is provided having a quadrant permitting adjustment for sawing to any angle from 30 up to 90 degrees.

The planing table is made in two parts, fitting in a channel in the main table, and is adjusted horizontally to give access to the mandrel. Both ends of the sliding table are held rigid in any position by two hand screws. An adjustable gauge is furnished which can be set close to the planer head or any distance from it, up to 12 in. It can be set at 90 degrees angle with the table top, or be tilted back. A 10-in. planer head with knives is furnished with the machine.

The lathe will take work up to 18 in. diameter and 48 in. long. The lathe head has four cone pulleys—5½-, 7½-, 9¾- and 12-in. diameter—taking a 2-in. belt.

Equipment includes a tool rest, one spur center, and a face plate. A disc sander or a grinder can be fixed to face plate, but are not included with outfit.

A unique and patented feature of the machine is the carriage on the boring table, not only for holding wheels but for drilling, boring and cutting tenons. The carriage has a traversing as well as a vertical movement.

In tenoning spokes, a lever is provided for feeding. A small stop screw can be set to arrest the carriage when the desired depth has been bored. This is essential when mortising. A boring socket, to hold 1-2 in. round shank bits, is furnished with the machine.

It is impossible on this page to give the full capacity of operations of this machine, but it is easy for three men to work at one time.

Specifications—Without Motor

Dimensions of table, 6½ ft. long, 4½ ft. wide; height to top of table 35 in.; overall length, with spoke equalizer and carriage extended, 14 ft.; size of drive pulleys 10x3½ in.; diameter of drive shaft 1⅞ in. Main drive is controlled from either side by lever and belt shifters. Maximum power required to operate all parts of machine at one time, 4 to 5 h.p.

WHY YOU SHOULD BUY "BLUE GRASS TOOLS"

"The Nation's Standard of Quality"

"Quality"

Blue Grass Tools are made of the very highest grade materials suitable to the uses and requirements of the individual items in the line. They are manufactured in the best equipped factories in this Country by skilled mechanics, specialists in their line, many of whom have spent their lives in the making and perfecting of fine tools. They are subjected to the most critical tests and inspections during the process of manufacture and to additional inspection before acceptance into our stock. Blue Grass tools are in fact "The Nation's Standard Of Quality".

"Finish"

In keeping with the highest quality possible Blue Grass Tools have only the highest finishes adding that unmistakable touch that announces, even to the layman: "here is a thoroughbred that any man should be proud to possess." Many important lines such as Axes, Hatchets, Hammers, etc. are furnished in several different finishes to suit individual taste, but all are of the same quality. Blue Grass Handles in Axes, Hatchets and Hammers are of Super quality specially selected second growth hickory, sand belted, waxed and polished.

"Variety"

The Blue Grass line offers the merchant a greater variety of High Grade Tools than any factory brand in the market today. No single tool maker, makes near as complete a line and the merchant handling the Blue Grass line, can sell a mechanic or householder a more nearly complete line of tools than can be had under any other brand. A satisfied customer on one Blue Grass Tool is always a live prospect on many other items.

"Performance"

Blue Grass Tools have been giving complete satisfaction for more than forty years, during which time millions of individual items have passed from the Stores of our customers into the hands of the users—many have passed from one generation to the next and are still giving complete satisfaction.

"Profit"

Almost invariably Blue Grass Tools are priced lower than the comparable qualities of factory or other brands This saving in price is intended to give our Merchant Customers a higher average profit than is obtainable on other brands.

"Complete Satisfaction"

There is no Brand of Tools offering more in quality, finish, or service. None that offers a greater number of items to select from at prices that will show our customers a fairer margin of profit and at the same time cost no more than the average good article.

"Protection"

We assure the merchant handling Blue Grass Tools that every piece is perfect in workmanship and material and will give complete satisfaction when used properly for the purpose intended We cannot guarantee against failure due to abuse or mis-use, but will gladly replace any Blue Grass Tool that shows defective material or faulty workmanship.

"Reputation"

The Reputation of the Belknap Hardware & Mfg. Co. built up during 90 years of constant growth and honorable service stands behind every Blue Grass Tool.

— EVANS —
NEW ROLLER BEARING ACTION

Lighter Magic is achieved in the New Evans—the magic of modern mechanical perfection.

Cross Lever, Roller Bearing Action is a new principle in lighter building—exclusively Evans. It means smoother action, wider clearance between snuffer and wick, an almost complete revolution of the sparking wheel that spurts a veritable shower of sparks to insure ignition—not at one, but at several points in the revolution of the wheel, from just one pressure of the thumb. The removable wick holder is a unique convenience and all steel parts are specially hardened to assure long wear.

New York Office: 200 Fifth Avenue
Room 463 Fifth Avenue Building

TO the HALSAM Line of round-cornered Safety Blocks, Checkers and Dominoes has been added a new line of brilliantly colored Building Blocks and Art Cubes.

HALSAM LEADERSHIP has again demonstrated itself in these new features by creating manufacturing equipment which has made possible an individual color on each one of the six sides of these Building Blocks —a feature which provides an almost endless variety of color patterns.

You should be familiar with the new HALSAM "PLAYTIME" ART CUBES and "RAINBOW" BUILDING BLOCKS.

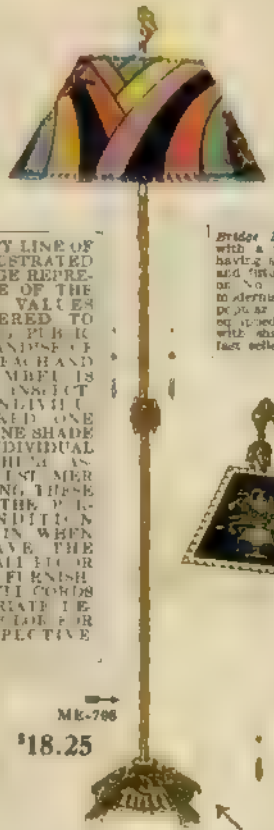
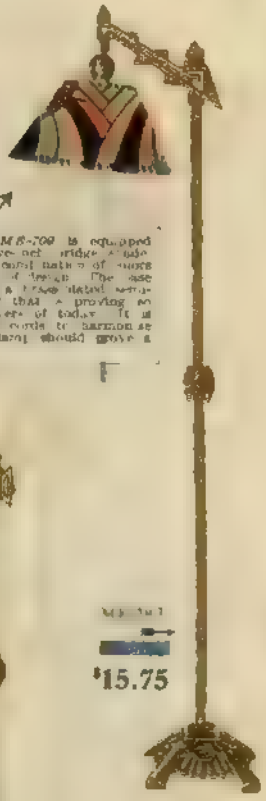
ALL FLOOR LAMPS ARE FURNISHED WITH PULL CORDS OF APPROPRIATE DESIGN AND COLOR FOR EACH RESPECTIVE NUMBER

ME-710
$22.00



ME-708
$18.25

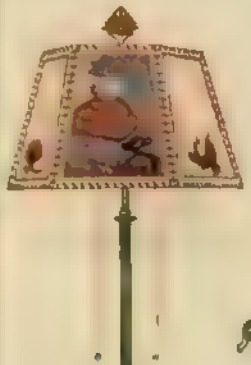


Bridge Lamp No. ME-709 is equipped with a round twelve-inch bridge shade having a wonderful combination of colors and futuristic trend of design. The base on No. ME-709 is a brass-plated setup of distinctive number that is proving so popular to the buyers of today. It is equipped with pull cords to harmonize with shade. This lamp should prove a fast seller.

ME-709
$15.75

Junior Lamp No. ME-710, illustrated above is an individual creation. The shade is a beautiful six-panel number of extraordinary design. This lamp has attracted widespread attention. The base on this lamp is distinctively different. A brass-plated bridge base of unique design, making a combination that is very bewitching and pleasing.

Junior Lamp No. ME-708, illustrated above is equipped with an 18-inch round shade with a wonderful combination of colors and futuristic trend of design. This shade is lined top and bottom and on two sides. The base is of junior type two-light stand of semi-modernistic design and presents a pleasing appearance.



ME-701
$24.00

Bridge Lamp No. ME-701 illustrated above is a beautiful Spanish tinted parchment shade with petit point design, a reproduction of ancient Mexican shade of rich art colorings, edge size and coloring combine that are most artistically attractive. Each and every panel of this shade is authentic hand painted. The very attractive base used with this shade is an imitation steel effect of unique design.

Quality At A Low Price

ME-705
$19.00

Bridge Lamp No. ME-705 illustrated above is equipped with a very smart and attractive design shade that is entirely distinctive. The shade is worthy of the finest artistic perfection. This two-color all panel bridge shade comes fitted with a beautiful semi-modernistic bridge base, equipped with pull cords to match, makes one of the most beautiful combinations of decorative floor lamps ever offered by any manufacturer.

ME-706
$26.50

Junior Lamp No. ME-706 illustrated above is one of the most attractive numbers in our entire line. A beautiful hand-painted parchment shade with a very attractive Spanish design combined with a beautifully designed imitation Swedish steel two-light junior base. This number represents the real value.

EACH OF THESE BEAUTIFUL BRASS-PLATED STANDARDS BEARS ENLIVENING TOUCHES OF CONTRASTING FINISH, AND ALL JUNIOR LAMPS HAVE TWO-LIGHT FIXTURES. PROTRACTED SEARCH HAS BEEN REWARDED BY THE DISCOVERY OF THESE STANDARDS THAT BLEND SO WELL WITH THE BEAUTIFUL PARCHMENT SHADES. THE ARISTOCRATIC LACE SHADES ILLUSTRATED ON THIS PAGE ARE MEETING WITH THE ABSOLUTE APPROVAL OF BUYERS IN THE LARGER METROPOLITAN CENTERS. EVERY DESIGN IS AN ARTISTIC MASTERPIECE . . NO TWO ALIKE . . . A WONDERFUL ASSORTMENT OF SHADES THAT PROVED TO BE A HUGE SUCCESS AT THE LATEST SHOWING IN THE LAMP MARKET DISPLAYS. THE PREVAILING COLORS ARE RICH BROWN AND TANS DECORATED WITH BEAUTIFUL COLOR COMBINATIONS

ME-704
$21.00

Junior Lamp No. ME-704, above is one of the most attractive of its type. The design is strikingly different. The shade is a 14-inch four-panel number. The base is a beautiful semi-modernistic two-light junior. Equipped with pull cords to harmonize with the color scheme.

"PARCHTEX"
LAMPS OF ENDURING BEAUTY

SPECIALS THAT SELL

We ask that you kindly remember that each and every shade listed on this page is of regular parchtex quality and is in no manner inferior to our regular quality line of parchment shades. The very attractive prices we have placed on this merchandise makes it possible for you to have a fast-moving special that is certain to get a rapid turn-over

NO TWO ALIKE—
PRICED TO SELL

We illustrate below a group of six most attractive occasional table lamps ever manufactured and there has been a decided trend the past season for table lamps of medium size. This very attractive group of six quality lamps is equipped with brass plated bases approximately 15-inches high and are distinctively new designs. The shades on these lamps are approximately 12-inches in diameter and 8-inches high. The entire height with shade attached being 23½ inches.

TABLE LAMPS

ME-707
$24.00

Bridge Lamp No. ME-707 is a striking number, exemplifying the semi-modern art motif. Its pan is the new reed finish for the shade base and ornamental panels along the lines are brilliant but tried well. The base on these pieces has been dull nickel, giving a number of the combination steel with brass high lighting and a touch of polychrome color

ME-603
$7.50

ME-604
$7.50

ME-602 $7.50

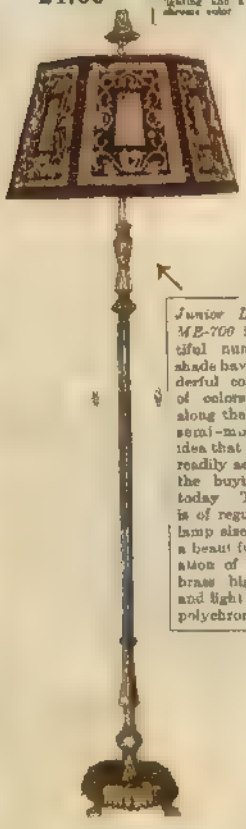
ME-600
$7.50

ME-601
$7.50

ME-605
$7.50

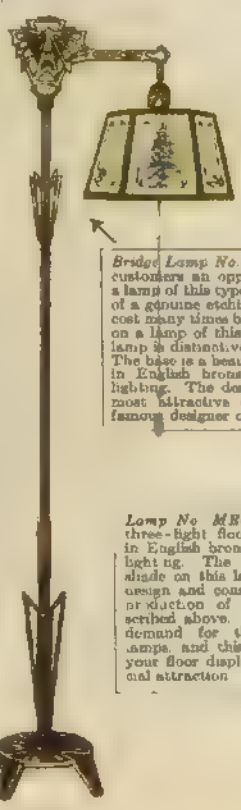
ME-703
$19.00

Bridge Lamp No. ME-703 is a dainty bridge lamp exquisitely designed. The brass plated base is of the new pedestal type so pleasing to the eye. The oblong curved and four-panel leather side board shade is an individual creation of beautiful design.



ME-706
$26.50

Junior Lamp No. ME-706 is a beautiful number, the shade having a wonderful combination of colors designed along the lines of a semi-modernistic idea that is being so readily accepted by the buying public today. The shade is of regular junior lamp size, the base a beautiful combination of steel with brass high lighting and light touches of polychrome



ME-751
$22.50

Bridge Lamp No. ME-751 offers to our customers an opportunity to purchase a lamp of this type using a reproduction of a genuine etching on parchment at a cost many times below than ever offered on a lamp of this quality before. This lamp is distinctively new and different. The base is a beautiful creation finished in English bronze with bronze highlighting. The design being one of the most attractive ever produced by a famous designer of lamp bases.

Lamp No. ME-750, an intriguing three-light floor torchere finished in English bronze with brass highlighting. The sixteen-inch junior shade on this lamp is of the same design and construction as the reproduction of etching shade described above. There is a decided demand for three-light torchere lamps, and this number added to your floor display will be an especial attraction

ME-750
$28.50

ME-702
$21.00

Junior Lamp No. ME-702 is another creation . . . rather unusual 15-inch oblong junior shade with curved ends unique in shape as well as design incorporating color combinations that are very attractive . . . a lamp that is entirely different. Combined with a two-light junior base of the pedestal type, this should meet with the entire approval of the most discriminating customer

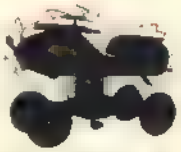
To Win---

Stock Corcoran "Green Arrow" Toys!

Progressive merchants all over the country have recognized the profit possibilities in this new Corcoran line. If instant acceptance is any indication of real merit, then "Green Arrow" Toys are the ones to take on to win



The enthusiastic response to every showing is a sure sign of buyers' approval and the orders received prove that Corcoran Toys are going over. The nearly exact duplication of the real thing in these new vehicles is the foremost reason for their increasing popularity

The unique mechanical action affords new thrills that appeal to either boy or girl. All steel construction assures a sturdiness and substantiability that crude wooden affairs never attained—yet Corcoran Toys are not excessively heavy. Here is an all around profit making line ready to create increased business for you. If you want to win out in today's close competition, stock the Corcoran "Green Arrow" Line. Complete information is set forth in the catalog—write for your copy today. Dept. T-6.

NOTICE—INJUNCTION

A Preliminary Injunction Granted by the Appellate Division of the Supreme Court, Against an Imitator of the MARGIE DOLLS—as follows:

(Please note particularly Paragraphs 2 and 3)

At a Term of the Appellate Division of the Supreme Court for the First Department, held in the County of New York, on this 11th day of April, 1930.

Present: Hon. Victor J. Dowling, P.J.
Hon. S. K. MERRELL,
Hon. JOHN V. McAVOY
Hon. JAMES O'MALLEY,
Hon. HENRY L. SHERMAN, J.J.

JOSEPH L. KALLUS, doing business under the firm name and style of CAMEO DOLL CO.,

Plaintiff-Appellant,

against

BIMBLICK TOY MFG. CO., INC., and JOSEPH BIMBLICK, individually and doing business under the trade name of BIMBLICK TOY CO.,

Defendants-Respondents.

6072

The above named appellant, Joseph L. Kallus, having appealed to the Appellate Division of the Supreme Court, First Department from an order of the Supreme Court, New York County, denying plaintiff's motion for a preliminary injunction entered in the office of the County Clerk on the 4th day of March, 1930, and the said appeal having been argued by Mr. Thomas McEnroe, counsel for the plaintiff appellant, and by Mr. Asher Blum, counsel for the defendant respondent, and due deliberation having been had thereon it is hereby unanimously

ORDERED AND ADJUDGED that the order of the Supreme Court, New York County denying plaintiff's motion for a preliminary injunction [illegible] be and the same is hereby reversed with Ten Dollars ($10) costs and disbursements and the motion granted, and it is hereby unanimously

ORDERED AND ADJUDGED that the defendant-respondent Joseph Bimblick, his officers, agents, servants, employees and those acting in concert or in privity with him and each and all of them be enjoined and restrained during the pendency of this action and until the entry of final judgment herein

1. From manufacturing or causing to be manufactured, assembling or causing to be assembled, selling, or dealing in, in any form whatsoever, any doll with a grotesquely shaped composition head containing a groove when perfect the insertion of a ribbon, and with a facial expression that of a sinister smiling little girl so similar to the head and facial expression of the plaintiff's genuine MARGIE doll as to be calculated to confuse the trade and the purchasing public into the belief that the said dolls head was the head of the plaintiff's genuine MARGIE doll

2. From manufacturing or causing to be manufactured, assembling or causing to be assembled, selling, or dealing in, in any form whatsoever, any doll with wooden body parts held together by an elastic cord, pear-shaped torso, peculiarly shaped feet, segmented arms and legs of a certain size, shape, color, and appearance, so similar to the wooden parts of the plaintiff's genuine MARGIE doll in size, shape, color and appearance of the torso, peculiarly shaped feet, segmented arms and legs, as to be calculated to confuse and to deceive the trade and the purchasing public into the belief that the said dolls body parts were the body parts of the plaintiff's genuine MARGIE doll.

3. From manufacturing or causing to be manufactured, assembling or causing to be assembled, selling, or dealing in, in any form whatsoever, any doll with complexion so similar to the plaintiff's genuine MARGIE doll in type, design, size, shape, location of design and appearance whether the similarity be derived by a copying of the MARGIE doll's complexion head and facial expression or by a copying of the various wooden parts of the MARGIE dolls body or by [illegible] as to be calculated to confuse and to deceive the trade and the purchasing public into the belief that the said doll is a genuine MARGIE doll

AND IS FURTHER ORDERED that the Sheriff of the County of New York forthwith take into his custody any and all dolls, doll [illegible] molds or dies belonging to the defendant used in the manufacture of defendant's imitation dolls or parts thereof and not essential of use for any other purpose save the manufacture of defendant's imitation dolls whether the said dolls, doll parts, molds or dies, belonging to the defendant, are in the defendant's possession or otherwise, and let the Sheriff hold the said dolls, doll parts, molds or dies and keep them in his custody until the further order of the Court

Enter,
V. J. D.
P. J.

KNAPP MASTER MAGIC

RECORD-BREAKING! First introduced in 1929. Outsold all other magic sets wherever displayed. Going even stronger this year. The most complete line of tricks ever offered, including many stage triumphs of famous magicians, never before exposed. Three popular priced sets, each entirely different.

KNAPP ELECTRIC QUESTIONER

FOR 39 YEARS a "best seller". Last year, the greatest year in its history. This year—selling better than ever! The Knapp Electric Questioner has proved a most profitable and steady sales producer for practically every toy store and toy department in the country.

No. 325. List price, $3.50; without battery, $3.40
Denver and West, $3.75, without battery $3.65

No. 399. List price, $3.50
Denver and West, $3.75

KNAPP TELL-BELL

HERE'S THE improved Tell-Bell—new cards—new box, etc. It's the companion to the Knapp Electric Questioner—introduced last year and already taking its place next to the Questioner in sales. Here again you have the demonstration selling feature; three sliding knobs and tinkling bell when the answer is correct. Instructive, amusing, mysterious. With the new low price of $3.50 this should be a banner year for Tell-Bell sales!

PYRAMIDS

THIS NEW fascinating puzzle is a simplified version of an old Egyptian problem—a brain teaser from the ancients that's fast becoming a craze. Its growing demand assures long and continued popularity.

List price 50¢. *Denver and West* 55¢.

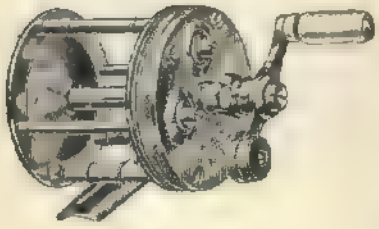
REELS

CASTING

MEEK



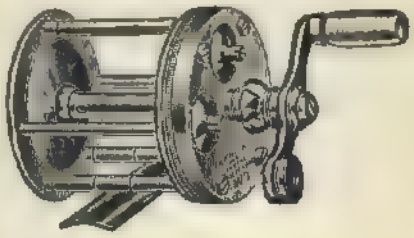
Quadruple Multiplying

Spiral gearing for fishing reels is a distinctive Meek feature and gives strength, power and smoothness of action otherwise unattainable. In making pinions a solid bar of Stubs' steel drill rod is used. This rod runs entirely through the spool, making pivots and pinions one solid piece and spool perfectly rigid. All pivots and studs are tempered, then ground and polished to the highest degree. Capacity 160 yards of No. 5 Kingfisher line. Dimensions: Diameter end plate 2¼ inches; length spool 1⅝ inches; diameter spool head, 1 23/32 inches.

No. 4M. Watch nickel silver, balance handle forward, click and drag screw off oil caps. Wt. each 16 ozs. .....Each $32 00

No. 4MJ. Same as No. 4M except made with jeweled pivot bearings. Wt. ea. 16 ozs. .....Each $38 00

BLUE GRASS



Quadruple Multiplying

This reel will hold 160 yards of No 5 Kingfisher line. Very powerful gear and a most reliable reel; it casts beautifully. Made of nickel silver, quadruple multiplier, balance handle, click and drag and screw off oil caps. Has spiral gears and tempered tool steel pivots and stud.

No. 4B. Diameter end plate, 2 5/16 inches; length spool, 1⅝ inches; diameter spool, 1 23/32 inches. Wt. ea. 16 ozs. .....Each $24 00

No. 4JB. Made same in all respects as the No. 4B except that this has jeweled pivot bearings, click and drag and screw off oil caps. Wt. each 16 ozs. .....Each $29 00

All above, one in a box.

PFLUEGER WORTH

Quadruple Multiplying

This reel has everything a high grade bait casting reel should have; best material and workmanship enters into it: nickel silver is treated to prevent tarnish; generated spiral tooth gears, steel pinion; adjustable front sliding drag; Pyralin ivory handle, adjustable front sliding phosphor bronze click; bushed for bearings; steel pivots, highly polished with end bearing; patented adjustable tension oil cups with genuine scarlet agate jewels. The end play of the spool can be taken up with patented tension oil cups.

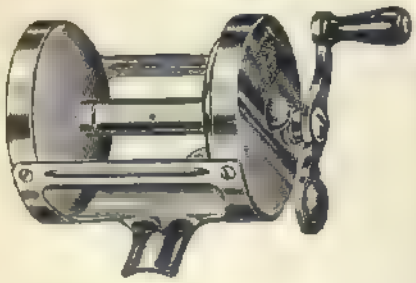
No. 1823J. 60 Yard. Satin nickel silver, jeweled; 1⅞ in. pillar; 2 in. plate. Wt. ea. 12 ozs. ....Each $6 75

Each reel is wrapped in silver tissue and anti-tarnish paper. One in a fancy card box.

REELS.

CASTING.

NIFTEE

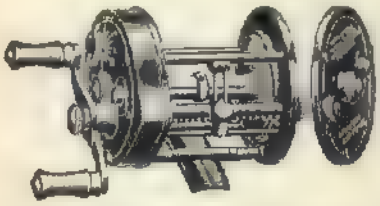


Quadruple Multiplying
Satin Nickel Finish.

Adjustable back sliding click; steel pinion; line shedding bushings; extra long pivot bearings; fancy crank, balanced; rubberoid handle. Has an oversize line capacity, and is wonderful value for the price. Embodies new and novel features for which patents are pending. Oil holes are provided for conveniently oiling both front and back pivots.

No. 1314. 80 yards; 1⅞ inch pillar; 2 in. plate. Wt. ea., 6 ozs. . Each $1 25

PFLUEGER SUPREME



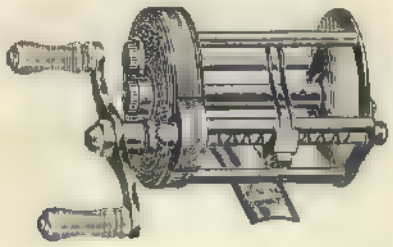
Level Winding, Anti-back-lash.

Made of Nichalum, a metal very light in weight and strong as steel. The double thread shaft and the half nut which travels in the threads of the double thread shaft are made of highest quality tool steel, tempered and lapped to a dimension. When fishing we advise oiling the reel completely at least once a day and the double thread shaft and line carrier twice or more a day, using the best watch oil possible. The anti-back-lash mechanism is contained within the reel and automatically thumbs the spool and stops the same instant the bait strikes the water. The adjusting screw and dial regulator is so constructed that any tension desired can be secured and can be thrown off altogether, thereby making an open level winding reel. Generated spiral tooth gears; steel pivots, tempered and polished; phosphor bronze bearings; adjustable back sliding click. Each reel is wrapped in silver tissue paper and packed in a chamois leather bag.

No. 1573. 80 yd., 1⅞ in. pillar, 2¼ in. plate. Ship. wt. ea. 12 ozs. . Each **$25 00**

All above, one in a box.

PFLUEGER SUMMIT



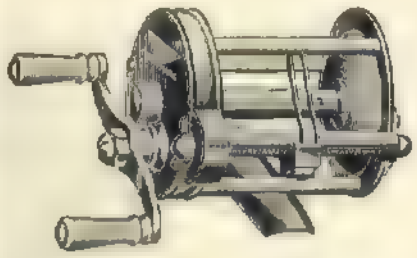
Level Wind. Anti-back-lash.

Level winding mechanism is one of the most important in any level winding reel and most likely to get out of order. The double thread shaft is made of selected steel. The half nut which travels in the threads of the double thread shaft is made of highest quality tool steel, tempered and lapped to a dimension. These two important parts are non-corrosive and highly resistant to wear, work in perfect unison and produce a level winding action that cannot be equaled by any other known mechanical movement. Housing for double thread shaft is of one piece and is attractive in design and serves several purposes. By reason of it the level winding mechanism can be taken apart and quickly and conveniently cleaned without disturbing any other part of the reel. Line guide loop travels full width of spool thus preventing any space between the wound line and flanges of spool and which would very likely cause back lash and other casting difficulties. This reel has the same anti-back-lash mechanism as the No. 1573 Supreme. Tension oil cup with this feature the end play of the spool can be adjusted to any degree desired by the angler. With genuine scarlet agate jewels. Crank is a design and weight as will operate the reel with greatest balance and least vibration. Phosphor bronze bearings; steel pivots; steel pinions; Pyralin amber double handle; fancy nickel silver finish. Wrapped in silver tissue paper and packed in chamois leather bag.

No. 1993J. Jeweled; 7⅞ in. pillar; 2 in. plate. Wt. ea., 8 ozs. Each **$10 00**

One in a card box.

PFLUEGER AKRON



Level Wind—Quadruple Multiplying

The Akron is offered to meet a demand for a level winding reel—one light in weight, plenty of line capacity and constructed to insure long life and satisfactory service. Priced at a figure which will enable the angler of limited means to secure a very desirable and dependable level winding reel. It has many distinctive features some of which are patented and others patents are pending. One of the outstanding is its design and size which makes it comfortable to "palm" and easy to cast. Level winding mechanism is one of the most important in any level winding reel and most likely to get out of order. The double thread shaft is made of selected tool steel. The half nut which travels in the threads of the double thread shaft is made of highest quality tool steel, tempered and lapped to a dimension. These two important parts are non-corrosive and highly resistent to wear, work in perfect unison and produce a level winding action that cannot be equaled by any other known mechanical movement. Housing for double thread shaft is of one piece and is attractive in design and serves several purposes. By reason of it the level winding mechanism can be taken apart quickly and conveniently and cleaned without disturbing any other part of the reel. Line guide loop travels the full width of spool thus preventing any space between the wound line and the flanges of the spool and which if prevailed would very likely back lash and other casting difficulties. Tension oil cup with this feature the end play of the spool can be adjusted to any degree desired by the angler. Crank is of a design and weight as will operate the reel with the greatest balance and least vibration. Assembled with two handles and much can be said in favor of the advantages of a double handle crank over a single handle crank. Steel pivots; steel pinion; white celluloid double handle; combination satin and polished nickel. Each reel is wrapped in silver tissue and anti-tarnish paper.

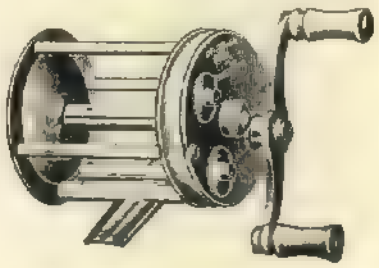
No. 1893. 1⅞ inch pillar; 2 inch plate. Wt. ea., 8 ozs. . . . . Each **$5 00**

One in a fancy box.

REELS

CASTING

PFLUEGER BUCKEYE

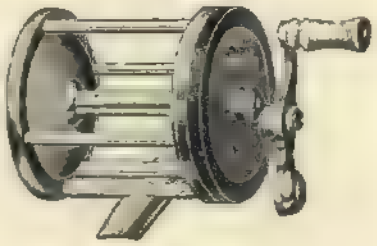


Quadruple Multiplying.

This reel has steel pivots, highly polished with end bearing; bushed for bearings; steel pinion; adjustable front sliding phosphor bronze click; adjustable front sliding drag, Pyralin ivory handle; patented adjustable tension oil cups. The end play of the spool can be taken up with patented adjustable tension oil cups.

No. 993JDH. 60 Yards. Double handle crank, satin nickel-jeweled; 1⅞ inch pillar; 2 in. plate. Wt. ea. 10 ozs. .....Each $5 25

PFLUEGER CAPITOL



Quadruple Multiplying.

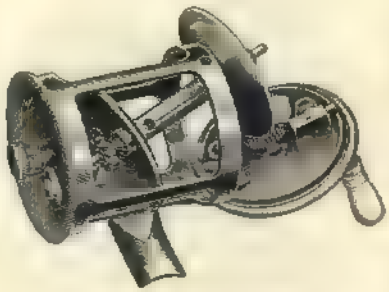
A high grade reel with hard rubber disks; reverse metal bound; adjustable slide click and drag; steel pinions and steel pivots; fancy crank, balanced; Pyralin ivory handle

No. 604. 80 yard. 1⅞ in. pillar; 2½ in. plate. Wt. each, 10 ozs..Each $4 50

No. 605. 100 yard. 1⅞ in. pillar; 2¾ in. plate. Wt. each, 12 ozs..Each $6 00

All above, one in a box.

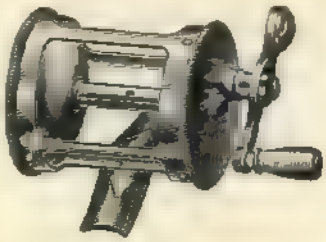
SAMSON



Quadruple Multiplying.

A high grade bait casting reel; nickel plated; with removable spool; end of reel where handle and gears are attached is fastened to frame with a hinge which eliminates the possibility of losing this part. Free running spool and balanced handle.

No. 500. 80 Yard. Wt. each, 9 ozs. .....Each $3 00

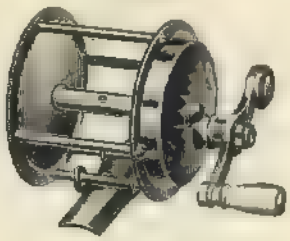


Quadruple Multiplying.

A high grade bait casting reel; nickel plated; solid frame; free running spool and balanced handle

No. 350. 80 Yard. Wt. each, 8 ozs. .....Each $2 50

SAMSON



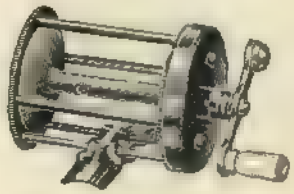
Quadruple Multiplying.

A good grade bait casting reel; nickel plated; free running spool, balanced handle

No. 250. 60 Yard. Wt. each, 7 ozs. .....Each $2 00

All above, one in a box.

SUNNYBROOK



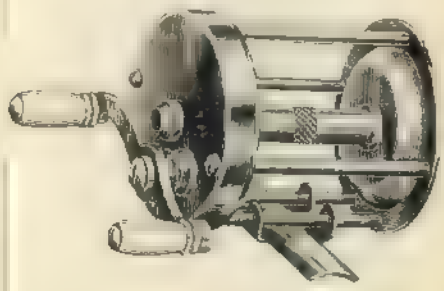
Double Multiplying

Polished Nickel Plated.

A widespool, popular price reel for general use. Adjustable click; knurled edges.

No. 125. 60-80 yards. Wt. ea. 7 ozs. .....Each $1 65

MONTAGUE



Quadruple Multiplying Polished Nickel Plated.

A substantially built and well-finished, quadruple, multiplying, bait-casting reel. This reel must not be confused with the many cheaply made and poorly-finished reels now being offered. It is a high-grade product in every respect and will give excellent service. It is finished with a substantial coat of nickel plate, highly polished.

No. 35. 80 yards. Wt. ea., 8 ozs. . . . . Each $1 35

All above, one in a box.

STEAM WHISTLES

PLAIN

Cast brass tubing bell. Produces a clear, penetrating sound which can be heard a long distance. Used for all general purposes.

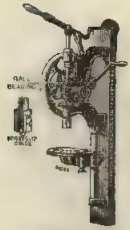
CHAMPION DRILLS

E

FOOT



Lever Feed

This pattern is built for light and quick work; intended to be used as a second drill in shops where tire drilling and countersinking are an object, especially where screw feed drills are used; as well as any other light work.

Specifications.—Has slotted planed table, which can be removed or swung to either side. All bearings ground from solid steel; gears are turned and cogs faced and polished. Drills up to ⅝-inch hole in center of 14-inch circle. Spindle 1-inch in diameter, with an up and down run of 3½ inches. Has end thrust ball bearings. Full back geared. Spindle bored to take ⅝-inch round shank bit drills.

NO	Ht. In.	lb Ea.	EACH
100	40	100	$25.00

No. 100P. Same as above, but with tight and loose pulleys 6x2 inches, for power.

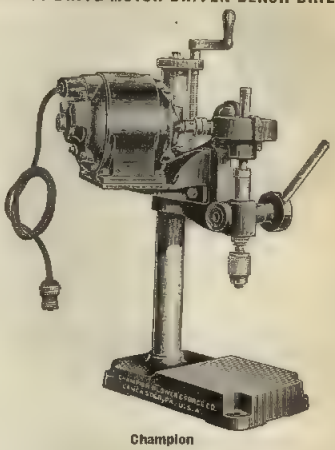
NO.	Ht. In.	lb Ea.	EACH
100P	40	125	$30.00

New Black Diamond

The No. 525 is an automatic self-feed; the new ball bearing feature greatly reduces the power required for drilling. Gearing is compounded for quick and easy running, both side and top wheels making two revolutions to one of the crank. The new wheel holder will hold wheels for drilling tires without scuffing off the paint. Second speed for bearing work, is put on in an instant, by inserting crank handle into side fly wheel. Round, lathe turned slotted table, adjustable; drills to center of an 18-inch circle. Holes up to 1¼ inches. Spindle has up and run down of 4 inches, and bored to take ⅝-inch round shank drills.

NO.	Height	Weight Each	EACH
525	56 in.	225 lb.	$42.75

DIRECT DRIVE MOTOR DRIVEN BENCH DRILL



Champion

The Champion Motor Driven Bench Radial Drill represents a new drive feature not found on any drill heretofore. The motor is attached to the main frame of the drill, and the power to the drill spindle is transmitted by a helical cut spiral pinion and helical cut gear, which makes a wonderfully smooth running drill. The motor shaft and spindle are connected by the helical gear and pinion; the lever for feeding is arranged with a spring to automatically raise the bit out of the work after a hole is drilled. No belts to slip. Drill is furnished complete with attachment cord and plug, requiring no electrical expense in setting up.

Drill has a screw and handle for raising and lowering the adjustable head and when clamp is loosened, the drilling mechanism may be swung around on the column to either side of bench, enabling the used to do work requiring an expensive radial drill where long pieces or frames are to be drilled.

The drill has many advantages for doing a variety of work on production drilling that cannot be done on drills costing many times the price of this drill. It therefore fills a want among mechanics such as light manufacturing, machine shops, pattern and model shops, garages and the home workshop.

SPECIFICATIONS

Drills to center 10 inch circle.
Spindle equipped with Adjustable 3-Jaw Chuck to take straight shank drill bits 0 to ½-inch.
Drills holes up to ½-inch.
Up and down travel of spindle, 2½ inches.
Travel of Adjustable Head on Column 9½ inches.
Distance between Spindle and Base, 11 inches.
Spindle speed, 1050 R. P. M.
Size of base—planed—7x7 inches.
Diameter column, 1¾ inches.
Bench space, 12¾x7 inches.
Height, 25 inches.
Weight, 90 lbs., crated.

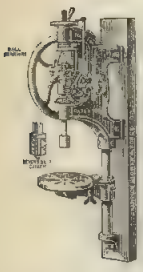
E CHAMPION DRILLS



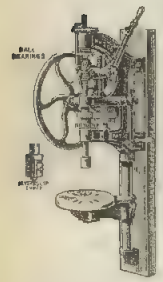
POST

Combination automatic self-feed and double compound lever-feed upright post drill with ball bearings. The compound lever gives you 80 per cent more pressure at the point of drill than any other, instantly raising the drill bit or replacing it on the work. No more turning back of feed screw nut to get drill out of work. Both self-feed and lever-feed are independent of each other and can be changed instantly. The lever makes it especially convenient for wood boring for blacksmith shops. It has two speeds, with three gears, in order to give second speed the same turning direction of crank as first speed. Table is lathe-turned and slotted. Can be swung to either right or left, and raised up or down. Can be removed for drilling. Drills holes up to 1¼-inch to center of 16-inch circle. Spindle is 1½ inches diameter and has an up and down run of 4 inches. All end friction of the spindle is taken away by the use of end thrust ball bearings. Spindle bored like Never-Slip chuck for ⅝-inch shank drills.

NO.	Height	Weight Each	EACH
200	51 in.	200 lb.	$53.00

With tight and loose pulleys for power, 6-inch diameter and 2-inch face, otherwise same as No. 200.

NO.	Height	Weight Each	EACH
200P	51 in.	205 lb.	$57.00

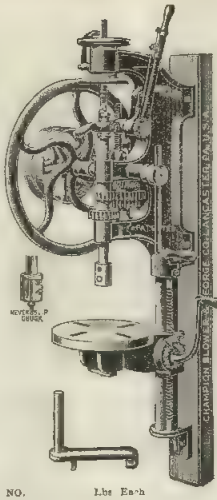


POST

The Champion patented combination automatic self-feed and double compound lever-feed drill is the most powerful medium priced drill ever built. Special attention is called to the double compound lever-feed, which gives the benefit of every possible invention that a drill can have. This feed produces 80 per cent more pressure at the point than any other drill without it. The automatic self-feed and double compound link and rack lever-feed are independent of each other, and can be changed in the fraction of a second.

It has two speeds, the change from slow to fast speed or from heavy to light work is accomplished by sliding the gears and requires but an instant. Table is lathe-turned and slotted, and can be swung to either right or left or raised up and down. Can be removed for drilling tires. Drills holes up to 1⅓-in. to center of 18-in. circle. Spindle is 1⅔ in. diameter and has an up and down run of 5½ in. Spindle bored like Never-Slip Chuck for ⅝-inch shank drills. With tight and loose pulleys, 11-in. diameter by 2½-in. face for power.

NO.	Height	Weight Each	EACH
200½P	55 in.	285 lb.	$75 00

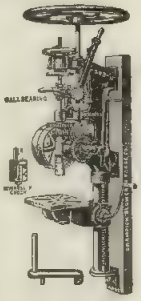


POST

Champion combination automatic self-feed and double compound lever-feed post drill with tight and loose pulley. Made with cut gears and ball bearings.

Specifications: Drill to center of 21-in. circle. Spindle 1¾-in. diameter, has up and down run 5½ in. Equipped with never-slip chuck to take ⅝-in. straight shank bits. Tight and loose pulley 11-in. diameter, 2½-in. face. Speed 100 r.p.m.

NO.	Lbs Each	EACH
201P	430	$95.00



POST

This patented powerful compound lever and automatic self-feed, each independent of other, or changed from one to the other in the fraction of a second, accomplishes wonders in turning out work; there is no time lost, as the raising or lowering of the drill is instantaneous in both feeds. There is no turning back of the feed screw nut with either feed. With this machine, a blacksmith can drill holes as cheaply and quickly as an up-to-date machine shop. This lever also makes the drill a first class wood boring tool.

Specifications.—Automatic self-feed and lever-feed upright drill, with ball bearings; fitted with tight and loose pulleys for hand and power combined. This drill has all the latest improvements as described in the No. 201 Drill, but is heavier in construction and has the fly wheel on top instead of side, which spins on ball bearings. Has two speeds, automatic and lever feed. Square table with lever and ratchet adjustment and wheel rack. Drills from 0 to 1½-in. holes to center of a 21-inch circle and has 1¾-inch spindle with up and down run of 5½ in. Fitted with Never-Slip Chuck bored for ⅝-in. round shank drills. Power pulley 11x2½ in. Speed for ordinary work 180 revolutions per minute.

Lawn Mowers

Channon Special

Ball Bearing Wheels, Four Manganese Steel Blades, 9-inch Dia. Wheels.

Manganese steel blades, crucible steel cutter bar. Only the very best material used throughout. A light running, serviceable machine. Adjustments are easily and quickly made.

Blade, inches	16	18	20
Price, each	$19.00	$20.00	$21.00

Worchester

Ball Bearing 9-inch Dia. Wheels

This ball bearing mower is a thoroughly dependable mower, easy operating and capable of very fine work. 9-inch wheels of the open type; four special alloy crucible steel blades; lipped underknife. The entire construction is solid and sturdy and of the best materials. No shims, cotter pins nor springs in the construction of this mower.

Blade, inches	16	18
Price, each	$16.00	$18.00

Boughton Ball-Bearing Lawn Mower

Five Manganese Steel Blades, 10-inch Diameter Wheels.

One of our most popular models. Strictly high grade, light running, noiseless and serviceable. Two blades are on the cutter bar at all times, giving a short cut. The turned-up lip makes the cutter bar self-blade self-sharpening.

Blade, inches	16	18	20
Price, each	$23.00	$24.00	$25.00

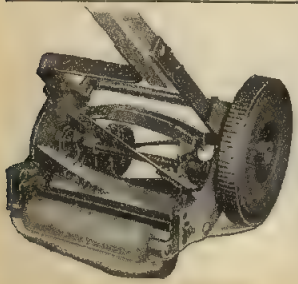
Mt. Tom

Plain bearing Manganese, Four Steel Blades, 8-inch Dia. Wheels

Manganese steel blades, crucible steel cutter bar. Only the very best material used throughout.

A light running, serviceable machine. Adjustments are easily and quickly made.

Blade, inches	14	16	18
Price, each	$12.00	$12.50	$13.00



Worcester Lawn Trimmer

For mowing close to trees, borders, fences etc., a thoroughly efficient and practical machine extensively used in parks, country clubs, and by City and Suburban home owners.

It provides the finish touch.

Price, each $15.00

Chausse Kerosene Torches

Model C1 Three Gallon Portable Torch

For

Thawing,
Drying,
Pre-heating,
Soldering,
Tempering,

Expanding
and
General Shop
and Foundry
Service.

The only self-contained portable 3-gallon torch which will burn its entire fuel capacity in any position—vertically, horizontally or upside down. The only one which cannot be blown out by high winds or extinguished by water or rain. Weighs only 30 lbs. filled with 3 gallons of kerosene or distillate. Generates 1600 to 2000 degrees (F) of heat in a long clean 24-inch flame. Burns 3 hours on one filling.

Price complete.....**$30.00**

Thawing Out Switches and Frogs

Model C3 2-Quart

Models C3 and C4
One and Two Quart Torches

The widespread demand for small kerosene torches is met by the Chausse one and two quart torches. They are safer and more economical than gasoline torches, give a clean, non-carbonizing flame and can be used to heat soldering tools. They can be filled or emptied from the top.

These torches can be used in houses, apartments and other buildings where gasoline torches are forbidden by building codes. They are cleaner, safer and more satisfactory than antiquated charcoal burners.

Chausse hand torches are used in large quantities. One of the largest tractor makers in this country has used thousands of them, equipping each machine to preheat kerosene to facilitate starting. Another manufacturer, of fuel oil stationary engines, equips every engine with a one-quart torch.

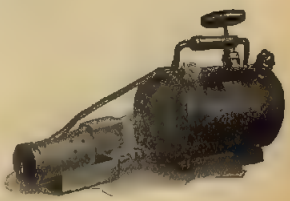
These torches are also made with burner horizontal and soldering iron rests. Specify horizontal or vertical burner on orders.

Price Model C4, one quart.....**$6.00** Price, Model C3, two quarts.....**$12.00**

No. 55 Hauck Thawing Torches

This torch gives excellent service in severe sleet and ice storms. Has bracket reinforcement. The 1½-gallon rust-proof oil tank is equipped with hand pump. Pressure gauge registers 60 lbs. Burner is equipped with heating pan. Windshield protects flame. Length of flame, 22 inches. Oil consumption, 3 quarts of kerosene oil an hour. Weight, 11 pounds.

No. 55. Price, each.....**$25.00**



Clements Cadillac Portable Electric Blower —Suction Cleaner—Sprayer

The Approved Method of Industrial Cleaning

Cleaning

It cleans motors, generators and all machinery, shop and office equipment, etc., either by blowing or by suction

This tool is equipped also to handle liquid insecticides, paints, lacquers and cleaning fluids. Simple. No upkeep. Operates from any light socket. Clements-Cadillac Portable Electric Blower has been chosen by thousands of industrials, large and small, to answer all cleaning requirements because of its low price, adaptability to all cleaning requirements, low operating cost and because it delivers clean DRY air in large volume but at comparatively low pressure to clean safely the most delicate equipment.

All Cadillac Blowers are equipped with Universal motors, operating on A C or D C. (specify voltage when ordering), ball bearings which require no oiling, complete with 20-ft. super-service cable and armoured plug (separable).

Suction Cleaning

(Illustration No. 2 at left)

It converts instantly from blower to suction cleaner. Simply remove rubber nozzle and attach Dust bag. Remove wire screen at side, clamp on Hose connection and attach Hose and cleaning tool desired.

The standard attachments are sufficient for all ordinary suction cleaning purposes. This equipment is ample for cleaning out stock bins, office furniture, automobile upholstery, or any job where ordinary suction cleaning is desired.

There are also special tools for special requirements, including a long tube with an adjustable brush for reaching high places—for cleaning overhead pipes and line shafting. Also a Floor Nozzle with detachable brush for easy and thorough cleaning of floors, rugs and carpets. With their added power, the new Clements-Cadillac models make practical the use of type-cleaning devices for printers—telephone braid brushes curry combs and curry brushes and many other special attachments obtainable only with the Clements-Cadillac.

Special attachments can be purchased separately.

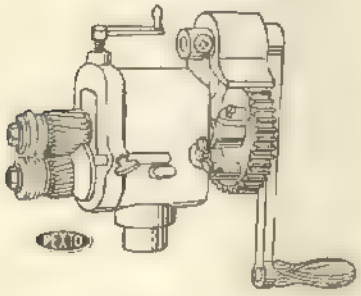
SHEET METAL WORKERS' MACHINES

PEXTO

CRIMPER AND BEADER



Interchangeable.

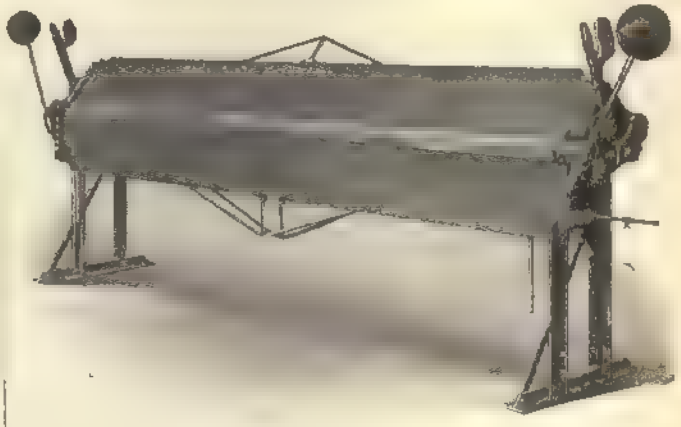
Capacity 20 Gauge Iron and Lighter.

For producing a neat, uniform crimp and bead or crimp without bead these machines recently made from new patterns will be found superior to any other make for general pipe crimping or beading. They have been designed with a view to giving maximum strength and rigidity and can be depended upon for producing snug fitting pipe joints that hold when put together. A very practical feature is offered in the arrangement of the driving gears. Two speeds are provided for; back geared for heavy stock and direct drive when lighter gauges of materials are used. The driving gears can be removed and the machine converted instantly into a direct acting crimper by attaching the crank to lower shaft. Connecting gears are of machine cut steel the frame and cap machined to insure perfect fit of all working parts for accurate and uniform work. Rolls are made of a high grade steel, scientifically hardened and the gauge is of extra wide proportions made from tool steel properly hardened. Adjustments are provided for regulating the relative depth of crimp and bead. The adjustment will be found in a wedge between the rear bearings. This wedge is adjusted by wing nuts in front and back of frame near handle end. The upper shaft can be tipped toward front or back as desired thus making a deep crimp and shallow bead or shallow crimp and deep bead. Face of rolls are flush with their arbors. When the blank rolls as furnished are placed behind the crimping rolls a plain crimper is procured. Furnished with No. 975 standard.

No. 585. Diameter of beading rolls 1 15/16 inches, diameter of crimping rolls, 1 13/16 inches, width of crimp rolls 1¾ inches, width of bead rolls 1 inch, size of ogee bead ½ inch, ratio of gearing 3 to 1, distance between shaft centers 1¾ inches. Shipping wt., approximately 65 lbs. Each $35 00

CHICAGO

BENDING BRAKES



Shipment from Factory Only.

The construction is such that although the machines are strong and rigid they are light in weight. Steel is used throughout in their construction. The rated capacity is for mild steel sheets and for bending a flange of one inch or wider on sheets of full capacity. To secure additional leverage for bending heavy metal a steel angle extension is attached to the bending leaf Full length sheets can be worked by one man; one end is clamped on the mark and the other end of the sheet can be moved to the desired mark without disturbing the first mark. The balance is perfect to make easy and rapid operation. Bending edges are made of special hard alloy steel to withstand wear. Adjustable stop gauge is furnished.

TELEPHONES

CHICAGO

Generator—Mechanically and electrically perfect, sturdy and powerful, and capable of generating a sufficient amount of current to ring through the heaviest loaded lines. The gear wheels are solid brass, made extra wide to insure strength and durability. The shunt springs are of nickel silver.

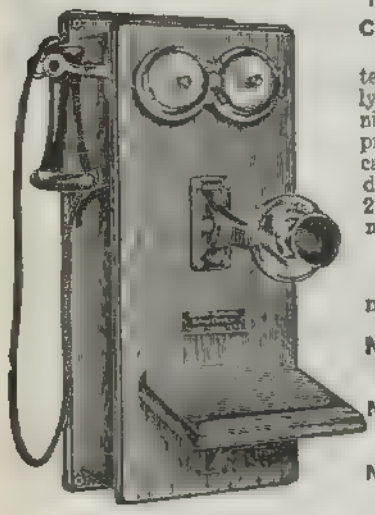
Transmitter—Latest improved solid back long distance transmitter. A transmitter of increased talking efficiency, excellent quality of articulation, clear and distinct tones. The carbon granulas used, are imported from France.

Receiver—Bi-polar receiver. Accurately and distinctly reproduces the tones of the human voice. All parts easily accessible and self-contained.

Switch Hook—Simple in design, positive in action, compact durable and reliable. The contact springs are of nickel silver with pure platinum contacts.

Ringer—Produces a clear, penetrating tone, and is noted for its sensitiveness even under unfavorable line conditions.

Lightning Arrester—The bi-polar lightning arrester is a part of the regular equipment of each telephone, and is a positive protection against damage by lightning.



"CHICAGO DE LUXE"
Compact Type—Bridging.

Improved design, quarter-sawed oak cabinet, highly polished finish; black and nickel trimmings. Space is provided in lower part of cabinet for two 2½x6 inch dry cells. Size cabinet 23x8x7 inches. (Prices do not include Batteries).

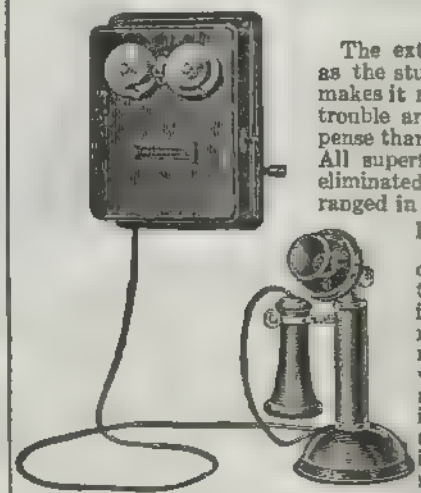
"CHICAGO DESK SETS"
Bridging.



The extreme simplicity as well as the sturdiness of construction makes it no more susceptible to trouble and increased upkeep expense than the standard wall type. All superfluous parts have been eliminated and the equipment arranged in a way that makes every part instantly accessible.

The equipment is standardized. The same transmitter, receiver induction coil, generator, ringer and lightning arrester are used as in the wall types. The generator, ringer movement, induction coil and lightning arrester are mounted in a neat, compact magneto box, quarter-sawed, golden oak finish; nickel trimmed.

The desk stand is sturdily constructed so as to withstand rough usage. Mouth piece and receiver are of hard rubber; black enameled post; nickel plated base and transmitter.

Size box 8x5¾x4½ inches; size desk stand, diameter base 5¼ in.; height over all 11 inches. (Prices do not include Batteries).

3 Reasons Why Boys Want

SELLEY

Model Airplanes—

they *FLY* Featherweight and scale models alike are ***guaranteed to fly at least*** 75 to 300 feet.

they are ***EASY TO BUILD*** . . . Sold in ***semi-built*** construction sets with detailed plans and directions.

they are ***REALISTIC*** . . closest replicas of big ships that will actually fly.

YOU'LL want to stock Selley Parts and Supplies, too. Boys patronize stores that sell parts for models of their own design, and for replacement. Selley's complete line of standard parts fill every need of boy model builders and keep them coming back to your store the year 'round.

THAT'S why Selley Models bring REPEAT BUSINESS . . . the boy who builds one Selley Model wants to build them all.

Six models, from 75c to $7.50 retail. . . . Lark featherweight R.O.G.; scale models of Curtiss Ace, Bremen, Bellanca Columbia, Spirit of St. Louis, Stinson Detroiter Biplane. A complete line of featherweight models to be introduced in near future.

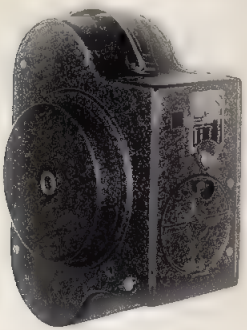
Q. R. S. DE VRY MOVIE CAMERAS & PROJECTORS

A Popular Line at Popular Prices

A line of cameras and projectors that is efficient in every detail, at a price that makes it possible for anyone to own a movie outfit. Every De Vry Movie Camera and Projector is guaranteed for one year against any defects in material.

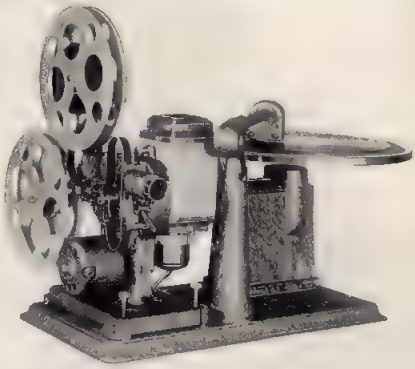
Prices are list, subject to wholesale discounts.



DE VRY Model B Camera

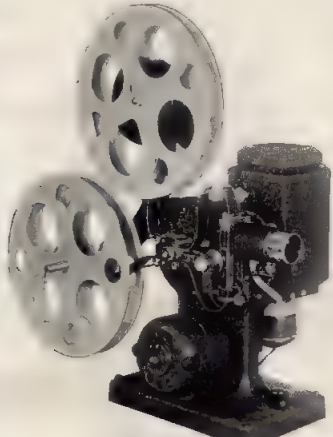
N8500 . . . . . $90.00
Takes amateur standard 16 mm. films in 50 or 100 ft. lengths. Equipped with Graf 3.4 Lens. Simple arrangement of loading film, fast and slow motion effects can be obtained by using hand crank provided; automatic spring motor; two finders—waist and eye-level, footage dial and tripod socket; color—black frostine, weighs approximately 6 pounds. Dimensions 9 x 6½ x 4½ inches.

N8501 Carrying Case for above $8.50
Black imitation leather with hand and shoulder strap. Strong and serviceable.



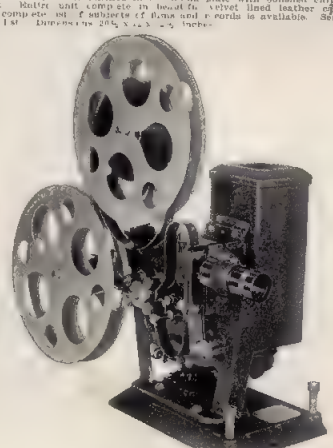
DE VRY Cinetone for Talking Pictures

N8502 . . . . . $425
The Cinetone consists of a motion picture projector connected to a phonograph in such a manner that positive synchronization is assured. The volume control is located in the supporting base of the turntable, while the leads may be attached to either an existing radio set or a special amplifier. A specially designed governor insures the utmost smoothness in operation. Latest type two-tone gold bronze. All moving parts heavily plated with chromium. Lamp house finished in chromium plate with polished chromium trimming. Built into complete unit of beautiful velvet lined leather carrying case. A complete list of subjects of films and records is available. Send for complete list. Dimensions 20½ x 8½ x 9½ inches.



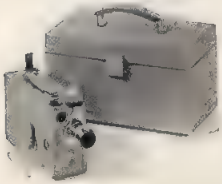
DE VRY Model G Projector

N8503 . . . . . $150
All metal construction—black lacquer finish, weight, seven pounds; universal motor operating on A.C. or D.C., positive white claw movement, five-watt controls adjustable speed, F2.5 50 mm. lens, interchangeable with other focal lengths, perfected optical system, rapid geared rewind, film idlers lock in position, lamp, equipped 200 Watt prefocus base—instantly interchangeable, framer (operates during projection), capacity 400 ft. equivalent of 1,600 ft. of standard 35 mm. film, safety stop-on-film prevents blistering, all moving parts heavily plated with chromium. Dimensions 11½ x 8½ x 11¼ inches.



DE VRY Model B Projector

N8504 Hand Driven Model $58
N8505 Motor Driven Model 80
Silent operation whether hand or motor driven; simple film threading action, positive self framing precision claw movement, equipped with 2 in. Graf focusing lens (interchangeable), quick accessibility to all parts; standard base 150 watt prefocus lamp, film can be rewound by hand crank or electric motor; equipped with automatic light trap which makes possible stop projection without injury to film. Dimensions 11 x 12 x . inches.



N8400 Ciné-Kodak, BB, f. 1.9. . $225
Ciné-Kodak, Model BB, f 1.9, is small and light. 50 ft. film capacity. Spring motor driven. Built-in exposure guide. Waist and eye finders. Footage indicator. Half speed adjustment. Supplied in blue, gray, brown, or black with carrying case to match. Please specify color. Size 8⅜ x 2 1/16 x 4 13/16 inches. **Retail price $140.**

N8403 Ciné-Kodak, BB, f. 3.5 . $120
Except for lens equipment, this camera is the same as the model BB, f 1.9 above. It is equipped with the Kodak Anastigmat f 3.5 lens. Ciné-Kodak, Model BB, f. 3.5 is offered in black only. It will appeal to those who desire a small, easily carried and moderately-priced high-quality movie camera. Size 7½ x 3 7/16 x 4 11/16 inches. **Retail price $75.**

CINÉ-KODAKS

Prices are list, subject to wholesale discounts.

HOME movie-making is one of the most fascinating sports ever devised, and is creating large volumes of business for those who stock the equipment. Yet movie-making is more than a sport—it is a means of preserving for the future precious moments, happy events. It is a means of capturing in motion the outstanding events of one's life and the lives of loved ones, so that they may happen on the home screen as often as desired.

To make home movies, one has only to sight the subject in the finder and press the lever. That's all there is to it, and the action before the lens is being recorded for all time on a thin strip of film. With the Kodascope Projector it is possible to show those movies on the home screen just as easily as they were made with the Ciné-Kodak. One merely snaps the electric switch and the screen leaps to life with the movies.

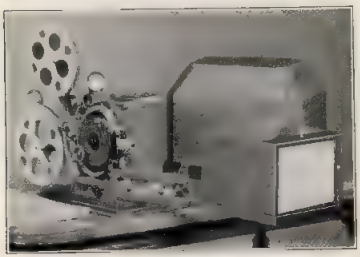
In addition to films of one's own making, there are available Kodak Cinegraphs of comedy, travel and cartoons and professional photoplays of full theater length. Write for complete list.

Once a store is established as home movie headquarters with a good representation of the Eastman line profitable trade will result.

Send for Complete Catalog
of Ciné Kodaks.

N8401 Ciné-Kodak, B, f. 1.9, in color with case $225
N8402 Ciné-Kodak, B, f. 1.9, black, without case $240
Ciné-Kodak, Model B, f. 1.9, has all the features of the model BB, f. 1.9, except for the latter's half speed feature. It is larger and will accommodate the 100-foot or 50-foot roll. Available in gray, brown or black with carrying case to match, or in black. Size 9⅝ x 3 1/16 x 5 9/16 inches. Please specify color.

N8404 Ciné-Kodak, B, f. 3.5 . $135
This camera, except for lens equipment, is identical with the Model B f 1.9, in black. It is equipped with Kodak Anastigmat f 3.5 lens which is fast enough for all ordinary purposes, and has a special portrait attachment for close up movies. It will take either the 50-foot or 100-foot roll of Ciné-Kodak film and is the ideal hand movie camera. Size 8 13/16 x 3 3/16 x 5 9/16 inches. Supplied in black only. **Retail price $85.**



The Library Kodascope set up on a table—opened and ready for use. Size 10¼ x 7½ x 9¼ inches.

N8405 Complete Library Kodascope $475
The Library Kodascope represents the ultimate in home movie projectors. It combines an exquisite piece of furniture with a home movie projector of the highest excellence. Briefly, the Library Kodascope consists of the justly-famed Model B Kodascope Projector, a handsome walnut case, a self-contained screen and one-inch and two-inch projection lenses, together with a 400-foot aluminum reel, spare lamp, connecting cord, splicing outfit and oiling equipment—everything that is necessary for a "de luxe" home movie program. **Retail price $390.**

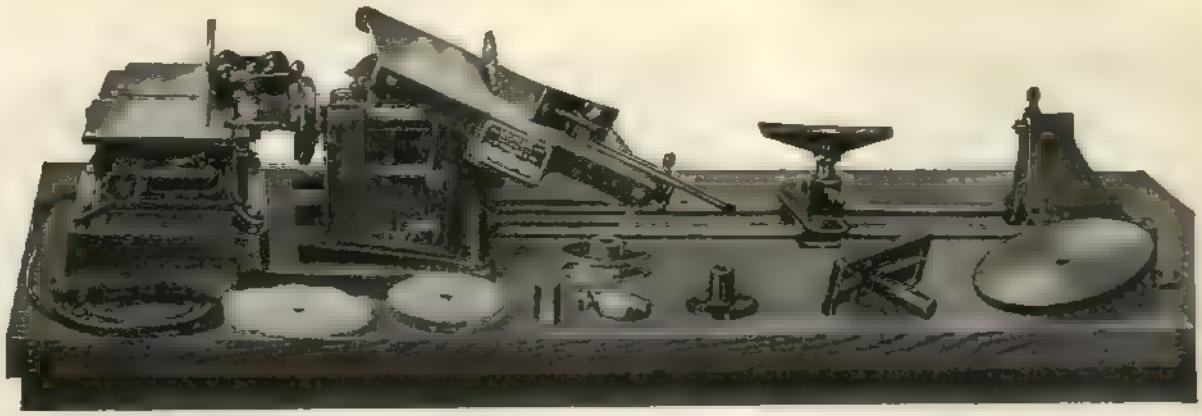
ELECTRIC WOODWORKER
WORKACE



This 5-foot shop includes a 4 inch planer, 8 inch circular saw, 6x36 inch lathe, 8 inch disc sander, 6 inch buffer, 5 inch grinder, ¼ inch drill and chuck, and a ½ H. P. General Electric motor, endless "V" belt, two separate pulleys, rust iron base and 10 feet of cord, and saparable plug

The motor, a General Electric ½ H. P. constant speed type, 110 volts, which will operate from the ordinary electric lighting circuit. The lathe is of the latest type construction, heavy steel rods which are ground to .001, assuring quick adjustment and secure fit of the tool rest and rail stock. When using the lathe the saw spindle and blade are removed and either the screw chuck or the spur center mounted on the saw arbor

When the grinding attachments or sanding attachments are used these are mounted on the saw arbor and the tool rests on work table shown is used in connection with the lathe tool rest holders for convenience in working. The drill chuck is also mounted on the saw arbor when used, so is the buffing wheel. The change is quickly and easily made.

The Workace Electric Woodworker will help the man and the boy of the house to enjoy their hobby, and to make the necessary items for the home. It is an inexpensive and very efficient unit for commercial purposes and we invite your close inspection to this clever and efficient tool.

Workace Woodworker. Complete as described above. Net wt., 145 lbs. Shipping wt., 165 lbs. .....Each **$95 00**

ELECTRIC SHAPER
WORKACE

A popular priced shaper, up to the minute in design with direct drive—no belts to slip and waste power and to replace. The Workace shaper is provided with a direct, positive, powerful economical drive. 10,000 R. P. M. no load speed. Take the Workace Shaper where it will be convenient for the work—save steps. Stands securely without fastening. Smooth running.

Ball Bearing. Design prevents oil reaching motor; excess oil thrown into drain by slinger below bearing.

Adjustable Table; table mounted on screw. Locks securely, by hand wheel.

Husky steel shaft equipped with two grooved shaper collars, four spacing collars and locking nut. Spindle locked by inserting pin in hole thru housing and spindle (pin placed by convenient pocket when not used, as shown)

Capacity, between shaper collars 2½ inches; using solid cutters 3¼ inches.

General Electric, universal motor. Can be used where light socket is available, 110 volts; operates with equal efficiency on D. C. or A. C., any cycle 25 to 60, single phase

Air cooled. Fan draws air thru base, expells at top of motor. Increases efficiency

The Workace Electric Shaper is a product of J. D. Wallace & Company, specialists in portable woodworking machinery. All parts guaranteed against defect in workmanship nd material for one year.

Blued Black Finish.

Automatic loading, cocking and ejection of fired shells is combined with easy loading in the new automatic pistol. The recoil spring is not compressed when operating the arm by hand to load. Provided with two safeties, the first on the grip and only operated when arm is properly held for shooting and a deliberate pressure applied by the second finger, second safety prevents discharge when magazine is withdrawn. Rigid frame and barrel. Wide flat top sights. Chambered for 32 rimless smokeless cartridges.

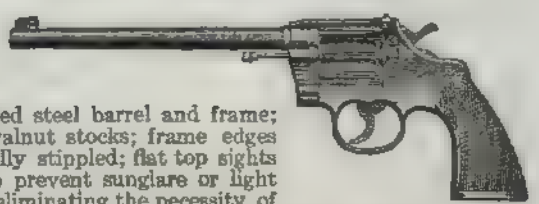
	Each
No. 032 Circassian walnut stock; length of bbl, 3½ ins; length over all 6½ ins	♦$94 50

One in cardboard box, wt each 25 ozs.

PISTOLS

COLT'S CAMP PERRY MODEL

22 Caliber. Single Shot Target.



Full blued steel barrel and frame; checked walnut stocks; frame edges mechanically stippled; flat top sights matted to prevent sunglare or light reflection eliminating the necessity of smoking the sights to obtain clear, sharp definition. Action, hand finished with light pull trigger, clean and smooth with no back lash. Trigger and back strap finely checked to prevent slipping. Equipped with Patridge type sights: front sight adjustable for elevation, rear sight with adjusting screw adjustable for windage, sighting radius 9⅛ inches. Barrel chambered to insure that great degree of accuracy demanded by experts. Length barrel 10 inches; length over all 13¾ inches.

	Each
No. CP02210—Shoots 22 long rifle	$107 55

One in cardboard box; wt each $4½ ozs.

One in wood box.

WAGON AND STOCK SCALES

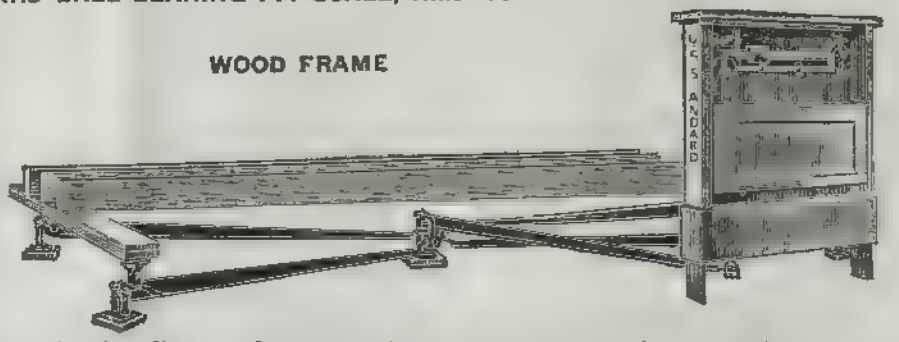
STANDARD BALL BEARING PIT SCALE, AMERICAN

Sealed to the U. S. Standard of Weights and is actually set up at the factory and tested under load. Levers in all types are of cast semi-steel; will not bend and are large enough to carry more than the required weight; well painted to prevent rust. All bearings are of tool steel, accurately ground and tempered to the required hardness. Provided with hardened ball bearings, placed between the platform and the main bearings, which absorbs the shock of driving on or off the scale.

Each scale provided with a standard full capacity compound beam brass faced, accurately graduated, notched on top roller bearing sliding poise. There are no loose weights as the upper bar is graduated by 200 pounds to full capacity of scale. Fractional weight bar with 2½ pound notches, tare bar graduated by 5 pounds, to full capacity of scale.

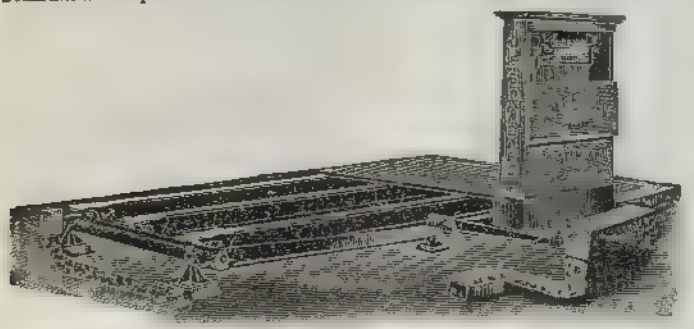
The beam box is well proportioned, substantially built of No. 1 Fir; painted three coats lead and oil; white, trimmed in black. Ball bearing platform, which absorbs shocks and protects the knife edge bearings. Furnished with all working parts including standard compound beam and beam box. Customer must supply the following: heavy timbers which support the platform material for the platform, concrete for pit and wood coping around pit. The pit should be about 28 inches deep.

WOOD FRAME



With Full Capacity Beam (No weights required).

Nos.	Capacity Tons	Platform Ft.	Ship Wt, lbs.	Each
23	5	8x14	550	✦$204 00
45	8	8x14	800	✦ 300 00
146	10	8x14	835	✦ 321 00
48	10	8x22	1000	✦ 399 00



STEEL FRAME, SHALLOW PIT, AMERICAN

By purchasing this type of scale a considerable saving is effected in the cost of installation, which offsets the higher initial cost. Steel joists are furnished with the scale and the depth of the pit is only 16 inches. The customer furnishing the wood for the platform, the concrete for the shallow pit and the timbers for the wood coping around the pit.

With Full Capacity Beam (No weights required).

Nos.	Capacity Tons	Platform Ft.	Ship Wt, lbs.	Each
136	5	8x14	800	✦$294 00
88	8	8x14	950	✦ 495 00

STEEL FRAME PITLESS SCALE

Scale furnished complete with everything except the wood for the platform. Ready for use by setting it upon top of ground, building the wood platform and approaches of dirt, cinders or concrete at each end. All parts are of iron, steel or brass, except the beam box. Channel steel frame work and platform supports.

With Full Capacity Beam (No weights required.)

Nos.	Capacity Tons	Platform Ft.	Ship Wt, lbs.	Each
31	5	8x14	1400	✦$336 00
25	8	8x14	1800	✦ 498 00
26	10	8x14	2000	✦ 540 00
71	10	8x22	2600	✦ 720 00

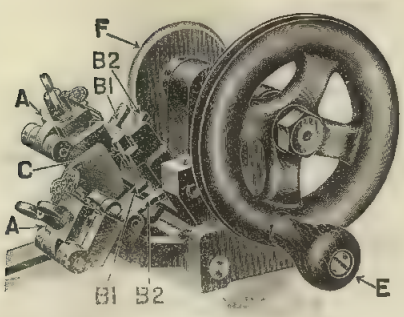
AUTOMATIC KEY DUPLICATING MACHINES

DORUIN



This key cutting machine will cut duplicates of all makes of pin tumbler cylinder keys, all flat keys, double bitted keys, and solid and hollow barrel or stem keys, by changing the cutter or gauge. It will do this without complicated changes and adjustments, and possible loss of accuracy.

Equipped with two types of cutters, milling cutter (F) for cutting pin tumbler keys, and cutting saw (G) (not illustrated) for cutting all other kinds of keys. Can be operated by hand or driven by power if desired.

The hinged vises (A, A) hold both original key and blank to be duplicated in a rigid and correct position. A shelf on the end of each vise supports the bow on the cylinder key. On each vise is a hinged stop, which serves both as a top shoulder stop (B1) and as a setting stop (B2). The top shoulder stop is indispensable when cutting cylinder keys, as all cutting from the original should be started from the top shoulder. This stop (B1) insures accurate reproduction of the original key. The setting stop (B2) gives the correct distance from the cutter to the gauge by resting the shoulder of one stop (B2) against the cutter and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (C, C), one for cylinder and one for other types of keys, are furnished with this machine. They can be interchanged quickly, and easily placed in correct position. The exactness of each may be quickly proved by the setting stop (B2).

After the original key and the blank to be cut are placed in position, raise lever (D) (not illustrated) with left hand, turning handle (E) until cutter (F or G) (G not illustrated) engages and cuts into blank to be duplicated.

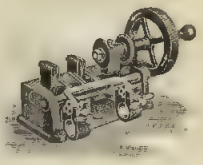
NO.	Wt. Each	EACH
85	**12 lb.**	$51.00

One in a wooden box.

Extra Cutters From Factory Only

	EACH
Milling Cutters	$10.00
Cutting Saws	.90

SEGAL



Cuts all makes of flat keys, such as trunk, letter-box, padlock keys, etc., as well as cylinder or paracentric keys.

Cutters and guides need not be changed.

Cuts from the lowest groove as the manufacturer does, or from the bottom of the key, as you prefer.

The patented constructed vise holds the key in place so firmly that it cannot slip.

Gauges key from upper shoulder.

Extra length rotary shaft bearing, which insures accuracy, strength and durability.

Cuts key in less than one minute.

Makes an accurate duplicate out of an inaccurate blank. That is why it is called the Rectifying Key Cutter.

Operates by hand or power.

NO.	lb Each	EACH
800	10	$73.50

One in a box.

Same as the No. 800 except it will cut paracentric cylinder keys only.

NO.	lb Each	EACH
900	10	$60.00

One in a box.

KEYS CUT TO SAMPLE

Extra keys cut for padlocks, cabinet locks, door locks and cylinders when furnished from our stock.

Note—The prices listed for cut keys, does not include master keys. Master keys are priced elsewhere.

	EACH
Cylinder Keys	$0.40
Flat Padlock Keys	.40
Flat Cabinet Lock Keys	.30
Mortise Lock Bit Keys	.45

NOTE—See page 1840 for exceptions to price on mortise lock bit keys.

"MY MOTHER AND DAD ARE THE BEST IN THE WORLD"

BLACK BEAUTY

That's what Bobby says as he throws out his little chest. Why?—because they've just given him a new Corcoran Black Beauty.

Kiddies love them—and because they do—fond parents everywhere are buying them. That's why progressive merchants cannot afford to overlook Corcoran Green Arrow Toys. They are as true to life both in appearance and action as it is possible to make a toy: constructed of all steel, assuring long life, and yet not excessively heavy and easily handled. Write for your catalogue containing complete information.

The Black Beauty—mechanism gives sensation of actually riding a horse—will delight any girl or boy.

The Red Bird—built close to the ground and has a gentle, safe, planing motion—for the younger girl or boy.

The Red Hawk—for the older child who wants a little more speed and action—looks like a real plane.

The Red Eagle—a "real" toy for a "real" boy—has joy stick that throws plane into a climbing position. Thrills—speed—action and perfectly safe.

Corcoran Vehicles are made only in Cincinnati

WOOD MINNOWS
CREEK CHUB

FAMOUS PIKIE MINNOW

Genuine cedar, slim body; rust proof bronze hooks set in sockets and blend with color of body. Gives best results when reeled slow but will not revolve if reeled fast. Especially designed near surface wiggler but by turning up the screw eye and reversing mouth piece it becomes a surface splatter. Length body 4½ inches.

	Per Doz
No. 700—Pikie minnow, scale finish	$25 20
No. 701—Natural yellow perch, scale finish	
No. 702—White with red head	
No. 704—Golden shiner, beautiful light golden sides	
No. 705—Natural Pikie, red side	
No. 708—Rainbow	
No. 718—New silver flash	

One in cardboard box; wt per doz 1⅓ lbs.

CREEK CHUB, FLYROD CRAWDAD

Small body with squirrel tail, claws, feather legs and tail; with No. 1/0 O'Shaughnessy hook. Made to float and for use with split shot. Length body 1 inch.

	Per Doz

No. 2018—Silver flash	

One in cardboard box; wt per doz 1½ lbs.

CREEK CHUB, NEW PLUNKER

Wood body, water proof enameled finish. Equipped with two treble hooks. A splendid lure for the lazy bass. When in action it makes a peculiar sound of plunk, ker plunk.

Very effective when used in likely looking pockets in the reeds or pads and given short jerks to keep it bobbing, dancing, fussing and ker plunking. Length 3 inches.

	Per Doz
No. 3200—Natural pikie, scale finish	$19 80
No. 3201—Natural perch, scale finish	
No. 3208—Rainbow finish	
No. 3218—Silver flash finish	

One in cardboard box; wt per doz 1¾ lbs.

WOOD MINNOWS
CREEK CHUB, WEED BUG

Wood body, waterproof enameled in meadow frog colors. Equipped with two single hooks. Designed to take the place of pork chunk and live frog bait. Floats when cast, the hooks are in the best position to receive all strikes. Shape of head enables it to go through reeds and lily pads without fouling, the planes take it through moss and weeds. Used in bad places where other baits can not be used, very attractive for night fishing.

	Per Doz
No. 2819—Length body 2 inches	$26 40

One in cardboard box; wt per doz 1¼ lbs.

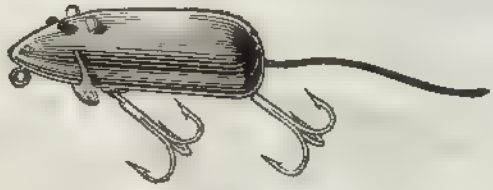
FRED ARBOGUST, TIN-LIZ

Molded of bright, rustless metal, with every detail perfect. Most realistic crippled minnow made. Real mouth, gills, fins and shining scales. Has a great range of depth. Sinks with a fluttering motion. Reeled fast with the rod held high can be skipped along the surface. Length 3¼ inches.

	Per Doz
No. TL1—Red side chub	$26 40

Half doz on display card with individual boxes furnished; wt per doz ½ lb.

ARTIFICIAL BAIT
CREEK CHUB LUCKY MOUSE



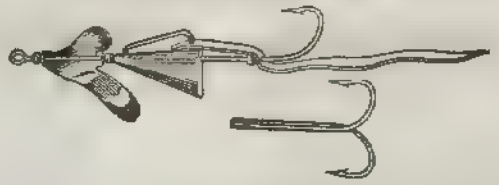
Wood body, water-proof enamel finish. Pyralin plane and ears; bead eyes; braided fabric tail. Equipped with two treble hooks so placed to make it a sure hooker and eliminate becoming entangled.

Produces a life like imitation of a swimming mouse when slowly reeled, when retrieved moderately fast produces a churning effect on the water. Length 2½ inches.

	Per Doz
No. 3600—Natural grey finish	$26 40
No. 3602—White with red eyes	
No. 3613—All black	

One in cardboard box; wt per doz 1 lb.

ARTIFICIAL BAIT
CREEK CHUB WIGL-Y-RIND



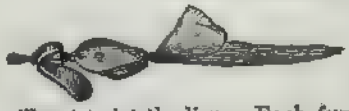
Brass spinner and weighted brass shell body, nickel plated and highly polished. Furnished with two hooks, single and double. Single hook easily removed and double hook substituted. Spinner can be used with any standard buck tail or streamer fly.

The big slow motion spinner gives the rind or fly a natural swimming motion, the shape of spinner aids in preventing fouling in weeds. Uses any standard pork rind.

	Per Doz
No. 10$—Size display card 11x14 inches	$22 50

One in cardboard box, half doz mounted on easel back counter display card; wt per doz 1¾ lbs.

FOSS' SHIMMY WIGGLERS



Brass, heavily nickel plated. Practically weedless as it rides hook up passing over weeds and obstructions, and will not twist the line. Each furnished with Foss' Bucktail streamer and one hook.

	Per Doz
No. 5SW-R3/0—Red with No. 3/0 hook	$26 40
No. 5SW-W3/0—White with No. 3/0 hook

RIFLES

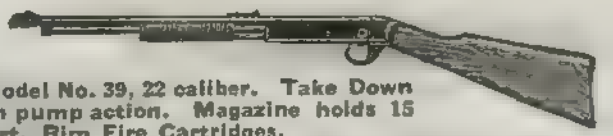
HAMILTON, REPEATING



Model No. 39, 22 caliber. Take Down with pump action. Magazine holds 15 Short, Rim Fire Cartridges.

Automatic lock prevents accidental discharge while operating pump action, as trigger can not be pulled until breech is locked in firing position. Pump action is automatically locked when rifle is loaded and ready to fire. A trigger lock in the gun just back of trigger may be used to prevent accidental discharge when rifle is loaded. This lock is not automatic. Barrel is bronze lined, accurately rifled, with solid steel breech. Front sight knife pattern, rear sight open and adjustable; stock and forearm genuine walnut turned. Length over all 35 inches. Length of barrel assembly when taken down, 21¼ inches. Weight about 4 lbs. each. Each

No. H3922—22 caliber; shoots 22 short rim fire cartridges.....$25 20

One in cardboard box; 10 in wood case.

PLAY RIFLES

SAVAGE

AIR RIFLES

BENJAMIN

SINGLE SHOT

No. 200. Single shot, take down. Shoots round air rifle shot with compressed air and has greater penetration than any other air rifle. The air is compressed with a pump contained in large barrel; three or four pump strokes give maximum power. Peep rear and blade front sights. Safe, reliable and accurate. Fully guaranteed. Length 37 inches. Gun metal finish barrel. Genuine walnut stock. Wt. ea. 3 lbs. .....Each $5 00

One in a box, one dozen in a case.

AUTOMATIC 25 SHOT

600 Automatic. 25 shot, take down. Has exclusive feature of positive automatic shooting of up to 25 round air rifle shot with compressed air without repumping or reloading. Famous Benjamin penetration. Patented automatic feed. Positive safety. Peep rear and blade front sights. A perfect light hunting and practice arm. Length 36 inches. Gun metal finish barrel. Genuine walnut stock and forend; half pistol grip. Wt. ea. 3½ lbs.....Each $10 00

One in a box, one dozen in a case.

REMINGTON

MODEL 26. PUMP ACTION REPEATER.

TAKE DOWN.

Built along the lines of the Remington .22 caliber repeating rifle with solid breech, hammerless, take down construction and looks more like a real firearm than any other air rifle. The stock and forend are made of genuine American walnut, the same quality as used on Remington standard grade firearms. The forend is grooved and is large so that it may be readily grasped for operation. The rear sight is adjustable for elevation. As a special feature, the rifle may be carried safe against accidental shooting by simply keeping the fore-end back of the forward position. If the forend is started rearward to cock the rifle, the motion must be completed before forend can be returned forward. There are no protruding parts such as a lever in which to catch the fingers.

Model 26. Magazine capacity, 50 shots; length 38 in.; when taken down, 27 inches. Wt. ea. 4 lbs .....Each $7 50

AIR RIFLES

CROSMAN

.22 Caliber.

Model P. Single Shot. Shoots 22 pellets. Walnut stock, pistol grip; steel buttplate; round deeply rifled barrel; blade front sight and rear peep sight. Length 36 inches. Wt. ea. 5 lbs. .....Each $12 00

Model R. Repeater. Shoots 20 shots at one loading; otherwise same specifications as single shot rifle. Wt. ea. 5½ lbs. .....Each $18 00

Pells (Bullets). .22 Cal., 500 in a box.....Box $1 25

TELL

.22 Caliber

This rifle is manufactured by one of the best and largest manufacturers abroad and is finely finished. It is absolutely accurate and will penetrate ⅝ inches of pine board at 100 feet. The barrel is equipped with knife blade front sight and elevation rear sight. It is cocked and loaded by pulling back the thumb latch on the right side just ahead of forearm and then breaking down the barrel by depressing muzzle. This operation forces back a plunger attached to a heavy spring. After inserting the Pellet and closing the barrel, the arm is ready to be fired. Pulling the trigger releases the plunger which in rushing forward compresses air in the air chamber driving the pellet from the barrel with great force. No pumping necessary, quick acting and will absolutely kill small game. Wt. ea. 5¼ lbs.

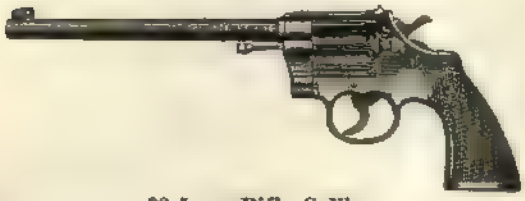
No. 1705G Tell. .....Each $16 50

Pells (Bullets) .22 Cal., 500 in a box.....Box $1 25

SINGLE SHOT PISTOLS

COLT

CAMP PERRY TARGET MODEL



.22 Long Rifle Caliber.

This new "Camp Perry" model is the result of many years of experiment, consultations with the leading target experts of the country and exhaustive factory and practical tests in the hands of Camp Perry shooters, Olympic team members and individuals in actual match work and is now brought out to meet the demanad for a Single-Shot Pistol superior in grip, balance, action and accuracy to any arm of its class now on the market.

Reference to the specifications will indicate its many advantageous points.

This model is built on the lines of the Colt Officer's Model Revolver, hence a shooter who desires to use both a caliber .38 revolver and .22 pistol may do so without change of grip or style of holding.

Camp Perry Target. Blued finish; 10 inch barrel; single action; checked walnut stocks; sights: either "bead" or "patridge" style as desired; front sight adjustable for elevation; rear sight, with adjusting screw, adjustable for windage; sighting radius 9½ inches. Shoots .22 long rifle cartridges. Length overall, 13¾ inches. Wt. each, 34½ ozs. .....Each **$40 75**

SMITH & WESSON

STRAIGHT LINE TARGET MODEL

.22 Long Rifle Caliber.

The barrel of this arm is taper bored, and especially chambered to give maximum accuracy and power. The rifling is the equal land and groove type with a twist of one turn in 15 inches. The "Straight Line 22" is the finest thing in the pistol line—and it comes in a special pressed steel case with a real cleaning rod and swivel screw driver. Put up in this way it is always ready to take to the range, slip into a suit case, pocket, or camping kit, completely protected from both injury and dampness. This case is 12 inches long, 5⅛ inches wide, and 1½ inches thick, beautifully finished in blue with the S & W monogram in the cover. It is a case such as all shooters have wanted.

Straight Line Target Model. Blued finish; 10 inch barrel, single action; Circassion walnut stock with monograms. Sights: 1/10 inch patridge front and fully adjustable rear with square notch. Shoots .22 long rifle cartridges; length, overall, 11⅛ inches. Wt. each, 34 ozs.....Each **$35 00**

SINGLE SHOT PISTOLS

STEVENS

OFF-HAND TARGET MODEL

.22 Long Rifle.

Selected black walnut stock; sporting rear and bead front sight; round barrel with octagon breech; handles .22 long rifle cartridges.

No. 35—.22 Cal. 8 in. barrel. Wt. ea. 27 ozs...Each **$13 25**

AUTOMATIC PISTOLS.

COLT.

The action of these pistols is automatic, except that the trigger must be pulled to fire each shot (continued discharge will NOT result from one pull of the trigger). The arm can be discharged at the rate of five to eight shots per second, the cartridges being automatically supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell is ejected, and a new cartridge loaded into the chamber. All these operations take place automatically without any manipulation of the arm. This automatic operation of the pistol is effected by recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has not the usual disturbing effect.

"WOODSMAN" MODEL

.22 Caliber. 6½ inch barrel; length overall, 10½ inches; full blued; checked English walnut stocks; bead front sight, adjustable for elevation; rear sight, with adjusting screw, adjustable for windage; capacity of magazine 10 shots; handles .22 long rifle rim fire cartridges. Wt. ea. 28 ozs. .....Each **$32 00**

Your Dealer Will Give You A New Pair of Crown-Shrunk Overalls

FREE If They Shrink!

The best dealers in your town are now offering the most unusual buy ever presented American overall wearers. A famous overall company has supplied them with a garment made of a new type denim designed to resist shrinking—to stay the same size despite repeated washings. These dealers guarantee "A new pair free if they shrink." The overalls are called Crown-Shrunk and are made by The Crown Overall Mfg. Company, largest in the world.

Crown-Shrunk Denim

The Most Startling Improvement Ever Developed in Overalls

FOR years overall wearers and dealers have urged manufacturers to produce an overall that would not get skimpier and tighter after every washing. Now The Crown Overall Mfg. Co., largest in the world, has furnished the answer. They bought two denim mills and an entire town, and installed special equipment to produce a super-denim along the lines set down by Crown textile experts

Crown-Shrunk Denim, the result, is worth many times its cost of development. Not only does it resist shrinkage as per sworn affidavit of United States Testing Company, but it is more closely-woven, heavier, stronger, tougher and quadruple-dyed! Yet this amazing shrunk feature costs you nothing extra. In fact its long wearing qualities make it far more economical.

Crown-Shrunk Denim is produced by a secret process. The only mills that make this denim are owned by Crown—no other overall maker can buy it. The dealer who sells you Crown-Shrunk Overalls is offering you an exclusive product—the best that his money can buy and the best that you can buy. If Crown-Shrunk Overalls get tight—if they bind, lose their fit, or shrink out of shape like ordinary overalls, *you get a new pair free with no questions asked!*

All you need do is try one pair of Crown-Shrunk Overalls. Not only are they made of Crown-Shrunk Denim; they are the most comfortable, durable, economical and best appearing overalls ever produced . . . more pockets and more special features than any other overall. Go to your dealer today. Look at the Crown ticket yourself to see this revolutionary guarantee never before possible—

"A new pair free if they shrink."

The S-H-R-I-N-K Has Gone From Overalls

A NEW PAIR FREE IF THEY SHRINK!

Great news for overall wearers! A new type of denim, perfected by The Crown Overall Mfg. Co., largest in the world, protects you against shrinking, backed by the guarantee—"a new pair free if they shrink!"

Crown-Shrunk Denim

Amazing Discovery Revolutionizes Overall Wear, Fit and Comfort

CROWN textile experts have developed an amazing improvement in denim with such resistance against shrinking that Crown can confidently offer it in Crown-Shrunk Overalls with this unprecedented guarantee—"a new pair free if they shrink."

To develop Crown-Shrunk Denim, The Crown Overall Mfg. Co. bought two complete textile mills and an entire town where these experts labored for years. Finally they developed Crown-Shrunk Denim which showed no shrinkage—as per sworn affidavit of United States Testing Company.

Think of the longer wear there must be in a shrink-resisting denim! For Crown-Shrunk Denim is a close-woven, extra heavy, quadruple-dyed cloth of incredible strength and toughness. And this amazing shrink-resisting feature costs you nothing, due to the longer wearing qualities of Crown-Shrunk Denim.

Crown-Shrunk Denim is produced by a secret process. No other overall maker can buy it. The dealer who sells you Crown-Shrunk Overalls is offering you an exclusive product, the best that money can buy.

All you need do is try one pair of Crown-Shrunk Overalls. Not only are they made of Crown-Shrunk Denim—they are the most comfortable, durable, economical and best appearing overalls ever produced... more pockets and more special features than any other overall. OFFICIAL BASKETBALL GOALS

IMPROVED BRACELESS

This braceless goal is preferred for all official games Designed to withstand the most severe use without vibration.

Built much heavier than ordinary goals. The rim is ⅝ inch round steel held securely by malleable iron bracket, constructed to hold the rim slightly above the plane of bracket so there will be no deflection of the ball in play. The large bearing surface of the bracket is fastened by four points of contact so arranged as to counter-balance all strain from any angle the ball hits the rim, and eliminates drooping or tipping of the goal.

Complete with best hand knotted seine twine nets, draw cords at bottom permits net to be used open or closed as desired.

Guaranteed against breakage.

NO.	lb Boxed	PAIR
103	25	$10.50

BRACELESS

Designed to eliminate side braces and maintain rigidness. Rim is of ½ inch round steel held in position by malleable iron casting, having a large bearing surface which assures stability when securely fastened in place.

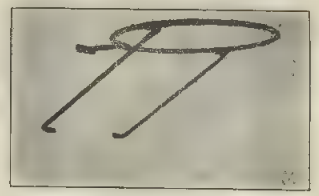
Braceless feature permits goal to be fastened in small space and eliminates the possibility of the ball deflecting at any angle.

Fitted with hand-knotted seine twine net, having draw cords at the bottom which allows nets to be used open or closed.

NO.	lb Boxed	PAIR
101	17½	$9.50

All goals are packed in pairs in strong corrugated paper boxes, ready for shipment.

BRACE RIM



This brace basket ball goal is made to supply the demand for an official goal with side braces at a minimum cost. Regulation in all respects. The rim of the goal is ⅝ inch and side braces of ½ inch round steel.

Braces are fastened by special hinged device.

The goals are complete with hand knotted seine twine nets carefully tied to rim so as not to slip. Draw string in bottom which allows nets to be used open or closed.

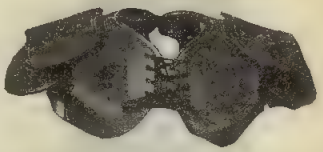
3H	$3.50

SHOULDER PADS



The new D&M Shoulder Pad is made of molded fibre covered with felt and padded underneath with foam rubber. It has molded fibre shoulder caps, padded with rubber and a stiffened fibre protection over shoulder. Covered with heavy duck and has leather-bound edges. Elastic straps around chest to hold pad in place. The foam rubber will not absorb the perspiration and retains the same weight under all playing conditions.

NO.	EACH
28	$11.00

The Lever-Action Shoulder Pad. A new idea in shoulder pad construction. It gives perfect freedom of arms, is made of fine white felt, covered with sole leather. Laced adjustable front and back.

AIR RIFLES

CROSMAN—PNEUMATIC .22

The Crosman Pneumatic rifle for target and small game shooting using Crosman Pells. Has heavy walnut stock pistol grip, steel butt plate.

Explosive Force—Compressed air under tremendous pressure.

Barrel—Blued steel, round and accurately rifled for .22 caliber pells.

Action—Popular sliding bolt type, rugged and fast.

Sights—Government type blade front sight and adjustable rear peep.

Pells—Not round but spool shaped with rounded nose; ungreased.

Cleaning—No cleaning necessary with the Crosman.

Take Down—When desired entire stock may be removed.

The Crosman Pneumatic .22 is capable of precision shooting up to 50 yards.

No Powder to Corrode or pit the barrel, no noise, no smoke and no troublesome cleaning. Maintains accuracy indefinitely.

Velocity may be varied at will for either target or field work.

Trigger Pull is light and smooth without take-up or creep.

TARGETS

CROSMAN

The Automatic Dodo

The Automatic Dodo Target provides all the sport of the shooting gallery. Requires no manipulation, and does away with the danger that accompanies shooting at tin cans, glass bottles, etc.

Shoot down each Dodo and then hit the center target. All three figures spring automatically back into position. It puts new sport into target shooting. Size over all 4x10 in. Made from heavily japanned armor plate and can be easily carried about. Hang it on the wall or any convenient tree or post.

SHOT GUNS
DOUBLE BARREL, HAMMER
—ESSEX—

Case hardened locks and frame. Water table breech, low circular hammers; double bolt, rebounding bar locks; top lever action. Interchangeable lock parts machine made.

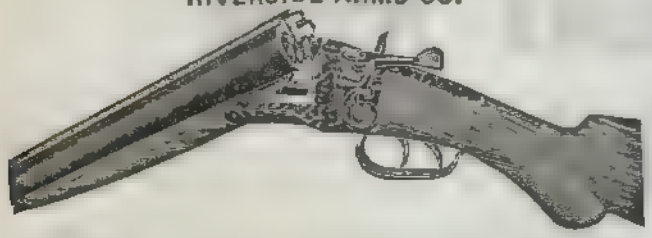
Barrels—Genuine armor steel, blued, matted extension rib. Can furnish cylinder, modified or full choke bored.

Stock—Polished hardwood; rubber butt plate.

With Plain Extractor.	Each
No. 112E—12 gauge, 26, 28, 30 or 32 in. barrels; wt 7½ to 8 lbs.	$40 50
No. 116E—16 gauge, 26, 28 or 30 in. barrels; wt 7½ to 8 lbs.	40 50
No. 120E—20 gauge, 26 or 28 in. barrels; wt 6¼ to 6¾ lbs.	40 50

One in cardboard box; ten in wood case.

RIVERSIDE ARMS CO.



Action—Top lever and bolt in one piece; low circular hammers; rebounding locks; coil springs.

Barrels—Blued; tested with Nitro powder; matted extension rib; barrel and lug in one piece, forged from a solid bar of steel; brazed fore-end lug. Right modified, left full choke.

Frame—Flat; case-hardened.

Stock—Checkered half pistol grip, and snap fore-end; rubber butt plate; length 14 inches; drop 2 to 3¼ inches.

With Plain Extractor.	Each
No. 215-12—12 gauge, 26, 28, 30 or 32 in. barrels; wt 7¾ lbs.	$43 50
No. 215-16—16 gauge, 26,28 or 30 in. barrels; wt each 7 lbs.	43 50

One in cardboard box; ten in wood case

L. C. SMITH

The locking bolt is cylindrical in shape and tapered to allow for wear and self adjusting, making it impossible to shoot loose. Guaranteed to shoot any nitro powder loads. Standard length of stock 14 to 14¼ inches, standard drops 2½ to 3¼ inches. Hammer guns are not made special to order.

Case hardened frame; low circular hammers; rebounding locks.

Barrels—Royal steel, carefully selected, toughened and hardened, matted extension rib. Can furnish cylinder, modified or full choke bored.

Stock—English walnut; checkered pistol grip; rubber butt plate.

With Plain Extractor.	Each
No. 12SHB—12 gauge, 26, 28, 30 or 32 in. barrels; wt 7½ to 8¼ lbs.	$95 70
No. 16SHB—16 gauge, 26, 28 or 30 in. barrels; wt 7 to 7½ lbs.	95 70

One in cardboard box; ten in wood case

SHOT GUNS
DOUBLE BARREL, HAMMERLESS
—ESSEX—

With Automatic Safety.

Every part is drop forged, highly polished and case hardened.

The cocking mechanism is simple and strong and requires no more exertion than is used to open an ordinary hammer gun, and may be closed with the hammer cocked or otherwise, if desired.

Frame and action parts drop forged from best refined steel; locked by heavy round barrel lug-bolt and cross-bit on extension rib, which makes it impossible to shoot loose.

Barrels—Genuine armor blued steel, Lyman ivory front sight, matted extension rib. Can furnish cylinder, modified or full choke bored.

Stock—Full capped checkered pistol grip; Deeley and edge fore-end neatly checkered, fancy rubber butt plate.

Weights—12 gauge, 7¼ to 8 lbs.; 16 gauge, 7 to 7¾ lbs.; 20 gauge, 6¼ to 6¾ lbs.

With Plain Extractor.	Each
No. 0112E—12 gauge, 26, 28, 30 or 32 in. barrels **No. 0116E**—16 gauge, 26, 28 or 30 in. barrels **No. 0120E**—20 gauge, 26 or 28 in. barrels **No. 0410E**—410 gauge, 26 in. barrel only	$47 10

One in cardboard box; ten in wood case.

DAN'L BOONE

Breech—Reinforced; consists of a sleeve fitted over breech of barrels, full length of shells increasing its strength. Barrel lug and breech are all one forging which assures a perfect fit of barrel preventing gun ever shooting loose.

Action—Top lever extending through slot of rib extension and locking on both sides of frame; spiral main spring, automatic safety.

Barrels—Decarbonized steel, matted rib, fully tested with extra heavy proof loads. Can be furnished in cylinder, modified or full choke bored.

Frame—Case hardened.

Stock—High grade oil finished walnut with half pistol grip and plain fore-end. Rubber butt plate. 2¼ to 3 inch drop. Factory will not deviate from this drop.

Weights—12 gauge, 7¼ to 7¾ lbs; 16 gauge, 6½ to 7¼ lbs; 20 gauge, 6 to 6½ lbs.

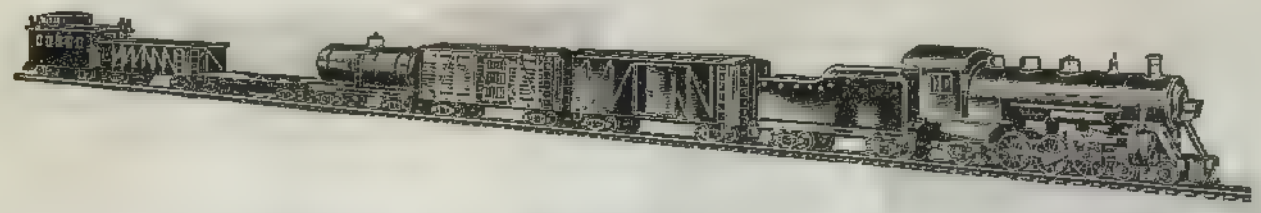
OUTDOOR STEEL TRAINS

"BUDDY L"—NON-ELECTRICAL, NON-MECHANICAL—STRONG ENOUGH TO RIDE UPON



Total Length 15 Ft.

Note These Sizes:	Length, ins	Width, ins	Height, ins
Engine with Tender	44	6½	9½
Box Car	22	6½	7¾
Stock Car	22	6¾	8¼
Tank Car	19½	6¼	9
Flat Car side drop ballast	22	6½	7¾
Coal Car drop bottom	22	6½	5½
Caboose	20	6¼	2½

The Buddy "L" Outdoor Railroad is **the most remarkable plaything ever conceived. Imposing in size; made entirely of steel; strong enough for a child to ride upon.** All proportions are true to scale and as a consequence the train is startingly realistic in appearance. May be pushed, pulled and scooted on its track or on the sidewalk.

The heavy steel rails are made in 4 foot interlocking sections, integral with steel ties, and when laid down in the yard, either straight or in curves provides a solid, substantial track 24 sections curved track required to make a complete circle 3 feet in diameter and 96 feet in circumference.

The cars when bumped together couple automatically like a real train. The doors open and close, tanks may be filled and drained, cars loaded. Every thrill of actual railroading is here.

The locomotive and tender are packed as one unit, while cars may be added as wanted. Baked-on enamel finish in proper colors.

Per Outfit

No. 999—Train as illustrated; Locomotive and Tender, Box Car, Tank Car, Caboose and 20 ft. of staight track; wt per outfit 110 lbs $108 75

Builders Transit

No. 6362C

This Builders Transit has been designed to meet the demand for a low-priced and reliable instrument that can be used by builders as either a Transit or a Level.

Specifications of No. 6362C

Horizontal Circle—Diameter, 5 inches; marked with two rows of figures reading 0 to 360 both ways; graduated on sterling silver; vernier reading to 1 minute.

Telescope—Length, 8¼ inches; magnifying power, 16 to 18 diameters; objective, 1 inch; erecting eye-piece; fixed stadia hairs.

Telescope Level—Length, 4¾ inches; 60 seconds sensibility; $\frac{1}{16}$ inch division.

Compass—Numbered in quadrants; graduated to half-degrees; silvered; magnetic needle, 3⅝ inches.

Centers—Accurate and substantial; range of shifting center, ½ inch.

Leveling Base—Large diameter; four leveling screws, phosphor bronze.

Finish—Dark; very durable; not affected by spirits, acids or atmospheric changes.

Weight—Instrument, about 8 lbs.; tripod, about 7¾ lbs.

Accessories—Solid-leg Tripod No. 6492, sun-shade, adjusting pins, plumb bob, magnifying glass, mahogany box with lock, key and strap.

No. 6362C. Builders Transit; complete. Each.....**$184.00**

Light Reconnoissance Transit

No. 6354C

Specifications

Horizontal Circle—Diameter, 5 inches to edge of graduation; marked with two rows of figures, reading 0 to 360 both ways; figures inclined in the direction they are to be read; circle and vernier graduated on sterling silver, the lines being very legible and uniform in thickness.

Vernier—One, reading to 1 minute.

Plate Levels—Two; length, 2 inches; 90 seconds sensibility; $\frac{1}{16}$ inch division.

Telescope—Length, 8¼ inches; magnifying power, 16 to 18 diameters; fixed stadia hairs.

Object Glass—Diameter, 1 inch, used to full value.

Eye-Piece—Erecting; improved style, giving a large, flat field.

Level—Length, 4¾ inches; 60 seconds sensibility; $\frac{1}{16}$ inch division.

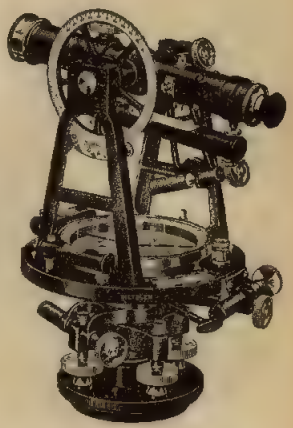
Vertical Circle—Diameter, 3½ inches; vernier to 2 minutes; graduated on composition metal

Compass—Numbered in quadrants; graduated to half-degrees; silvered; magnetic needle, 3⅝ inches; variation plate cardinal points shift with the graduated circle.

Centers—Accurate and substantial; of a design in harmony with the general construction and quality of the instrument.

Shifting Center—Range, ½ inch.

Leveling Base—Large diameter; four leveling screws, phosphor bronze with accurately cut threads and ball and socket cups.



No. 6354C

Tangent Screws—Phosphor bronze; improved form, with opposing spiral spring; accessible and well protected.

Finish—Dark; very durable; not affected by spirits, acids or atmospheric changes.

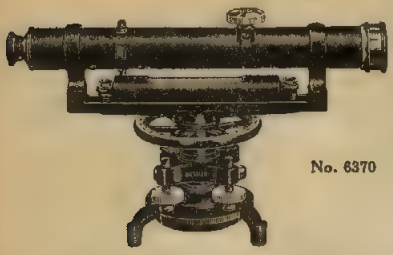
Weight—Instrument, about 9 lbs., 3 oz.; tripod, about 8¾ lbs.

Accessories—Extension Tripod No. 6497, sun shade, adjusting pins, plumb bob, magnifying glass, mahogany box with lock, key and strap.

No. 6354C. With Split Leg Tripod. Complete, each **$220.00**
With Extension Tripod. Complete, each. **225.00**

Surveying Instruments

Builders Dumpy Level No. 6370



No. 6370

This Instrument, while low in price, is exceptionally well made and very reliable. It meets all the requirements of the Builder, Contractor, Architect and Millwright for reading angles; for laying out buildings; for leveling walls, foundations, floors, shafting, and bases of machinery, and for grading streets, curbing, ditches and draining. It is simple to operate, does not get out of adjustment easily, and requires less careful handling than a Y Level.

The telescope of a Dumpy Level cannot be reversed as it is permanently fixed to the collars of the cross bar; on account of this construction the method of adjustment is different than that of a Y Level, the telescope of which is reversible in the wyes.

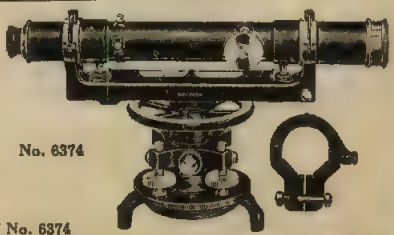
Specifications of No. 6370

Telescope—Length, 12 inches; magnifying power, 18 to 20 diameters; objective, 1⅛ inches, used to full value erecting eye-piece.
Cross Bar Length, 8 inches; bell metal; designed to increase stability and decrease weight.
Level to Cross Bar—Length, 5 inches; 60 seconds sensibility; $\frac{1}{10}$ inch division.
Horizontal Circle—Diameter, 3¼ inches; silvered; graduated every degree, numbered every 10 degrees, in quadrants; vernier reading to 5 minutes.
Center Bell metal; center and cross bar cast in one piece. **Shifting Center**—Range, $\frac{7}{16}$ inch.
Leveling Base—Large diameter; with Trivet, which with the trivet points furnished, is used for setting Level where use of tripod is difficult; four leveling screws, phosphor bronze, with accurately cut threads and ball and socket cups.
Finish Dark; very durable, not affected by spirits, acids or atmospheric changes.
Weight—Instrument, about 5 lbs.; tripod, about 6½ lbs.
Accessories Solid-leg Tripod No. 6491, sun shade, plumb bob, adjusting pins, box made of ash, natural finish, with lock, key and strap.
No. 6370. Builders Dumpy Level; complete. Price, each **$55.00**

Builders' Y Levels—No. 6374

These Instruments, of excellent quality and accurate workmanship, are adapted for reading angles; for laying out buildings; for leveling walls, foundations, floors, streets, curbing and bases of machinery, shafting, etc.; and for ditching and draining.

They are very simple to operate, easy to adjust, and of great value to Builders, Contractors, Architects, Landscape Gardners, Etc.



No. 6374

Specifications of No. 6374

Telescope—Length, 12 inches; magnifying power, 18 to 20 diameters; objective, 1⅛ inches, used to full value; erecting eye-piece.
Telescope Level – Length, 5 inches; 60 seconds sensibility; $\frac{1}{10}$ inch division.
Cross Bar—Length, 7½ inches; bell metal; simple wye adjustment and effective wye locking device.
Horizontal Circle—Diameter, 3¼ inches; silvered; graduated every degree, numbered every 10 degrees, in quadrants; vernier reading to 5 minutes.
Center Bell metal; center, cross bar and wyes cast in one piece. **Shifting Center**—Range, $\frac{7}{16}$ inch.
Leveling Base—Large diameter; with Trivet, which with the trivet points furnished, is used for setting Level where use of tripod is difficult; four leveling screws, phosphor bronze, with accurately cut threads and ball and socket cups.
Finish—Dark; very durable; not affected by spirits, acids or atmospheric changes.
Weight—Instrument, about 5 lbs., 15 oz.; tripod, about 6½ lbs.
Accessories—Solid-leg Tripod No. 6491, sunshade, plumb bob, adjusting pins, box made of ash, natural finish, with lock, key and strap.
No. 6374. Builders Y Level; complete. Price, each **$75.00**
No. 6376. Builders Y Level like No. 6374, but with Tangent Screw; complete. Price, each **75.00**

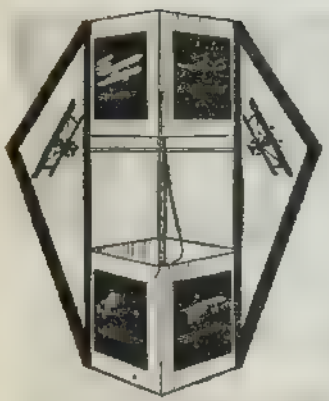
KITE ASSORTMENTS

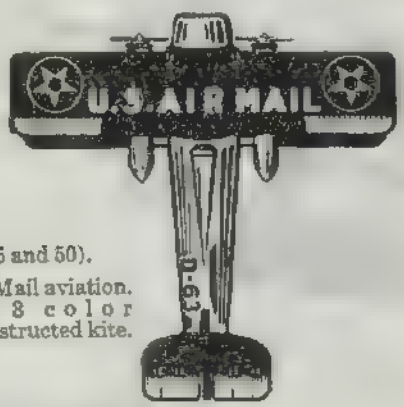
DOLLY, FOLDING TYPE

Extra tough paper, printed in bright red, blue and orange colors.



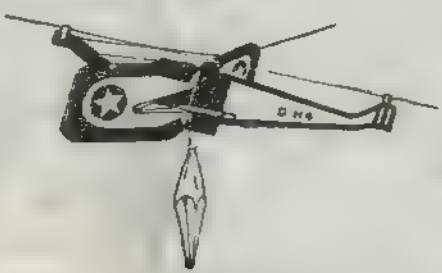
(No. 1). Aviation Box Kite. Heavy Nibroc craft sails with aviation story on each sail.

(Nos. 40, 30 and 10).



(Nos. 25 and 50).

U. S. Air Mail aviation. A beautiful 8 color strongly constructed kite.



(No. 2). Not a kite, but a remarkable aeronautical toy. Ascends kite string while kite is being flown, collapses, drops parachute and then returns to the hand.

(No. 101) Wonder trick kite. Constructed of heavy paper, folded, has no frame work. Flies under any condition of wind.

No. 150 ASSORTMENT

Consists of 96 kites and 12 mail parachutes as follow:

½ Doz—No. 1, size 30x10x30 ins; retails at 50c each	$ 3 00
1 Doz—No. 25, size 28x28 ins; retails at 10c each	1 20
1 Doz—No. 50, size 37x37 ins; retails at 25c each	3 00
1 Doz—No. 101, size 30x20 ins; retails at 10c each	1 20
3 Doz—No. 40, size 24x24 ins; retails at 5c each	1 80
1 Doz—No. 10, size 36x36 ins; retails at 10c each	1 20
2 Doz—No. 3, air mail parachutes, retails 2 for 5c	60
1 Doz—No. 2, parachute carrier, retails at 10c each	1 20
Total Retail Value	$13 20

Per Ass't

No. 150—Ass't complete as described $25 50

One ass't in carton; wt per ass't 16 lbs.

No. 75 ASSORTMENT

Assortment consists of 72 kites assorted as follow:

1 Doz—No. 50, size 37x37 ins; retails at 25c each	$ 3 00
2 Doz—No. 10, size 36x36 ins; retails at 10c each	2 40
3 Doz—No. 30, size 24x24 ins; retails at 5c each (Same as No. 40, except without string or bowing)	1 80
Total Retail Value	$ 7 20

Per Ass't

No. 75—Ass't complete as described $12 75

One ass't in carton; wt per ass't 10 lbs.

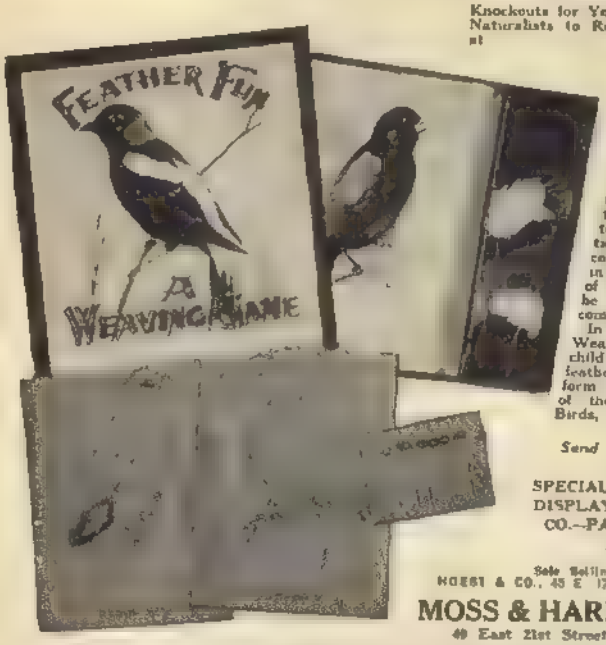
Millions of Children and Millions of Parents are Lovers of Beautiful Birds—Reach their Hearts with

FEATHER FUN CUT OUTS

Feather Fun Weaving Game

Knockouts for Young Naturalists to Retail at **$1.00**

Cash in on the Love of Beautiful Birds



In "Feather Cut Outs" the child cuts out the Bird in sections according to simple directions. Then he colors these parts in the true colors of the bird. Next he assembles the complete bird.

In "Feather Fun Weaving Game" the child weaves colored feathers into the true form of beautiful birds of the Tropics, Song Birds, etc.

DOUBLE BARREL SHOT GUNS

L. C. SMITH. HAMMERLESS

FIELD GRADE

12, 16 and 20 Gauge

Armor steel barrels; both barrels full choke; plain English walnut stock, checkered and well finished; full pistol grip stock only.

12 Gauge. Plain Extractor. 30 inch barrels. Wt. each, 6¼ to 8¼ lbs. .....Each $39 89

16 Gauge. Plain Extractor. 28 inch barrels. Wt. each, 6¼ to 7 lbs. .....Each $39 89

20 Gauge. Plain Extractor. 28 inch barrels. Wt. each, 5¾ to 6½ lbs. .....Each $39 89

LONG RANGE WILD FOWL. FIELD GRADE

With the development of modern high velocity powder for shot guns, a demand has been created for a gun to handle this heavy load, and equal or better the performance of 8 and 10-bores. The 8-bore has been made obsolete through legislation, and the 10-bore is fast losing its popularity. With the limit of 1¼ ounces of shot, it is not the powerful weapon that has for a decade been used on water fowl, and because of its excessive weight it has grown less popular. The problem for the gun manufacturer was the production of a 12-bore shot gun to handle progressive burning powders, heavy charges, and 1⅛ ounces of shot, to replace the 10-gauge and give at the same time equal results. The Smith Long Range Wild Fowl Gun is built from the regular model, and is designed to handle heavy charges of modern propellant powders, giving an increased effective range of 15 to 25 yards, and extreme velocity and penetration with uniform patterns. Carried in Field grade, 30 in. or 32 inch barrels; without automatic ejector, two triggers; 3 inch chamber. The killing range of this gun is from 70 to 85 yards, and the gun is capable of killing at even longer distances

12 Gauge. Plain Extractor. Wt.ea.8 to 8½ lbs..Each $50 69

DOUBLE BARREL SHOT GUNS

PARKER. HAMMERLESS

V. H. GRADE

12, 16 and 20 Gauge

Vulcan steel barrels; American walnut stock; checkered on grip and forend; line engraving; pistol grip; hard rubber butt plate.

Duff Ball-Bearing Screw Jacks

No. 64

These Jacks are accurately made of highest grade materials. Screw is of crucible steel and revolves in a specially compounded bronze nut. Load is carried on a large ball-bearing, reducing friction on the head of jack 90 per cent. Jack is operated by a simple ratchet and bevel gear.

Nos. 60 and 68

No.	Capacity Tons	Height Inches	Raise Inches	Weight Pounds	Price Each

*These Jacks have cone bearings.

Duff Ball Bearing Journal Jacks

These jacks combine usually light weight with ample strength for their rated capacity. The built-in positive stop featured in these jacks prevents raising standard out of base. Most careful selection and treatment of materials have made it possible to make these jacks lighter in weight and of greater raise than any similar jacks on the market. Steel screw turning in hard bronze, together with full ball bearings, insures ease of operation. Particularly adaptable for low loads.

Wilmington Hydraulic Jacks

Plain Hydraulic Jacks

These jacks are intended for use where a firm foundation can be secured and for operating in close quarters where the space will not admit a jack with a larger base. The valves are so arranged that these jacks will operate in horizontal, inclined or vertical positions. To secure the best results a fluid consisting of one part grain alcohol and two parts water should be used, adding one ounce of sperm oil to amount necessary for one jack.

Capacity, tons	Price Each	Rise, inches	Height Closed, inches	Size of Base, in. square	Approx Weight, pounds.

Claw Hydraulic Jacks

The claw on this style jack, being very close to the ground, is intended for raising loads that are not of sufficient height to admit the head of jack. The valves are so arranged that jack will operate in horizontal, vertical or inclined position. When a jack is not in continual service, it is well to pump it up occasionally to keep the valves and leathers in working condition. In ordering repairs, give capacity of jack as well as shop number stamped on lever socket.

Capacity, tons	Price Each	Rise, inches	Height Closed, inches	Height of Claw, inches	Approx Weight, pounds

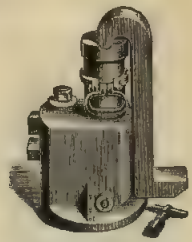
Broad Base and Low or Horizontal Hydraulic Jacks

Broad Base



Low or Horizontal

The increased area of base of the broad base jack gives it a solid foundation where steadiness is required. The 40, 50 and 60 ton jacks are all steel.

The horizontal or low jacks are so called because they will run out as far horizontally as vertically and are about five inches lower than regular style jacks of equal capacity

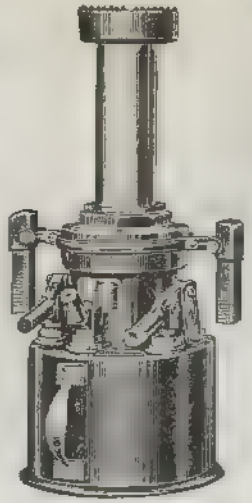
HYDRAULIC OIL POWER JACKS



BLACK HAWK
Extra Heavy Lift.

For locomotive work, heavy erecting and lifting vast tonnages. Equipped with high and low pressure pumps for speed and for lifting. Easily portable.

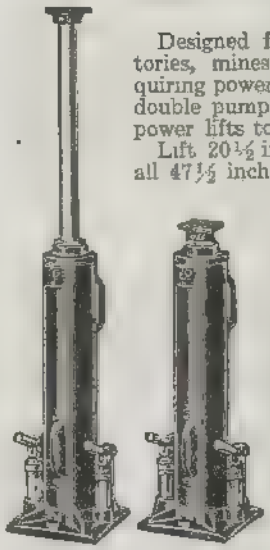
	Each
No. K-18—Capacity 75 tons; lift 9 ins; height 18 ins; height over all 27 ins	✣$675 00

Packed loose; wt each 260 lbs.

BLACK HAWK, Industrial Type.
Extra High Lift.

Designed for steam and electric railways, factories, mines, mills, oil fields and other uses requiring power and extreme height. Equipped with double pumps allowing speed lift to contact and power lifts to carry load.

Lift 20½ inches; height 27 inches; height over all 47½ inches.



Nos.	E27	F27
Cap, tons	18	30
Wt each, lbs	90	110
Each	✣$247 50	✣337 50

Packed loose.

SALAMANDERS

AKRON

Heavy gauge steel shell and ash pan; body provided with three vertical flanges that hold the shape under fire; fitted with heavy strong grate bars with large openings to allow plenty of draft for a quick fire. Adapted for small contractors for drying out walls and floors of new buildings.

	Each
No. 14—18 gauge shell; diam 14 ins; height shell 18 ins; height over all 26 ins; wt each 32 lbs.	✣$ 7 35
No. 17—16 gauge shell; diam 17 ins; height shell 24 ins; height over all 32 ins; wt each 49 lbs.	✣11 25

Crated; K. D.

✣Jacks—F. O. B. Wisconsin Factory Only.

✣Salamanders—F. O. B. Ohio Factory Only.

SAND DRYING STOVES

—BLUE GRASS—

Adopted by the United States Government for the Navy Yards and Panama after a competitive test.

The wet sand is shoveled into the skirting and as it dries, will, of itself, run through the holes in the ring at the bottom. The amount of sand the stove will dry depends upon how wet the sand is and upon the condition of the fire in the stove. The stove may be fed with hard or soft coal, coke or wood. Clear sand only can be used, as earth or clay bakes hard.

Complete Without External Grating.

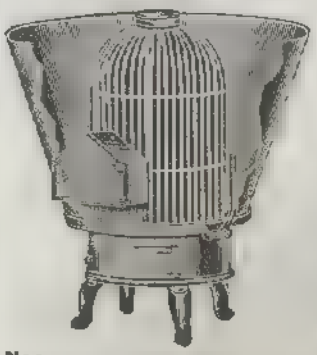
EXTERNAL GRATINGS FOR SAND DRYING STOVES



—BLUE GRASS—

Upright cast iron grating which surrounds the main body of the sand dryer, leaving an air space of about 1½ inches between grating and body of stove. This prevents the wet sand from coming in contact with the hot furnace. It permits it to dry much more rapidly and adds greatly to the life of the stove by preventing baking of sand and consequent burning of castings.

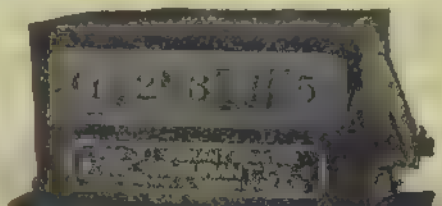
Durant Counters

Model A Counter

No 1 counts 10,000
Price..... $5 10
No. 2 counts 100 000
Price . $ 00
No. 3 counts 1,000,000
Price..... 7.20
No. 1, with Alarm
Price . 9.75
No. 2, with Alarm
Price . . 11 25

Durant Counting Machines have been on the market longer than any other device of the sort and are very favorably known throughout the world. The Model A is the original type of ratchet counter, and has recently been brought to a high point of perfection by the introduction of extra heavy all steel wearing parts with broad wearing surfaces. All chance of breakage, or of other wise getting out of order is thus eliminated and their count can be depended upon absolutely. The figures are large black characters on a pure white background and drawn well forward so as to be easily read at a considerable distance or angle. All working parts are cut from heavy cold rolled steel, while the springs are wound from the best piano wire.



Model B Counter

Size 4 inches x 2¼ inches x 1¾ inches Weight 1¾ lbs
Net Price.....$6.00 With lock $6 45

Our Model B is a new production, and because of its compactness and light weight, is adaptable to many places where a ratchet machine is not. The Counter is of the full geared positive type and counts on only a single spring, used to return the lever to position. It will allow of a constant speed of over 400 per minute without the slightest chance of inaccuracy, breakage or appreciable wear. Resetting is accomplished without the use of a key according to very simple directions printed on the inside of lid and with a little practice can be done almost instantly.

Other forms of this Model are made as follows.

Rotary, or winding lathe counter, net ...$7 00
Star Wheel counter, net 8 40
Lineal Measure counter, net . .. .14 00

All Durant Counters are guaranteed for two years to be free from imperfections in materials and construction.

[illegible] Supplies. Your correspondence solicited.

"INITIATIVE" REVOLUTION COUNTERS

THE PERFECT REVOLUTION COUNTER

Registers from 0 to 10,000 in either direction, and then repeats. Can easily be set to zero, and count is read like an ordinary number, all digits being lined up in a row of figures. This feature is not found in any other revolution counter and offers many advantages over the puzzling way of reading with a pointer and dial.

The cut is exact size of counter—it is packed in a neat case and can easily be carried in pocket.

INITIATIVE Revolution Counters are compact in size—4½ inches over all—simple in construction, and will not get out of order easily. There are no delicate or flimsy parts. The instrument is made to wear and meets all requirements. This is very popular and we have received many second and third orders.

Price, each.....$4.75

Postage, 5 cents.

[illegible] been giving them a "square deal."

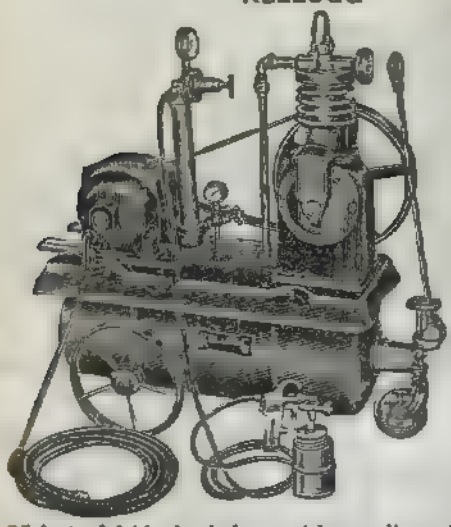
PAINT SPRAYING EQUIPMENT

KELLOGG



A complete spray painting outfit for use where a standard sized equipment is necessary, combined with the added factor of portability. Equipped with 16 gallon tank with automatic unloader to govern pressure, mounted on 3 wheel carriage. The air transformer, filter and pressure regulator is connected directly to tank outlet valve, forming an integral part of compressor equipment. Complete with pistol grip spray gun, 25 feet of ¼ inch air hose with couplings, 20 feet of extension cord with separable attachment plug and two spray heads for either round or spray work. Operates from standard lamp socket. Designed for refinishing used cars, furniture, interior decorating and work that can be done with a suction type gun.

1 H. P., 60 Cycle, A. C. Motor, for 110 or 220 Volt.

Each

No. A-3—Wt each 500 lbs..... +$840 00

Crated.

PAINT SPRAY HOSE

VITALIC

Flexible metallic lining covered with thick rubber this in turn is covered and protected by an outside cover of heavy braided cotton.

In 25 Foot Cut Lengths.

AUTOMATIC AIR STATIONS

ECO

No. A-20

Bright red enameled cast iron base and upright. Equipped with automatic tire inflator with bell ringing signal, air cleaner inclosed in base, and automatic hose reel with 25 feet of high grade red rubber air hose. Automatic shut off valve on hose reel turns off air when not in use. Glass enclosed dial calibrated from 20 to 70 pound pressure. The motorist sets indicator to the pressure desired and applies chuck to tire, when tire has been inflated to pressure indicated, bell stops ringing and the air is automatically shut off. Furnished with special anchor bolts and plans for mounting on concrete base.

No. A-19

Each

No. A-20—With illuminated opal glass globe on top. Height over all 5 ft, 5 ins; ship wt each 250 lbs. $452 00

No. A-19—As illustrated. Height over all 4 ft; ship wt each 240 lbs..... 429 00

Crated.

Red enameled cast iron upright and base. Equipped with automatic bell ringing tire inflator easily operated by turning indicator to desired pressure, removing hose and applying chuck to valve, when desired pressure is reached the bell stops ringing. The air is turned on when hose is taken down and shut off when hose is returned to hook. Glass enclosed dial calibrated from 20 to 70 pound pressure. Complete with 25 feet of high grade red rubber air hose and instructions for installing.

Each

No. A-26—Height over all 5 ft..... $289 05

AIR BRUSHES

SPEEDY

Consists of adjustable nozzle with spring tension which holds nozzle firmly in position, adjusting nut for regulating spray pressure, self-contained automatic pressure regulator, ebonized wood handle with pistol grip trigger control which permits continuous production without hand strain, 6 feet of high-grade rubber hose with air connection, two material nozzles, one for small and one for large sprays and standard Mason Jar container which permits utilizing containers for storage of a number of colors or materials.

Operates on air pressures from 50 to 150 pounds, spreads paints, lacquers, varnishes, auto dressings, rust-proofings and practically all forms of protective and finishing coatings, also used for spraying kerosene and gasoline for washing motors and greasy parts.

Each

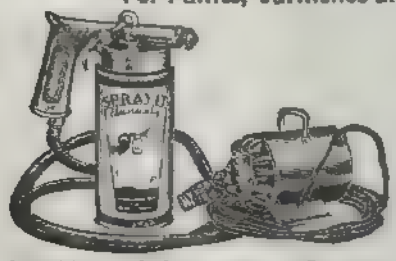
No. A-JKS—Wt each 3 lbs..... $28 05

One in carton.

SPRAY GUNS

SPRAYIT, AGITATOR TYPE, ELECTRIC

For Paints, Varnishes and Lacquers.



Aluminum motor housing and checkered pistol grip handle with control trigger.

Consists of rotary motor compressor unit protected by fine mesh wire screen, 12 feet of rubber insulated cord with push through switch and separable attachment plug, adjustable nozzle for coarse or fine spray, 2 containers, one glass and one metal, 8 feet of red rubber hose with brass connection and instructions for operating.

Operates from standard lamp socket or receptacle. Light in weight, portable by handle on motor housing. Constant fluid agitation, a stream of air is forced through the fluid and keeps it churning, thoroughly mixed and broken up.

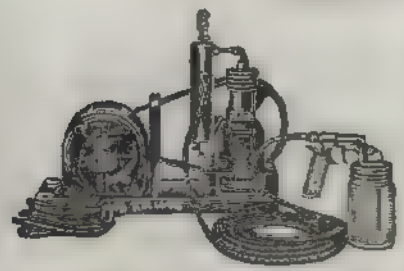
Designed for and used by paint shops and industries where moderate size surfaces are to be painted, lacquered or varnished. Sprays smooth or crackle finish on wood or metal. Each

No. A-83—Wt each 9 lbs..... $99 00

One in carton.

PAINT SPRAYING EQUIPMENT

KELLOGG



A complete spray painting outfit mounted on easy rolling castors. Consists of ¼ horse power motor, air compressor, spray gun with pistol grip control, 15 feet of ¼ inch air hose with fittings and extension cord with separable attachment plug. Operates from standard lamp socket. Designed for painting fibre furniture, radiators, machinery, lighting fixtures, toys, etc. Sprays practically any paint material, spraying and brushing lacquers, oil paints, cold water paints, metallic paints such as bronze, etc.

110 Volts, 60 Cycle, Operates Only on Alternating Current. Each

No. A-UA—Wt each 46 lbs..... +$163 35

EDISON MAZDA LAMPS L

The trademark MAZDA on an incandescent lamp signifies that the manufacturer of the lamp has had the advantage of the most recent findings of the General Electric Company

A Mazda lamp is always the product of the latest and best methods of incandescent lamp making. The filaments of all Mazda lamps are at present made of tungsten. All of these tend to make Mazda lamps the best.

Edison Mazda "C" lamps are gas filled and are pear-shaped. They come under the classification for general use and are used everywhere, especially in the home and store. Filaments are not easily broken. The average lamp life is from 700 to 1000 hours although many of them burn much longer.

Any lamp requiring a change in construction from the standard, such as shape or color of bulb, tipped bulb, number of loops in filament, number of an hore watage, voltage amperes etc will take a special price, which may be obtained upon application

HOW TO ORDER EDISON MAZDA LAMPS

All orders should specify whether Mazda B, Mazda C, Daylight Mazda or White Mazda lamps are desired and should give the following information:

1. QUANTITY—Number of lamps desired. Purchasers will avoid delays and get best discount by ordering package quantities.
2. SIZE OF LAMPS—Specify wattage of multiple lamps and lumens of series lamps.
3. VOLTAGE—For multiple lamps.
   AMPERES—For series lamps.
4. BULB—S14, A21, PS25, etc. The letter in the bulb designation indicates its shape and the figure its diameter in eighths of an inch. Thus an S14 bulb is straight-sided and is 14/8 or 1¾ inches in diameter. A indicates the New Inside Frosted, P and PS a pear-shaped bulb.
5. FINISH OF BULB—Clear, inside frosted, bowl enameled, or all frosted.
6. BASE—Medium screw or mogul screw.
7. SERVICE—For example: Projection, Flood Lighting, Locomotive Headlight, etc.

* Lamps can be supplied in any voltage.
‡ Colored covers only red, yellow, green, blue and amber-orange.

Tennis Equipment and Croquet Sets

Wilson Tennis Balls

Pluglers—two piece—ballarrowed balls with a fine covering of wear-resisting Australian wool felt.

They are non-perishable because they are packed in metal pressure tubes which keep them fresh and lively for years. The tubes are so made that they efficiently fulfil the air within the ball preventing loss by seepage. The tube is a high level article—the ball giving an extra amount of service.

Officially approved by U. S. L. T. A.

SAFE

Approved by Underwriters' Laboratories

WHEN a little girl sees an Empire Miniature Electric Range, her mind is so filled with the wonderful things she can do with it that safety is not even considered.

But the parents, who do the buying, are more careful.

And the fact that Empire Miniature Electric Ranges are approved by Underwriters' Laboratories is one reason why they have become standard with most dealers.

Not only because sales are made easier—but because dealers want to provide this protection for their customers.

However important safety may be — this is only one of the many Empire advantages.

The line includes six types and sizes priced from $2.50 to $20.00.

They are attractive in appearance—with colored panels and switches — nickel plated trim—black japanned bodies—oven thermometers—and aluminum cooking utensils.

And the Metal Ware Corporation's policy of liberal discounts makes every sale highly profitable.

Send the coupon for prices and complete details on the three famous Empire lines of Miniature Electric Ranges—Electric Steam Engines—and accessory toys.

F

F. & N. LAWN MOWERS

FENDEN QUALITY

The F. & N. line of Lawn Mowers is the perfected result of more than fifty years' experience of experts in this class of construction, and all of them are guaranteed to give the purchaser absolute satisfaction. All material used is the best for the purpose. Every part is machined and accurately fitted.

THE CUTTER BAR ADJUSTMENT is by means of two screws, both on top of the mower in plain view, and convenient to the operator.

THE CUTTER BAR—The cast bed of the cutter bar is accurately ground and the steel cutting knife attached with rivets headed up with a new spinning device, drawing the blade closer to the bar yet never cracks the casting.

THE REELS OR REVOLVING CUTTERS are of the highest grade crucible tool steel, having concave steel edges which maintain a perfect cutting edge as the machine is sharpened.

GRINDING BLADES—All blades are of razor steel, tempered in oil, and ground under running water to preserve the temper, and are self-sharpening.

REEL SPIDERS are of malleable iron, firmly attached to shaft by riveting through each hub and the shaft.

BALL CASES are of steel, case-hardened, ground, polished, and when set up are packed in vaseline.

BALL-BEARING CONES are all case-hardened or "carbonized," making the surface of the cone so hard that it will not show wear in the life of the machine.

PINIONS have deep cut teeth, engaging firmly and strongly in the gearing of the wheel, giving long life and durability.

PAWL—The pawl is case-hardened with a lock lip that makes it impossible to slip.

ROLLER BRACKET AND ROLLER — The roller bracket is of malleable iron built with a gudgeon entering a hole in the polished roller, eliminating split rollers and noise.

AUTOMATIC BALL BEARING ADJUSTMENT—The reel bearings on all our Ball Bearing Mowers are equipped with a new patented Automatic Adjustment. It consists of a case-hardened steel spring working against a contracting metallic sleeve, around the shaft and inside the cone. At the instant all looseness is taken up by the spring, the sleeve grips the shaft, thus preventing any further pressure than is required for the most delicate adjustment, permitting the reel to revolve with perfect freedom. Throughout the life of the mower this adjustment continues to accommodate itself to conditions, keeping the bearings always adjusted to a nicety, without the slightest attention from the operator.

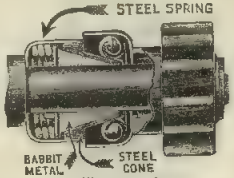

Illustration of Automatic Ball Bearing Adjustment. No Screws to Lose Out.

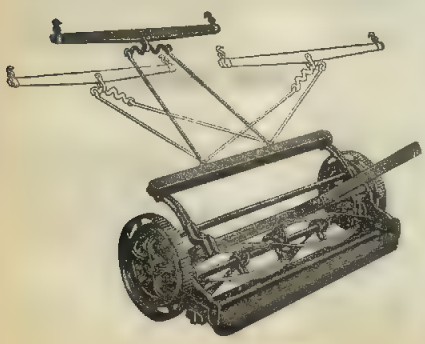
Illustration Showing Cutter Bar Adjustment

F. & N. HORSE POWER LAWN MOWERS

CRESTLAWN PONY—Ball Bearing



The Horse Attachment

Each mower is equipped with our patented horse attachment. This can be adjusted quickly and in such a manner that in operation the mower is held to the ground and the disagreeable "tipping up" of the rear of the machine is impossible with the Crestlawn.

Our attachment affords another great advantage, which is shown in the illustration—that of the horse walking in the middle front or to either side of the mower, and yet maintaining at all times an equal and central draft.

Drive wheels, 11 inches high. Width of cut, 30 inches. Diameter of reel, 6 inches. Reel axle, ¾-inch. Double riveted malleable reel braces.

The reel is made with four revolving knives of finest crucible steel, oil tempered, and self-sharpening. It revolves in adjustable bronze bearings.

Beautifully finished in light green and gold bronzes with red decorations.

Sold on an absolute guaranty to give satisfaction.

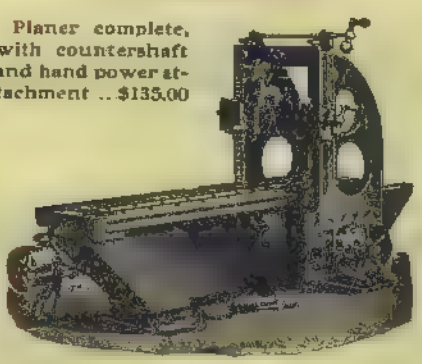
Federal Bench Planer

Planer complete, with countershaft and hand power attachment .. $135.00



No originality is claimed for this machine. The design is but the embodiment of the best practice of to-day.

In offering this planer we think we have a tool that will meet with the approval of mechanics. This planer can be used in many shops, both large and small, to hand e certa n work expedit ously. The bar is very heavy and strong, the head has an automatic cross feed in either direction, and a graduated swivel which can be set at any angle and locked in the usual manner. Every planer is set up and run before leaving the shop and all parts are e asily inspected. All the gears are cut, the pinions and rack are of steel, all the flat wearing surfaces are scraped. The table is gibbed down to prevent lifting, and has three standard T-slots cut from the solid and four rows of ⅜-inch holes, jig drilled and reamed. Full width of table, 9 inches; distance between pockets, 30 inches; extreme length, 36 inches. Driven by a steel rack 36 inches long, 1¼ inches face. Bull gear, 7 inches diameter by 1¼ inches face.

Distance between housings, 10⅝ inches. Extreme length of bed 44⅜ inches by 8 inches deep. Total height of planer, 29¼ inches. Diameter of driving pulleys, 8 inches; diameter of reverse pulleys, 5¾ inches. Countershaft has tight and loose pulleys 5 inches in diameter by 2-inch face. The countershaft should run 635 revolutions per minute. Ratio of driving belt speed to cutting speed 37 to 1.

Planer complete, with Countershaft and Hand-Power Attachment .. ..net $135.00

Federal Planer Chuck

Jaws, 6 inches long; opening, 4 inches. Swivel graduated base. All screws are made of steel.

Net .. $13.50

Federal Planer Centers

These are substantially and accurately constructed. Swing, 6 inches. Graduated tilting head, indexed, dividing circles into 24 divisions.

Net .. $16.20

BENCH.—A stand or bench can be furnished for Federal Planer at $19.80 net

EUREKA SCOTCH GAUGE GLASSES. The kind we sell are made at Peterhead, Scotland, and are genuine Scotch Gauge Glasses. Are you sure the Scotch Gauge Glasses you are now using are made in Scotland? (See index in front of book.)

MONTGOMERY & CO., 105 & 107 LIBERTY STREET, NEW YORK CITY
(Consult Index). Mention "Tool Monger" No. 30 when ordering from this book.

Tool Wrench

No. 66

This Tool Wrench, made of steel, is constructed so as to *hold* about anything that can be put into it in the line of taps, reamers, drills, etc. Takes in round, square, or oval. Tool is about 3 inches long, and takes up to ⅜ inch. Screw hardened cast steel. Body case hardened.

Price, each..... $.38

Drill and Reamer Holder

This little tool is exactly what one is "always looking for" to hold small stock or tools in the lathe or drill press. It is made in three sizes. Screw hardened cast steel. Body case hardened.

		Price
No 67	Diam handle ¼ inch, length 3¾ inches, holds ⅛ inch	$ 18
No 68	Diam handle ⅜ inch, length 4¼ inches, holds ¼ inch	25
No 69	Diam handle ½ inch, length 5¼ inches, holds ⅜ inch	37

Toolmakers' Punch

No. 65

This little tool is one of great convenience in laying out precision center work, for fine drilling. It has a slot and a hole milled and drilled so that an exact center can be verified, and at the same time the punch kept directly perpendicular to the space to be drilled; an absolute necessity in the finest class of work. Tool is well finished and one that will be most useful. Punch made from best quality cast steel properly tempered. Base hard gray iron.

Price, each..... $0.37

Double Centering Punch

No. 97

This tool was designed to facilitate the marking of holes, in opposite sides of round or square work for precision drilling from two sides. The V-slide is removable. Bottom punch, held up by spring into hole first made by top punch, makes the two holes come exactly opposite each other. The use of this device insures accuracy and rapidity on a class of work heretofore requiring much bother and delay in accomplishing.

Price, each..... $1.90

Shipping weight, 1¾ pounds.

The Hudson "Lear" Bolt Fastener is one of newest fasteners and has been selling readily. It looks as though it might be a "winner." (See index in front of book.)

MONTGOMERY & CO., 105 FULTON STREET, NEW YORK CITY
(Consult Index). Mention "Tool Monger" No. 30 when ordering from this book.

INDUSTRIAL HORNS

Extensively used in factories, mills, mines, office buildings, warehouses, etc.—or railroads, farm ships and bridges, and by boards of education, armies, navies, police departments and fire departments, both in this country and abroad.

The types shown can be furnished to operate on electrical current of 6 to 230 volts D. C. and 12 to 440 volts A. C. Their weatherproof housings are fitted with brackets for wall mounting and are tapped for conduit. The instruments are finished in fire red enamel and are identical in all respects except their projectors.

Klaxon

Type "WS" has a short projector, producing a shrill note of great penetrating power. It is especially fitted for indoor use, under severe noise conditions.

NO.	Length	Wt. Ea.	EACH
*WS	7½ in	13 lb.	$35.00

Klaxon

Type "W" is furnished with a ram's horn shaped projector, which directs its deep note downward. It is suitable for overhead or outdoor use.

NO	Length	Wt. Ea.	EACH
*W	12 in.	18 lb.	$35.00

Klaxon

Type "WL" is furnished with a long projector. It has a deep, penetrating note of great carrying power and is particularly recommended where long distances are to be covered.

State size of exhaust pipe, O. D. measurement.
One in a box.

HORN VALVES

This style is used when making attachment between engine and muffler by cutting a section of the exhaust pipe and inserting valve. So made of malleable iron, carefully machined to fit the exhaust pipe accurately. A cup point set screw at each end of valve is additional security. This connection is the better and we recommend it on all cars when it is possible to install in this position.

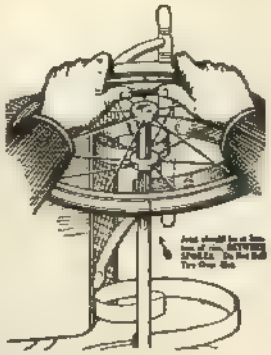
RUBBER TIRES

CALCUTT'S

For Go-Carts, Baby Buggies, Hand Cars, Autos, Etc.

Showing end of tire with coupling pin held firmly in left hand after twisting other end of tire towards you 4 complete revolutions.

Showing tire back to natural position after you push together and screw from you by turning to the right. Note—No kinks or twists, ready to apply



Showing coupled section of tire in channel of wheel between spokes, ready to snap on. Stretch over wheel as shown above. Must snap on very tightly.

Sectional view of tire showing coupling in position.

The above illustrations show how this tire is used. Complete instructions come with each box. The tire comes in a continuous length with sufficient couplings to make up 60 tires to the 100 feet.

SLEDS

THE FLEXIBLE FLYER LINE

The Sled That Steers.

All wood used is selected straight grained second growth ash; the steel parts are japanned so the paint sticks; the wood parts are handsomely decorated and finished with the best varnish; the grooved runners are straight and true which makes for speed, yet in steering no dragging of toes is necessary, thus saving shoes and preventing wet feet; steering is easy and the grooved runners prevent skidding; the goose-neck runner gives a longer and therefore better steering surface, and the steel-front acts as a shock absorber and prevents breakage.

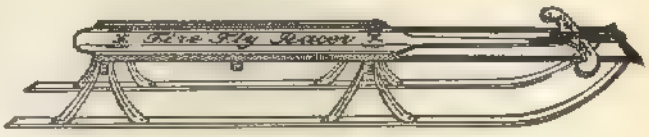
FIRE FLY



Next to "Flexible Flyers" these coasters are without doubt far superior in construction, design, finish and steering qualities to any other coaster. They have steel steering front and grooved spring steel runners, making them very strong vertically but flexible sidewise. The materials used and the finish are first-class, and the prices are low, quality considered.

THERMOMETERS

The Thermometers shown in this catalog have been carefully selected, with the requirements of this territory in mind, and we believe that one for practically any ordinary purpose can be found described.

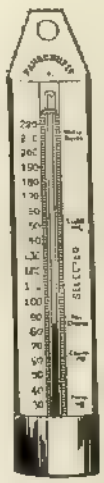
PERMACOLOR

Tycos and Taylor Permacolor Thermometers have their tubes filled with red liquid and may be used with the certainty that the color will remain indefinitely as when the thermometer is purchased. This liquid is the result of many years of experimenting, has been put to the severest tests, and is absolutely non-fading. Thermometers having their tubes filled with colored spirit (alcohol) have always been popular, because of the ease with which they can be read. The public is, however, in increasingly large numbers, coming to recognize that this easy-reading feature is more than offset by the tendency of the colored spirit to fade when exposed to strong light. If spirit-filled thermometers are now bought at all, therefore, it is with the expectation that after a time they will be almost impossible to read, and so practically useless. The letter "S" after any catalog number indicates that its tube is filled with red liquid. If this letter "S" does not appear the thermometer tube is mercury-filled.

DAIRY

There are few food supply industries in which temperature plays a more important part than in dairying and butter making. From the time the milk comes from the cow it must pass from one temperature condition to another, if that firm, smooth, fine-grained butter that commands the highest price is to result. Temperature is almost the one item in successful butter making that will absolutely not allow of guesswork or neglect. An accurate churn and pasteurizing thermometer should be the butter maker's constant companion, advising him truthfully of the condition of the milk or cream with which he is working. Without this knowledge he is "going blind" and cannot hope to produce equal results in a series of operations. Thermometers are scientific instruments and are accurate or inaccurate, reliable or unreliable, according to the intelligence and honesty of the manufacturer. With a Tycos Thermometer every step in butter making is taken with knowledge and for a reason, and the result may be practically determined beforehand.

No. 5715



No. 5748S.

Ordinary Grade. All-Glass Floating Dairy.

No. 5715. 8 inches long; approximate temperature range 30° to 220° F.; mercury filled tube; floats upright in the milk. Wt. carton of 1 dozen, about 12 ounces ..... Dozen $3 50

Selected Ordinary Grade, Flanged-Metal-Scale Dairy.

No. 5748S. Eight-inch brass scale; black filled figures and graduations; approximate temperature range 20° to 220° F.; the sliding bulb-guard is removable for cleaning; the white-back magnifying-front tube is filled with non-fading red liquid, making it easy to take readings. Wt. carton of 1 doz., about 1½ lbs. ..... Dozen $11 00

One in a box; one dozen in a carton.

COASTER WAGONS

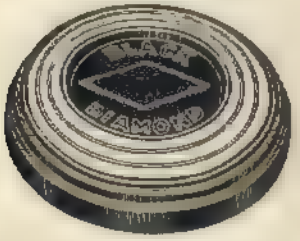
TARGETS

WHITE FLYER

As a breaker and producer of high scores, the White Flyer stands alone; the white band lending material advantage over any other color against any kind of background.

White Flyer. Wt. bbl., 154 lbs. (570 in a barrel) .....Barrel $8 00

BLACK DIAMOND



This target is of a scientific design, accurate mechanical construction and perfect balance giving an even flying target. Any trap that will throw a target will throw Black Diamonds a little better. It is jet black with a distinct pink ring, making a combination which shows up clearest under all conditions. The weight, balance and design of the Black Diamond enables it to ride the wind better than any other target

Black Diamond. Wt. Bbl. 180 lbs. .....Barrel $8 00
504 in a barrel.

PAPER

Paper. For rifle use.....100 $0 30
Paper. For revolver use.. ..100 80

DUCK COLLARS

For use on live decoys. ⅝ inch leather, ring on each end. Wt. doz., 8 ozs. .....Dozen $0 85

DUCK SNAPS

No. 29—Nickel. Swivel snaps to use with duck collars. Wt. doz., 4 ozs. .....Dozen $1 20

DECOYS

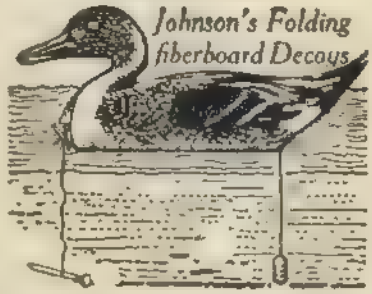
COLLAPSIBLE CANVAS

Duck. Fitted with lead valves; packed 1 dozen in a neat, hinged box with handle and clasp; same patterns as wood decoys. Wt. doz., 8¾ lbs..Each $1 35
Goose. Full size; fitted with lead valves; packed as described above. Wt. doz., 10 lbs. .....Each $2 25

WOODEN DUCK

Superior. Hollow construction; made of genuine Idaho cedar, hand painted; life size; glass eyes; feather finish, carried in the following patterns in both male and female: blue bill, canvas back, mallard, pin tail (sprig), green wing teal and widgeon Wt. doz., 23 lbs ..... Each $1 25
Superior. With Leads and strings complete. Any pattern ....Each $1 40

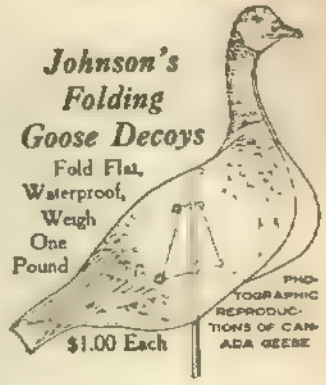
FOLDING DUCK



Johnson's. Printed in natural colors on tough jute fibre board, better than that used in high-grade shot gun shells, so thoroughly waterproofed and reinforced that they last indefinitely. They have every appearance of a full, round duck body, ride perfectly in any weather and the slightest wind keeps them moving, making them most effective. The ⅝ in. cedar float, also waterproofed, slides snugly inside the body to spread and float it. A balancing device attached to the float makes tipping impossible. Suggestions for different ways of using are printed on bottom of each decoy. Carried in Mallards, Canvas Back, Sprig and Widgeon. Wt. doz., 7 lbs. .....Each $0 55
Packed ½ doz. in canvas bag.

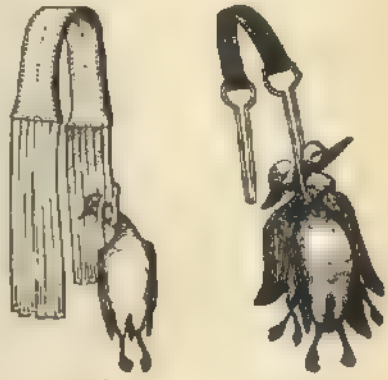
DECOYS

FOLDING GOOSE



Johnson's. A wonderful goose decoy. Life-like, light and inexpensive. Photographic reproduction of Canada geese and Brandt in natural colors on tough jute fibre board. Triangular frame on heavy wire stake holds body open. Folds flat for carrying. Wt. each, 1 lb. Packed one dozen in canvas bag, ⅔ doz. Canadian Honkers and ⅓ doz. Brandt .....Each $1 00

GAME CARRIERS



No. 1 No. 89

No. 1. Three strap: rawhide; extra heavy sole leather; stitched handle; fancy stamped. Wt. doz., 7 lbs. .....Each $2 75

No. 2. Four strap; rawhide; extra heavy leather; stitched handle; fancy stamped. Wt. doz., 8 lbs. .....Each $3 25

No. 89. Barnum, with canvas center piece; shaped wire at each end in which to carry game. Wt. each, 2¼ ozs. .....Each $0 20

CALLS

GOOSE AND CRANE

Nickel plated brass shell with telescope extension; wood mouth piece and reed holder, pipe organ reed.

Fuller. Wt doz., 3½ lbs....Each $1 65

DUCK

Allen's. Maple shell, natural finish, brass reed with cedar holder contained in a brass tube; heavily nickel plated. Will give call of any species of duck or waterfowl. Wt. doz., 2 lbs. .....Each $1 00

Broad Bill. Latest invention; will produce, with perfect accuracy, any call of our native ducks, from the short, choppy Teal to the long, dignified call of the Mallard Wt. doz., 2 lbs. .....Each $0 75

CROW

Purdue. Wood shell, nickel plated end. Wt. doz., ¾ lb. .....Each $1 20

CALLS

CROW

Jahn.

Made of ivory pyralin, in four pieces. Gives a most natural tone. Wt. doz., ½ lb.

Jahn .....Each $1 00

HOW TO USE A CROW CALL

Place the very ends of the two split halves of the call to the lips and give short, quick blows; do not attempt to place the lips over the entire end, but just the very point, leaving the two sides of the "Call" open for a portion of the air to pass out. If a finer tone is wanted, close the front teeth upon the split halves, hold in the right hand while blowing, with the hand in a hollow shape around the end. This produces the deep call of the crow. Use care to keep dirt out of the call and do not dip in water, but keep dry.

PLAYING CARDS

CONGRESS

Look for the name "Congress" on every box

No. 606W. Air cushion finish; gold edges; whist size, 2¼x3½ inches. Backs are reproductions of the most artistic paintings in full color and gold. Wt. doz., 3¼ lbs. .....Package $0 85

Adjustable Trucks Used on Hudson Hay Carriers for Steel Track.

The above cuts show method of adjusting trucks to fit practically any steel track. All that is necessary is to have proper trip block.

STEEL TRACK

HAY CARRIER

HUDSON

Rust-Proof.

The Hudson is the strongest steel track made and the simplest to erect. Each section is composed of two pieces of high carbon angle steel securely held together by malleable clamps and one-half inch bolts. It is very easy to join these sections and erect a track the required length. A wrench is the only tool needed. No drilling of holes nor riveting necessary. Track is two and one-half inches wide. Sections of track are five, eight and ten feet in length.

No. 401. With couplings. Wt. 100 ft., 240 lbs.100 Feet **$40 00**

TRIP BLOCKS

HUDSON

For Adjustable Hay Carriers.

No. 48. To fit Louden and Porter.....Each **$1 00**

No. 43. To fit Ney and Olson..... ..Each **$1 00**

No. 49. To fit Myers..... ..Each **$1 00**

No. 47. To fit Star. (Hunt, Helm, Ferris).....Each **$0 90**

We recommend that dealer carries extra trip blocks in stock. In installing Hudson adjustable carriers for other makes of track than Hudson, the proper trip block must be furnished.

Gibbs Toys Guarantee Expert Workmanship with Surpassing Value

INSPECT Gibbs Toys closely, and you'll find all the important "little things" accounted for in respect to design, workmanship, and appearance. Gibbs Toys have a trick of resting lightly on your shelves and moving rapidly to make way for fresh stocks. The numbers shown on this page are typical of Gibbs' complete line of profit-earning toys. Write for the Gibbs Catalog in actual colors.

Gibbs Passenger Plane No. 37

Beautifully enamelled in four bright colors. Up to the minute in every detail. Fuselage of the latest type, with enclosed cabin. Stoutly made of wood, 11 inches long, 10 inches wide. Packed one to a box. "No. 37" sells fast at 50c retail.

Feature *Bang Ball*-- a Clever Leader for Your Toy Department

No. 150 Bang Ball for 2 Players

Bang Ball is more than a toy—it's a game, and a fascinating game for kiddies or grown-ups. The set consists of two brightly colored celluloid balls, and two 10-inch guns enamelled in four attractive colors. The display box has a 5-color lithographed label.

No. 151 Bang Ball for One

No. 150—Bang Ball for 2. Retails at $1.00.
No. 151—Bang Ball for 1. Retails at 50c.

Gibbs Lumber Truck No. 38

Its bright color scheme (enamelled) catches the eye instantly. Ready to go, loaded with smooth lumber for building play structures. A sturdy, all-wood toy 12 inches long. One toy in box. "No. 38" is a snappy 50c number.

Here's a Real Winner—

The New O-HI-O Climbing Top (No. 6)

You'll be surprised and pleased with the smooth, light running of this extra quality come-back top. Children like to parade their knack of "making it climb." Enamelled by hand in striking color combinations. Packed 2 dozen to box. The "New O-HI-O" No. 6, measures 9 inches around, and is an exceptional 10c item.

Colonial Model Banjo Clocks

8-DAY STRIKE

Banjo model. Mahogany finished clock, 34½ in. high, 10⅝ in. wide. Has brass sides, eagle top and colored picture on glass. Fitted with a New Haven 8-day pendulum movement striking the hours and halves. An outstanding Banjo clock.

2G25111 PRICE **$34.50**

NORMANDY CHIME

Mahogany finished Banjo clock, measuring 30 in. high and having a 5½ in. silvered dial. The panel is Walnut burl; the decoration on the glass is delightfully colored. Fitted with Gilbert 8-day pendulum movement, striking the hours and halves on Normandy two-tone chimes. Shipping weight 15 lbs.

2G25112 PRICE **$31.00**

LONG PENDULUM

Mahogany finished Wall Clock, graceful in design and an excellent time-keeper because of the extra long pendulum. Has 8-day movement strikes hours and halves on two-tone Normandy chime. Has square silvered dial. Height 24 in., width 8 in. Ideal for home or office.

2G25113 PRICE **$26.50**

TIME ONLY

Mahogany finished Banjo clock, standing 32½ in. high and 7⅜ in. wide. Has 6 in. ivory colored dial and gold plated sash. Fitted with 8-day lever movement. Will run in any position. Has brass sides and eagle, colored illustration on glass, and decorated panel. (It does not strike).

2G25114 PRICE **$17.00**

HALF HOUR 2-ROD STRIKE

Sessions Banjo of many features, 37 in. long and 9¾ in. wide. The case is Mahogany finished, has decorated panel and delightful, colored picture on glass. Has convex crystal, polished brass sash, silvered dial and etched figures. The 8-day pendulum movement strikes the hours and halves on 2-rod chime. Has brass sides and eagle.

2G25115 PRICE **$27.50**

8-DAY TIME-LEVER MOVEMENT

For those who want neither strike nor pendulum, this Banjo clock is recommended. Height 22⅝ in.; width 7⅝ in. The case is Mahogany finished with inlay design. Has 5-in. silvered dial, polished brass sash, brass side pieces and eagle. Attractive panel in colors.

2G25116 PRICE **$18.00**

COLONIAL HALF HOUR STRIKE

Gilbert has made clocks since 1807. Then, as now, this clock was a favorite. Has a Colonial hand rubbed Mahogany finished case of authentic design. The movement is an 8-day pendulum, striking the hours and halves on cathedral gong. Height 16 in., dial 6 in. Weight 12 lbs. packed.

2G25117 PRICE **$26.00**

8-DAY LEVER-TIME BANJO

Green lacquered case, richly decorated, standing 23½ in. high. Fitted with 8-day Gilbert lever (no pendulum) movement keeping good time in any position. The dial is silvered, 5½ in. in diameter, and has brass finished sash, side pieces and eagle. Does not strike.

2G25118 PRICE **$16.00**

American Made Westminster Chime Clocks

Values Never Before Equalled

All of the clocks shown on this and the following page play the world famous chime of Westminster Abbey. The notes above show the chime that is played each quarter hour. On the full hour, the chime is followed by melodious, harmonizing strike, announcing the time.

SOLID MAHOGANY WESTMINSTER CHIME

Handsome, solid Mahogany case with burl panels, all hand rubbed, measuring 21¾ in. long and 16½ in high. It is fitted with Sessions Westminster Chime movement, playing the famous Westminster Chime on the quarter hours, and striking on 8 chorded gong the hours, following the chime. Has silvered dial with raised figures.

2G25119 PRICE **$60.00**

UPRIGHT MODEL SESSIONS

An upright design of unusual beauty. The case is made of solid Mahogany ornamented with an exquisite oval panel of Mahogany Burl. Fitted with 8-day Sessions Westminster Chime movement, playing the famous melody and striking the hour on a harmonizing chord. Has large silvered dial, cast brass sash, convex glass, and every other feature making it a clock of beauty and a worthy time-keeper. Size, 14⅝ in high, 11½ in wide.

2G25120 PRICE **$60.00**

BANJO WESTMINSTER

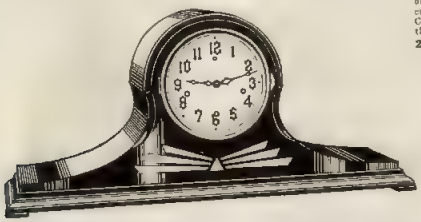
Handsome New Haven Banjo with Westminster Chime; height 34¾ in; width 10⅝ in., silvered dial 6 in. Case is Mahogany finished, has brass sides, eagle top, and decorated panels in color. Has 8-day pendulum movement with Westminster Chime and strike.

7G25124 PRICE **$72.50**

FULL WESTMINSTER CHIME—A GREAT VALUE

Knowing the great love that everyone has for the Westminster Chime, Sessions has been successful in their attempt to build one within the reach of every pocketbook. The case is 21 in long, stands 10 in. high and has a 6 in silvered dial with raised gold numerals. The case is in Mahogany finish with an inlay effect. Has polished brass sash, convex glass, and a new 8-day Westminster Chime movement, chiming each quarter hour and striking on the hour. An achievement in clock making, when one considers that, until recently, no good Westminster Chime could be had for less than $100.00.

2G25121 PRICE **$45.00**



FULL WESTMINSTER CHIME WITH CHORDED STRIKE

This clock tells time melodiously. Each quarter hour it chimes of silver-clear tone you will hear the delightful Westminster melody. At the hour it strikes on a rich chord. The movement is an 8-day self-winding, 3-train chime and strike. The case is of solid Mahogany finish in Dixie red hand rubbed. The case is 21 in long, height 16 in., dial 6 in. The dial is silvered and has raised numerals. The crystal is convex and has a polished sash. (This clock requires a mantel 8 in. deep.)

7G25122 PRICE **$52.50**

ABBEY DESIGN WESTMINSTER CHIME

Built like a Gothic tower, this case adds dignity to any mantel. The detail is hand carved and the case is solid Mahogany throughout, in a satin, antique finish. It stands 15¾ inches high and has a base 10¾ in. wide. The dial measures 6 in. and has a cast sash and beveled convex crystal. The dial is silvered and has raised numerals. The movement is an 8-day pendulum 3 train, with Westminster Chime and chorded strike. As handsome a clock as anyone could wish for.

7G25123 PRICE **$115.00**

BULLS EYE STEEL AIR RIFLE SHOT

The Best Way to Sell Air Rifle Shot

DON'T sell air rifle shot in bulk—it is too unhandy and wasteful. The most profitable way is to sell Bulls Eye Steel Shot, in the handy nickel tube, convenient for you and the customer. BULLS EYE Steel Shot now recommended for use by makers of leading air rifles.

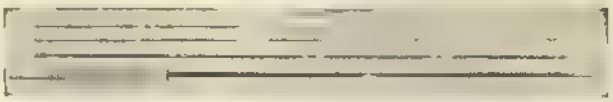
FLY RODS.

SPLIT BAMBOO
GRANGER
PREMIER



Granger Premier Rods represent a supreme effort in rod building. Their quick action, perfect balance, maximum power, expert workmanship, excellent materials and beautiful finish command constant admiration. Each section of this rod is built up with six triangular strips taken from the same piece of cane (subjected to actual breaking test) which produces uniform strength, color and resiliency. A rod so made possesses a delicate sensitiveness and quality for staying straight that cannot be had by any other form of construction. Through a special ageing process, the bamboo in these rods becomes a beautiful golden brown which with wrappings of gold-colored silk makes a most pleasing color combination. Made in three sections with extra tip. Equipped with hard rubber, locking screw reel seat and butt cap. All guides, ferrules and other metal parts are of chromium plated nickel-silver. Ferrules are made in one piece, hard drawn and waterproof. Chromium-plated guides and tip-tops possess remarkable wearing qualities. Because of this, they are guaranteed, under ordinary usage, not to cut, rust, crack or break during the life of the rod. Each Granger Premier rod is put up in a partitioned cloth bag and an aluminum case.

De LUXE.

Granger DeLuxe Rods differ from Granger Premier Rods in the selection of the can and in wrappings only. The cane requirements for Granger Premier Rods not only demand that it be of the very finest quality, but that it must conform to certain color standards and be absolutely free from any discoloration or blemish. Granger DeLuxe Rods are made from the same quality of cane but the color requirement is less rigid. Made in three sections with extra tip. Equipped with hard rubber, locking screw reel seat and butt cap. Fly Rods have chromium plated butt guides and tip-tops with hardened steel line guides. All other metal parts are of nickel silver. Ferrules are made in one piece, hard drawn and waterproof. Chromium plated guides and tip-tops possess remarkable wearing qualities. Because of this they are guaranteed, under ordinary usage, not to cut, rust, crack or break during the life of the rod. Each Granger DeLuxe Rod is put up in a partitioned cloth bag and aluminum case.

SPLIT BAMBOO
GRANGER
FAVORITE

Granger Favorite Rods are very similar in action, balance and power to the Granger DeLuxe Rods. However, instead of each section being built of strips from the same piece of cane, they are made up of strips coming from different canes. They go through exactly the same process, have the same beautiful golden brown color, and are finished with wrappings of jasper and gold. Made in three sections with extra tip. Equipped with hard rubber, locking screw reel seat and butt cap. Fly Rods have chromium plated butt guides and tip-tops with hardened steel line guides. All other metal parts are of nickel-silver. Ferrules are made in one piece, hard drawn and waterproof and are are made in one piece, hard drawn and waterproof Chromium plated guides and tip-tops possess remarkable wearing qualities. Because of this they are guaranteed, under ordinary usage, not to cut, rust, crack or break during the life of the rod. Each Granger Favorite Rod is put up in partitioned cloth bag and aluminum case

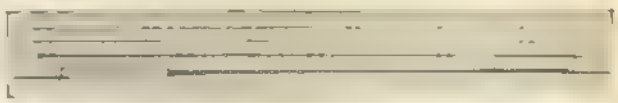
SPECIAL



Each and every strip of cane entering into these rods is heat straightened and sized to the same accurate dimensions and taper as the best grade rods. The cane is also put through a special ageing process which produces the much desired golden brown color. Green silk wrappings give these rods a distinctive and pleasing appearance. Made in three sections with extra tip. Equipped with hard rubber, locking screw reel seat and butt cap. Nickel-silver mountings, and one-piece, hard drawn, waterproof ferrules. All butt guides and tip-tops are chromium plated, and under ordinary usage, are guaranteed not to cut, rust, crack or break, during the life of the rod. Packed in cloth case with grooved wood form for protecting tip sections.

FLY RODS.

SPLIT BAMBOO.

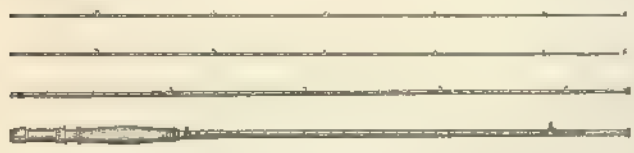
MONTAGUE

The supreme achievement of the oldest and largest makers of split bamboo rods in the world. This rod consists of three pieces and an extra tip hand made of six strips of the most carefully selected Tonkin cane, aged and heat treated to secure an action found in no other rod and resulting in a rich deep brown color. The ferrules are of 18% nickel silver hand welted, perfectly fitted, serrated and wound over and made waterproof. The reel seat is of rich black hard rubber with spiral locking nickel silver band and butt cap. The solid cork grip, shaped to fit the hand, is of fine satin finish cork. The first guide and the tops are of genuine agate, smooth and well mounted. The intermediate guides are file hard steel and a hook ring is provided just above the grip. At guides, ferrules and grip the rod is wound with pongee and purple silk and then heavily varnished by hand with a special waterproof varnish. Packed in a heavy canvas bag and the whole in an aluminum rod case with watertight screw cap. Lengths 9 and 9½ ft. Wt. ea. 6 ozs. Ship. wt. ea., 14 ozs.

Manitou .....Each **$35 00**

A rod of highest quality consisting of three pieces and an extra tip made of thoroughly seasoned, selected brown, heavy Tonkin cane in six strip construction. The ferrules are serrated and welted and chased and, with the hand made reel seat, are of 18% nickel silver. The grip is of solid cork, well shaped. The first guide and tops are of genuine agate and the intermediate guides of file hard steel and there is a convenient hook ring at the grip. The rod is wound with red and yellow silk and nicely varnished. Packed in a partition canvas bag and then in an aluminum rod case with watertight screw cap. Lengths 9 and 9½ ft. Wt. ea. 6 ozs Shipping wt. 14 ozs.

Red Wing .....Each **$25 00**

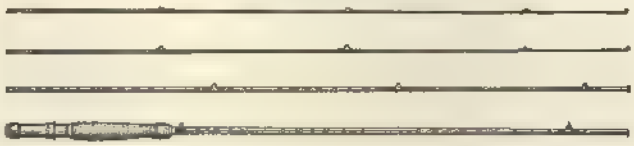


A high grade rod consisting of three pieces and extra tip made of selected brown Tonkin cane. Ferrules are hand welted and serrated and, with the patent waterproof reel seat, are of 18% nickel silver. The solid cork grip is nicely shaped. The first guide and tops are of genuine agate and the intermediate guides are of file hard steel. A hook ring is mounted just above the grip. Wound with yellow and dark red silk. Packed in a partition canvas bag and aluminum rod case with a bayonet cap. Lengths 9 and 9½ ft. Wt. ea. 6 ozs. Ship. wt. 14 ozs

Trail .....Each **$20 00**

SPLIT BAMBOO.

MONTAGUE



A rod of excellent quality consisting of three pieces and extra tip made of selected brown Tonkin cane. Ferrules are roll welted and, with the patent waterproof reel seat, are of 18% nickel silver. The grip is of solid cork and shaped. All guides and the tops are of file hard steel, the first guide being of the one ring type. A hook ring is provided. Closely wound with garnet and lemon silk and nicely varnished. The tips are packed in an aluminum tip case and the whole in a partition canvas bag. Lengths 9 and 9½ ft. Wt. ea. 6 ozs. Shipping wt. 14 ozs.

SPECIAL 1929 ASSORTMENT
With Display Material

This assortment is made to fit the need of the small dealer who just "wants to feel his way" before ordering a larger quantity of Buss Lights.

It contains one of each of the designs or models of Buss Lights (seven in all). From it, the retailer can fill any call for Buss Lights, as nationally advertised.

Packed with the lamps is a new type display card that can be illuminated. This card is unusually striking, and with it the retailer can build a striking display either on his counter or in his window that will attract attention and sell Buss Lights.

The lights in this 1929 assortment are priced at the regular dozen price. The dealer cost is $13.33 and retails for $20.00.

In ordering just specify: the 1929 Buss Light Assortment, including 7 lights and display material.

1929 Buss Light Assortment
(Including 7 Lights and Display Material).

STOVE HOLLOW WARE

Griswold extra finished iron hollow ware is of the highest quality. Each piece is carefully molded by experienced workmen insuring thicker, heavier metal, where durability and heat are required. The choicest of high grade superior iron is used, making possible the highly polished surface. To preserve this finish each piece is vaporized with a transparent anti-rust preparation, which eliminates the danger of rust from atmospheric changes.

F FIRE EXTINGUISHERS

SODA AND ACID TYPE

Guardene

No. SUAC

Guardene

Made of special cold rolled copper. Seams hand riveted, heavy treated rubber hose, lead nozzle, bottle cage is heavy cast brass, lead coated, and is separated from head; the bottle has a loose lid stopper. To discharge, turn extinguisher bottom end up and hold by the handle underneath the bottle; the lead stopper drops from the neck of the bottle and rests against the head, allowing the sulphuric acid to mix with the soda solution, and creating a large volume of carbonic acid gas, throwing a stream of the chemical 50 ft. which will instantly put out an oil or gasoline fire. Chemicals required—1½ pounds bicarbonate of soda, 4 fluid ounces of sulphuric acid.

NO.	Cap. Gal.	Ht. In.	Dia. In.	lb Ea.	EACH
Guardene	2½	21	7	25	$24.00

STANDARD

Similar in construction to above and approved by insurance underwriters.

NO.	Cap Gal.	Ht. In.	Dia. In.	lb Ea.	EACH
Standard	2½	21	7	25	$18.00

One complete in a carton.

Charges for Above

Will work with any soda and acid type extinguisher.

NO.	Wt. Each	EACH
SUAC	1½ lb.	$1.00

FOAM TYPE

Pyrene Mfg. Co.—Phomene

A foam type fire extinguisher effective on all classes of fires, including oil, gasoline, naptha, enamel, tar, wax, grease, shellac, lacquers, inflammable solvents and chemicals. Phomene ejects 20 gallons of tough fireproof foam which spreads over the burning surface and cuts off the supply of oxygen. Built of heavy cold rolled copper, polished and lacquered. Labeled by the Underwriters Laboratories. Throws stream of from 25 to 35 feet.

NO.	Cap. Gal.	Hgt. In.	Lb. Ea.	EACH
Phomene	2½	24	18	$25.00

Charges for Above

NO.	Cap. Gal.	EACH
Phome-C	2½	$1.75

PYRENE

No. PB-J

No. PEC-Q

Pyrene Liquid is a carbon tetrachloride chemical combination, that on touching fire or heat is converted into a dense white gas blanket, which surrounds the fire and smothers it instantly. Effective on any kind of fire—oil, electric, etc. Will reduce insurance charges. Complete with japanned brackets.

NO.	Cap.	Ht. In.	Dia. In.	lb Ea	EACH
PBJ-Auto	1 pt.	11	2½	5.	$ 9 00
PBJ-1	1 qt.	14	3	6	12.00

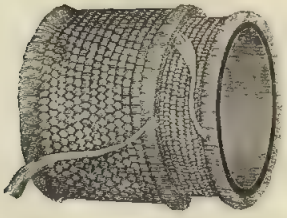
One complete in carton, with brackets.

Charges for Above

NO.	Capacity	lb Each	EACH
PEC-P	1 pt.	2	$0.90
PEC-Q	1 qt.	4	1 80

Twenty quart cans to a case.

FIRE HOSE F



Chieftain—Cotton—Double Jacket

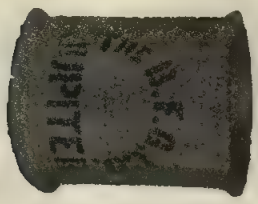
Cotton rubber lined hose is for outside service, where the hose is to be connected with hydrant or pump. To preserve this hose, water must be run through it frequently, at least two or three times a year, as this keeps the rubber lining pliable, and lengthens its life. Before being put back into service the fabric or jacket should be thoroughly dried. Should be kept in a well ventilated place. Coiling this hose on reel or saddle is better than folding on hose rack. The life of a fire hose is usually one of inactivity and only the best of materials can withstand the deteriorating effects of age.

This hose is woven from the highest grade long fibre, gulf cotton yarn. The weave is such that each thread must bear its proportion of the strain. Rubber lined. Tested to 400 pounds pressure.

Coupled with expansive ring couplings.

NO.	Diameter	Wt. Foot	FOOT
CH2	2 in.	3½ lb.	$1.80
CH2½	2½ in.	5 lb.	2.20

In 50 foot lengths only.



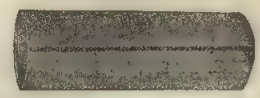
Jupiter—Cotton—Double Jacket—Rubber Lined

A strong dependable hose for fire department service, somewhat lighter in weight than Chieftain but of excellent quality. An unparalleled value for the smaller municipalities.

Coupled with expansive ring couplings.

NO.	Diameter	Wt. Foot	FOOT
J2	2 in.	3½ lb.	$1.70
J2½	2½ in.	5 lb.	2.00

In 50 foot lengths only.



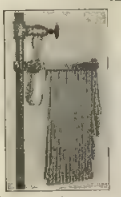
Rendein—Underwriters—Unlined Linen

Unlined linen hose for interior fire protection. Used in connection with stand pipe in office buildings, factories, etc. Linen hose deteriorates by being wet. The underwriters request that purchasers do not test the hose, as linen hose is tested before it leaves the mill, and the test will merely damage the hose to an appreciable extent. Hose will leak slightly when first used, but the fibres will almost immediately expand and the hose becomes practically water-tight. Very thoroughly dry the hose inside and outside after it has been wet. Not intended to be used for general service, but for interior fire protection only.

Highest grade boiled flax fibre, extra well made, carefully finished, without rubber lining. For use where a light rose is required. Will fold in small space, for factories, etc. Made in any length up to 300 feet. In accordance with requirements and specifications of Associated Mutual Insurance Company. Without couplings.

NO.	Diam.	Wt. 100 Ft.	FOOT
RE1½	1½ in.	16 lb.	$0.45
RE2	2 in.	20 lb.	.60

FIRE HOSE RACKS



Style F—With Pipe Clamp For Unlined Linen Hose

The Bowes idea consists of a tubular arm mounted with sliding eyelet p ns. The opposite ends of the pins are designed to fit in a channel parallel to the tubular arm, thus supporting the folded hose, giving a positive support. The pressure is equal on both arms which prevents pinching of the hose and absolutely holds it in place until the hose is withdrawn at the open end, the pins remaining on the extension arm. Finished in aluminum.

NO.	Size Hose Inches	Capacity	Wt. Each	EACH
41F	1½ in.	50 ft.	15 lb.	$ 8.00
42F	2 in.	50 ft.	7 lb.	8 00

One in cardboard box; wt each 28 ozs.

REVOLVERS

IVER-JOHNSON

The Safety Action—The top of the hammer of an Iver-Johnson revolver rests against the solid frame, so that no conceivable impact could force it against the firing pin.

A lifter, which is a long upright part, fits into the notch in front of the hammer; when the trigger is pulled, this lifter is at its highest point and covers the firing pin and at this relative position the hammer is released, striking the lifter and driving the firing pin into the cartridge. Then as the trigger snaps forward the lifter drops down, leaving a clear space between the hammer and firing pin.

The safety action does not add a single extra part nor does it impair the smoothness or speed of action. It demands no thought or intelligence from the user. There is no other conceivable way to discharge the cartridge except by simply pulling the trigger. You can throw the revolver against the wall, kick it about the room or "hammer the hammer" and the cartridge will not explode.

Genuine Hand Made "Ernst Reinhold Schmidt" Violins

Generally Accepted as America's Favorite in Imported Violins

These Violins have been on the American market for the past thirty years and are well known amongst the accomplished violinists and in the trade. They are strictly HAND MADE—the finish beautiful and the tone exquisite.

Each model quoted below is equipped with the finest ebony trimmings and each instrument bears the label of the maker. The models quoted below were selected because of their superiority of tone, unusually fine workmanship and excellence in finish. Coupled with this are extremely low prices, which makes this offering so attractive.

Furnished in Full Size Only

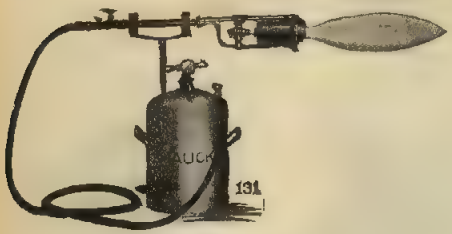
Hauck Portable Kerosene Burner



Hand Pump Type

No Compressed Air Required

For kerosene only; having a quick acting hand air pump built inside the tank. It was designed for field and shop work where compressed air is not available or convenient for use. The flame is intense and easily regulated. The burner operates approximately five hours with a few strokes of pumping.

Stands as shown, holding above burner, are furnished when ordered.

No.	Capacity of Seamless Tank, Gallons	Length of Hose, Feet	Oil Consumption per Hour, Gallons	Shipping Weight, Pounds	Weight of Burner, Pounds	Price, Complete
11	3	6	½	50	3	$ 45.00
7a	5	6	1	60	3	50.00
7	10	12	1½	80	5	70.00
8	12	12	2½	95	6	85.00
9	15	12	3	110	8	98.00

Hauck Portable Kerosene Lead Melting Furnace

The standard type furnace, made entirely of steel and iron, with a cast iron melting pot and bar.

It is equipped with a Hauck burner of the latest improved type attached to the furnace shell and 10-gallon capacity seamless drawn steel tank, equipped with a quick acting and powerful hand air pump; also pressure gauge and necessary valves.

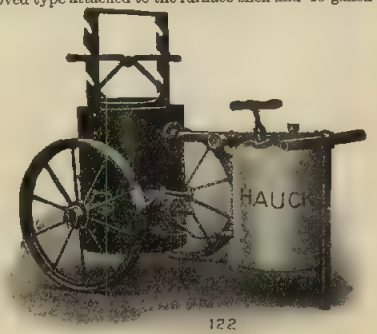
Only a few strokes are necessary to obtain the required pressure. The burner operates approximately five hours with a few strokes of pumping.

The furnace is well balanced and easily portable. Note the wide rims on wheels.

450 pounds of lead can be melted within 20 minutes and kept in molten condition at a few cents per hour. Additions of new lead will melt instantly.

The oil tank and burner are securely attached to the furnace and always ready for immediate use. Made in three sizes.

Also furnaces of the No. 122 type, mounted on three legs, furnished with a bracket to hold any type of portable burner.



Portable Kerosene Lead Melting Furnace

No.	Capacity of Pot, Pounds	Oil Consumption per Hour, Gallons	Price
200	200	1½	$135.00
201	450	2	180.00
202	850	3	180.00

Hauck Combination Melting Furnace and Portable Heater

Hauck portable burner used in connection with a melting furnace; 200 pounds of babbitt metal melted in fifteen minutes and the molten metal kept at a proper temperature at little cost.

The burner may be detached from furnace and used for numerous other heating requirements.

Special furnaces and burners for melting brass, copper, iron, aluminum, bearing metal, lead, etc.

Price with No. 7 burner..... $ 65.00

Price with No. 8 burner..... 115.00

Extra burner with base like No. 131 without tank, for attaching to above furnaces, **$33.50** additional.

No. 339 Easel Display
SOUTH BEND BABY TEAS-ORENO

A colorful display easel that instantly attracts attention to the merchandise. Placed in a window trim it will spot attention—bring the prospect into your store. When arranged on your counter, it is an open display, actually making sales. One each of the RH, Rain, F, SF, YP, and MS finishes of the Baby Teas-Oreno is mounted over lithographed replicas of the lure, so that when sales are made, a complete range of colors is shown until the last lure is sold. Packed one display card in a container. Weight, 1¼ lbs. per display.

Each

No. 339 Baby Teas-Oreno Easel Display $6 90

No. 390 Easel Display
SOUTH BEND SELECTED LURES

A selection of fast selling, best-known lures in the South Bend line is mounted on a six-color lithographed easel card that compels attention and creates sales. Every dealer should have this display on his tackle counter as it will act as a silent salesman, reminding the fisherman to buy now. Packed one display in a container. Weight, 1½ pounds per display. The following lures are included:

No. 940 RH—Teas-Oreno
No. 975 RH—Whirl-Oreno
No. 973 RH—Bass-Oreno

No. 364 Easel Display
SOUTH BEND
FLY ROD SURF-ORENO

An attractive six-color card featuring South Bend Fly Rod Surf-Orenos on which is mounted one each of six patterns. Suitable for window or counter display. An attention-compelling poster is also furnished for attaching to window. Packed one display in container. Weight, 1½ lbs. per display

Each

No. 364 Fly Rod Surf-Oreno Easel Display $4 50

No. 373 Easel Display
SOUTH BEND BASS-ORENO

The Bass-Oreno is without exception the most popular, best known and greatest fish-getter ever developed. Experienced anglers depend on it to produce results when other lures fail. A simple and ideal way to present this lure to your trade is to have an easel display on your counter and in your window. An assortment of the six most popular colors is mounted on a bright, six-color display card, which is attention compelling. Lures are mounted over lithographed illustrations of the Bass-Oreno in the different colors. The following colors are included: RH, F, RSF, RAIN, P, and RS. Packed one display card in a container. Weight, 1½ lbs. per display.

Each

No. 373 Bass Oreno Easel Display ... $6 00

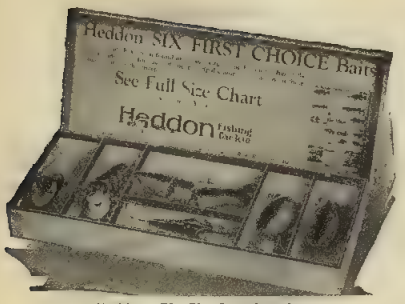
No. 394 Easel Display
SOUTH BEND TRIX-ORENO

The South Bend Trix-Oreno Easel Display attracts attention, intrigues the fisherman and acts as a silent salesman when displayed on your counter or in your window. The action of the lure is illustrated and the sales story, which will be read by fly-rod fishermen, is convincing. The lures are mounted on individual cards, inserted in cellophane envelopes that are attached to the easel display. Packed one display card in a container. Weight, 1½ lbs. per display.

Each

No. 394C, 6 Bass and 6 Trout size, 1 color each.. . . .. $9 00

BASS PLUGS AND MINNOWS J



Heddon—Big Six Assortments

This counter display box of Heddon first choice baits is your "silent salesman."

This assortment contains one each of Heddon's most popular numbers for best all 'round results.

The selections are made as the composite results of tests and carefully checked reports of many thousand anglers.

NO	Wt. Ea.	Per Asst.
HB6	½ lb.	$6 25

Heddon—Little Six Assortments

Contains one each of the following popular baits—Nos. 190BWF, 190WF Ace, 5409P, 5402, 7409M, 7409R.

NO.	ASST.
LH6	$6.50

GRASSHOPPERS

Rubber
Dressed on Hollow Point Hook

NO.	Size	DOZEN
760	1	$4.80

One on a card; one-half dozen in a box.

DEVIL MICE

Tuttle

For bass, the Devil Mouse, gray color, may be used. Often when no other lure will bring them up they strike viciously at the mouse. The Mouse Devil floats and always stays right side up on the water. The Devil Bug Mouse is made up on model perfect turn down eyed hooks, Nos. 2/0 ring hooks.

NO.	DOZEN
201	$9.00

One on a card; one dozen in a carton.

MINNOW

Biz

A good trout or bass bait. Has propeller blade spinner, nickeled body of soft rubber nicely decorated, luminous enameled.

972F	Frog Back	10.20
972RH	White Body, red head	10.20

One in a box; one doz. in a carton.

SOUTH BEND FISH-ORENO

The Bait with Insurance Policy

Body length 3¼ inches, with two treble hooks. The ideal bait for deep-water fishing, during hot weather, when the "big ones" are lying down deep. The nickel head plate quickly sinks this bait to any depth at approximately two feet per second. On the retrieve, this bait stays and travels at the depth to which it sank, with that erratic, zig zag, wobbling motion that is so sure to entice the fish.

NO	Color	DOZEN
953SF	Scale finish	$15.00
953RH	White body, red head	15.00
953Y	Yel. body, blk. & red spots	15.00
953P		15.00
953F	Frog Back	15.00

Each in a box; one dozen in a carton.

BASS-ORENO BAITS

South Bend

An under water and surface type bait. It floats when not in motion. On reeling, it dives zig-zags and darts in a very alluring, minnow-like course. The faster it is reeled the deeper it travels. Body 3¼ inches long. Wt. approx ⅝ oz.. Enamel finishes. Guaranteed not to crack.

NO.	Color	DOZEN
973XP	Gray Scale Finish	$12.00
973Rain	Rainbow	12.00
973RSF	Rainbow Scale	12.00
973SF	Scale Finish	12.00
973RH	White Body, Red Head	12.00
973Y	Yellow Body, Red and Green Spots.	12.00
973PL	Pearl	12.00

GRASSHOPPERS

Palmer

A cork body grasshopper of very natural appearance. Dead grass and green color dressed on hollow point hooks.

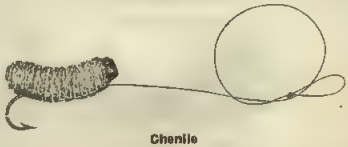
GRUB WORMS



Chenile

To 4½-in. single gut leader, No. 8 hook.

NO.	DOZEN
447	$3.00

One dozen on a card.

J

FISHING REELS

Anti-Back-Lash

Made of nickel silver with agate bearings. Used extensively by expert and experienced casters. The reel thumbs itself—is free running and not retarded by any continuous brake action. The brake automatically applies at end of cast when bait lights. By a slight turn of adjustment screw can be used either as anti-back-lash or regular type reel. Guaranteed without time limitation against defective material or workmanship.

Fitted with Double Handle

NO.	Capacity	Lgth. Fillar	Disc	EACH
1131	100 yd.	1⅝ in.	1⅝ in.	$10.00

Packed one in a box.

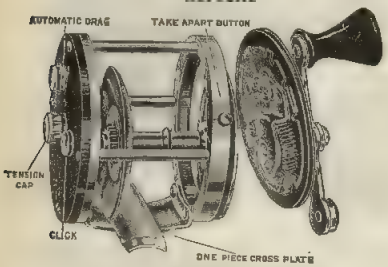
Oreno—Anti-Back-Lash

Same general construction as No. 1131A, made of brass nickel plated plain bearings. Plain dull finish.

NO.	EACH
900	$6.50

Packed in plain box.

NEPTUNE



Meisselbach—Quadruple Multiplying

Hard rubber and nickel silver of best quality. Steel pointed pivot axles; adjustable bronze bearings.

To take apart release button, turn rubber side plate to the left.

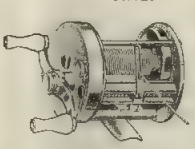
To operate throw-off mechanism, hold reel in left hand. To disengage handle from spool, depress button which is located on front plate. To engage the crank handle with the spool, take hold of crank handle at its center on the side, and slide the handle towards the center of the reel.

Adjustable automatic drag.

NO.	Capacity	Weight Each	EACH
40	200 yds. No. 9	11 oz.	$22.00

Packed one in a box.

INDIAN CHIEF

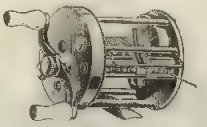


Heddon—Level Winding

Entire frame of Duraluminum. Reversing screw is of phosphor bronze to prevent rust. Line carriage is of special alloy, to insure good service. Bushings are of nickel silver alloy. Double crank handle. Line capacity is 100 yards of 15 lb test hard braid waterproof line. Spool has square shoulders, flanges of duraluminum with tempered steel shaft, running on nickel silver bearings. Length 1⅞ in., diameter 1⅛ in., weight of reel 7⅜ oz.

NO.	EACH
3-Heddon	$8.50

Packed one in individual box.



Level Wind—Anti-back Lash

This reel is the same as the No. 3 described above, except that it has the standard positive and reliable anti-back lash device. This anti-back lash device can be quickly adjusted to the bait of the user, so that the spool will cease revolving the moment the bait strikes the water.

NO.	EACH
3AB	$10.50

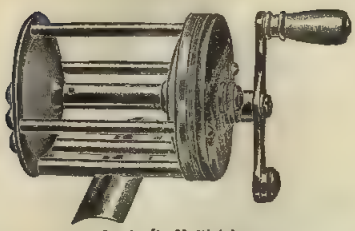
Waltonian—Casting

A complete, new, different design and operating principle. Spool of Duraluminum; frame of nickel silver; gears and bearings of hardened steel. Thin spool avoids snarls. Capacity 100 yards; weight 7 oz.

NO.	EACH
W-Waltonian	$15.00

FISHING REELS J

PFLUEGER—REGAL



Quadruple Multiplying

Satin nickel plated, wide pattern spool, length of pillar 1⅞-in., fancy turned white bone handle, discs finely milled, steel pivots and pinion, adjustable front sliding drag and back sliding click, bushings with oil cups on back and front plate, Kentucky pattern cross plate.

NO.	Capacity	Pillar	Disc	EACH
1660	60 yd.	1⅞ in.	2	$3.00

Jeweled bearings, satin finish.

NO.	Capacity	Pillar	Disc	EACH
1660J	60 yd.	1⅞ in.	2	$4.00

Packed one in a box.

TRI-PART AND TAK-A-PART

Meisselbach—Quadruple Multiplying

The reel frame and reel seat are drawn from one piece of metal, without solder, joint or rivet, finely finished and nickeled, spool made of nickel silver, bearings are steel and bronze, ground to perfect fit, highly polished, very smooth running and noiseless, adjusting cap with friction device preventing back lashing. This reel can be taken apart instantly without the aid of tools by unscrewing the ring head of plate.

Tri-Part

No.	Capacity	Weight	Lgth. Pillar	Disc	EACH
580	80 yd.	6¼ oz.	1⅝ in.	1⅞ in.	$6.00

Tak-a-Part

No.	Capacity	Weight	Lgth. Pillar	Disc	EACH
480	100 yd.	7¼ oz.	1⅝ in.	1⅞ in.	$7.00

Same style and design as No. 580, but has free spool, making an exceptionally good casting reel.

ARTIFICIAL BAIT

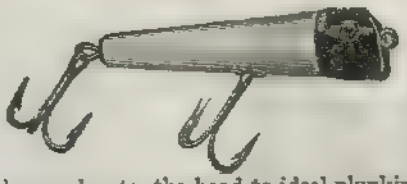
SOUTH BEND PLUNK ORENO



Select red cedar body, water-proof enamel finish. Equipped with two extra strong nickel plated treble hooks, the tail hook being slightly larger elevates the head to ideal plunking position. When cast it will float then by slight jerks with rod tip or by succession of sharp quick turns of reel handle, pausing between each turn. With a diving motion just under the surface, it riffles the water and sings out ker-plunk. Length over all 3¾ inches.

Per Doz

No. 929RH—Red head and white body $22 50
No. 929S F—Rainbow color 22 50
No. 929YP—Yellow perch scale fish 22 50

One in box, one doz in cardboard display box; wt per doz 1½ lbs.

WOODEN MINNOWS

SOUTH BEND TYPE 999

Select red cedar body, water-proof enamel finish. Equipped with two nickel plated extra strong treble hooks. The tail hook is slightly larger, elevating the head to correct position. Slender in shape, carefully balanced so that series of twitches gives it irregular action, diving, darting, lazily floating, then nosing slightly out of water, giving the appearance of a minnow that has unsuccessfully met an attack of so voracious game fish. Length over all 4 inches.

Per Doz

No. 999RH—Red head and white body $22 50
No. 999G CB—Green cracked back with light belly 22 50
No. 999Y P—Yellow perch, scale fish 22 50

One in box, one doz in cardboard display box; wt per doz 1½ lbs.

SOUTH BEND, CRIPPLED MINNOW

Select red, cedar body, water-proof enamel finish. Equipped with two nickel plated treble hooks and loose spinners that makes a buzzing noise when lure is retrieved. It will drive any drowsy or up and at'em he game fish to action, the way it acts brings on that mad rush then the strike. It appears to be injured or crippled with most of its strength spent, or lying on its side with just a little life like motion, making the big fish mad. Length over all 3¼ inches.

Per Doz

No. 965RB—Rainbow color with blue back $22 50
No. 965S F—Scale fish green 22 50
No. 965S$—Silver speckled white body, brown blending around eyes and down the back 22 50

One in box, half doz in cardboard display box; wt per doz 1½ lbs.

BABY DIMPLES and DOLLY ROSEBUD

1930 Edition of Baby Dimples and Dolly Rosebud

More news about successful Baby Dimples and Dolly Rosebud! The dolls so popular they have made their own unsurpassable reputation. So profitable that they are responsible for continued reordering.

1930 finds a startling new and entirely different edition of these quick selling dolls. Radical changes have been made in the construction of body. New expressions have been given to their faces. Different costumes have been designed adding an up-to-date wardrobe.

Again Horsman have produced dolls unequalled in value, cashing in on the names of former successes and giving them new and added sales vitality.

National advertising of the new Horsman lines will make Baby Dimples and Dolly Rosebud wanted more than ever from coast to coast.

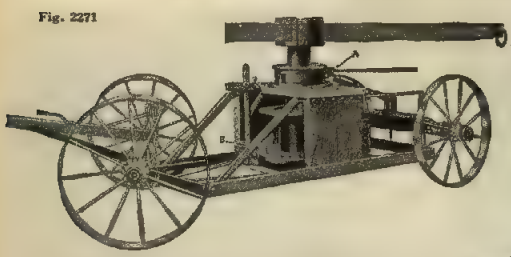
Fig. 2271 House Movers Portable Capstan

Fig. 2271



The cable is wound on the drum until the object moved is drawn close to the capstan. The capstan is then raised onto the portable gear and moved to a distance of 700 or 800 feet and again staked down. The front wheels and tongue are used as a stake puller and one man can do all the work.

The two ratchet bars pass through the rear axle and support rear end of capstan bed. Pulling out the hand lever releases the ratchet bars and deposits the capstan on the ground. The bed is raised again by a crow bar.

The Drum is steel 12 in. dia. and will hold 800 ft. of ⅝ or 600 ft. of ¾ inch cable. The only wearing part is the pin at the bottom of the spool which is easily replaced when worn out.

Price with 32″x3″ steel truck wheels and capstan sweep. **$300.00**

Fig. 2272 Rope Capstan

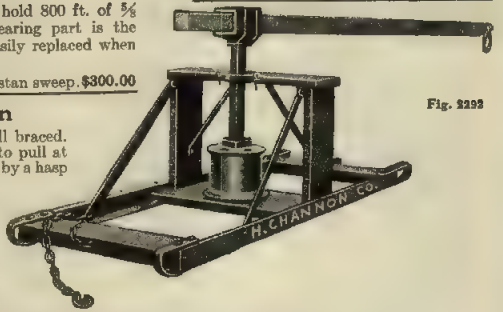


Fig. 2272

The frame is made of steel angles well braced. Shoes and chains are arranged for a horse to pull at either end in resetting. The spool is released by a hasp for placing cable on the drum driving shaft is 2½ inches square steel with a heavy cast head for sweep. The drum is 10 inches in diameter, cast iron, and the lower bearing is 3 inches in diameter, 2 inches long. This is not the crude affair usually made by a country blacksmith, but is strickly up to date in every respect.

Price each **$110.00**

House Moving Trucks

These house moving trucks are all equipped with disc wheels, 24 inches diameter. 12 inch tire and with hubs or 3 inch axles.

Fig. 2273

Fig. 2274

Fig. 2273. Steel Giant Truck. Has ball and socket plate top-header and a fifth wheel jaw which allows full oscillation of front axle. They are very efficient for three point loading method and can be used on four point load if desired. Price each, **$260.00**

Fig. 2274. Little Wonder Four Wheel Truck. A fine truck for average work. The main bolster is of wood, 8″x12″x3′2″ and the truck is equipped with ball and socket plate top-header. Price each, **$240.00**

Fig. 2275. Little Wonder Jr. 2 wheel truck, is designed for small buildings and light work. Made especially for four point loading but can be used on three point by using a little wonder four wheel truck for the point of the load and two wheel trucks for the rear.

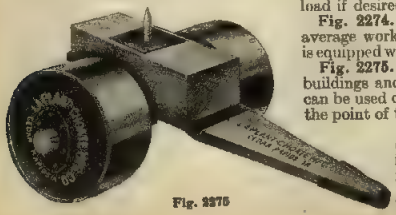

Fig. 2275

The bolster for main frame is 8″x12″x30″ white oak. It can be converted into a four wheel truck by adding the front wheels with axle and bolster used for the little wonder four wheel truck. Price each, **$140.00.**

Steel Truss Bolster for front truck, three point low loading. Price, **$75.00.**

HUBLEY

CAST IRON TOYS THAT SELL

RIDE THE TIDAL WAVE OF PROFITS *with* THESE NEW HUBLEY ACTION TOYS

HUBLEY "Exclusive Right" Toy No. 22 as shown above is 8 inches in height and 8 inches long. The figure is attractively proportioned and the pose is true to life. Snappy coloring and its action feature insure that it will catch the eye.

HUBLEY "Exclusive Right" Toy No. 23, shown at the right, has the same action as the toy above. The suit is the standard type used by life guards. The figure, naturally posed, is neatly modeled. The height is 8 inches and the length 8 inches.

The combination of two famous names, Jantzen and Hubley, will enable you to get ample return from the featuring of these two toys.

TWO new HUBLEY "Exclusive Right" Toys with immense sales and profit possibilities are now ready for you. The Jantzen Surf Girl — No. 22 — and the Jantzen Beach Patrol — No. 23. These two new toys are full of action and smart color and they have all the eye appeal necessary to produce business.

When pulled along, the eccentric front wheel makes the surf board, or aquaplane, on which the figures are mounted, bob up and down just as if it were riding the waves. The figures are wearing Jantzen bathing suits which carry the famous Jantzen emblem. The imitation water base surrounding the surf boards is realistically colored. Each figure is nicely modeled. In every respect these two new toys possess the features that produce sales — and HUBLEY alone is privileged to make them. Both designs have full patent protection.

TO HELP YOU

sell these two new HUBLEY "Exclusive Right" Toys we are taking space in

JUNIOR HOME
AND
CHILD LIFE

the two leading juvenile publications.

In this space we will illustrate No. 22 and describe both toys. We will ask the public to ask for these toys by name. Our advice to you is to be ready for business.

They're Different

Look for the HUBLEY page in this magazine next month. It will be in color, and another new and interesting toy will be presented. In the meantime, get in touch with your jobber.

ANOTHER SURPRISE FOR 1930

Plenty of Color and Action in This New One

Everyone who has seen Hustling Hand Car 415 predicts a great success for it.

HUSTLING HAND CAR 415

Beautiful colors and plenty of action will make this Bell Toy an outstanding feature for the coming year.

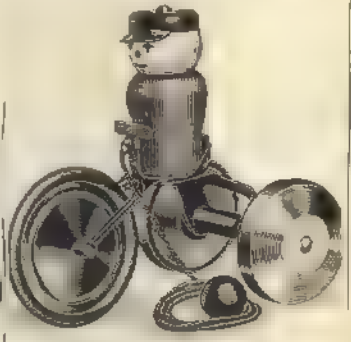
Correct Packing Methods Important

The Gong Bell Mfg. Company consider it just as important to pack their merchandise well as to make it well.

Each item, wherever possible, is packed in an individual colored display box which many customers use for counter and window trim. These boxes must arrive at the customer's store fresh and clean. For this reason The Gong Bell Mfg. Company use strong, clean, corrugated cartons.

Customers Look to Gong Bell Line for Something New

Here is a new number, a funny little fellow on his tricycle, which will bring your sales up and make a name for itself. Every child who has ever had a Kiddy Car or the like will insist upon having a Tricycle Ike Bell Toy and it will cost only fifty cents retail.



TRICYCLE IKE 450

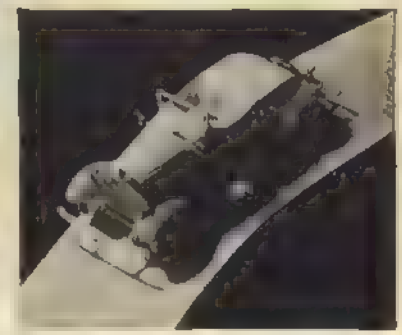
We will appreciate your courtesy in mentioning PLAYTHINGS.



RATHER TOUGH on JUNIOR

. . . . . but great stuff for the toy business!

YOU know most Dads are only a few years removed from the "dirty knees" age, if they would only admit the truth. But whether they admit it or not, their toy purchases prove it...and that's what interests you...and us.

KILGORE designers recognize that irrepressible urge among parents to "show the children how it runs." That's why you'll find so many interesting playthings in the line. And KILGORE Toys are as inexpensive as they are durable and colorful, because we realize that Dads and Mothers want to buy them often. There are scores of toys for girls and boys to retail at 10c, 25c, 50c and $1.00 and there are many interesting sets at 50c and $1.00. Ask your jobber about KILGORE Toys... or send direct for literature.

Here's the T. A. T. Plane, an exact replica. Up in the corner you see the Roadster, a handsome toy. Both retail for $1.00 ..both are remarkable values. And how they are selling!

THE KILGORE MFG. COMPANY

Counting Machines

Model "A" Redington Counter

Recommended for punch presses, screw machines, packing machines, etc., and for general use. Arrangement of flanges at back and bottom simplifies installation on any machine. Operated by movement of ratchet lever through an arc of about 45°. Operates at any speed up to 400 per minute. Easily set back to zero. A very durable and reliable counter—constructed entirely of steel.

Weight boxed for shipment, 23 oz.

Size, inches 3¼x2½x2⅛

Model A. Price, each $6.25

Model "L" Redington Counter

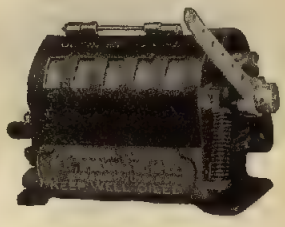
Same durable counter as the Model "A" but equipped with lock and two keys. As on the Model "A" figures are easily read because of contrast with black body of counting machine. Intended for plants operating on a piece work basis or under other conditions making necessary a counting machine which cannot be tampered with by unauthorized persons. Windows are celluloid.

Weight boxed for shipment, 23 oz.

Size, inches 3¼x2½x2⅛

Model L. Price, each $7.25

No. 1 American Counter



A large rugged counting machine constructed entirely of cast and malleable iron and steel parts. Recommended for use on the largest and heaviest presses, shears, can machines, and heavy duty operation in general. Easily installed through flanges on back and bottom. Figures are easily read, being ½ inch in height. Speeds up to 175 per minute. Readily reset to zero.

Weight boxed for shipment, 4½ lbs.

Size, inches 6x3½x3

No. 1 American. Price, each $8.25

No. 2 American Counter

Same large, durable easily read counter as the No. 1 but also has lock and two keys and glass window. Used in plants operating on a piece work basis or under other conditions making necessary a counting machine which cannot be tampered with by unauthorized persons. Like the No. 1 it is operated by the movement of the ratchet lever through an arc of about 45°.

Weight boxed for shipment, 4½ lbs.

Size, inches 6x3½x3

No. 2 American. Price, each $9.75

Standard Model A Geared Counter

Size 2½x4 in. Registers 100,000 Standard construction—only thirteen working parts. Tested to run 20,000 per hour. Quickly reset.

Steel Shaft, Steel Dogs, Steel Ratchet, cannot skip or repeat.

With Padlock	8.50
With handle on left	8.50

Veeder Set-Back Counters

With from Three to Ten Figure Wheels reset to zero by turning knob.

Revolution Counter

Registers one for each revolution which records an operation of a machine.

Rotary Ratchet Counter

Counts reciprocating movements of the lever, which correspond to the operations of the machine.

Prices with Four Figure Wheels

Revolution Counter. Price, each	$11.50
Ratchet Counter. Price, each	10.00
With Lock and Key to prevent tampering, extra	2.00

No. P3 Veeder Revolution Counters

This counter has five figures and flange case, also projecting shaft on the left. Adds one for every complete revolution of the shaft forward and subtracts one for each complete backward revolution.

Contains no springs. First ring is operated by a positive mechanism which starts it in motion slowly; gradually accelerating, and then again gradually bringing it to a stop.

In this type of counter a pivoted link is used instead of a sliding movement, thereby avoiding friction and wear.

Shown one-half size.

No. P3. Price, each . . . $2.25

No. Z13 Veeder Reset Ratchet Counters

This counter indicates one for each oscillation of the lever, which moves through an angle of 45 degrees. It can be reset to zero by one turn of the knob.

The counter can be furnished with the drive shaft projecting either on the right or left hand side as may be desired and with three, four or five figure wheels.

This counter is regularly equipped with a spring to return the lever to its operating position; but can be omitted if so desired. This counter should never be oiled.

No. Z13. Price, each . . . $6.00

No. Z13K, equipped with Pin Tumbler Lock and Two Keys. Price, each . . . $8.00

No. 21 Veeder Speed Counters

No. 21 records R.P.M. of engines, motors, etc.

Tip is held against center of shaft or flywheel. Pressure is applied to start; released to stop. Clutch works instantly.

No. 21, with 2 Rubber Tips. Price, each . . . $3.60

Veeder Set-Back Hand Tallys

Can be quickly set to zero by one turn of the knob. The case is small and has been designed with rounded corners so as not to irritate the hand, nor wear the pockets. Finger ring has been located so it can be held in either hand.

Price, each . . . $5.00

Ingersoll Free Showcase Deal

The showcase is given free with an order for twenty-four clocks, assorted. Your choice of styles selected from this page. The showcase is made of metal in rich mahogany finish and holds five clocks. It offers a very handsome display when placed on top of your showcase, and will be a silent salesman for you for this line. It is not a cheap claptrap box, but a "real" nicely finished display case.

PLANES

STANLEY-GAGE

SELF-SETTING

The relation of the edge of the steel cap to the edge of the iron is automatically adjusted when setting the plane for coarse or fine work. After the plane iron and cap are once set they can be removed and replaced in exactly the same position. The steel cap on the lever can be adjusted to the cutting iron to make either a single or double iron as desired for fine or rough work. The cutter is held so rigidly that it will not chatter. The frog is fitted to the plane and then permanently attached so that a continuous cutter seat is obtained to the plane mouth. The handles and knobs are made of rosewood

No. 131. Length, 8 inches; cutter, 1⅝ ins Wt. ea., 1¾ lbs.....Each $3 00

SCRUB PLANES

STANLEY

User can quickly plane down to a rough dimension any board that is too wide to conveniently rip with a hand saw, an operation that is sometimes called "hogging." This is made possible by reason of the peculiar shape of the extra heavy cutter, the cutting edge of which is rounded instead of square. Handles and knobs of beech.

No. 40. Length, 9½ inches; 1¼ inch cutter; japanned. Wt. each, 2⅛ lbs. .....Each $2 65

CIRCULAR PLANES

STANLEY

Has flexible steel face which can be accurately adjusted for planing the inside or outside of circles. The cutter is adjustable endwise and sidewise. The face is fastened at its center to the plane body, and adjusted at the end by means of a screw and levers. A valuable feature is the graduated scale for setting the face.

No. 113. Japanned; length, 10 inches; cutter, 1¾ inches. Wt. each, 3¾ lbs ....Each $8 85

All above, one in a box.

RABBET AND BLOCK PLANES

STANLEY

Detachable Side.

Easily changed from a block plane to a rabbet plane, or vice versa; cutter is adjustable endwise and set on a skew. Nickel plated trimmings, rosewood knob.

No. 140. Length, 7 inches; cutter, 1¾ ins. Wt. ea., 1⅝ lbs.....Each $3 20

BULL NOSE RABBET PLANES

STANLEY

Very useful for working close up into corners or other difficult places. Adjustable throat

No. 75. Length, 4 inches; cutter, 1 inch; japanned trimmings. Wt. each, ⅝ lb. .....Each $0 90

IMPROVED RABBET PLANES

STANLEY

Iron Stock, Japanned.

Will lie perfectly flat on either side and can be used with right or left hand equally well while planing into corners or up against perpendicular surfaces; fitted with spur which permits working across the grain. Detachable Depth Gauge

No. 192. Length, 8 inches; cutter, 1 inch. Wt. each, 2 lbs.....Each $3 10

All above, one in a box.

BICYCLES

IVER JOHNSON

The Iver Johnson bicycle is built to give extra long, unfaltering service, under any and all conditions, with no trouble or annoyance of broken parts due to poor materials or faulty construction. It is built to give lasting riding satisfaction.

Models 87M and 18M.

Model 87K.

Models 87H, 18H and 16H.

MOBICYCLE. MODEL 87M

Latest design; finds great favor with youngsters who do not object to little additional weight to get a bicycle built along motorcycle lines, with features similar to the power driven machine.

Frame—Mobicycle; oxidized silver name plate; height, 18 or 20 inches at seat post; color, blue with white head, full nickel crown, wheels, 28 inches with steel rims, striped; tires, Fisk cord 1½ inches; coaster brake, Morrow, gear, 73 (26 and 10); chain, roller, 3/16 inch, 1 inch pitch; cranks, 7 inches; pedals, rubber; handle bar, No. 82 with forward extension, long bulldog grips; saddle, Motobike, No 43; fork, detachable truss, full nickel; stand, rolled steel, motorcycle type.

No. 87M-18. Wt. each, crated, 72 lbs. ..... Each **$60 00**

No. 87M-20. Wt. each, crated, 75 lbs. ..... Each **$60 00**

Note—In ordering No. 87M be sure to specify whether 18 or 20 inch size is wanted.

MOBICYCLE. MODEL 87K.

Same bicycle as Model 87M but equipped with rear carrier, horn, electric light and tank for holding two No. 6 dry cells.

No. 87K. Wt. ea. crated 78 lbs. ..... Each **$65 00**

Specify whether 18 or 20 inch.

MOBICYCLE. JUVENILE MODEL 18M

Exactly the same construction as Model 87M, with some changes in dimensions. Frame, Mobicycle: Oxidized silver name plate; height 16 inches at seat post; color, blue with white head; full nickel crown; wheels 26 inches with steel rims, striped; Fisk cord tires, 1½ inches; Morrow coaster brake; gear, 64 (22 and 9); chain, roller 3/16 inch, 1 inch pitch; cranks 5½ inches; pedals, juvenile rubber; handle bar No. 82 with forward extension; long bull dog grips; Scout saddle No. 51, with tilting clamp, fork, detachable truss, full nickel; rolled steel stand, motorcycle type.

No. 18M. Wt. ea. crated 55 lbs. ..... Each **$50 00**

DROP BAR ROADSTER. MODEL 87H

The upper tube is dropped 2 inches at the saddle post, thus making this full size bicycle available for the rider who otherwise would be unable to reach the pedals of a regular straight frame. Just the model for persons of short stature, as well as those desiring a rakish looking bicycle. Frame, drop bar; oxidized silver name plate, height, 18 inches at seat post; color, blue with white head, full nickel crown; wheels, 28 inches with steel rims, striped; tires, Fisk cord, 1½ inches, coaster brake, Morrow; gear, 73 (26 and 10); chain, roller 3/16 inch, 1 inch pitch, cranks, 7 inches; pedals, rubber; handle bar, No 62, 22 inches with forward extension; saddle, Motobike No. 43 Rolled steel stand, motorcycle type.

No. 87H. Wt. each, crated, 70 lbs. ..... Each **$50 00**

BOY SCOUT. MODEL 18H

This is a man's bicycle in every way, but of somewhat reduced size to accommodate boys not quite large enough to reach the pedals of regular ones, the upper tube is dropped in a graceful curve at the saddle post without shortening the head, which gives it snappy lines, the growing boy can ride it without the appearance of having outgrown his bicycle. Frame, drop bar; oxidized silver name plate; height, 16 inches at seat post; color, blue with white head, full nickel crown, wheels, 26 inches with steel rims striped, tires, Fisk juvenile; coaster brake, Morrow; gear, 64 (22 and 9), chain, roller 3/16 inch, 1 inch pitch; cranks 5½ inches; pedals, Juvenile rubber; handle bar, No 62, 18 inches with direct stem; saddle, Scout No. 46. Rolled steel stand, motorcycle type.

No. 18H. Wt. each crated, 50 lbs. ..... Each **$45 00**

BOY SCOUT JUNIOR. MODEL 16H

A distinctive Juvenile model, constructed in such a manner that the small child can readily reach the pedals, and yet be able to use the same size of frame as larger or older children. The top bar is dropped two inches at the saddle post, and by raising or lowering the saddle it will readily adapt itself to varying ages, and not soon be outgrown. This model is just the bicycle for the small child, as it will withstand hard knocks and rough and tumble usage, and continue to give good service as long as ridden. It is the most economical to buy, as it will outwear several others of cheaper construction Frame, drop bar; oxidized silver name plate; height 14 inches at seat post; color, blue with white head, full nickel crown; wheels, 24 inches with steel rims, striped, tires, Fisk Juvenile; coaster brake, Morrow; gear, 59 (22 and 9); chain, roller 3/16 inch, 1 inch pitch; cranks, 5½ inches; pedals, Juvenile rubber; handle bar, No. 62, 18 inches, with direct stem; saddle, Kiddo Scout, No. 48. Rolled steel stand, motorcycle type.

No. 16H. Wt. each, crated, 50 lbs. ..... Each **$40 00**

BICYCLES

IVER JOHNSON

These bicycles have double loop frames with oxidized silver name plates color is maroon with green head and full nickeled crown; Morrow coaster brakes; 3/16 inch roller chains, 1 inch pitch.

LADIES' ROADSTER. MODEL 87L

Height, 20 inches; wheels 28 inches with steel rims, striped, Fisk cord tires 1½ inch; gear, 68 (22 and 9); cranks, 6½ inches; rubber pedals; No 92 handle bar with direct stem, No. 50 Diana saddle; rolled steel stand, motorcycle type.

Model 87L. Wt. each, crated, 72 lbs. ..... **Each $55 00**

CAMP FIRE GIRLS'. MODEL 18L

The same high quality and finish as the regular adults ladies models only built on smaller lines to accommodate juvenile riders; the saddle post tubing is shortened while still retaining the long head making a smarter looking bicycle, and at the same time allows the growing girl to ride it several seasons without the appearance of having outgrown it Height, 16 inches; wheels, 26 inches, with steel rims, striped, Fisk juvenile tires; gear, 64 (22 and 9); cranks, 5½ inches; juvenile rubber pedals; No. 62, 18-inch handle bar with direct stem; No. 49 Princess saddle; rolled steel stand, motorcycle type.

Model 18L. Wt. each, crated, 50 lbs. ..... **Each $45 00**

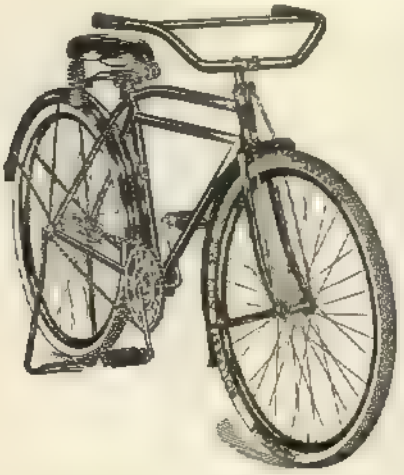
CAMP FIRE GIRLS' JUNIOR. MODEL 16L

Same as Model 18L only smaller, of the same high class quality and finish as the full sized ladies' models. The frame is constructed with the saddle post tubing two inches lower than ordinarily used, and still retaining the long head. This makes a more classy looking bicycle, and one which allows a wide range of saddle adjustments to varying ages. Thus a growing child is still able to use the same machine by simply raising the saddle, without the appearance of having outgrown it. Height, 14 inches; wheels, 24 inches with steel rims, striped, Fisk Juvenile tires, Morrow coaster brake; gear 59 (22 and 9), cranks 5½ inches; Juvenile rubber pedals; No 62, 18 inch handle bar with direct stem; No. 48 Kiddo Scout saddle; rolled steel stand, motorcycle type.

Model 16L. Wt. each, crated, 50 lbs. ..... **Each $40 00**

BICYCLES

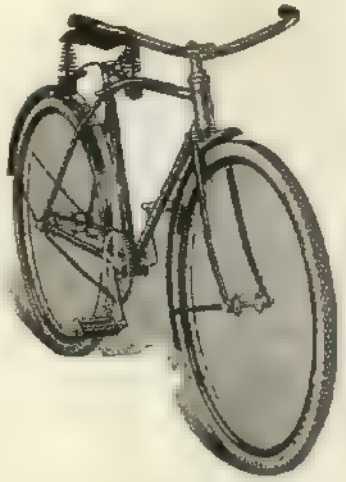
PEERLESS



Motobike Model

Motorcycle style double bar 20 inch frame dropped to 18 inches at the seat; enameled blue with gray head; fork reinforced with double truss rods reaching from the steering head to front axle; 28 inch wheels with steel rims; one-piece drop forged hanger; rubber pedals; Morrow coaster brake; motobike padded saddle; braced handle bars with rubber grips; rear stand, non-skid single tube tires.

No. 854. Ship. wt. 56 lbs. ..... **Each $45 00**



Boys' Juvenile.

Single bar 18 inch frame dropped to 16 inches at seat; enameled blue with gray head; 26 inch wheels with steel rims; one-piece drop forged hanger; rubber pedals; Morrow coaster brake; motobike type padded saddle; juvenile type handle bars with forward extension and rubber grips; rear stand; non-skid single tube tires.

Duplex Convertible Diaphragm Pump

Gasoline Engine Driven Trench Pumps

Single and Duplex Diaphragm Type

They give the contractor a self-oiling anti-splash open diaphragm pump and a lift and force pump—at the cost of one pump. They are particularly handy on work where water must occasionally be carried through a hose to some distance, or to a moderate height above the pump.

Single Pumps on Two Steel Wheels

Model	Size Suction	Engine	Gallons Per Hour	Suction Lift	Total Head Feet	Weight	List Price
4YG	4 inch	2½ H P. F. & J Enclosed Type	10000 12000	25	30	930	$397.50

4YYK	4 inch	6 H.P. 2 Cyl. Leroi	18000–20000	25	40	1770	825.00

Single and Duplex Plunger Trench Pumps

For combining large capacity, high suction lift and high head with the ability to stand up under long periods of continuous pumping without need for replacement of parts or repairs, plunger trench pumps are ideal. Sand or mud won't clog them—plunger will not wear out in years of service—no diaphragms to replace.

Outside packed plungers simplify maintenance. Any standard packing can be used in the glands. Grease cups hold a week's supply of lubricant. A patented agitator plate keeps sediment moving toward the outlet. As much as five cubic yards of sand, mud and stone have been pumped through the duplex plunger pump in one hour—without clogging or undue wear upon the plungers.

The large ball valves used are especially well adapted to pumping water containing a large amount of solids. Flap valves can be furnished if specified, for special installations. Note the quick opening valve covers giving easy access to the valve and valve chamber.

Bronze shell bearings, heavily shimmed, replaceable as well as adjustable, protected from dust and grit, add life and dependability to these pumps.

The drop frame used on these pumps puts the suction valve a foot nearer water level—adding a foot to the lift. Low center of gravity increases portability. Plungers are completely protected from dust and weather by the close fitting housing as shown in the cut at the top of preceding page.

These plunger trench pumps are built in four inch angle and duplex models. Single units can be had mounted either on a trailer truck with roller bearing wheels, or on the low slung four wheel truck. Duplex units are mounted on four wheel truck only.

These pumps are driven through gears made like an automobile transmission. Gears are cut from forged blanks and run in an oil bath inside an oil-tight dust-proof case. Experience on hundreds of actual jobs has demonstrated the remarkable durability of this type of power transmission.

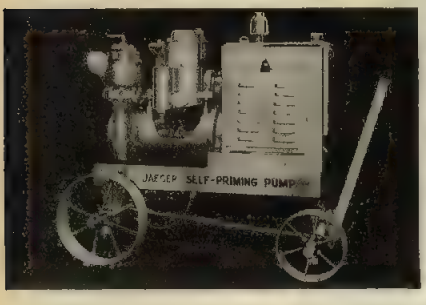
Self Priming Centrifugal Portable Pumping Outfit



The self-primers are the result of careful investigation into actual field conditions and pumping costs. They are thoroughly engineered and their design has been proved by actual service under the most adverse conditions. They eliminate at once foot valves and the nuisance of priming. The exclusive self-priming unit that accomplishes these things gives the additional advantage of greater capacity and higher suction lift. This simple vacuum pump keeps the air exhausted from the suction hose and a solid column of water rising to the centrifugal impeller. It maintains a continuous high vacuum automatically and makes possible a suction lift of 27 feet—5 to 10 feet more than the lift of ordinary centrifugals.

Self-priming centrifugals are replacing pumps of other types because they move bigger volumes of water at lower cost, because they handle large volumes of solids without clogging, because of their simple self-priming mechanism. They have the extreme high lift of 27 feet and can be used with profit on almost any class of dewatering work a contractor has to deal with, including operating well point pumping systems.

The vacuum pump has only one moving part—and that runs in an oil bath. Pumps air only—impossible for water to reach it. Works whenever the suction hose is water sealed at the intake—cuts out when the centrifugal pump is primed. Keeps a solid water column rising to the impeller, automatically removing air which may leak into suction line.

These direct connected centrifugal pumps are recommended for drainage work of all kinds. They are especially suited to the contractors requirements.

The special open type impeder will handle mud, sand, grit, small stones and other materials which will pass through a Standard Suction Strainer. Certain sizes are also suitable for supplying water to gravel washing plants and for irrigation work.

The heads of the pumps are accurately turned and bored to insure perfect alignment and correct clearances. Stuffing boxes are of liberal size, bored to receive the packing and glands, and are fitted with replacable bronze bushings of generous size. The method of mounting the pump and engine insures perfect alignment between engine and pump shafts, the pump being mounted on an intermediate casting bolted solidly to the engine flywheel housing.

Special cradle blocks carry the weight of the pump shell and suction pipe, or hose. In addition to this special mounting a flexible shaft coupling is provided between engine and pump shafts, as an extra safety factor to prevent strain from weight of suction pipe, or hose, being transmitted to engine.

Packed loose.

WADE IN

I. C. tin, oval shape top and bottom, flare in top; two ⅜ inch loops on each side for fastening shoulder straps; cup shape cover fits snugly into bucket; 9 gauge steel wire lift pin securely soldered across cover to aid in removing it from bucket; finished in green japan with gold lettering and stripes. Per Doz

No. D1—Capacity 2 qts; size bottom 6x3¾ ins; size top 5x3 ins; height over all 8 ins. $18 90

Packed loose; wt per doz 9 lbs.

JONES AQUARIUM

(No. 300).

Galvanized outer receptacle, with galvanized wire inset; heavy coppered wire bail with black enamel wood grip. Finished in green and gold, with uniquely designed transfer ornament. The inset is provided with an oval air chamber, fitted with a valve to receive an ordinary bicycle pump, by means of which compressed air is supplied to the chamber. Leading downward from the air chamber to the bottom of the inset, is a fine outlet tube which ejects a current of air at the bottom, which will run from four to six hours without filling. Per Doz

No. D200—Without lid on outer receptacle; capacity 8 qts; length 15 ins; width 6i ns; height 8 ins; wt per doz 66 lbs $135 00

No. D300—With perforated lid on outer receptacle; capacity 12 qts; length 15 ins; width 10 ins; height 6 ins; wt per doz 84 lbs 144 00

Packed loose.

Air Fed.

Dark green lacquered finish, heavy gauge rust resisting galvanized iron tank and air chamber, fitted with standard Schrader Automatic Air Valve that supplies oxygen to the water.

The flow of oxygen through the water is controlled by a specially designed brass needle valve. The air is pumped into air chamber which will hold up to 25 lb pressure, sufficient to keep minnows alive 24 hours provided air control valve is properly adjusted.

Designed for transporting live fish, for use by hatcheries, fishing clubs, etc.

Capacity 2 gallons, height 11½ inches; diameter 9⅛ inches. Per Doz

No. D375—Full floating, with pump attached to side of bucket $109 20

No. D350—Non-floating, without pump; automobile or bicycle pump can be used for filling air chamber 92 40

Third doz in carton; wt per doz 66 lbs.

Start your letter right: "I saw your ad in PLAYTHINGS"

ANNOUNCING

THE ROLMONICA CHROMATIC

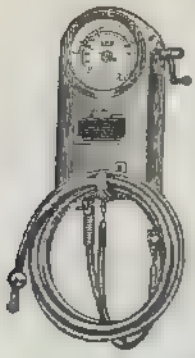
The Rolmonica is a harmonica built on the player-piano principle . . . playing with music rolls available in a wide selection of popular airs, kept constantly up to date by monthly issues of the latest Broadway hits. The Rolmonica Chromatic (as distinguished from the Standard Rolmonica 12-Note Instrument) renders beautifully the various selections with diminishing chords in both major and minor keys . . . in a truly professional manner. Anybody can play it, young or old.

Liberal discount to jobbers and dealers. A nice profit for both. Rolmonica is nationally advertised and has a universal appeal. ORDER ROLMONICA AND ROLLS TODAY . . . Profits inevitably follow.

THE ROLMONICA MUSIC CO. 501 E. PRESTON STREET
BALTIMORE, MD.

AUTOMATIC AIR STATIONS

ECO



Bright red enamel cast iron case. Equipped with automatic bell signal tire inflator, air cleaner, hook operated shut off valve and 25 feet of high grade red rubber air hose. Back cover hinged so that case may be opened for inspection or adjusting. Hook projects 12 inches from wall.

Each

AIR COMPRESSORS

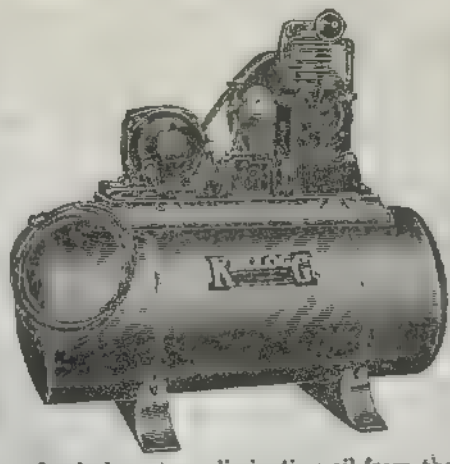
KELLOGG, TWO STAGE HEAVY DUTY, Stationary.



Copper intercooler enclosed in aluminum housing which confines the draft created by the fan blades. The air is delivered to the high pressure cylinder at a low temperature making a very efficient two stage compressor. Ball bearing construction insures a greatly increased efficiency and more air per horse power. Constant level lubrication, combined pump, and splash system eliminating oil from the air prolonging the life of compressor. Oil gauge in plain sight shows the amount of oil always in reservoir of pump. Vanadium steel disc valves positive in action increasing the compressor efficiency. Equipped with combined air filter and starting retort which insures dry air in storage tank providing easy starting of motor. Automatic self adjusting idler pulley keeps the proper tension on belt at all times. Complete with all equipment.

¾ H. P. 32 Gallon Tank. Displacement 4 cu. ft. 325 R. P. M.

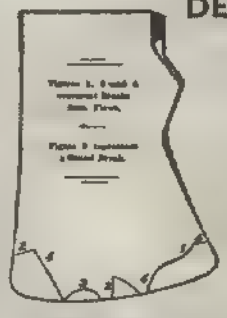
OUR AXE HANDLING DEPARTMENT

Our Axe Handling Department, by years of experience, has reduced the handling of Axes to a science. Not only is each handle correctly gauged but it is driven and wedged with such accuracy as to insure a correct setting of the axe and to prevent its becoming loose on the handle.

All our handled axes are packed one dozen assorted weights in a crate. The heads are enclosed in a strong wood box and are held firmly and securely in place in such a manner as to prevent rubbing and scratching the finish. The handles are entirely covered with a strong cotton sack made especially for this purpose and tied securely, protecting them from dust, dirt and damage in shipping and storage. (See illustration.)



DEFECTIVE AXES

Necessarily the cutting edge of an axe must be high carbon and high temper and for this reason a good axe is more likely to break than a poor one, as soft steel or steel in which the temper has been drawn by heating on a stone will bend before it will break.

Breaks from Flaws are known by being angular in form. **Sound Breaks**, which show no fault in manufacture, are always circular in form.

Axes (except) (**Steel King, Keystone, Mohawk and Cyclone**) are guaranteed against breaks from flaws shown in Figures 1, 2 and 4, but not against sound breaks shown in Figure 3.

These Mechanical KENTONTOYS Are Just What Boys Want

No getting around it . . . boys nowadays want toys that work like large, mechanical units. Yet, these toys must not be expensive, for a youngster's pocketbook is small at best.

That accounts for the increasing sales of these new Kentontoys. The Buckeye Ditcher, the Jaeger Concrete Mixer and the Vertical and Horizontal Engines are reasonably priced even though they do have a multitude of working parts.

There's a new Kentontoy catalog just off the press that we would like to send you . it shows these cast iron toys in their new, flashy colors—and gives complete specifications. Write for it

KENTON TOYS

Greater Profits Are Speeding in Your Direction

Here is a KENTONTOY train that is so real you can almost hear it "choo-chooing" down the track. The box in which it is contained gives the necessary touch of realism which strikes the fancy of all the boys that see it . . . and they buy *quickly*.

Merchants like this new display idea which is given at no additional cost and are showing these boxed trains in their windows with wonderful results. If you want to see a bunch of little noses (and big ones, too) pressed against your store window, just try a display for yourself and you will be surprised how your profits will begin to make your cash register ring.

Our new catalog describes the new Kenton trains and all of the other KENTONTOYS recently introduced . . . write for it today . . . your copy will be sent at once.
